

# Victor Harbor Road Duplication Project

## Site Investigation Works – Update

Dear Resident / Business Owner,

The Department for Infrastructure and Transport (the Department) is continuing site investigation works for the Victor Harbor Road Duplication Project.

Site investigations are required to better understand the existing conditions and will take place between the intersection of Main South Road, Old Noarlunga, and Main Road, McLaren Vale, and will include:

- Location and depthing of underground services.
- Geotechnical investigations.
- Environmental investigations including flora and fauna surveys and noise monitoring.
- Aboriginal and cultural heritage assessment.

### **Works will occur intermittently over the coming months.**

The investigation sites do not necessarily correspond to areas which will be impacted by the project in the final design. The locations have been carefully chosen to minimise disruption to the community and for the best overall understanding of local conditions.

Night works will occur on Victor Harbor Road between Main South Road, Old Noarlunga and Main Road, McLaren Vale between Monday, 1 March and Saturday, 13 March. These works will be undertaken as night works **between the hours of 7pm and 7am**, starting Monday evening and finishing Saturday morning each week. There will also be an additional two nights at the end of March.

Remaining site investigations will generally occur during the daytime between the hours of **7am and 7pm**, however some night works will occur as necessary when traffic volumes are lower.

All roads will remain open, with some localised speed and lane restrictions in place. Road users are advised to take extra care when workers are on site, and observe signage when travelling through the area. In the event that access to your property is required for these works, we will contact you directly to obtain your permission and discuss the nature of the works.

Some noise can be expected at times while these works are completed, however the work will be managed to minimise disturbance to nearby residents and businesses, as much as practically possible.
