

Spotless WMS to SAMIS equipment interface

The interface to copy Spotless WMS equipment records into SAMIS is now live. Spotless will progressively provide equipment records on a site by site basis. Once a site is under interface control, equipment related data elements will be made read-only in SAMIS, where only Spotless will be able to update these data elements through the interface. The benefits of a site under interface control include:

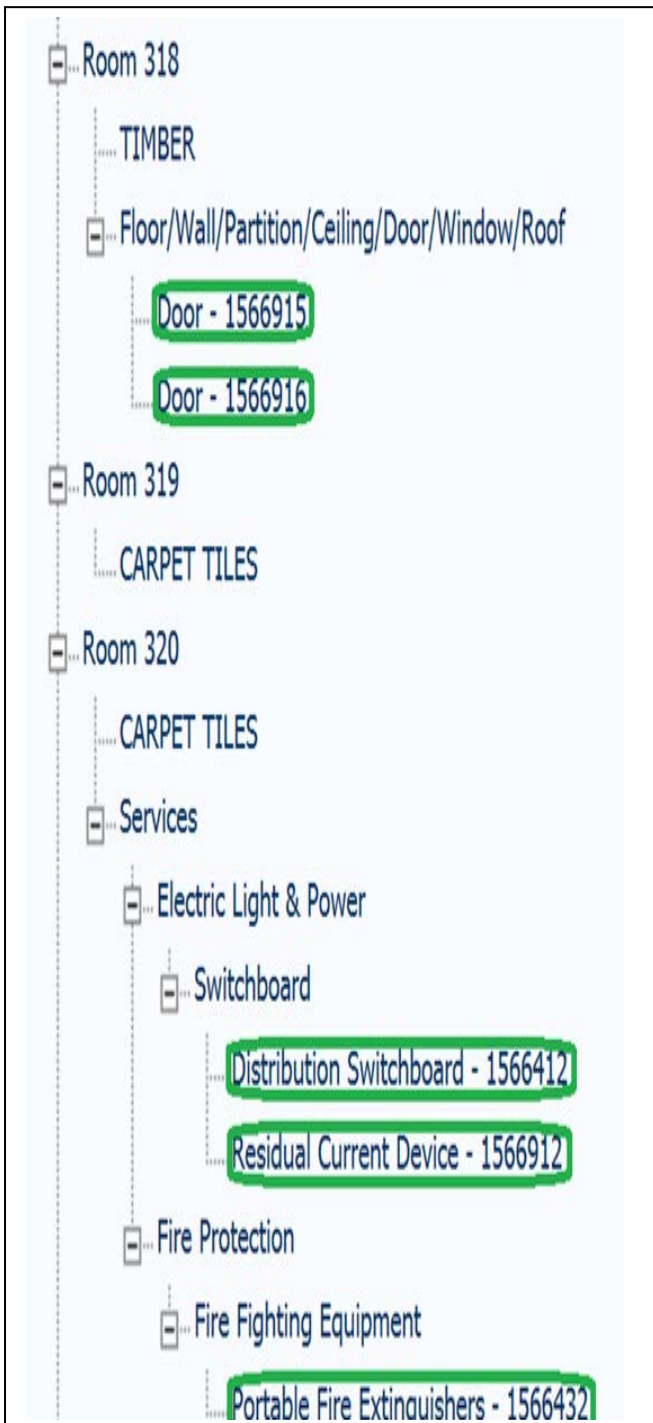

- Spotless no longer having to manually enter equipment data into SAMIS.
- SAMIS users having visibility of equipment maintained by Spotless.

How to determine if a site is under interface control:

1. Site Under Interface - Yes

Asset Details <small>Asset Information</small>	
Department for	
General Details	
SAMIS ID	
Name	Department for
Classification	Site
Logical Number	
Status	In Service
Number of Items	1
Creation Date	03/03/2010
Last Modified By	
Site Under Interface	YES

2. Equipment records can now easily be identified in the SAMIS Asset Hierarchy as they have a SAMIS Id suffix:

3. Data elements under interface control:
