

Cross and Fullarton Road Intersection Upgrade

Dear Resident/ Property Owner/ Business Owner,

The Australian and South Australian governments have released the concept designs for two important intersection upgrades along the Fullarton Road corridor, worth almost \$100 million combined.

Both governments have jointly committed \$61 million and \$35 million, on a 50:50 basis, to upgrade the Fullarton Road intersections with Cross Road and Glen Osmond Road, respectively.

The Cross and Fullarton Road Intersection Upgrade is expected to support approximately **65 jobs per year**, averaged over the life of the construction period.

Once complete, the upgrade will improve travel times and safety for all road users, improve network reliability and support economic activity.

Your views are important

A concept design has been developed for the upgrade, taking into consideration feedback received from local residents and businesses in the first stage of consultation for the project.

The concept design is now available for public comment and has been developed to encompass project objectives, design criteria, community and stakeholder feedback to date and the outcomes of environmental, social, safety, economic and preliminary site investigations.

The proposed treatments include:

- Widening of Cross Road, with the installation of dedicated right turn lane into Fullarton Road on both approaches, three through lanes on both approaches, a dedicated left turn slip lane onto Fullarton Road (northbound) and dual left turn lanes onto Fullarton Road (southbound)
- Widening of Fullarton Road, with the installation of dedicated right turn lanes into Cross Road on both approaches, three through lanes on both approaches, a dedicated left turn slip lane onto Cross Road (westbound) and a shared through and left turn lane onto Cross Road (eastbound)
- Indenting of Urrbrae Agricultural High School Bus stops on the south side of Cross Road (west) and bus stop 12 on the west side of Fullarton Road (north), and relocation of bus stops 165 located on the north and south sides of Cross Road
- Upgraded pedestrian crossings within the intersection, including ramps, dedicated on-road bicycle lanes on all approach exit lanes to/from the intersection;
- A seagull median treatment on Fullarton Road for access to Urrbrae Agricultural High School;
- Pavement construction and surfacing
- New and upgraded traffic signals

BUILDING OUR FUTURE

Government
of South Australia

**BUILDING
WHAT MATTERS**

- LED road lighting for the extent of the works
- New line marking and drainage.

How to get involved

To view the draft design and provide feedback, please visit the project website at: https://www.dit.sa.gov.au/cross_fullarton.

A project information session also will be held in early 2021, the consultation period for feedback on the concept designs will be open until **COB 28 February 2021**.

All feedback received from the community will be reviewed and considered by the project team.

What's next?

Project design work will continue in the coming months with early works anticipated to commence by mid-2021. Major construction works are anticipated to commence in late 2021, with project completion expected in late 2022, weather permitting.

If you require further information or would like to register your interest in the project, please visit the project website, email dit.communityrelations@sa.gov.au or telephone 1300 794 880.

Kind regards,

Cross and Fullarton Road Intersection Upgrade project team
