

Gawler East Link Road Project

Concept Design of Gawler One Tree Hill Road Roundabout

Dear Resident/Property Owner,

The Department of Planning, Transport and Infrastructure (DPTI) would like to provide you with an update on the Gawler East Link Road Project.

Earlier this year the project team consulted with the community and stakeholders to provide feedback prior to the detailed design phase commencing.

This feedback has been considered and has resulted in some modifications to increase functionality and improve safety and amenity for all road users, pedestrians and cyclists.

The project will construct a new roundabout to connect the Gawler One Tree Hill Road intersection with the Gawler East Link Road.

The project scope at this location includes:

- One lane in each direction on approach to the roundabout intersection.
- Permanent speed change on One Tree Hill Road from 80km/h to 50km/h on approach to the roundabout intersection.
- New asphalt surfacing and line marking.
- Raised median between Potts Road and Springwood Development.
- Improved connectivity to commercial and school precincts.
- Improved pedestrian facilities including footpath and crossing points.
- On street bicycle lanes to the Gawler East Link Road.
- Light emitting diode (LED) lighting.

A concept plan is attached for your viewing and information.

Should you require further information, please contact the DPTI project team via:
