

Gawler East Link Road Project

Works notification

Ongoing service relocation works – November 2018 to January 2019

Vegetation management works – November 2018

As part of the Gawler East Link Road Project, the Department of Planning, Transport and Infrastructure (DPTI) advises that day and night works will be undertaken in and around the Evanston Park area for ongoing service relocation works, as well as vegetation management activities along the link road alignment.

Commencing: November 2018, intermittently for approximately three months.

Work hours: Day works between 7:00am and 5:00pm, night works between 7:00pm and 5:00am.

Activities:

Installation of new underground utility services to Para Road, Main North Road and Potts Road.

Vegetation management, including some tree removals, commencing at Calton Road and heading south towards Potts Road on the link road alignment. The extent of works will only be for vegetation in the corridor of the new link road.

Traffic management:

Speed and temporary lane restrictions will be in operation in some locations at varying times.

Signage and traffic management will be in place to advise motorists of changed conditions. Every effort will be made to minimise the disturbance to residents and businesses.

What to expect:

During this time, you may notice the following:

- Changes to traffic conditions that may increase travel times;
- Increased presence of ground personnel;
- Plant and machinery entering and exiting designated work zones under the guidance of traffic management;
- Traffic control personnel to assist motorists with any traffic alterations;
- Increased noise disturbance.

Further notification will be provided regarding night works activities. SA Power Networks (SAPN), SA Water, Telstra, and APA will be assisting with these works and will contact residents and businesses directly if utility supply will be impacted.
