**Successful Applicants –
 2012 Community Grants for safer, greener
 and more active travel**

Total Allocation: \$45,896.00

TravelSMART stream – provides funding to communities, organisations and workplaces for small scale projects that reduce car use and/or get more people using active travel - walking, cycling or using public transport.

Total funding approved under the TravelSMART stream - \$27,056.00

<p>il nido Children's Centre Active Travel Beyond the Nest</p>	<p>The project will encourage families to get to and from the centre by active means. Staff will gather baseline data and identify barriers through surveys, run regular workshops and regular active travel events, provide bike racks and recycled bikes for loan to families and training where necessary, help families work towards goals and provide journey mapping services, including for those children about to move up to schooling. The surveys will also identify any changes in perceptions relating to active travel to the centre among participating families.</p>	<p>\$1,930.00</p>
<p>Blackwood Community Childcare Centre Little Green Travellers</p>	<p>The centre will encourage active travel to and from their premises through; providing bike and pram storage areas, delivering information sessions for families, encouraging goal setting and public commitments to active travel, including for the parents' subsequent work commute. Surveys will be used to collect data at particular points in the project to identify barriers to active travel and measure outcomes.</p>	<p>\$3,132.00</p>
<p>Uniting Care Wesley Port Adelaide Community Links Plus</p>	<p>This project will assist Uniting Care's Mount Gambier clients to develop confidence in using public transport and help to reduce any stress they have in using it. Staff will assist clients with journey planning and provide further support by accompanying them on journeys (role modelling). They will survey clients about their experiences of using buses as a transport alternative throughout the project term. Where public transport is a reasonable option, Uniting Care Wesley will assist clients to incorporate these costs into their budget planning.</p>	<p>\$780.00</p>
<p>CHSA Jamestown Hospital</p>	<p>The hospital will support their staff in modelling health promotion by providing a staff bike as a transport option for short trips around Jamestown, reducing reliance on Government</p>	<p>\$1,500.00</p>

Bike Pool	vehicles.	
URPS and WAX Design Better By Bike at the Parks	The applicants will encourage their staff and co-tenants to cycle for work related journeys to and from their building by providing a work bike. They will also provide a safe shared storage area, and actively promote it to clients and encourage them to cycle to meetings at their CBD-fringe office. URPS and WAX Design will develop a common booking system to facilitate access to the work bike by all tenants in their building	\$1,700.00
National Heart Foundation of South Australia Active Travel Program	The National Heart Foundation will implement an Active Travel Program for staff who undertake work related travel. The organisation will make journey planning available, purchase a workplace bike and provide cycle training. It will also trial providing public transport tickets for work journeys. Staff will be surveyed throughout the project term to determine any changes in their perceptions about making active choices for work journeys.	\$1,850.00
Carspa, Mount Gambier Getting People Cycling	Carspa will purchase two work bikes for staff to use for regularly repeated journeys between their two work sites.	\$1,500.00
Dunbar Terrace Kindergarten Cycle to Kindy Campaign	The kindergarten will encourage families to make their kindergarten journeys by active modes and will provide cycle training for both children and their parents. Active travel will be included in the kindergarten curriculum and a bike frame will be installed for bike storage. Children arriving by active modes will receive a stamp in their 'passport', enabling simple measurement of active travel and progress towards goals.	\$4,084.00
Gowrie SA A Greener Journey to Gowrie	Gowrie SA will purchase four workplace bicycles and associated equipment to allow for active work journeys between their two campuses, and bike racks for secure storage.	\$2,240.00
City of West Torrens Wheels Around the West	Council will provide two bicycles for their staff to use for work related travel and survey staff throughout the project term to determine any changes in their perceptions about making active choices for work journeys.	\$1,500.00
Trinity Gardens Primary School The Next 10%	With data already collected on active travel to and from school, Trinity Gardens Primary School will: host a 'walk and ride safely' presentation evening for parents and staff, deliver an integrated active transport education program, install bicycle	\$3,440.00

	racks and provide bike maintenance courses and hold a Ride2School Day event to reinforce the school's culture of active transport. The school community will be surveyed throughout the project to identify any changes in active travel perceptions.	
Urban Myth Theatre of Youth GREEN(ticks)	The theatre will encourage people attending their performances to arrive by active or green means, by offering journey planning to all participating patrons. Tickets for public transport journeys to the theatre and other incentives will be on offer to those registered patrons who choose to arrive by bicycle, public transport or on foot.	\$3,400.00

Community Road Safety stream (funded by the Motor Accident Commission) - provides funding for small scale projects that aim to engage with local communities to create a culture of road safety and to influence safer use of the road network for the overall well being of the local community.

Total funding approved under the Community Road Safety stream - \$18,840.00

Western Border Football League Green Tribunals	The football league will purchase videoconferencing equipment to be used for their tribunal meetings, which will remove the need for club members to drive long distances late at night to attend hearings in person.	\$3,600.00
Clare and Gilbert Valleys Road Safety Advisory Committee U Turn	In conjunction with Country Health SA, this project will harness the creative energies of high school students in the Clare and Gilbert Valleys to develop a script on a road safety theme. The script will be delivered as a stage production performed to local audiences.	\$5,000.00
Centacare Murray Mallee Adelaide Hills Domestic Violence Service Murraylands DV Link	Centacare will purchase videoconferencing equipment to reduce the number of long distance journeys their staff make from their Berri base to other regional and metropolitan destinations.	\$5,000.00
Adelaide Hills Community Road Safety Group Adelaide Hills Safe Biking Project	The group will deliver cycle training for children and their parents, surveying participants throughout the project term to gauge success in assisting local families to cycle safely.	\$5,240.00
