

SAMIS Build 13.19.1

Overview

The SAMIS Build Initiatives & Enhancements Communication Bulletin contains information about business and system changes that have occurred and been released / deployed into SAMIS production.

Details of Enhancements

In SAMIS Build 13.19.1 the following expected benefits were deployed into SAMIS production:

- **SE-128 Modify URL used to call COGNITO Reports**
This change was required to allow SAMIS Cognito reports to be run via COGNOS 11 (upgrade from existing COGNOS 10). This change allows users to run reports in all browsers.
 - **SE-168 Condition Report Fields Added to Equipment Register Export**
Additional fields relating to an assets condition added to the Equipment Register Export to Excel function.
-

Deployment Date

9th August 2017
