A handwritten signature in blue ink, appearing to be 'TBS', is written over a horizontal line. The signature is stylized and includes a large loop.

From the Chief Executive

The Department of Planning, Transport and Infrastructure (DPTI) made big steps forward in FY19-20 in delivering on government's requirements whilst responding to emerging challenges.

From the onset of the COVID-19 pandemic, DPTI has sustained the delivery of a range of essential and important services, working with the Chief Public Health Officer on measures to remain COVID safe. We have supported government's efforts to manage bushfire recovery and public health issues by adjusting a range of administrative settings, from changing conditions for driver license renewal to assist the medical profession, to amending regulations to enable Local Government and property transactions to function in the new environment. We also supported measures to support the economy, accelerating current programs where feasible, and pivoting to prioritise delivery of new works arising from a \$150m stimulus package.

DPTI progressed implementation of a range of government's key policy reforms, from the new Planning System to Local Government Reforms, Modernising Road Maintenance, the Rail Transformation Program as well as a number of smaller scale reforms.

In March 2020, the South Australian Government announced a record \$12.9 billion infrastructure delivery program, with a \$3.7 billion commitment to road infrastructure over the next four years, including \$1.1 billion for regional roads. At the same time we advanced and completed a number of in-flight projects, most significantly opening the Northern Connector in early 2020. DPTI collaborated with other agencies to support delivery of government infrastructure across the spectrum including upgrades of hospitals, schools, courts, correctional facilities and entertainment venues.

Behind the scenes, substantial advances were made in transforming our organisational arrangements and streamlining business processes to deliver improved outcomes for the state and for government. We continue to work on lifting our performance and picking up the pace by strengthening our foundations for:

- **Customer Focus:** understanding the needs, expectations and preferences of our customers and our communities; and adapting to better serve them;
- **Solution Delivery:** making best use of the resources we have and working within the constraints of available budget and time to deliver target outcomes;
- **Building Capability:** building capabilities needed in local industry and bringing out the best in our people to deliver on our commitments; and
- **Assuring Safety:** systematically managing risk with measures that assure the safety and security of the public, our people, our assets and the environment.

We are committed to further progressing the government's key objectives for our agency, for the state and for the communities we serve in the year ahead.

Tony Braxton-Smith

Chief Executive

Overview: about the agency

Our strategic focus

As at the period ending 30 June 2020, the Department of Planning, Transport and Infrastructure (DPTI) has diverse responsibilities for transport systems and services, infrastructure planning and provision, and strategic land use within South Australia.

DPTI ensures that South Australia's needs for the movement of people and freight, and the delivery of services across the transport and infrastructure sectors are met in a safe, efficient, cost effective and sustainable manner. DPTI also plays a leadership role in the management of public sector building assets and infrastructure, statutory services and information to the community relating to land titling and administration functions, and the state's land use and development planning for all South Australians.

Our Vision	DPTI works as part of the community to deliver effective planning policy, efficient transport and valuable social and economic infrastructure. By harnessing the diversity of our skills, resources and people, we strive every day to achieve positive outcomes that enable economic growth and enhance the liveability of South Australia.
Our Values	Collaboration, Honesty, Engagement, Excellence, Respect.

Our functions, objectives and deliverables as at 30 June 2020

Planning and Land Use Services Division

Manages the planning and land use system for our state to grow the economy and create more vibrant places for our communities; and supports the effective functioning of Local Government and outback communities. The division is focussed on delivering:

- Delivering a simpler planning system that is consistent and accessible across individuals and professionals, including the release of the new Planning and Design Code within an ePlanning system
- Targeting growth areas that are planned, zoned and ready for development based on demographic and land supply analysis
- Securing regions the infrastructure and services they need to support their own development and lifestyle, including oversight of the Municipal Services on Aboriginal Lands (MUNS) Program
- Enabling a Local Government sector that is stronger, delivering better services to its community, and is more accountable to it through reform to the *Local Government Act 1999*
- Progressing building reform and compliance, implementing targeted policies and programs to improve building safety.

Transport Planning and Program Development Division

Develops strategic plans, programs, management frameworks and standards for transport network development and management settings that optimise outcomes. The division is focussed on delivering:

- Integrated strategies for transport networks driven by data and analytics, linked to broader state economic and social objectives
- High potential program and project pipeline of economically viable projects presenting government with clear investment options
- Orchestrated controls and governance from project initiation to benefit realisation
- Contemporary standards and practices for design, engineering and technical elements, fit for purpose for the whole asset lifecycle.

Transport Project Delivery Division

Procures and delivers transport infrastructure safely and efficiently to sustain and support growth, and maximise the benefit of government's investment in transport assets. The division is focussed on delivering:

- Well structured, innovative procurement approaches that manage risk effectively and deliver value for money outcomes, whilst providing opportunities for South Australian businesses
- Delivering customer focused transport infrastructure safely, efficiently, on budget, on time and fit for purpose
- Creating new assets that drive economic growth and maximise available benefits
- Best practice in safety and project management.

North-South Corridor Program Delivery Division

Develops the plans and oversees the delivery of infrastructure needed to connect the North-South Corridor and enhance economic opportunity and livability for the communities it serves. The division is focussed on delivering:

- Planning and executing the program of work that delivers the final stage of the North-South Motorway
- Developing and establishing the Project Delivery Office capability (organisation, project management framework, tools and processes)
- Safely delivering the most effective North-South Corridor solution in accordance with the scope, budget and schedule requirements.

Road and Marine Services Division

Connecting communities by enabling safe, reliable and efficient movements and flows of goods, services, and people across the state's roads and marine networks. The division is focussed on delivering:

- Free flowing road and marine networks that efficiently meet expected demand
- Safe and reliable infrastructure operated and maintained, with available resource to maximise economic and community benefit
- Effectively regulate and control access and usage to protect community interests
- Forward-thinking policies and strategies based on objective analysis, fostering safer, more inclusive and sustainable use
- "Digital First" transactions and service by design, with customer support addressing exceptions, complexities and special needs.

South Australian Public Transport Authority Division

Offering frequent, well-connected and customer-focused services for mass transit movements that can be delivered safely and efficiently. The division is focussed on delivering:

- A simple, safe and easy to use public transport experience, leading to patronage growth and continuously improving customer satisfaction
- New technology enabling better integrated end to end journeys, with better access, increasing mobility options and reducing journey time
- Sustainable service delivery practices enabling growth by efficiently using resources and recovering more through the fare-box.

Across Government Services Division

Provides building project planning, design and construction services, facilities management, and property related services to South Australian Government clients. The division is focussed on delivering:

- Delivery models and applications of construction expertise that drive improvements in the management of risk and value for money outcomes for client agencies.
- A valued partnership approach with Government agencies and Government levels for collaborative and planned delivery of services and infrastructure requirements.
- Management of Government Accommodation provision and associated vacancies and fit outs.
- Safe, efficient and effective facilities maintenance programs for Government's building facilities.
- Adopting a community focus in line with the Land Acquisition (Miscellaneous) Amendment Bill.

People and Corporate Services Division

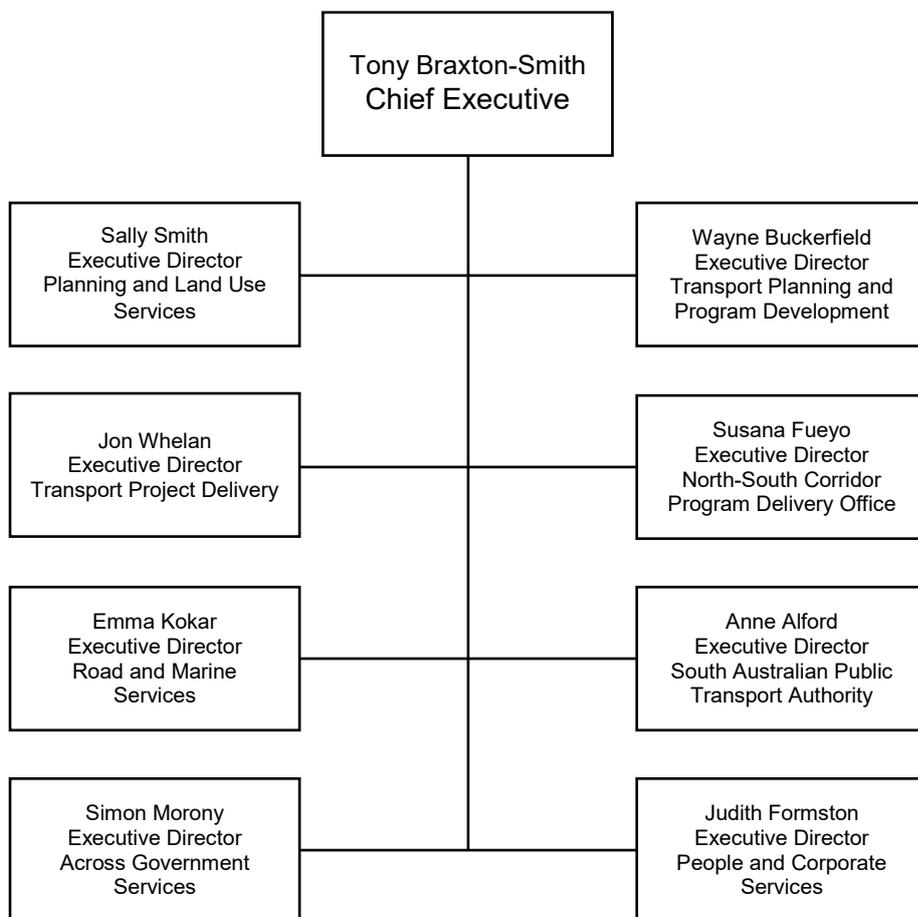

Provides systems for managing our people, our finances, and our core business processes, ensuring we can work safely, compliantly, efficiently and productively. The division is focussed on delivering:

- Delivering the right corporate tools and systems that enable us to be highly efficient and effective
- Providing a capable, flexible and resilient workforce that is well-placed to deliver our business objectives and respond to government requirements
- Creating a learning organisation relentlessly improving processes and building skills
- Ensuring diversity and inclusion is evident in all business areas, so our workforce better reflects our community composition
- Running diligent management of our legal and financial duties and obligations in all aspects of our administration.

Our organisational structure as at 30 June 2020

Reports directly to the Chief Executive are Executive Directors for:

- Planning and Land Use Services
- Transport Planning and Program Development
- Transport Project Delivery
- North-south Corridor Program Delivery Office
- Road and Marine Services
- South Australian Public Transport Authority
- Across Government Services
- People and Corporate Services.

A detailed organisational chart is available on the Departmental website

Changes to the agency

During 2019-20 there were the following changes to the agency's structure and objectives as a result of internal reviews or machinery of government changes.

The following divisions were discontinued:

- Policy, Strategy and Program Development has been replaced by the Transport Planning and Program Development Division
- Public Transport Services has been replaced by the South Australian Public Transport Authority.

The following division was created:

- North-South Corridor Program Delivery Office.

Our Ministers

The Hon Stephan Knoll MP is the Minister for Transport, Infrastructure and Local Government and the Minister for Planning. Minister Knoll oversees the transport systems and services, infrastructure planning and provision, and strategic land use within South Australia.

The Hon Corey Wingard MP is the Minister for Police, Emergency Services and Correctional Services and Minister for Recreation, Sport and Racing. Minister Wingard oversees road safety initiatives to improve road user safety outcomes in South Australia.

Our Executive team

Tony Braxton-Smith has been Chief Executive of the Department of Planning, Transport and Infrastructure since October 2018. He is also the South Australian Rail Commissioner and Commissioner for Highways. He is accountable for the delivery of Government's requirements of the Department, setting strategy and policy, overseeing implementation of programs, projects, initiatives and service delivery, and driving improved performance.

Sally Smith is the Executive Director, Planning and Land Use Services. Sally has 25 years' experience working in the planning and building field, including development assessment, major projects (EIS), strategic planning (regional planning) and policy making. Sally has been in the Department for the last 12 years in various roles and prior to that worked for the Qld and NSW governments. Sally is the Ex-Officio on the State Planning Commission, an Assistant Coordinator-General and is currently overseeing 2 major reform programs (Planning and Local Government Act reforms).

Wayne Buckerfield is the Executive Director, Transport Planning and Program Development. Wayne is accountable for; development of policy settings, strategies and technical standards for transport networks; modelling and analysis of transport network performance, strategic asset management, maintaining a prioritized portfolio and pipeline of potential network investments, directing the preparation of business cases and maintaining project assurance and reporting frameworks. In addition, provides oversight of aboriginal engagement and inclusion initiatives.

Jon Whelan is the Executive Director, Transport Project Delivery. Jon leads and directs the delivery of a portfolio of capital investment programs for road, rail, marine and other transport infrastructure upgrades and new builds, and is the Senior Responsible Officer accountable for delivering these projects as specified, on time and within budget, identifying and implementing mitigation measures to manage any associated risks.

Susana Fueyo is the Executive Director, North-South Corridor Program Delivery Office. Susana leads and directs the program of work to enable the delivery of the final stage of the North-South Corridor. She is the Senior Responsible Officer accountable for finalisation of the business case, detailed project design, all supporting pre-construction works, and delivery of the program to its final approved design, budget and schedule.

Emma Kokar is the Executive Director, Road and Marine Services. Emma ensures the safe, reliable and efficient movement and flow of goods, services and people across the State's Roads and Marine networks by leading and directing the team that delivers all aspects of their maintenance, operation and regulation, and managing key partner relationships that play a role in these outcomes.

Anne Alford is the Executive Director, South Australian Public Transport Authority (SAPTA). Anne is responsible for delivery of effective and efficient public transport services and exceptional customer service provision in mass public transit. Key to this is the major government initiative of the establishment of the SAPTA. SAPTA will provide a customer-first public transport system that will be affordable, safe and secure, frequent along the key corridors, be clean and comfortable, be easy to understand and use and be friendly and inclusive.

Simon Morony is the Executive Director, Across Government Services. Simon is responsible for leading and directing the team that delivers building infrastructure programs, minor building project works, facilities management services, property leasing, other property related services and land acquisitions on behalf of State Government clients from health, education justice, cultural and other departments, as well as for the Department for Infrastructure and Transport.

Judith Formston is the Executive Director, People and Corporate Services. Judith enables the Department and its people to fully comply with our obligations, do our work and deliver on our commitments by directing and managing the enterprise's human resources, finances, and core business processes and systems (including information technology, statutory and legal, procurement, risk and assurance).

Legislation administered by the agency

As at 30 June 2020 the department was responsible for administering the following legislation:

Minister for Transport, Infrastructure and Local Government

Adelaide Oval Redevelopment and Management Act 2011
Adelaide Park Lands Act 2005
Adelaide Railway Station Development Act 1984

Character Preservation (Barossa Valley) Act 2012
Character Preservation (McLaren Vale) Act 2012
Commissioner for Kangaroo Island Act 2014
Development Act 1993
Linear Parks Act 2006
Planning, Development and Infrastructure Act 2016
Private Parking Areas Act 1986
West Beach Recreation Reserve Act 1987

*Denotes Act of limited application

The agency's performance

Performance at a glance

The agency has achieved the following:

- Progressed towards commencement of Phase Two of the Planning and Design Code and release of fully digital online ePlanning solution
- New Design Review Scheme released for consultation
- Processed 802 development applications with a combined development cost of \$5.9 billion. This comprised 291 Crown development or sponsored private sector applications to the value of some \$3.7 billion, and 511 other private sector applications to the value of \$2.1 billion
- Facilitated the approval of 12 council-led Development Plan Amendments and completed seven Ministerial Development Plan Amendments
- Secured \$1.6 billion funding across rural and metropolitan road network. Actively consulted with community, analysed congestion, safety aspects and condition of assets in order to best direct funding allocations
- Completed the Penola Northern Bypass Project, delivering on the commitment to provide a complete bypass of the Penola Township
- Commenced Stimulus works to support the economy and jobs during the COVID-19 pandemic
- Opened the new Adelaide Service SA centre with assisted self-service, digital kiosks and new concierge and customer flows integrated into the service model
- Adopted improved service routines for the concierge and customer flow at numerous metropolitan Service SA service centres, reducing wait times by an average of 38%
- Commenced contracted models of tram and bus services
- Replaced turnouts at Dry Creek that now secures more flexible access/egress for trains accessing Dry Creek Railcar Depot
- Upgraded Edwardstown Train Station with a new shelter, station furniture, re-bitumised the platform surface and installed DDA compliance tactile and directional indicators that assist customers with visual impairments
- Completed works on Her Majesty's Theatre redevelopment
- Progressed delivery of the Department for Education's \$800m capital works program, in readiness for Year 7s to transition into high school from 2022
- Contributed to response and emergency recovery relating to the 2019-20 bushfires across South Australia
- Contributed to response and support to government in the response to the COVID-19 pandemic in order to ensure the continuation of DPTI critical services, and work to maintain the safety of staff, contractors, customer and consumers of DPTI services throughout the duration of this event.

Agency contribution to whole of Government objectives

Key objective	Agency's contribution
More jobs	<p>Efficient and effective delivery of infrastructure projects.</p> <p>Greater participation of medium and small businesses through procurement.</p> <p>Sustainable development through strategic land, transport and infrastructure delivery.</p> <p>Local participation policies for procured services.</p>
Lower costs	<p>Improved governance and investment decisions.</p> <p>Rejuvenation and growth through reuse of existing buildings and assets.</p>
Better Services	<p>Public transport which reflects community need.</p> <p>Community engagement across major projects.</p> <p>New Service SA centre providing enhance customer service through digitisation.</p> <p>Maximising efficiency of programs and services.</p> <p>More efficient movement of local, interstate and international freight.</p>

Agency specific objectives and performance

DPTI is committed to implementing key reform and delivering major projects to create more jobs and provide better public services that deliver long term benefit to the state.

Highlights of the 2019-20 financial year include:

Agency objectives	Indicators	Performance
<p>Effective Planning Policy</p>	<p>Legislative Reform</p>	<p>Statutes Amendment (Local Government Review) Bill 2020 was introduced into Parliament on 17 June 2020.</p> <p>Regulations made under the <i>Planning, Development and Infrastructure Act 2017</i>: Transitional Provisions (Code) Variation Regulations 2019; General (Development Assessment) Variation Regulations 2019; Swimming Pool Safety Regulations 2019; Transitional Provisions (Staged Commencement) Variation Regulations 2019; Fees, Charges and Contributions Variation Regulations 2019; Swimming Pool Safety Variation Regulations 2019; General (Development Assessment) (No 2) Variation Regulations 2019; Planning Agreements Regulations 2020; General (Annual Reports) Variation Regulations 2020; General (Miscellaneous) Variation Regulations 2020; Transitional Provisions (Miscellaneous) Variation Regulations 2020; Swimming Pool Safety (Construction of Safety Features) Variation Regulations 2020.</p>

<p>Effective Planning Policy</p>	<p>Legislative Reform</p>	<p>Statutes Amendment (Local Government Review) Bill 2020 was introduced into Parliament on 17 June 2020.</p> <p>Finalised new building regulations aligned to National Construction Code 2019 (NCC19).</p> <p>Established new Ministerial Building Standards.</p> <p>Implemented the <i>Architectural Practice (Continuing Professional Development) Amendment Act 2019</i>.</p> <p>Supported and delivered legislative reform to cut red tape to make it easier to be a business in South Australia.</p>
<p>Effective Planning Policy</p>	<p>Reform Initiatives</p>	<p>Completed Building Inspection policies as recommended in the 'Building Confidence Report'.</p> <p>Accredited 277 building and planning professionals under the Accredited Professionals Scheme.</p> <p>Completed Cladding Audit Phase 1 and 2. Phase 3 underway.</p>
	<p>Infrastructure Planning</p>	<p>Commenced preparing transport network plans to support the 20 year Infrastructure Plan.</p> <p>Continued to complete business cases on projects for assessment by Infrastructure South Australia.</p>
	<p>Regional development</p>	<p>Commenced creation of Regional Plan delivery team, governance frameworks. Joint Planning Boards expected to be established late 2020.</p>

	<p>Planning and Development improvements</p>	<p>The Draft Local Design Review Scheme has been prepared and is currently on public consultation until 21 August 2020.</p> <p>Developed and finalised the new Design Review Scheme for operation under the <i>Planning, Development and Infrastructure Act 2016</i>.</p>
<p>Efficient Transport Services</p>	<p>SAPTA Implementation</p>	<p>Designed and progressed implementation of a new organisational structure to support SAPTA's shift from service operator to diligent custodian of the Public Transport network and assets.</p>
<p>Efficient Transport Services</p>	<p>Customer Focussed services</p>	<p>MetroMate decommissioned and new service interfaced with Google maps, providing accurate and timely information to empower customers to make better decisions about their journeys.</p> <p>Redesigned the Adelaide Metro Website which has been accredited at an international level for accessibility.</p> <p>Minor upgrades to stations, rail track and Interchanges to improve the overall experience for customers.</p> <p>Redesign of the Adelaide Metro with Statement of Accessibility from Vision Australia received.</p> <p>Increased rollout of digital timetable kiosks.</p> <p>Completed significant rail track resurfacing, improving the overall ride quality for customers travelling on trains.</p> <p>Achieved a 100% disabled access bus fleet.</p> <p>Installation and upgrade of 50 digital real-time bus and tram stops around metropolitan Adelaide. Works for the new digital bus and tram stops are planned for Tea Tree Plaza, Paradise, Klemzig and Mount Barker bus stops as well as various tram stops in the city.</p>

Efficient Transport Services	Value delivery	<p>We have increased the use of various technologies to assist in making maintenance activities more effective and cost efficient.</p>
Valuable social and economic infrastructure	Customer Focussed services	<p>Improved outcomes for Service SA customers through process and transaction automation, removal of red-tape and a simplified online experience.</p> <ul style="list-style-type: none"> • 16 online services from the legacy EzyReg environment have been redeveloped in a contemporary mobile friendly environment. • Introduction of digital registration renewal notices providing an end to end digital self-serve capability. • Removal of the mandatory requirement to surrender Number Plates where the vehicle registration lapses for more than 90 days. • Implemented an automatic progression from restricted R-Date motorcycle licence class to unrestricted R class. <p>From December 2019, South Australian motor vehicle owners could subscribe to receive registration renewal notices digitally, via email or SMS, creating efficiencies and reductions in the number of registration renewal application forms being printed and mailed out.</p>

	Enhancement of current transport infrastructure	<p>Delivered a suite of road infrastructure enhancement initiatives; and an enhanced approach to the road resurfacing program.</p> <p>Streamlined heavy vehicle access; and co-developed and delivered a program of freight productivity improvements in consultation with industry.</p> <p>Resurfaced approximately 42 lane kilometres to improve ride quality on inner urban roads, resealed 75 lane kilometres and re-sheeted 50 kilometres of shoulders to improve safety on rural roads.</p>
--	--	---

<p>Valuable social and economic infrastructure</p>	<p>Progress of major transport infrastructure projects, programs and planning studies.</p>	<p>North-South Corridor (NSC) - Northern Connector open to traffic March 2020.</p> <p>Majority of works complete on the NSC - Darlington Upgrade.</p> <p>Main works commenced on the NSC - Regency Road to Pym Street Project.</p> <p>Completed the Oaklands Rail Crossing Grade Separation Project.</p> <p>Completed the Gawler East Link Road projects, and upgrade works on the Tulloch Road Intersection Upgrade.</p> <p>Majority of works complete on the Gawler East Link Road Project, and Tulloch Road Intersection Upgrade.</p> <p>Completed the City South Tram Line Replacement Project.</p> <p>Completed the Penola Northern Bypass Project, delivering on the commitment to provide a complete bypass of the Penola Township.</p> <p>Awarded an Alliance contract for the Joy Baluch AM Bridge Duplication and Port Wakefield Overpass and Highway Duplication projects.</p> <p>Progressed delivery of the Department for Education's Capital Works Program.</p> <p>Delivery of over \$275m of major building infrastructure projects, including \$66m Her Majesty's Theatre redevelopment project.</p> <p>Commenced preparing transport network plans to support the 20 year Infrastructure Plan.</p> <p>Continued to complete business cases on projects for assessment by Infrastructure South Australia. Continue Across Government Facilities Management Arrangements reform agenda, focussing on delivering improved services to client agencies.</p> <p>Progress delivery of the Department for Education's Capital Works Program.</p>
---	---	--

Safe, Reliable and Efficient Movement	Speed / Safety Management initiatives	<p>Enhanced the motorcycle graduated licensing scheme to reduce fatalities and serious injuries amongst novice riders.</p> <p>Ensured that safe system principles are embedded into DPTI's planning and design of road infrastructure and operations.</p> <p>Increased the capacity of remote Aboriginal communities to support improved road safety and driver licensing outcomes.</p>
--	--	---

Corporate performance summary

- The Department's Reconciliation Action Plan (RAP) 2017-2020 is a Stretch RAP under Reconciliation Australia's Reflect, Innovate, Stretch, and Elevate (RISE) framework and commits DPTI to meeting targets that build on its successes
- The Reconciliation Action Committee are currently working with Reconciliation SA to develop a Stretch Reconciliation Action Plan for 2020 to 2023
- During the 2019-20 financial year selected Divisions underwent organisational realignment to ensure DPTI's operations, functions and capabilities are aligned with our strategy
- Internal governance committees are established to align with the department structure and improve governance and decision making.

Employment opportunity programs

Program name	Performance
Internships	DPTI hosted university undergraduate students undertaking an unpaid placement in a variety of discipline areas. In the 2019-20 financial year, the Internship program hosted four Interns in areas of: Urban and Regional Planning and Civil and Structural Engineering.
Undergraduate Vacation Employment	<p>The Undergraduate Vacation Employment Program offered university students who are undertaking an undergraduate degree, to do paid work placements with the practical experience to develop skills in their chosen discipline.</p> <p>Over the 2019-20 summer break, 24 undergraduates from across South Australia Universities worked on projects in a range of disciplines</p>
Graduate Program	<p>Approximately 62 graduates are employed across the agency from a wide range of discipline areas.</p> <p>A majority of the graduates, as part of the DPTI Graduate Development Program have completed a Certificate IV in Project Management Practice and Action Learning Project through TAFE SA. The Graduates have taken part in a comprehensive Graduate Development Program through education (formal training, workshops and online learning), exposure (coaching, mentoring, feedback and shadowing) and experience (job rotations, on job learning, projects and activities).</p>
Skilling South Australia	<p>The Skilling South Australia – SA Government Apprenticeship Signature Project is designed to contribute to government's objective to create more than 20,800 additional apprenticeships and traineeships over four years to support more South Australians into meaningful, long-term careers.</p> <p>In the 2019-20 financial year, 26 positions were created with the addition of 19 graduates and seven trainees, meeting DPTI's target of 26.</p>

Agency Performance Management and development systems

Performance management and development system Performance

DPTI Operating Procedure 008: Managing Our People

DPTI’s blended learning model for employees provides 70% of learning through on the job experience, 20% through mentoring, coaching and networks and 10% through formal training programs. It ensures learning and development is not only achieved through formal education and structured learning, but is reliant on both experiences and exposure to others, a blended learning approach.

During 2019-20, \$1.19 million was invested in formal learning and development for employees.

55.1% of employees (including managers and executives) participated in formal performance management reviews as at 30 June 2020.

DPTI continues to maintain a performance culture and is implementing an enhanced performance management framework to support employees and managers engage in day to day performance conversations to develop capability and review progress against performance standards and role outcomes.

Executive Performance

Executive performance continues to be monitored through the enhanced executive performance reporting process, specifically through an executive aligned Performance and Learning Agreement assessment.

Work health, safety and return to work programs

Program name	Performance
Influenza Vaccination Program	<p>The percentage of employees participating in the Influenza Vaccination Program increased from 49% in 2019 to 61% in 2020.</p> <p>The program was run across 38 worksites with a total of 52 sessions</p> <p>Feedback from participants was positive with no operational changes recommended to next year’s program.</p>

Employee Assistance Program	<p>The number of worksites utilising the onsite walk and talk service continues to increase with 27 workgroups receiving the service.</p> <p>The traditional face to face services has an average utilisation rate of 3.2%.</p> <p>The effectiveness of the program is based on feedback received through customer satisfaction surveys. Respondents indicated that 76% were satisfied with the service provided.</p>
Drug and Alcohol Management Program	<p>During the 2019-20 period DPTI workers and Rail Commissioner employees that had undertaken rail safety work on behalf of the Rail Commissioner were drug and alcohol tested. Eight worksites were targeted; Adelaide Railway Station, Mile End Worksite, Seaford Depot, Glengowrie Depot, Dry Creek Depot, Gawler Depot, Salisbury and Noarlunga Stations along with adhoc Rail Project locations. The volume of testing conducted:</p> <ul style="list-style-type: none"> • Random alcohol testing – 4,740 • Random drug testing – 744 • For cause testing – 72
Health and Fitness Management Program	<p>The frequency of periodic health assessments of rail safety workers is based on risk of ill-health determined by age and safety critical level of the role.</p> <p>During 2019-20, a total of 366 people participated in the health monitoring tests and rail health assessments:</p> <ul style="list-style-type: none"> • Category 1: Safety Critical - 197 • Category 2: Safety Critical - 65 • Category 3: Non-safety critical - 26 • Audiometric Assessments – 49 • Asbestos Medicals – 29
Rehabilitation Programs (Return to Work Program)	<p>DPTI's Injury Management and Return to Work Program (Rehabilitation) is administered by the Department of Treasury and Finance, Return to Work Services. DPTI works in close collaboration with all parties to facilitate successful return to work outcomes for all involved.</p> <p>The department's Early Intervention Program continues to play an essential role in ensuring injured workers get the support they need as soon as possible.</p>

Wellbeing Program	DPTI's Wellbeing Program also included initiatives such as Mental Health First Aid and MATES in Construction training programs, the promotion of community events such as R U Ok Day and SafeWork Month. The department also supports workers participation in the 'Life Be In It' Corporate Cup with 194 workers participating in 2019.
WHS training	<p>Summary of results of the program</p> <p>The following are provided as mandatory online training for all staff:</p> <ul style="list-style-type: none"> • WHS Awareness • WHS Induction (and refresher) • Hazard and Incident Reporting <p>Other training is also provided for occupational specific roles:</p> <ul style="list-style-type: none"> • WHS Due Diligence Training • WHS for Managers • WHS Incident Investigation for Managers • WHS Risk Management • Follow Work Health and Safety Procedures

Workplace injury claims	2019-20	2018-19	% Change (+ / -)
Total new workplace injury claims	97	85	+14%
Fatalities	0	0	NA
Seriously injured workers*	0	0	NA
Significant injuries (where lost time exceeds a working week, expressed as frequency rate per 1000 FTE)	7.32	5.3	+38%

Work health and safety regulations	2019-20	2018-19	% Change (+ / -)
Number of notifiable incidents (<i>Work Health and Safety Act 2012, Part 3</i>)	24	23	+4.4%
Number of provisional improvement, improvement and prohibition notices (<i>Work Health and Safety Act 2012 Sections 90, 191 and 195</i>)	15	2	+650%
Return to work costs**	2019-20	2018-19	% Change (+ / -)
Total gross workers compensation expenditure (\$)	\$2.72m	\$1.92m	+42%
Income support payments – gross (\$)	\$0.89m	\$0.56m	+59%

Executive employment in the agency

Executive classification	Number of executives
EXEC0A	1
EXEC0F	1
SAES1	28
SAES2	14

Data for previous years is available at: <https://data.sa.gov.au/data/dataset/executive-employment-in-the-department-for-planning-transport-and-infrastructure>

The [Office of the Commissioner for Public Sector Employment](#) has a [workforce information](#) page that provides further information on the breakdown of executive gender, salary and tenure by agency.

Financial performance

Financial performance at a glance

The following is a brief summary of the overall financial position of the agency. The information is unaudited. Full audited financial statements for 2019-20 are attached as Appendix 1 of this report.

For a detailed breakdown of financial performance please refer to Note 1.4 Budgetary reporting and explanations of major variances between budget and actual amounts.

The department has assets worth \$38.739 billion. This consists mainly of network, land and building assets and Deposits at call with the Treasurer. The department has total liabilities of \$1.526 billion. This mainly consists of employee entitlements and expenses due but not yet paid on supplies and services and capital projects.

Consultants disclosure

In 2019-20 DPTI did not engage any consultants.

Data for previous years is available at:

<https://data.sa.gov.au/data/dataset/consultants-engaged-by-the-department-of-planning-transport-and-infrastructure>

See also the [Consolidated Financial Report of the Department of Treasury and Finance](#) for total value of consultancy contracts across the South Australian Public Sector.

Contractors disclosure

A summary of external contractors that have been engaged by the agency, the nature of work undertaken, and the actual payments made for work undertaken during the financial year is attached as Appendix 2.

Previous year details for the category is available on Data SA:

<https://data.sa.gov.au/data/dataset/external-contractors-engaged-by-the-department-of-planning-transport-and-infrastructure>

The details of South Australian Government-awarded contracts for goods, services, and works are displayed on the SA Tenders and Contracts website. [View the agency list of contracts](#).

The website also provides details of [across government contracts](#).

Other financial information

Pursuant to section 7D of the *Road Traffic Act 1961*, the Minister is required to report to Parliament on the operations of the Community Road Safety Fund. This report is provided separate to this annual report.

Risk management

Risk and audit at a glance

The department manages a wide range of complex areas with the need to manage significant levels of risk and is committed to embedding, monitoring and refining risk management processes into our culture, practices and decision-making processes.

Fraud detected in the agency

Category/nature of fraud	Number of instances
Confirmed fraudulent activity	1

NB: Fraud reported includes actual and reasonably suspected incidents of fraud.

Strategies implemented to control and prevent fraud

- Continue to implement and continuously improve fraud and corruption control strategies in line with Australian Standard 8001-2008 Fraud and Corruption Control
- Mandatory annual completion of the online Fraud and Corruption Control training module by all employees within the department
- Continue to promote behaviour in line with the Code of Ethics for the South Australian Public Sector
- Assess and test controls relating to fraud as part of internal audit processes and reviews
- Continue to develop relationships between the Fraud and Corruption Control Officer and other business units to develop and plan projects and resources that mitigate any potential risks
- Targeted face to face training sessions are held with specific business units based on their risk profile
- Fraud and Corruption Control presentations at corporate induction days for new employees.

Data for previous years is available at:

Public interest disclosure

Number of occasions on which public interest information has been disclosed to a responsible officer of the agency under the *Public Interest Disclosure Act 2018*: five

Data for previous years is available at: <https://data.sa.gov.au/data/dataset/a8b2bce8-a74e-471c-92aa-7a0daa040b84/resource/f696c67f-b7da-4c32-9e45-14a53d5628e5/download/whistleblowers-in-dpti-2018-19.csv>

Note: Disclosure of public interest information was previously reported under the *Whistleblowers Protection Act 1993* and repealed by the *Public Interest Disclosure Act 2018* on 1 July 2019.

Reporting required under any other act or regulation

Reporting against the *Air Transport (route licensing-passenger services) Act 2002*

The following report is provided pursuant to section 19 of the *Air Transport (Route Licensing-Passenger Services) Act 2002*.

Act or Regulation	Requirement
<i>Air Transport (Route Licensing – Passenger Services) Act 2002</i>	<p>Section 19</p> <p>(1) The administrative unit of the Public Service that is, under the Minister, responsible for the administration of this Act must, on or before 30 September in each year, present a report to the Minister on the operation and administration of this Act during the previous financial year.</p> <p>(2) A report required under this section may be incorporated in the annual report of the relevant administrative unit.</p> <p>(3) The Minister must, within 12 sitting days after receipt of a report under this section, cause copies of the report to be laid before each House of Parliament</p>

Operation and Administration of the Act in 2019-20

Adelaide - Port Augusta

Adelaide – Port Augusta was the only route subject to a Route Service License during the 2019-20 Financial Year. A Route License was awarded to Regional Express Holdings Ltd (Rex) in early July 2017. The airline commenced services from Adelaide to Port Augusta in September 2017.

In March 2020 Rex advised DPTI that, due to the impact of COVID-19, the airline would cease operations on the route with effect from 6 April 2020.

Rex has foreshadowed an intention to formally surrender the license under paragraph 14 section (1) of the Act was initiated and DPTI has sought confirmation of Rex's intent.

Passenger numbers for the Adelaide to Port Augusta route in the FY 2019-20 (1 July 2019 to 30 June 2020):

Segment:	Adelaide to Port Augusta	–	692
Segment:	Port Augusta to Adelaide	–	582
Total passengers		–	1274 (averaging 106 passengers / month)

Act or Regulation	Requirement
<p><i>Passenger Transport Act 1994</i></p>	<p>Section 24</p> <p>(1) The administrative unit of the Public Service that is, under the Minister, responsible for the administration of this Act must, on or before 30 September in each year, prepare a report on the operation and administration of this Act for the financial year ending on the preceding 30 June</p> <p>(2) The report must include specific reports on the following matters for the relevant financial year, and must also include any other information required by this Act:</p> <ul style="list-style-type: none"> (a) Levels of public utilisation of passenger transport services within the state (b) Issues affecting the accessibility and utilisation of public transport within the state (c) The number and nature of complaints, compliments and submissions made to the Minister by members of the public under any centralised system established for the purpose under this Act (d) The general availability of taxis on taxi-stands in Metropolitan Adelaide, and response times to bookings within the taxi industry. <p>(3) A report under this section may be incorporated into the annual report of the relevant administrative unit.</p> <p>(4) The Minister must cause a copy of the report to be laid before both Houses of Parliament within 12 sitting days after the report is prepared.</p>

The department administers the *Passenger Transport Act 1994 (the PT Act)* and Passenger Transport Regulations 2009 by planning, regulating and funding public transport services (bus, train and tram, taxi and hire car) across South Australia. Pursuant to section 24A of the PT Act the following report is provided.

Public transport bus services across metropolitan Adelaide were previously provided by two private bus providers, Australian Transit Enterprises operating as SouthLink who operate three contract areas (Hills, Outer North and Outer South), and Torrens Transit who also operate three contract areas (East-West, North-South and Outer North-East).

In April 2019, DPTI released an Invitation to Supply (ITS) for the provision of bus services in metropolitan Adelaide (Phase 1), which included the East-West, Outer North-East and Hills contract areas. The tender closed on 15 August, 2019.

In late July 2019, DPTI released an ITS for the provision of bus and light rail services in metropolitan Adelaide (Phase 2), which included the North-South, Outer North and Outer South contract areas. The North-South contract area includes both bus and light rail services whereas the Outer North and Outer South contract areas only include bus services. The tender closed on 14 November, 2019.

Operators tendered on the basis they would deliver simplification of the network, better integration of services, more frequent and efficient services and greater engagement with customers.

The outsourcing of tram services will allow the government to provide more efficient services at a significantly lower cost in comparison to current cost as provided by government.

On 10 March 2020, contracts were awarded as detailed below:

Proponent	Contract Area
Transit Systems (Torrens)	East-West, Outer North and Outer North-East
Australian Transit Enterprises (Keolis Downer)	Hills
Busways South Australia Pty Ltd (Busways)	Outer South
Torrens Connect (a joint venture between Torrens Transit Pty Ltd, UGL Rail Services Pty Ltd and John Holland Pty Ltd)	North South Bus and Tram

In June 2020, the South Australian Government announced proposed changes to the Adelaide Metro bus network for consultation. The feedback from customers indicated they wanted the current network to remain. As a result, the government did not proceed with the proposed changes.

The bus and tram contracts were due to commenced on 5 July 2020 including minor bus network timetable changes to better reflect actual traffic conditions.

Approximately 100 tram employees accepted offers of employment with Torrens Connect. Rail Infrastructure Maintenance for train and tram functions (i.e. within track, civil, signalling and overhead) will remain within the department until the commencement of the proposed train contracted service model.

All metropolitan rail services are operated by the department through the Rail Commissioner entity which has accreditation under the PT Act. Public transport services in regional South Australia are also administered by the department. These include regular route services (country bus services), provincial city services, integrated transport plans, special medical-related services and Dial-a-Ride services.

The department supports community passenger networks across regional South Australia and within metropolitan Adelaide. The Community Passenger Networks Program is established to facilitate access to transport for people who are transport disadvantaged. The program is jointly funded by the Commonwealth Home Support Program and the Department of Human Services.

The department is committed to continually improving public transport services and infrastructure and making public transport more accessible and easier to use for all users. The bus fleet is now 100% accessible.

The department's Station Upgrade Program continues to upgrade selected stations along metropolitan passenger rail lines to provide safer and more efficient services for train customers, with all improvements focusing on accessibility in line with the *Disability Discrimination Act 2002* for public transport services. Improved facilities for commuters include new shelters, improved lighting, platform furniture, additional cover, improved access, pedestrian crossings, bike enclosures, additional CCTV camera, new access paths and ramp along with new car parking facilities.

Departmental Officers at the Adelaide Railway Station monitor accessibility gates and provide 'sighted guide' assistance to passengers to board trains if needed. Information regarding accessible journeys is published on the Adelaide Metro website.

Heavy rail passenger services, operating across the Adelaide Metropolitan Passenger Rail Network (AMPRN), are currently delivered by DPTI through the South Australian Public Transport Authority (SAPTA).

In late May 2019, the government determined that government-operated heavy rail passenger services on the AMPRN be transitioned to a contracted service model within the private sector, procured through a competitive market process.

In late June 2019, DPTI initiated the Adelaide Rail Transformation Program (ARTP), to conduct the competitive market process and deliver on the Government's policy setting. In late October 2019, the government approved the ARTP proceeding to conduct a market-based competitive procurement to secure offers for the operation, maintenance and service delivery for the AMPRN, through a two stage, Expressions of Interest (EOI) (released in late October 2019) and Invitation to Supply (ITS) (released in February 2020) process.

The three shortlisted proponents announced last year to progress to the ITS were, Adelaide Next, Keolis Downer and TrainCo. All three proponents have significant experience in heavy rail operations, maintenance, and service delivery, either within

Australia or internationally.

In early June 2020, the ITS submission closed and an evaluation process was undertaken to determine the preferred bidder(s). Transition is expected to commence prior to January 2021.

Adelaide Metro patronage 2019-20 (millions)

The total patronage on the public transport system decreased by 16.6% compared with the previous financial year.

Note: 2019-20 patronage has decreased significantly due to the impacts of Covid-19, which showed a significant decline from mid-March 2020.

Total patronage by mode

Bus	Tram	Train	Total patronage*
42,872,194	7,395,366	13,261,398	63,528,958

Total patronage by passenger type

Regular	Concession	Student	Seniors	Free Travel	Special Passes	Total patronage*
18,693,614	19,757,355	11,145,914	6,500,149	6,930,838	501,088	63,528,958

Total patronage by ticket type

Metrocard	Single trip	Daytrip	Free travel	Total patronage*
51,439,548	4,560,508	598,064	6,930,838	63,528,958

*Note: *The figures listed above include free travel data.*

Special event services

On 23 October 2014, an amendment to the *Passenger Transport Act 1994* was enacted with respect to the management and funding of public transport for special events. The aim of the legislation is to facilitate the successful planning of special events in metropolitan Adelaide by requiring mandatory notification of major events and also to provide a mechanism for the costs of additional public transport services required for the event to be recovered where the event is considered a commercial event.

The key elements of the legislation include the requirement for venue managers to notify the department six months in advance (or as soon as the event is known) of any event expected to attract more than 5,000 patrons and, where additional public transport services are required, that commercial events contribute to the cost of these extra services.

Events are classified as one of two different categories of event for the purposes of the legislation. The two categories are:

- Commercial Events - organised for profit where there is a fee for participants either in the form of a ticket or an indirect fee i.e. membership of a club or association; or
- Community Events - organised as not for profit, the event is open to the community and attendance is free or a voluntary donation from attendees may be sought.

Based on the information provided in the notification form, the department will make a determination regarding the need for additional or special public transport services to cater for the event and, where extra services are required, events categorised as commercial will- be required to fund the services.

For the 2019-20 year, an average of 55% of the crowd attending AFL matches at Adelaide Oval used public transport to travel to and from the events. During 2019-20 DPTI continued to provide additional demand and customer support services for cruise ships the Cruise Ship season.

Regional services

The department regulates and contributes to funding transport services in some regional areas.

Regular route services operate across regional South Australian and link major centres to Adelaide. Services operate in the Barossa Valley, Murray Mallee, Mid North, Upper North, Far North, Riverland, Eyre, South East and Fleurieu regions.

Integrated transport services operate in the Coorong District Council, Karoonda East District Council, Murray District Council, Southern Mallee District Council, Mid Murray District Council, Southern Yorke Peninsula, Tatiara District Council, Eastern Riverland, Upper North, Mid North, Adelaide Hills, Victor Harbor and on Kangaroo Island.

Dial-a-Ride door to door services are provided in Victor Harbor, Port Lincoln, Murray Bridge, the Copper Coast and Barossa Valley. These supplement regular timetabled services and extend the range of public transport options for these communities.

In the past four years patronage has continued to decrease by an average of 5.7% per year. This decrease has in part been attributed to cheaper regional airfares, internet banking/services/shopping and people generally choosing to use cars rather than travelling long distances on buses.

Based on data provided by country bus operators, country bus patronage in 2019-20 was 600,038, a decrease of 7.67% from the previous year.

This larger than normal decrease in patronage is due to the impact of COVID-19. During the first months of the various COVID-19 restrictions, regional service bus operators recorded patronage decreases of between 30%-90% compared to the same period for the previous year.

In May 2020, SAPTA released a COVID-19 Financial Support Package for contracted regional bus service operators to help alleviate the financial strain on contractors due to their loss of patronage, and therefore fare revenue, to ensure that these essential services were maintained for the regional communities.

Provincial city bus services

Regular passenger services operate in South Australia's provincial cities of Port Lincoln, Port Pirie, Whyalla, Port Augusta, Murray Bridge and Mount Gambier. Provincial city services are a combination of town and school services.

Based on data provided by provincial city bus operators, patronage in 2019-20 was 355,586, a decrease of 14.33% from the previous year.

In the past four years provincial city bus service patronage has continued to decrease by an average of 1.6% each year.

Complaints, commendations and submissions

Feedback on public transport

Feedback from customers about passenger transport services is welcomed as it provides the ability to improve and assess existing services and practices. Customers are presented with multiple opportunities to provide their feedback through the Adelaide Metro website, Adelaide Metro Infoline and InfoCentre, as well as social media such as Facebook and Twitter. Complaints represented 0.01% of total public transport patronage (initial boardings and transfers) in the 2019-20 reporting year, with a decrease of 2,559 (a 25% per cent decrease) a decrease of 205 in commendations (a 23% per cent decrease) compared to the previous year.

A decline in patronage due to COVID-19 resulted in flow on effects to the number of complaints and commendations.

The table below shows Feedback information on public transport

Feedback	2017-18	2018-19	2019-20
Commendations	914	897	692
Suggestions	1,134	1,336	908
Complaints			
Service changes and service quality	6,267	5,589	5,320
Punctuality	3,088	2,905	1,714
Fares and ticketing	437	332	454
Passenger comfort	1,130	1,346	306
Other	323	225	44
Total complaints	11,245	10,397	7,838

Feedback on taxi and small passenger vehicle (SPV) services

The department receives complaints and commendations regarding taxis and small passenger vehicles. Complaints may lead to disciplinary action if a breach of the regulations under the Act is found to have occurred. Complaints represented less than 0.02% of the over eleven million journeys provided by taxis and chauffeur services.

The table below shows feedback information on taxis and SPVs

Feedback	2017-18	2018-19	2019-20
Commendations	1	3	1
Complaints	269	172	109

As at June 2019, there were 4,228 small passenger vehicles in the metropolitan area that can provide point to point services.

Waiting times

The taxi centralised booking services reported that the average waiting time for general taxis in metropolitan Adelaide for 2019-20 was eight minutes and 36 seconds during the day (6am to 6pm), and seven minutes and 36 seconds at night (6pm to 6am). The figures include waiting times for phone-booked, hailed and taxi rank trips and meet the prescribed waiting time of 12 minutes, as stated in the conditions for accreditation.

There were 1035 general licences in metropolitan Adelaide in 2019-20.

Access taxis

The taxi centralised booking services reported that the average waiting time for Access Taxis in metropolitan Adelaide for 2019-20 was five minutes and 6 seconds during the day (6am to 6pm) on weekdays and six minutes and 42 seconds on weekends, and 11 minutes and six seconds at night (6pm to 6am).

There are 102 general licenses with special conditions (Access Taxis).

Passenger Transport Standards Committee

The Passenger Transport Standards Committee (PTSC) is a statutory committee, established under the PT Act, responsible for exercising disciplinary powers under Part 4, Division 5 of the PT Act and for exercising or performing such other powers or functions as may be conferred on the PTSC by the Minister from time to time.

In 2019-20, the PTSC sat on 76* occasions and considered 732 matters including:

- 168 accreditation applications
- 564 disciplinary matters.

Of the 564 disciplinary matters, the PTSC:

- suspended the accreditation of 239 accredited persons for a period of time;
- revoked the accreditation of 318 accredited persons and disqualified them for a period of time; and
- permanently disqualified one person from holding accreditation under the PT Act.

Disciplinary matters included people who failed to demonstrate they met the requirements to hold an accreditation.

After holding an enquiry, the PTSC found no cause for disciplinary action against two accredited persons, while the remaining accredited persons were fined or reprimanded.

In addition to the above disciplinary matters, the PTSC also placed conditions on the accreditation of four persons.

**Due to the COVID-19 health emergency, the PTSC did not hold face to face hearings for a period of nine weeks between March and May 2020. Face to face hearings recommenced in late May 2020.*

Act or Regulation	Requirement
<i>Harbors and Navigation Act 1993</i>	Section 10 (1) The CE must, on or before 31 October in each year, report on the administration of this Act during the preceding financial year. (2) The Minister must, within six sitting days after receiving the report, cause copies to be laid before both Houses of Parliament.

Report on the administration of the *Harbors and Navigation Act 1993*

The following report is provided in accordance with Section 10 of the *Harbors and Navigation Act 1993* (the Act) for the 2019-20 financial year.

Lifejackets

The Harbors and Navigation Regulations changes for the wearing of lifejackets came in to force in December 2017, which prompted an increase in the wear rate of lifejackets and has been credited with a reduction in drownings since their introduction.

The life jacket program has been successful with many boaters purchasing new lifejackets that are suitable to the new regulations, and an increased awareness of the need to wear lifejackets.

Registration and Licences

A total number of 4,974 new boat licences were issued in the 2019-20 financial year, along with 125 special permits for persons aged 12 to 15. There were a total of 291,963 boat licence holders in SA in this period.

In terms of registration, there were 2,332 new boat registrations in the 2019-20 financial year.

Safety Strategies

A 12 month education and communication program for lifejackets was finalised in December 2019, which coincided with the commencement of a compliance campaign to ensure the safety of boaters on the state's waterways.

Part of the 2019-20 summer safety strategy has been to move to digital platforms for publications. The boat operator's licence examination paper tests have been updated with a focus on current regulations.

During this period a survey was conducted to provide an overview of boater's knowledge, demographics, age profile and input into the direction of boating. This information will assist in the formation of the 2020-21 summer safety strategy.

DPTI continues to issue boating safety related information, which includes flyers and safety messages through social media.

Aquatic Activity Licences

Aquatic Activity Licenses are issued to organisations for the purpose of an aquatic sport, activity or other purpose to be conducted on state waters. During this financial year an online aquatic activity process was trialled and has recently been implemented. Stakeholders were consulted and informed of the new process.

This process will provide for a more responsive and efficient service for organisations applying for an aquatic activity. The new process has gone live for the coming summer season.

During the 2019-20 financial year, 120 Aquatic Activity Licenses were issued for such events as races, exhibitions and fireworks displays.

Pilotage

The South Australian Government is responsible for issuing pilot licenses and pilotage exemptions for a vessel 35 metres or more in length which must not be navigated within a 'prescribed area' (compulsory pilotage area) unless the vessel is navigated under the control or at the direction of a licensed pilot; or the master of the vessel holds a Pilotage Exemption certificate; or the vessel is a Royal Australian Navy vessel.

There have been two Pilot Licences issued along with 21 pilotage exemptions for the 2019-20 financial year.

Safety operation of vessels

The department employs a team of Marine Safety Officers throughout the state of South Australia who conduct routine and targeted patrols by land and by water to observe boating behaviours and to inspect vessels for compliance for safety equipment, registration and licensing requirements.

Approximately 4,558 recreational vessels were inspected during the 2019-20 financial year. Of those inspected, 640 expiation notices and 1,446 cautions were issued to owners or operators for a range of offences, mostly related to the failure to carry items of safety equipment, speeding or for operating whilst unlicensed or unregistered. There were 3 offences during the 2019-20 financial year that were reported to Court, while another 414 vessels were required to stop launching and 130 were sent ashore.

Waterways management

Dredging works were carried out at the O'Sullivan Beach boat ramp and North Haven marina to clear the channels to ensure the safe passage of vessels.

30 new navigation beacons were installed to mark the navigation channels near Stansbury, Narrung (between Lake Alexandrina and Lake Albert), and in the Coorong channel between the Murray Mouth and Tauwitchere Barrage.

Marine Facilities

The State Government has continued to contribute towards boating infrastructure projects in regional areas of the state that are owned and managed by Local Councils.

In the 2019-20 financial year, approximately \$2.9 million was made available from the Facilities Fund to Local Councils.

Works that have been completed are:

- Emu Bay Boat Ramp Upgrade
- Morgan Boat Ramp Upgrade
- Encounter Bay Boat Ramp Installation of Vessel Holding Area
- Donovans Boat Ramp Upgrade
- Dry Creek Boat Ramp.

Works that are in progress include:

- Smoky Bay Pontoon Replacement
- Moores Boat Ramp Redevelopment
- Dicksons Reserve Multipurpose Floating Pontoon
- Franklin Harbour Marina Redevelopment
- Avoca Dell Bank Reclamation and Erosion Control
- St Kilda Boat Ramp Widening and Access Pontoon

- Waikerie Edgar Bartlett Drive Boat Ramp Upgrade
- Modification to Existing Blackpoint Boat Ramp
- Lock 6 Boat Ramp Upgrade.

Approximately \$2.2 million will be made available in the 2020-21 financial year.

Reporting required under the *Carers' Recognition Act 2005*

The principles of the Carers' Charter are incorporated into the department's strategic human resource framework, online training and corporate induction programs. Operating procedures set out the responsibilities of managers to assist employees to meet their caring responsibilities and provide a range of options to employees, including family carers' leave, flexible hours, flexible leave arrangements and access to special leave.

South Australians with severe and permanent disabilities which limit their capacity to use public transport independently are able to apply for transport assistance such as the Plus One Free Companion card and the South Australian Transport Subsidy Scheme. The Plus One Free Companion card provides assistance to people who cannot travel independently due to mobility, cognitive, sensory or communication impairments. Companions or carers accompanying Plus One Free Companion card holders travel on all Adelaide Metro bus, train and tram services free of charge.

The department provides public transport information for people with disability, their families and their carer's on the accessibility of the network, via the Adelaide Metro website, as well as the Adelaide Metro InfoLine and InfoCentres.

Public complaints

Number of public complaints reported for Public Transport (as required by the Ombudsman)

Complaint categories	Sub-categories	Example	Number of Complaints 2019-20
Professional behaviour	Staff attitude	Failure to demonstrate values such as empathy, respect, fairness, courtesy, extra mile; cultural competency	2,044

Service Improvements resulting from complaints or consumer suggestions over 2019-20

- In response to feedback, permanent metal 'No-Smoking' signage has been and will continue to be installed at large tram stops, train stations and large bus hubs. Approximately two to four signs are located at each location and are replaced when notified of vandalism. Standard bus stops and shelters have stickers installed by DPTI and Local Councils
- In response to the feedback, recharges are now available within one hour on the validator for all metroCARD recharges purchased via InfoLine and metroCARD website
- In response to the feedback, metroCARDS can now be purchased on the Adelaide Metro website and posted to customers. This assists those who are interstate visitors or unable to purchase at a retailer
- In response to the feedback, the Adelaide Metro website now displays Real-Time services going in all directions
- In response to the feedback, DPTI now operate an earlier 992 school bus on Tuesday afternoons to accommodate the needs of Mary Mackillop College and others that use the service
- In response to the feedback, DPTI installed a new bus stop post at stop 13D Grange Road
- Previously Passenger Service Assistants were advised not to accept any digital versions of approved concessions and student passes for travel. Since receipt of a complaint, Rail Operations have provided an employee notice advising that digital versions of concession and student passes be accepted. An extension to this, customers who hold a student metroCARD and are visibly wearing a school uniform will not be required to present student identification
- Implemented streamlined procurement processes for services contract which support out infrastructure program
- CBD Service SA streamlined process to reduced waiting time for our customers
- Developed and rolled out a virtual room for community engagement on for our major projects
- Increased transparency of the State Commission Assessment Panel to improve confidence in decision making
- Policy update to Historic Registration application to allow one report for a joint ownership
- New policy for overseas licence holders that need a new photograph for their licence introduced. Photos can now be supplied electronically
- Policy update to new owner re-registration transaction, no longer required to provide previous plate number
- Policy updated to allow renewal of motorcycle learner's permit for an additional nine months without Licence Policy approval (if expired less than one month)

- Policy and system enhancement to transfer interstate provisional licences at no fee
- System enhancement raised that prevents mail from being forwarded to a person that no longer resides at an address
- System enhancement in regards to digital renewal notices that are not delivered results in paper renewal being generated
- Hearse registrations able to be subscribed to direct debit
- Policy update to allow replacement number plates to be issued to unregistered vehicles
- Various website pages on sa.gov.au updated to include clearer and concise information
- Policy update to permit the waiving of an administration fee for learner permit renewals due to not being able to progress to a provisional licence as a result of COVID-19
- 'How to' videos relating to creating a mySA GOV account and allocating a CTP insurer to direct debit available on the Service SA website.

Mr T Braxton-Smith
Chief Executive
Department for Infrastructure and Transport
GPO Box 1533
ADELAIDE SA 5001

Dear Mr Braxton-Smith

Audit of Department of Planning, Transport and Infrastructure for the year to 30 June 2020

We have completed the audit of your accounts for the year ended 30 June 2020. Two key outcomes from the audit are the:

- 1 Independent Auditor's Report on your agency's financial report
- 2 audit management letters recommending you address identified weaknesses.

1 Independent Auditor's Report

We are returning the financial statements for Department of Planning, Transport and Infrastructure, with the Independent Auditor's Report. This report is unmodified.

My annual report to Parliament indicates that we have issued an unmodified Independent Auditor's Report on your financial statements.

2 Audit management letters

During the year, we sent you audit management letters detailing the weaknesses we noted and improvements we considered you need to make including matters we considered in forming our collective opinion on financial controls required by the *Public Finance and Audit Act 1987*.

Significant matters related to controls over the Across Government Facilities Services Arrangements (AGFMA), asset management, procurement, contract and project management, payroll processing, and information technology controls.

We have received responses to our letters and will follow these up in the 2020-21 audit.

I have also included summary comments about these matters in my annual report. These identify areas we assessed as not meeting a sufficient standard of financial management, accounting and control.

What the audit covered

Our audits meet statutory audit responsibilities under the *Public Finance and Audit Act 1987* and the Australian Auditing Standards.

Our audit covered the principal areas of the agency's financial operations and included test reviews of systems, processes, internal controls and financial transactions. Some notable areas were:

- accounts payable
- payroll
- bus contracts
- grants and subsidies
- fees and charges, including motor registrations, driver licences, land services and passenger transport fares
- income and expenditure for maintenance, property rental and building construction services
- accounts receivable
- Commonwealth revenues
- bank accounts and reconciliations
- general ledger
- governance, including risk management and legal compliance
- fixed assets including, capital works, network assets, land buildings and facilities and plant and equipment
- project delivery and management
- procurement and contract management
- asset management for road, marine and the Adelaide Oval
- the AGFMA
- acquisition and disposal of land and buildings
- information technology controls for selected systems.

Particular attention was given to the assumptions included in the revaluation of road assets and the recognition of lease liabilities, right of use assets and finance lease receivables as a result the implementation of AASB 16 *Leases*. We concluded that the financial report was prepared in accordance with the financial reporting framework in this respect.

Opportunities for improvement

The department performed a revaluation of the road assets as at 1 July 2019, resulting in a significant increase in road assets of \$5.5 billion (32%).

We note that the revaluation was originally scheduled to be completed in the previous financial year (ie: as at 1 July 2018), however due to the magnitude of the increase in value the department elected to perform important additional quality control work.

The revaluation, however, was not completed until late in the financial year. A draft revaluation report provided to us on 7 August 2020, with the final provided on 13 August 2020. The magnitude, complexity and nature of the road asset valuation requires significant audit resources to review.

The late provision of information for audit review unnecessarily increases the risk that we will not complete our work in time to meet reporting deadlines. For this year, the delay in finalising the valuation required us to contract additional resources to complete the financial statement audit.

For valuations performed as at 1 July, it is reasonable to expect that the revaluation process and associated documentation is finalised well before the end of the financial year. During 2020-21 my staff will work with yours to agree on processes designed to ensure future valuations are concluded earlier.

I would like to thank the staff and management of your agency for their assistance during this year's audit.

Yours sincerely

Andrew Richardson
Auditor-General

To the Chief Executive Department for Infrastructure and Transport

Opinion

I have audited the financial report of Department of Planning, Transport and Infrastructure for the financial year ended 30 June 2020.

In my opinion, the accompanying financial report gives a true and fair view of the financial position of the Department of Planning, Transport and Infrastructure as at 30 June 2020, its financial performance and its cash flows for year then ended in accordance with relevant Treasurer's Instructions issued under the provisions of the *Public Finance and Audit Act 1987* and Australian Accounting Standards.

The financial report comprises:

- a Statement of Comprehensive Income for the year ended 30 June 2020
- a Statement of Financial Position as at 30 June 2020
- a Statement of Changes in Equity for the year ended 30 June 2020
- a Statement of Cash Flows for the year ended 30 June 2020
- Notes, comprising significant accounting policies and other explanatory information
- a Statement of Administered Comprehensive Income for the year ended 30 June 2020
- a Statement of Administered Financial Position as at 30 June 2020
- a Statement of Administered Changes in Equity for the year ended 30 June 2020
- a Statement of Administered Cash Flows for the year ended 30 June 2020
- a Schedule of Expenses and Income attributable to administered activities for the year ended 30 June 2020
- notes, comprising significant accounting policies and other explanatory information for administered items
- a Certificate from the Chief Executive and the Executive Director, People and Corporate Services.

Basis for opinion

I conducted the audit in accordance with the *Public Finance and Audit Act 1987* and Australian Auditing Standards. My responsibilities under those standards are further described in the 'Auditor's responsibilities for the audit of the financial report' section of my report. I am independent of Department of Planning, Transport and Infrastructure. The *Public Finance and Audit Act 1987* establishes the independence of the Auditor-General. In conducting the audit, the relevant ethical requirements of APES 110 *Code of Ethics for Professional Accountants* (including Independence Standards) have been met.

I believe that the audit evidence I have obtained is sufficient and appropriate to provide a basis for my opinion.

Responsibilities of the Chief Executive for the financial report

The Chief Executive is responsible for the preparation of the financial report that gives a true and fair view in accordance with relevant Treasurer's Instructions issued under the provisions of the *Public Finance and Audit Act 1987* and Australian Accounting Standards, and for such internal control as management determines is necessary to enable the preparation of the financial report that gives a true and fair view and that is free from material misstatement, whether due to fraud or error.

Auditor's responsibilities for the audit of the financial report

As required by section 31(1)(b) of the *Public Finance and Audit Act 1987*, I have audited the financial report of Department of Planning, Transport and Infrastructure for the financial year ended 30 June 2020.

My objectives are to obtain reasonable assurance about whether the financial report as a whole is free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes my opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Australian Auditing Standards will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of this financial report.

As part of an audit in accordance with Australian Auditing Standards, I exercise professional judgement and maintain professional scepticism throughout the audit. I also:

- identify and assess the risks of material misstatement of the financial report, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for my opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control

- obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Department of Planning, Transport and Infrastructure's internal control
- evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Chief Executive
- evaluate the overall presentation, structure and content of the financial report, including the disclosures, and whether the financial report represents the underlying transactions and events in a manner that achieves fair presentation.

My report refers only to the financial report described above and does not provide assurance over the integrity of electronic publication by the entity on any website nor does it provide an opinion on other information which may have been hyperlinked to/from the report.

I communicate with the Chief Executive about, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that I identify during the audit.

Andrew Richardson

Auditor-General

25 September 2020

Department of Planning, Transport and Infrastructure CERTIFICATION OF THE FINANCIAL STATEMENTS

We certify that the:

- financial statements of the Department of Planning, Transport and Infrastructure:
 - are in accordance with the accounts and records of the Department; and
 - comply with relevant Treasurer's instructions; and
 - comply with relevant accounting standards; and
 - present a true and fair view of the financial position of the Department at the end of the financial year and the result of its operations and cash flows for the financial year.
- Internal controls employed by the Department of Planning, Transport and Infrastructure over its financial reporting and its preparation of the financial statements have been effective throughout the financial year.

Department of Planning, Transport and Infrastructure

Notes to and forming part of the financial statements

for the year ended 30 June 2020

1 About the Department of Planning, Transport and Infrastructure

The Department of Planning, Transport and Infrastructure (the department) is a government department of the State of South Australia, established pursuant to the *Public Sector Act 2009*. The department is an administrative unit acting on behalf of the Crown.

The financial statements and accompanying notes include all the controlled activities of the department.

The department does not control any other entity and has no interests in unconsolidated structured entities.

Transactions and balances relating to administered resources are not recognised as departmental controlled income, expenses, assets and liabilities.

As administered items are significant in relation to the department's overall financial performance and position, they are disclosed in the Administered Financial Statements following the controlled departmental general purpose financial statements. Except as otherwise disclosed administered items are accounted for on the same basis and using the same accounting policies as for departmental transactions.

1.1 Basis of preparation

The financial statements are general purpose financial statements prepared in compliance with:

- section 23 of the *Public Finance and Audit Act 1987*;
- Treasurer's Instructions and Accounting Policy Statements issued by the Treasurer under the *Public Finance and Audit Act 1987*; and
- relevant Australian Accounting Standards.

For the 2019-20 financial statements the department adopted *AASB 15 – Revenue from Contracts with Customers*, *AASB 16 – Leases* and *AASB 1058 – Income of Not-for-Profit Entities*. Further information is provided in note 9.

The financial statements have been prepared based on a 12 month reporting period and presented in Australian currency. The historical cost convention is used unless a different measurement basis is disclosed.

Income, expenses and assets are recognised net of the amount of GST except:

- when the GST incurred on a purchase of goods or services is not recoverable from the Australian Tax Office (ATO) in which case the GST is recognised as part of the cost of acquisition of the asset or as part of the expense item applicable; and
- receivables and payables, which are stated with the amount of GST included.

The net amount of GST recoverable from, or payable to the ATO is included as part of receivables or payables in the Statement of Financial Position.

Assets and liabilities that are to be sold, consumed or realised as part of the 12 month operating cycle have been classified as current assets or current liabilities. All other assets and liabilities are classified as non-current.

Significant accounting policies are outlined in Note 8.3 and within the Notes.

1.2 Objectives and programs

The department has diverse responsibilities for transport systems and services, infrastructure planning and provision, and strategic land use within South Australia.

The department ensures that South Australia's needs for the movement of people and freight, and the delivery of services across the transport and infrastructure sectors, are met in a safe, efficient, cost effective and sustainable manner. The department also plays a leadership role in the management of public sector building assets and infrastructure, statutory services and information to the community relating to land titling and administration functions, and the state's land use and development planning for all South Australians.

Department of Planning, Transport and Infrastructure
Notes to and forming part of the financial statements
for the year ended 30 June 2020

1.2 Objectives and programs (continued)

Departmental Organisation

The structure of the department has been established in a manner that provides clear accountabilities and responsibilities for all divisions and enables an open and steady flow of information between these areas.

The divisions of the department as at 30 June 2020 are:

- Across Government Services;
- People and Corporate Services;
- Planning and Land Use Services;
- Transport Planning and Program Development;
- South Australian Public Transport Authority;
- Road and Marine Services;
- Transport Project Delivery; and
- North-South Corridor Program Delivery Office.

In achieving its objectives, the department provides a range of services classified into the following programs:

Program 1 Road Safety

Provision of policy and investment advice, community information on road safety, and the provision of services for safe and sustainable road use and travel behaviour.

Program 2 SA Public Transport Authority

Provision and maintenance of safe, efficient, equitable and accessible public transport services in metropolitan Adelaide and assisting regional councils and communities to deliver diverse passenger transport services.

Program 3 Roads and Marine

Provision of safe, effective and efficient maintenance and operational services to manage the department's controlled road and marine infrastructure. This program also includes the regulation of driver and vehicle access to the transport network.

Program 4 Delivery of Transport Projects

Provision of major infrastructure safely and efficiently to sustain and support growth, and maximise the benefit of government's investment in transport assets.

Program 5 Provision and Management of Across Government Services

Provision of services to government agencies for the construction and maintenance of buildings and facilities management of property assets.

Department of Planning, Transport and Infrastructure
Notes to and forming part of the financial statements
for the year ended 30 June 2020

Program 6 Infrastructure Planning and Policy

Establishes strategic plans, standards and program management frameworks for network development to deliver positive community and economic benefits for South Australians. As well as statutory services and information to the community relating to land titling and administration functions.

Program 7 Land Use Planning

Administering the South Australian Planning and Development System, leading and presenting South Australia's strategic land use and development planning, and assessing applications for land use and development.

The disaggregated disclosures schedules present expenses, income, assets and liabilities information attributable to each of the activities for the years ended 30 June 2020 and 30 June 2019 below.

for the year ended 30 June 2020

1.3 Impact of COVID-19 pandemic on the department

The COVID-19 pandemic has impacted on the operations of the department in 2019-20 financial year. The estimate of the key impacts on the department in 2019-20 were:

- Additional \$3.3 million in cleaning and sanitising measures across the public transport network to enhance public safety;
- A financial assistance package of \$1.8 million to ensure that regional passenger bus services remain viable and the service is maintained for community needs;
- A financial assistance package of \$4.9 million to the taxi industry due to declined patronage as a result of COVID-19 restrictions implemented;
- A reduction in Public transport ticket and associated revenue due to less demand for services (refer note 4.2);
- The mobilisation of staff to assist with State COVID-19 initiatives;
- Provision of free public transport for SA Health staff; and
- Provision of rent relief for commercial tenants.

In addition to the above impacts the below stimulus packages were also approved:

- A \$85 million Road Infrastructure stimulus package targeting regional and National highway road projects and a \$60 million regional Road Safety stimulus package to be co-funded by the Commonwealth government; and
- A \$6 million road maintenance stimulus package funded by the State aimed at small and medium sized businesses to ensure continuity of works in regional and metropolitan areas;

As a result of the pandemic's impact on the economic environment, this may result in an impairment on the value of the department's assets and liabilities. The department will continue to monitor the impact of COVID-19 on the department. Note 10.4 provides information on the COVID-19 pandemic outlook for the department.

1.4 Budget performance

The budget performance table compares the department's outcomes against budget information presented to Parliament (2019-20 Budget Paper 4, Volume 3). The budget amounts have not been adjusted to reflect revised budgets or administrative restructures.

The original budget and budget process is not subject to audit.

			6 323	5 550
TOTAL COMPREHENSIVE RESULT		773 125	856	731

The following are brief explanations of variances between original budget and actual amounts. Explanations are provided for variances where the variance exceeds the greater of 10% of the original budgeted amount and 5% of original budgeted total expenses.

- Commonwealth Revenue was lower than original budget largely due to the timing of Commonwealth contributions towards the Gawler Line Electrification, Joy Baluch AM Bridge, North South Corridor Darlington Upgrade and APY Lands Main Access Road Upgrade major projects.
- Changes in depreciation expense is predominantly due to an increase of revised budget and expenditure for Right-of-Use assets upon the adoption of AASB 16 and depreciation related to the road network asset revaluation.

Department of Planning, Transport and Infrastructure
Notes to and forming part of the financial statements
for the year ended 30 June 2020

1.4 Budget Performance (continued)

- c) Cash alignment payments to the Department of Treasury and Finance are recognised annually in September. Per the original published budget papers there is no budget allocated.
- d) Changes in the revaluation surplus are predominantly due to the revaluation of the road network asset.

INVESTING EXPENDITURE SUMMARY

	Note	Original Budget 2020 \$'000	Actual 2020 \$'000	Variance \$'000
Investing Expenditure Summary				
Total new projects		92 000	94 201	2 201
Total existing projects	e	929 910	774 912	(154 998)
Total annual programs		145 795	155 312	9 517
			1 024	
Total investing expenditure		1 167 705	425	(143 280)

- e) Total existing projects investing expenditure was lower than original budget in accordance with the delivery schedules on projects including the Gawler line Electrification, Duplication of Joy Baluch AM Bridge and the Extension of the Tonsley Rail Line to the Flinders Medical Centre major projects.

Department of Planning, Transport and Infrastructure
Notes to and forming part of the financial statements
for the year ended 30 June 2020

1.5 Significant transactions with government related entities

All significant transactions with SA government related entities are identifiable in this financial report.

2 Board, committees and employees

2.1 Key Management Personnel

Key management personnel of the department include the Minister for Transport, Infrastructure and Local Government, the Chief Executive Officer and the members of the Executive Team who have responsibility for the strategic direction and management of the department.

The compensation detailed below excludes salaries and other benefits the Minister for Transport, Infrastructure and Local Government receives. The Minister's remuneration and allowances are set by the *Parliamentary Remuneration Act 1990* and the Remuneration Tribunal of SA respectively and are payable from the Consolidated Account (via the Department of Treasury and Finance) under section 6 the *Parliamentary Remuneration Act 1990*.

	2020	2019
	\$'000	\$'000
Compensation		
Salaries and other short term employee benefits	2 156	1 629
Post-employment benefits	739	381
Other long-term employment benefits	-	126
Termination benefits	-	429
Total compensation	2 895	2 565

Transactions with key management personnel and other related parties

There were no transactions with key management personnel and other related parties during the year.

Department of Planning, Transport and Infrastructure
Notes to and forming part of the financial statements
for the year ended 30 June 2020

2.2 Board and Committee Members

Members during the 2019-20 financial year were:

Passenger Transport Standards Committee

BIRCH C P (re-appointed 01/01/2020)
DUNSTONE J (re-appointed 01/01/2020)
EDMONDS D (re-appointed 01/01/2020)
KING B (re-appointed 01/01/2020)
MADAN V (re-appointed 01/01/2020)
MORTIMER K P* (re-appointed 01/01/2020)
OPIE A L (re-appointed 01/01/2020)
SIMIONATO P (re-appointed 01/01/2020)

Notes to and forming part of the financial statements
for the year ended 30 June 2020

2.2 Board and Committee Members (continued)

*In accordance with the Premier and Cabinet Circular No. 016, government employees did not receive any remuneration for board/committee duties during the financial year.

** In 2019-20 these members were temporarily appointed to participate on a Ministerial Development Plan Amendments Hearing Panel.

*** In December 2019 the State Planning Commission approved a new terms of reference to reform the Building Committee (BC) to the Building Technical Panel (BTP). The BTP will undertake delegated building-related statutory functions of the Commission under the Planning, Development Infrastructure Act 2016 (PDI Act) and the Development Act 1993.

Board and Committee Remuneration

	2020	2019
	Number	Number
The number of members whose remuneration received/receivable falls within the following bands:		
\$0 - \$19 999	33	26
\$20 000 - \$39 999	-	5
\$40 000 - \$59 999	5	5
\$60 000 - \$79 999	4	3
\$140 000 - \$159 999	-	1
\$160 000 - \$199 999	1	-
Total Number of Members	43	40

Remuneration of members reflects all costs of performing committee member duties including sitting fees, superannuation contributions, fringe benefits tax and other salary sacrifice arrangements. The total remuneration received by members was \$0.843 million (\$0.863 million).

2.3 Employee Benefits Expenses

	2020	2019
	\$'000	\$'000
Salaries and wages	171 263	177 902
Board and committee fees	611	825
Employment on-costs - superannuation	14 339	19 451
Employment on-costs - payroll	8 423	10 928
Annual leave	13 988	17 955
Long service leave	9 023	8 137
Workers compensation expenses	2 488	532
TVSPs payments (refer below)	3 147	5 683
Skills and Experience Retention Leave	699	983
Other employee related expenses	1 394	2 434
Total Employee Benefit Expenses	225 375	244 830

The superannuation employment on-cost represents the department's contributions to superannuation plans in respect of current services of current employees.

Department of Planning, Transport and Infrastructure
Notes to and forming part of the financial statements
for the year ended 30 June 2020

2.3 Employee Benefits Expenses (continued)

Remuneration of Employees

	2020 Number	2019 Number
The number of employees whose remuneration received or receivable falls within the following bands:		
\$151 000 - \$154 000 *	n/a	3
\$154 001 - \$174 000	38	25
\$174 001 - \$194 000	18	20
\$194 001 - \$214 000	3	1
\$214 001 - \$234 000	4	10
\$234 001 - \$254 000 (a), (c)	3	4
\$254 001 - \$274 000	3	1
\$274 001 - \$294 000 (b), (c)	8	2
\$294 001 - \$314 000 (c)	2	2
\$314 001 - \$334 000 (d)	1	4
\$334 001 - \$354 000	1	1
\$354 001 - \$374 000 (a)	2	1
\$474 001 - \$494 000	1	-
\$794 001 - \$814 000 (c)	-	1
Total Number of Employees	84	75

*This band has been included for the purposes of reporting comparative figures based on the executive base level remuneration for 2018-19.

The table includes all employees who received remuneration equal to or greater than the base executive remuneration level during the year.

Remuneration of employees reflects all costs of employment including salaries and wages, payments in lieu of leave, superannuation contributions, salary sacrifice benefits and fringe benefits and any fringe benefits tax paid or payable in respect of those benefits. The total remuneration received by these employees for the year was \$17.2 million (\$15.6 million).

(a) 2020 - includes TVSP payment for one employee

(b) 2020 - includes TVSP payment for three employees

(c) 2019 - includes TVSP / executive termination payment for one employee

(d) 2019 - includes TVSP / executive termination payment for three employees

The department had 45 (39) Executives as at 30 June 2020.

There were no executive termination payments in 2019-20 (2018-19: \$0.700 million).

Department of Planning, Transport and Infrastructure
Notes to and forming part of the financial statements
for the year ended 30 June 2020

2.3 Employee Benefits Expenses (continued)

Targeted Voluntary Separation Packages (TVSPs)

The number of employees who received a TVSP during the reporting period was 37 (2019: 66).

	2020	2019
	\$'000	\$'000
Amounts paid during the reporting period to separated employees:		
TVSPs	3 147	5 683
Leave paid to separated employees	1 671	2 958
	4 818	8 641
Recovery from the Department of Treasury and Finance	(2 338)	(5 202)
Net Cost to the Department	2 480	3 439

Department of Planning, Transport and Infrastructure
Notes to and forming part of the financial statements
for the year ended 30 June 2020

2.4 Employee Benefits Liability

	2020	2019
	\$'000	\$'000
Current:		
Annual leave	23 226	21 024
Long service leave	6 776	6 591
Skills and Experience Retention Leave	1 861	1 645
Accrued salaries and wages	5 581	4 123
Total Current Employee Benefits	37 444	33 383
Non-Current:		
Long service leave	69 712	73 706
Total Non-Current Employee Benefits	69 712	73 706
Total Employee Benefits	107 156	107 089

Employee benefits accrue to employees as a result of services provided up to the reporting date that remain unpaid. Long term employee benefits are measured at present value and short-term employee benefits are measured at nominal amounts.

Salaries and Wages, Annual Leave, Skills and Experience Retention Leave (SERL) and Sick Leave

The liability for salaries and wages is measured as the amount unpaid at the reporting date at remuneration rates current at reporting date.

The liability for annual leave and the skills and experience retention leave is expected to be payable within 12 months and is measured at the undiscounted amounts expected to be paid.

No provision has been made for sick leave as all sick leave is non-vesting and the average sick leave taken in future years by employees is estimated to be less than the annual entitlement for sick leave.

Long Service Leave

The liability for long service leave is measured as the present value of expected future payments to be made in respect of services provided by employees up to the end of reporting period using the projected unit credit method. Details about the measurement of long service leave is provided as Note 11.1.

Department of Planning, Transport and Infrastructure
Notes to and forming part of the financial statements
for the year ended 30 June 2020

3 Expenses

3.1 Supplies and Services

	2020	2019
	\$'000	\$'000
Supplies and Services		
Bus service contracts	217 842	219 419
Rail Commissioner salary reimbursements	71 398	74 408
Major infrastructure maintenance contracts	114 652	84 097
Other service contracts	127 779	113 215
Consultants	-	72
Operating leases**	-	167 055
Property expenses**	175 545	147 824
Plant, equipment and vehicle expenses	8 316	9 419
Land administration fees paid to Land Services SA	73 613	70 006
Information technology and communications	12 184	12 268
Materials and other purchases	18 820	19 731
Utilities	35 642	37 763
Insurance	5 494	5 338
Legal services	4 234	3 273
Short term and low value leases**	17 125	-
Commissions - transaction processing	1 946	2 186
Auditor's remuneration *	1 482	1 106
Administrative costs	7 502	8 191
State Planning Commission costs	45	50
Other	18 807	30 242
Total Supplies and Services	912 426	1 005 663

*For work performed by the Auditor-General's Department under the *Public Finance and Audit Act 1987*.

**Previously the department classified its leases as operating or finance leases based on the whether the lease transferred significantly all of the risks and rewards incidental to ownership of the asset to the lessee. Under the new accounting standard AASB16, the distinction between operating and finance leases no longer exists for lessee accounting. The non-lease components of operating leases have been recognised in property expenses above, refer to note 8.3 for more information.

From 1 July 2019, all leases, other than short term leases (under 12 months) and leases of low value assets are recognised as lease liabilities and lease assets (right-of-use assets and finance lease receivables) in the statement of financial position.

In accordance with AASB16, the majority of the department's former operating lease payments are now recognised as lease assets and lease liabilities. This includes lease agreements for office accommodation for the government sector, motor vehicles and other plant and equipment.

Lease expenses for short term and low value leases are recognised as an expense on a straight line basis over the lease term.

Department of Planning, Transport and Infrastructure
Notes to and forming part of the financial statements
for the year ended 30 June 2020

Consultants

The number and dollar amount of consultancies paid/payable that fell within the following bands:

	2020		2019	
	No.	\$'000	No.	\$'000
Below \$10 000	-	-	2	8
Above \$10 000	-	-	1	64
Total Paid / Payable to the Consultants Engaged	-	-	3	72

In determining the classification of expenditure on consultancies the department uses the definition of consultant from Treasurer's Instruction (Accounting Policy Statement) clause 4.

3.2 Depreciation and Amortisation

	2020	2019
	\$'000	\$'000
Depreciation:		
Network assets	391 887	302 095
Plant and equipment	57 653	52 316
Buildings and facilities	62 485	62 044
Right-of-use plant and equipment	3 248	-
Right-of-use building	101 459	-
Total Depreciation	616 732	416 455
Amortisation:		
Leased assets	-	880
Intangible assets	5 201	7 265
Total Amortisation	5 201	8 145
Total Depreciation and Amortisation	621 933	424 600

The useful life of an asset is generally determined on the basis of "economic useful life to the department". The useful lives of all major assets held by the department are reassessed on an annual basis.

All non-current assets having a limited useful life are systematically depreciated/amortised over their estimated useful lives in a manner that reflects the consumption of their service potential. Land, unsealed roads (graded and formed), rail and road earthworks, road pavement sub-base, non-current assets held-for-sale and works in progress are not depreciated.

The value of building assets under finance lease is amortised over the asset's useful life. Capitalised software is amortised over the useful life of the intangible asset.

Department of Planning, Transport and Infrastructure
Notes to and forming part of the financial statements
for the year ended 30 June 2020

3.2 Depreciation and Amortisation (continued)

Useful Life

Depreciation and amortisation for non-current assets is determined as follows:

<u>Asset Class</u>	<u>Depreciation Method</u>	<u>Estimated Useful Life</u>
Buildings and Facilities:		
Buildings and facilities	Straight Line	2 to 150 years
Dwellings	Straight Line	10 to 67 years
Right-of-use buildings	Straight Line	1 to 22 years
Plant and Equipment:		
Plant and equipment	Straight Line	3 to 96 years
Buses	Diminishing Value	15 to 25 years
Tram and train rolling stock	Straight Line	30 to 40 years
Information technology	Straight Line	3 to 15 years
Right-of-use plant and equipment	Straight Line	3 to 4 years
Network Assets:		
Roads (sealed surface)	Straight Line	25 to 30 years
Roads (sealed pavement)	Straight Line	48 to 77 years
Roads (sheeted)	Straight Line	18 years
Structures	Straight Line	10 to 195 years
Metro rail Infrastructure	Straight Line	10 to 149 years
Busway Infrastructure	Straight Line	10 to 100 years
Other	Straight Line	4 to 100 years
Intangible Assets:		
Intangible	Straight Line	3 to 19 years

Pavement sub-base, Earthworks, Graded and formed unsealed roads have indefinite useful lives and are not depreciated

Review of accounting estimates

In 2019-20 the department reassessed the useful life of some of its assets. This review resulted in a decrease of \$4.7million in depreciation expense for the 2019-20 year relative to the amount that would have been expenses based on the previous estimate of the useful life.

Department of Planning, Transport and Infrastructure
Notes to and forming part of the financial statements
for the year ended 30 June 2020

3.3 Grants and Subsidies

	2020	2019
	\$'000	\$'000
Grants and Subsidies		
Contribution for policing services	43 577	42 515
Transport Subsidy Scheme	9 007	11 573
Grants to local councils	15 172	9 276
Transport concessions	3 230	3 867
Business and job support fund*	5 711	-
Other	8 274	9 566
Total Grants and Subsidies	84 971	76 797

*In 2019-20 the department was responsible for the disbursement of financial assistance packages in the form of a subsidy payment to the taxi and regional passenger bus services industries. Refer to note 1.3 for more information.

3.4 Borrowing Costs

	2020	2019
	\$'000	\$'000
Interest paid/payable on Borrowing Costs:		
Interest on leases	24 026	704
Total Borrowing Costs	24 026	704

In 2019-20 the interest expense on leases increased due to the recognition of lease liabilities under AASB16. Refer to note 9.1 for further information.

Department of Planning, Transport and Infrastructure
Notes to and forming part of the financial statements
for the year ended 30 June 2020

3.5 Other Expenses

	2020	2019
	\$'000	\$'000
Other Expenses		
Rates, taxes and levies	9 245	9 273
Donated assets	7 071	47 330
Bad debts	805	16
Write-off of assets	2 625	10 843
Indentured Ports*	18 534	14 595
Local government and income tax equivalent payments	1 272	1 641
Other payments to consolidated account	3 851	5 759
Site remediation	6	370
Other	464	856
Total Other Expenses	43 873	90 683

* This relates to amounts paid to the Consolidated Account in accordance with section 90 of the *Harbors and Navigation Act 1993*.

Charges collected for cargo services and harbour services are allocated to the department and applied to the maintenance of indentured ports. Any remaining funds are paid to the Consolidated Account in accordance with section 90 of the *Harbors and Navigation Act 1993*. Assets associated with these ports include land and facilities at Port Bonython, Ardrossan and Whyalla.

Department of Planning, Transport and Infrastructure
Notes to and forming part of the financial statements
for the year ended 30 June 2020

4 Income

4.1 Appropriation

	2020	2019
	\$'000	\$'000
Appropriation		
Appropriations from Consolidated Account pursuant to the <i>Appropriation Act</i>	636 193	387 018
Total Appropriations	636 193	387 018

Appropriations are recognised on receipt. The increase in appropriation is predominantly due to additional funding in 2019-20 for the delivery of transport infrastructure projects.

This table does not show appropriations from equity contributions. Where money has been appropriated in the form of an equity contribution, the Treasurer has acquired a financial interest in the net assets of the department and the appropriation is recorded as contributed equity. Refer to the Statement of Changes in Equity.

4.2 Fees and Charges

	2020	2019
	\$'000	\$'000
Fees and Charges		
Drivers licence fees	67 567	76 958
Metrotickets	79 948	93 642
Motor registrations	493 389	451 235
Marine related fees and charges	29 493	26 425
Land services fees	16 621	16 240
Other fees and charges	33 799	34 297
Total Fees and Charges	720 817	698 797

Revenues from the levying of fees or charges set in accordance with various legislative acts (e.g. vehicle registration and drivers' licence fees) are recognised when the department obtains control over the funds. Control is generally obtained upon receipt of those funds.

The reduction in revenue from fees and charges for Metrotickets is largely due to the impact of the COVID-19 pandemic, refer to note 1.3 for more information.

Road Safety

In accordance with the *Highways Act 1926*, \$11.261 million (\$12.826 million) being one-sixth of driver's licence collections and \$1.024 million (\$0.986 million) being 1/100th of Heavy Vehicle Registrations, was applied towards funding transport safety related initiatives under the Road Safety activity.

Department of Planning, Transport and Infrastructure
Notes to and forming part of the financial statements
for the year ended 30 June 2020

4.3 Commonwealth-sourced grants and funding

	2020	2019
	\$'000	\$'000
Commonwealth-sourced grants and funding		
Commonwealth grants received via DTF*	285 087	550 073
National Land Transport Act 2014**	6 598	3 156
Other Commonwealth revenues***	127	351
Total Commonwealth-sourced grants and funding	291 812	553 580

* Commonwealth grants received from the Department of Treasury and Finance (DTF) represent mainly *Nation Building Program (National Land Transport) Act 2014* funding.

** *Nation Building Program (National Land Transport) Act 2014* represents Roads to Recovery funding.

*** Other Commonwealth revenue includes Remote Airstrip Upgrade funding.

Commonwealth sourced grants and funding are recognised as income on receipt.

Obligations under Commonwealth sourced grants and funding are required to be met by the State of South Australia. Where the department receives the grant monies via the Department of Treasury and Finance (DTF), for accounting purposes the obligations under the funding arrangements do not sit with the department. Hence, where the delivery of the programs, or infrastructure does not align with payments received by the State, contract assets or liabilities will be recognised by DTF as the representative of State of South Australia, not the department.

Where the department receives the grant monies directly from the Commonwealth (i.e. Roads to Recovery funding) the department is the representative of the State and the obligations under the funding arrangements rest with the department. Roads to Recovery funding is recognised progressively as the department satisfies its obligations under the agreement through its capital expenditure on this program. At 30 June 2020 the department did not have any unsatisfied obligations on the funds received as all funds were spent. Therefore a contract asset (unearned revenue) has not been recognised.

4.4 Intra-government transfers

	2020	2019
	\$'000	\$'000
Intra-government transfers		
Intra-government transfers	44 318	23 065
Transfers from contingency provisions	35 664	10 836
Transfers from Funds SA*	-	142 700
Total Intra-government transfers	79 982	176 601

Intra-government transfers relate to amounts received from other SA government entities for the delivery of departmental objectives. These are recognised as income on receipt.

*In 2018-19 \$142.7million was received from Funds SA on behalf of the Motor Accident Commission and paid into the Highways Fund.

Department of Planning, Transport and Infrastructure
Notes to and forming part of the financial statements
for the year ended 30 June 2020

4.5 Sales of Goods and Services

	2020	2019
	\$'000	\$'000
Sale of Goods and Services		
Maintenance services	134 938	135 885
Other sale of goods and services	46 030	37 920
Total Sale of Goods and Services	180 968	173 805

Revenues are derived from the provision of goods and services to other SA Government agencies and to the public. These revenues are driven by consumer demand and are recognised upon the delivery of those goods and services to the customers or by reference to the stage of completion.

Maintenance services:

In its role as across government facilities manager the department provides property maintenance and enhancement services to its portfolio of buildings, facilities and assets. It recovers the cost of providing these services from client agencies. This revenue is recognised over time after once the department has satisfied its performance obligations. Clients are invoiced in arrears of the performance obligations being satisfied.

Other sale of goods and services:

Project and contract management fees

The department acts as project manager for major capital works in relation to government buildings and government accommodation and for a range of minor capital works and maintenance type activities associated with the role of facilities manager. The department charges a fee to recover the cost of its project management activities which is recorded as revenue over time as it delivers the service.

Contract Balances:

As at 30 June 2020 the department held contract assets of \$43.604m (\$48.773m) included in the balance of receivables (note 6.2) in relation to Sales of Goods and Services revenue.

Contract assets relate to maintenance services and represents the department's rights to consideration for work completed but not yet billed at the reporting date.

Department of Planning, Transport and Infrastructure
Notes to and forming part of the financial statements
for the year ended 30 June 2020

4.6 Rental Income

	2020	2019
	\$'000	\$'000
Rental Income		
Government accommodation	192 505	208 329
Property rents and recoveries	3 581	3 794
Other	5 498	5 663
Total Rental Income	201 584	217 786

Rental income consists of income from the provision of office accommodation to general government sector agencies, government employee housing rent and other property rentals. Office accommodation rental is payable monthly in advance, other rentals are payable in arrears.

Under AASB15, contract assets and liabilities are recognised where consideration has been received for rental periods in advance or rental periods in arrears. Contract assets and liabilities in relation to rental income are immaterial and therefore not recognised.

Where the department has lease agreements as intermediate sub-lessor recognised under AASB16, a finance lease receivable has been recognised. Rental income previously recognised here for those leases is now apportioned between periodic interest revenue and reduction of the lease receivable. Refer Note 6.2.

4.7 Grants and Subsidies

	2020	2019
	\$'000	\$'000
Concessional passenger income	58 080	59 200
Business and job support fund*	6 736	-
Other	109	322
Total Grants and Subsidies	64 925	59 522

Concessional Passenger income relates to funding received from other government agencies in relation to concessional travel provided to pensioners, the unemployed and students on passenger transport in metropolitan and regional areas.

*In 2019-20 the department received subsidies from the Business and Job Support Fund for the disbursement of financial assistance packages to the taxi and regional passenger bus services industries. Refer to note 1.3 for more information.

4.8 Interest

	2020	2019
	\$'000	\$'000
Interest on deposit accounts	988	1 551
Interest on finance leases	5 103	90
Total Interest	6 091	1 641

The interest on deposit accounts relates predominantly to the Rail Transport Facilitation Fund, Boating Administration Working Account and Commonwealth Funding Received for Specific Projects.

Department of Planning, Transport and Infrastructure
Notes to and forming part of the financial statements
for the year ended 30 June 2020

4.9 Resources Received Free of Charge

	2020	2019
	\$'000	\$'000
Resources received/receivable free of charge:		
Land, buildings and facilities	7	-
Plant and equipment	46	82
Services provided by Shared Services SA	4 721	5 217
Total Resources Received Free of Charge	4 774	5 299

Resources received free of charge were recognised at their fair value.

Services were provided free of charge by Shared Services SA as the department is a non-billable client.

Department of Planning, Transport and Infrastructure
Notes to and forming part of the financial statements
for the year ended 30 June 2020

4.10 Net Gain (Loss) from Disposal of Non-Current Assets

	2020	2019
	\$'000	\$'000
Net gain (loss) from the disposal of non-current assets received / receivable:		
Land, Buildings and Facilities:		
Proceeds from disposal	6 197	2 434
Net book value of assets disposed	(6 274)	(4 195)
Net gain (loss) from disposal of land, buildings and facilities	(77)	(1 761)
Plant and Equipment:		
Proceeds from disposal	1 699	-
Net book value of assets disposed	(1 366)	(25)
Net gain (loss) from disposal of plant and equipment	333	(25)
Non-Current Assets Held for Sale:		
Proceeds from disposal	12 440	15 525
Net book value of assets disposed	(9 793)	(8 479)
Costs incurred to facilitate disposal	(354)	(141)
Net gain (loss) from disposal of non-current assets held for sale	2 293	6 905
Total Assets:		
Proceeds from disposal	20 336	17 959
Net book value of assets disposed	(17 433)	(12 699)
Costs incurred to facilitate disposal	(354)	(141)
Total net gain (loss) from disposal of non-current assets	2 549	5 119

Gains/Losses from the disposal of non-current assets are recognised on a net basis when control of the asset has passed to the buyer. When revalued assets are sold, the revaluation surplus is transferred to retained earnings.

for the year ended 30 June 2020

5.1 Land, Buildings and Facilities (continued)

Valuation of Land, Buildings and Facilities

For non-specialised land, buildings and facilities the valuer arrived at fair value using the market approach. The valuation was based on recent market transactions for similar land, buildings and facilities in the area and includes adjustments for factors specific to the land, buildings and facilities being valued, such as size and location. Refer to note 11.2.

Specialised land i.e. land dedicated to marine purposes and land in the rail corridor, have their values discounted to account for the restriction in their use to arrive at fair value. These land categories usually comprises of individual parcels.

For specialised buildings and facilities the valuer used depreciated replacement cost due to there not being an active market for such buildings and facilities. The valuation was based on a combination of internal records, specialised knowledge and acquisition/transfer costs. Rail infrastructure assets revalued in 2018-19 were indexed using the appropriate construction index and the revaluation was done by the Office of the Valuer-General.

Land under Road and Land for Current Projects are not revalued according to the department's policy. The Department of Treasury and Finance coordinates with Valuer-General to ensure asset value attributed to Land under Road on consolidated financial report is recorded at fair value. Land for Current Project are land acquired for ongoing construction projects, they are usually transferred to Land under Road on project completion. Land under Roads are only recognised after 1 July 2008.

Right-of-Use (ROU) Buildings

Right of Use (ROU) buildings leased by the department are recorded at cost. Movements in the ROU buildings are shown in the above movement schedule. Short term leases of 12 months or less and low value leases where the underlying asset value is less than \$15,000 are not recognised as right-of-use assets. The associated lease payments are recognised as an expense and disclosed in Note 3.1.

The department leases properties from external landlords to provide office and other accommodation for the whole of the government sector. These leases are now recognised on the statement of financial position as right-of-use building assets and lease liabilities in accordance with AASB16 Leases. The lease liabilities related to the ROU buildings are disclosed in Note 7.2. The department's maturity analysis of its lease liabilities is disclosed in Note 11.3. Expenses related to leases, including depreciation and interest expenses, are disclosed in note 3. Cash outflows related to leases are disclosed in note 8.2.

Valuation of Plant and Equipment

For non-specialised plant and equipment the valuer arrived at fair value using the market approach. The valuation was based on recent market transactions for similar plant and equipment and includes adjustments for factors specific to the plant and equipment being valued, such as size and location.

For specialised plant and equipment, the valuer used depreciated replacement cost due to there not being an active market for such plant and equipment. The valuation was based on a combination of internal records, specialised knowledge and acquisition/transfer costs.

Right- of-Use (ROU) vehicles

ROU vehicles leased by the department are recorded at cost. Movements in the ROU vehicles are shown in the above movement schedule.

Motor vehicles are leased from the South Australian Government Financing Authority (SAFA). Motor vehicle leases are non-cancellable, with rental payments monthly in arrears. Lease terms can range from 3 years (60,000km) up to 5 years (100,000km). No contingent rental provisions exist within the lease agreements and no options exist to renew the leases at the end of their term.

5.3 Network Assets (continued)

Valuation of Roads and Structures

Approval has been granted by the Treasurer for a variation to the requirements of Treasurer's Instructions (Accounting Policy Statements), which requires an independent valuation appraisal be performed at least every 6 years. The variation enables the department to value its road and structures assets using an internally developed revaluation methodology, with inputs for the key areas being provided by independent industry experts.

Departmental policy allows for the roads and structures assets to be revalued in accordance with the required timelines depending on the nature or purpose for which the asset is held, with indexing applied during intervening years, with the exception of the earthworks component. Indexing is applied using the Australian Bureau of Statistics' Road and Bridge Construction Price Index for South Australia as at 1 July.

In accordance with the department's policy, the roads and structures assets were due for revaluation in 2018-19. This revaluation was deferred to 2019-20 financial year. The deferral was primarily due to the determination that further assessment was needed to ensure the most accurate revaluation outcome was achieved for the state's road network asset.

The Department has adopted a network asset valuation model. This approach is defined as valuing a group of assets by applying representative stereotypes and associated unit rates (developed by independent experts) to calculate replacement costs.

All road and structures assets are valued at written down replacement cost by senior professional engineers with the knowledge and expertise in that area. Independent recognised industry experts are engaged to provide input with respect to key areas of the revaluation. As these assets have no active market, they are measured at written down replacement cost which is considered to be their fair value.

The valuation model segments the network assets into components that have similar engineering and functional characteristics. For the roads assets these components are:

- Sealed road surfacings
- Sealed road pavements – Base
- Sealed road pavements – sub base
- Sealed road earthworks

Each road component is then characterised by a representative stereotype. The main representative stereotypes are Motorways, Heavy Urban, Light Urban, Heavy Rural, Light Rural and Unsealed Roads (Sheeted, Graded, and Formed). Replacement unit rates are calculated based on the estimated resources necessary to complete a ten-kilometre length for each stereotype. The Department estimates the current replacement cost of the sealed pavements, surfacing and earthworks by multiplying the relevant replacement cost unit rate by the surfacing areas and unsealed pavements by the carriageway area.

For structures assets, the calculation of current replacement cost are divided into a generic group and a specific group. The generic group contains structures suitable for valuation using a unit rate per square metre of deck area. This group contains most of the bridges culverts and large retaining walls controlled by the department. Specific Group contains structures deemed unsuitable for valuation using the unit rate method. Structures in the special group are valued individually by calculating the estimated cost of building a new structure using current construction techniques.

All roads and structures assets, except for earthworks and the pavement sub-base, are subject to depreciation.

Department of Planning, Transport and Infrastructure
Notes to and forming part of the financial statements
for the year ended 30 June 2020

While the methodology remains unchanged, in 2019-20 the Department modified some of the assumptions on the nature of costs included in the unit rate to reflect current practices and improved information. Key changes are:

- Using a 'design and construct' contract model rather than a "construct" only contract approach for some stereotypes. This change results in the inclusion of contractor's design, overheads and margin costs in the estimated unit rates.
- Inclusion of the department's overhead charges.
- Allocating road construction overheads cost to road components (i.e. earthworks, Sub-base, Base and Surface) based on time spent for each component rather than on the component's construction cost. The time based approach has allocated more construction overhead costs to non-depreciation components (earthworks and sub-base) compared to cost-based approach.
- Improved data on the existence and occurrence of some road furniture (e.g. drainage and etc.)
- Increase in costs for improved standards of safety management and worker protection. This is now allocated to all road components.
- Inclusion of retaining walls as a new asset class for the structures revaluation

The impacts of the road network revaluation have been included in the final accounts as at 30 June 2020 resulting in a fair value increase of \$5.9 billion. The increase in roads and structures network value is due to several reasons, notably:

- Changes to key cost assumptions impacting unit rates (see above).
- Increase in the cost of road and structure making materials, including increase in granular material, asphalt costs and precast supply costs due to market conditions.
- Increase in labour costs for the construction of roads.

Department of Planning, Transport and Infrastructure
Notes to and forming part of the financial statements
for the year ended 30 June 2020

Valuation of Rail and Bus Network Assets

For specialised rail and bus network assets, the depreciated replacement cost was used in the valuation methodology due to there not being an active market for rail and bus network assets. Valuation is usually based on a combination of internal records, specialised knowledge and acquisition/transfer costs.

In 2019-20, rail infrastructure assets (Train and Trams) including tracks, signalling, overhead wiring systems, corridor and communication assets were revalued. The revaluation was undertaken by the Office of the Valuer-General (OVG) by applying the appropriate construction index. The OVG worked closely with qualified engineers within the department to review useful lives based on asset periodic condition assessment and asset design life.

Carrying amount at 30 June	14 407	14 896	29 303

Department of Planning, Transport and Infrastructure
Notes to and forming part of the financial statements
for the year ended 30 June 2020

5.5 Intangible Assets (continued)

On transition to AASB 1059 in the 2020-21 financial statements, the value of the land titles registry will be recognised as service concession asset. The department is in the process of valuing the data in the land title registry using the cost approach - *current replacement cost* under AASB 1059.

Valuation of Intangible Assets

Intangible assets, excluding service concession assets, are not revalued and are recorded at historic cost.

Intangible assets are identifiable as non-monetary assets without physical substance. Intangible assets are measured at cost and are tested for indications of impairment at each reporting date. Following initial recognition, intangible assets are carried at cost less any accumulated amortisation and any accumulated impairment losses.

The useful lives of the intangible assets are assessed to be either finite or indefinite. The department only has intangible assets with finite lives. The amortisation period and method for intangible assets is reviewed on an annual basis.

5.6 Inventories

	2020	2019
	\$'000	\$'000
Current - held for distribution at no or nominal consideration		
Road making material and stores at cost	3 429	3 573
Rail material and stores at cost	7 326	7 105
Total inventories held for distribution at no or nominal consideration	10 755	10 678
Current - other than those held for distribution at no or nominal consideration:		
Other inventory at cost	470	310
Total inventories other than those held for distribution at no or nominal consideration	470	310
Total Current Inventories	11 225	10 988

Inventories include goods and other property held for distribution in the ordinary course of business and excludes depreciable assets.

Inventories held for distribution at no or nominal consideration are adjusted when applicable for any loss of service potential. The basis for assessing loss of service potential includes current replacement cost and technological or functional obsolescence.

Inventories of roadside materials are measured at historic cost and stores are measured on a weighted average historic cost basis. Inventories held for works performed for clients external to the department are measured at cost.

Department of Planning, Transport and Infrastructure
Notes to and forming part of the financial statements
for the year ended 30 June 2020

5.7 Non-Current Assets Classified as Held for Sale

	2020	2019
	\$'000	\$'000
Non-Current Assets Classified as Held for Sale:		
Land, buildings and facilities	9 405	12 174
Total Non-Current Assets Classified as Held for Sale	9 405	12 174

The department has identified \$9.405 million (\$12.174 million) of land, buildings and facilities that are surplus to the department's requirements. The land, buildings and facilities are expected to be sold within 12 months by public tender or auction.

Valuation of Non-Current Assets Classified as Held for Sale

Non-current assets classified as held for sale generally consist of land and buildings that have been declared surplus to the needs of the department for which a plan of sale has been determined, the sale is highly probable and is expected to be completed within one year from the date of classification.

Non-current assets classified as held for sale are measured at the lower of carrying amount and fair value less cost to sell in accordance with *AASB 5 Non-Current Assets Held for Sale and Discontinued Operations*. The assets in this category are re-valued upon reclassification in line with the valuation techniques outlined in notes 5.1 to 5.3. They are presented separately from the other assets in the Statement of Financial Position and are not subject to depreciation.

6 Financial assets

6.1 Cash and Cash Equivalents

	2020	2019
	\$'000	\$'000
Deposits at call with the Treasurer	4 218 414	4 165 858
Imprest Account	15	15
Deposits with SAFA	1 563	-
Other	144	158
Total Cash and Cash Equivalents	4 220 136	4 166 031

Department of Planning, Transport and Infrastructure
Notes to and forming part of the financial statements
for the year ended 30 June 2020

6.2 Receivables

	2020	2019
	\$'000	\$'000
Current:		
Receivables	97 874	88 667
Expected credit loss	(1 700)	(960)
Finance lease receivables	20 962	723
GST input tax recoverable	9 367	11 210
Accrued revenues	61 720	65 497
Total Current Receivables	188 223	165 137
Non-Current:		
Receivables	353	2 814
Finance lease receivables	140 619	3 490
Total Non-Current Receivables	140 972	6 304
Total Receivables	329 195	171 441

Movements in the expected credit loss (impairment loss):	2020	2019
	\$'000	\$'000
Balance at 30 June 2019 under AASB 139	-	1 384
Adjustments on initial adoption of AASB 9	-	(345)
Carrying amount at the beginning of the period	960	1 039
Amounts written off	(65)	(95)
Increase / (Decrease) in allowance recognised in profit or loss	805	16
Carrying amount at 30 June	1 700	960

Receivables arise in the normal course of the provision of goods and services provided to other government agencies and the public. Receivables are normally settled within 30 days after the issue of an invoice or from when goods or services have been provided under a contractual agreement. Receivables and accrued revenues are non-interest bearing.

Collectability of receivables is reviewed on an ongoing basis. Other than as recognised in the expected credit loss, it is not anticipated that debtors will fail to discharge their obligations. The carrying amount of receivables approximates their fair value due to being receivable on demand. There is no concentration of credit risk.

Finance lease receivables:

The department is responsible for managing whole of government office accommodation arrangements under Premier and Cabinet Circular PC018. This includes leasing of accommodation from private landlords and subsequent sub-leasing these properties to government agencies. Where the sub-lease meets the definition of a lease under AASB16, and substantially transfers all the risks and rewards of the head lease to another government agency, the department recognises a finance lease receivable for the net investment of the lease. Finance lease receivables represent approximately 50 sub-leases.

Department of Planning, Transport and Infrastructure
Notes to and forming part of the financial statements
for the year ended 30 June 2020

6.2 Receivables (continued)

During 2019-20, the department recognised finance income on finance lease receivables of \$5.103m.

The following table sets out the maturity analysis of lease receivables, showing the discounted lease payments to be received after the reporting date.

Finance Lease receivables	2020	2019
	\$'000	\$'000
Finance lease receivables contracted for at the reporting date are as follows:		
Within one year	25 817	763
Later than one year but no longer than five years	69 487	2 408
Later than five years	111 154	1 195
Minimum lease payments	206 458	4 366
Less unearned finance income	(44 877)	(153)
Total Finance Lease Receivables	161 581	4 213
The present value of finance lease receivable is as follows:		
Within one year	20 962	723
Later than one year but no longer than five years	51 968	2 313
Later than five years	88 651	1 177
Present Value of Finance Lease	161 581	4 213
Representing:		
Current	20 962	723
Non-current	140 619	3 490
Total finance Lease Receivables	161 581	4 213

Refer to Note 11.3 for further information on risk management.

Department of Planning, Transport and Infrastructure
Notes to and forming part of the financial statements
for the year ended 30 June 2020

6.3 Other Assets

	2020	2019
	\$'000	\$'000
Current:		
Prepayments	24 401	49 828
Accommodation Incentives	8 418	7 898
Other	381	341
Total Current Other Assets	33 200	58 067
Non-Current Assets:		
Accommodation Incentives	49 126	29 765
Prepayments	-	1
Total Non-Current Other Assets	49 126	29 766
Total Other Assets	82 326	87 833

Accommodation Incentives received by the department which do not fall under AASB16 are amortised over the lease term.

Department of Planning, Transport and Infrastructure
Notes to and forming part of the financial statements
for the year ended 30 June 2020

7 Liabilities

7.1 Payables

	2020	2019
	\$'000	\$'000
Current:		
Creditors	11 243	2 845
Accrued expenses	202 017	194 354
Rail Commissioner (Federally Awarded Employees)	14 810	14 373
Employment on-costs	5 450	4 808
Other	-	5
Total Current Payables	233 520	216 385
Non-Current:		
Rail Commissioner (Federally Awarded Employees)	21 345	22 266
Employment on-costs	6 463	6 727
Total Non-Current Payables	27 808	28 993
Total Payables	261 328	245 378

Payables are measured at nominal amounts. Creditors and accruals are raised for all amounts owing but unpaid. Creditors are normally settled within 30 days from the date the invoice is first received. Employment on-costs are settled when the respective employee benefits that they relate to are discharged. All payables are non-interest bearing. The carrying amount of payables represents fair value due to the amounts being payable on demand.

Employment on-costs

Employment on-costs include payroll tax and superannuation contributions with respect to outstanding liabilities for salaries and wages and associated leave. The department makes contributions to several State Government and externally managed superannuation schemes. These contributions are treated as an expense when they occur. There is no liability for payments to beneficiaries as they have been assumed by the respective superannuation schemes. The only payable outstanding at reporting date relates to any contributions due but not yet paid.

As a result of an actuarial assessment performed by the Department of Treasury and Finance, the proportion of long service leave taken as leave has changed from the 2019 rate of 41% to the rate of 42% in 2020 and the average factor for the calculation of employer superannuation cost on-cost has remained unchanged from the 2019 rate of 9.8%. These rates are used in the employment on-cost calculation. The net financial effect of the changes in the current financial year is an increase in the employment on-cost of \$0.079 million (\$0.060 million). The estimated impact on 2020 and 2021 is not expected to be materially different to the impact in 2020.

Department of Planning, Transport and Infrastructure
Notes to and forming part of the financial statements
for the year ended 30 June 2020

7.2 Lease Liabilities

	2020	2019
	\$'000	\$'000
Current		
Lease Liabilities	139 179	2 680
Total Current Lease Liabilities	139 179	2 680
Non-Current		
Lease Liabilities	972 214	10 172
Total Non-Current Lease Liabilities	972 214	10 172
Total Lease Liabilities	1 111 393	12 852
Movements in the Lease Liabilities:	2020	2019
	\$'000	\$'000
Balance at 30 June 2019 under AASB 117	12 852	-
Adjustments on initial adoption of AASB 16	1 035 575	-
Carrying amount at the beginning of the period	1 048 427	13 923
Increase/(Decrease) due to lease additions, modifications and re-measurements	187 550	1 598
Reductions resulting from payments	(124 584)	(2 669)
Carrying amount at 30 June	1 111 393	12 852

All material cash outflows are reflected in the lease liabilities disclosed above. For 2018-19 the lease liabilities reflect only finance leases recognised in accordance with AASB117.

Lease liabilities are effectively secured as the rights to the leased assets revert to the lessor in the event of default.

On adoption of AASB 16, the Department recognised lease liabilities in relation to leases which had previously been classified as operating leases under the principles of AASB 117. These liabilities were measured at the present value of the remaining minimum lease payments discounted using the relevant incremental borrowing rate.

At 30 June 2020 the department had committed to material leases for building assets which had not yet commenced. The future cash flows for these leases is \$98.791m over 15 years.

The departments leasing activities as lessee include government accommodation, motor vehicles, office equipment and other plant and equipment. Refer Note 9.3.

Department of Planning, Transport and Infrastructure
Notes to and forming part of the financial statements
for the year ended 30 June 2020

7.3 Provisions

	2020	2019
	\$'000	\$'000
Current:		
Provision for workers compensation	1 618	1 638
Site remediation	14 479	16 465
Total Current Provisions	16 097	18 103
Non-Current:		
Provision for workers compensation	7 750	7 535
Site remediation	6 014	5 314
Total Non-Current Provisions	13 764	12 849
Total Provisions	29 861	30 952

Reconciliation of Workers Compensation

The following table shows the movement of the workers compensation provision:

Carrying amount as at 1 July	9 173	8 429
Increase (decrease) in provision due to revision of estimates	1 915	2 119
Reductions resulting from payments	(1 720)	(1 375)
Carrying Amount at 30 June	9 368	9 173

Reconciliation of Site Remediation

The following table shows the movement of the site remediation provision:

Carrying amount as at 1 July	21 779	21 500
Increase in provision due to revision of estimates	6	370
Reductions resulting from payments	(1 292)	(91)
Carrying Amount at 30 June	20 493	21 779

Provisions have been reported to reflect unsettled workers compensation claims and land remediation work required under the Ports Corp Business and Sale Agreement.

The department is responsible for the payment of workers compensation claims.

The workers compensation provision is based on an actuarial assessment of the outstanding liability as at 30 June 2020 provided by a consulting actuary engaged through the Office of the Commissioner for the Public Sector.

The provision reflects the actuarial valuation of outstanding liabilities under the *Return to Work Act 2014* and Additional Compensation provisions. The provision is for the estimated cost of ongoing payments to employees as required under current legislation.

The Additional Compensation provision entitlements are contained within relevant Public Sector Enterprise Agreements and Awards. These provide continuing benefits to eligible workers with respect to certain work-related injuries and whose entitlements have ceased under the statutory workers compensation scheme *Return to Work Act 2014*.

Adjustments against Retained Earnings

Work in progress adjustment – error correction

A review of projects expenditure by the department in the year ended 30 June 2020 identified \$14.658 million of costs included in capital works in progress at 30 June 2019 that should have been expended in a prior year. The prior period errors are corrected in the current year by an adjustment to retained earnings. The impact on the financial statements for 2018-19 is summarised below:

	2019	2018	Total
	\$'000	\$'000	\$'000
Road network - work in progress	(675)	(13 446)	(14 121)
Plant and equipment - work in progress	(33)	(504)	(537)
Total work in progress adjustment	(708)	(13 950)	(14 658)

Department of Planning, Transport and Infrastructure
Notes to and forming part of the financial statements
for the year ended 30 June 2020

8.1 Equity (continued)

Asset Recognition – error correction

A review of projects expenditure by the department in the year ended 30 June 2020 identified \$6.439 million of costs included in capital works in progress at 30 June 2019 that should have been capitalised in a prior year. The prior period errors are corrected in the current year by an adjustment to retained earnings. The impact on the financial statements for 2018-19 is summarised below:

	2019 \$'000	2018 \$'000	Total \$'000
Network Assets	(1 695)	(451)	(2 146)
Land, buildings and facilities	-	(4 438)	(4 438)
Plant and equipment	4	141	145
Total asset recognition - error correction	(1 691)	(4 748)	(6 439)

Other Adjustments – error correction

A review of operating income and expenditure by the department in the year ended 30 June 2020 identified \$0.214 million of costs incorrectly accounted for at 30 June 2019 that should have been classified and recognised differently in a prior year. The prior period errors are corrected in the current year by an adjustment to retained earnings. The impact on the financial statements for 2018-19 is summarised below:

	2019 \$'000	2018 \$'000	Total \$'000
Inventories	(220)	-	(220)
Receivables	(112)	-	(112)
Payables	118	-	118
Total other adjustments error correction	(214)	-	(214)

Statement of Financial Position	4 220 136	4 166 031
Reconciliation of Net Cash provided by (used in) operating activities to net result		
Net cash provided by operating activities	848 328	936 046
Add (less): Non-Cash Items:		
Net gain (loss) on sale or disposal of non-current assets	2 549	5 119
Depreciation/amortisation expense of non-current assets	(621 933)	(424 600)
Assets written off	(2 625)	(10 843)
Assets donated	(7 071)	(47 330)
Resources received free of charge	4 774	5 299
Expensing of works in progress	(549)	(2 680)
Movements in Assets and Liabilities:		
Increase (Decrease) in receivables	187 209	(30 728)
Increase (Decrease) in inventories	237	1 193
Increase (Decrease) in other assets	19 921	(1 754)
(Increase) Decrease in payables and provisions	(259 939)	(14 173)
(Increase) Decrease in employee benefits	(67)	(12 428)
(Increase) Decrease in other liabilities	39 342	4 473
Net result	210 176	407 594

Cash flows are included in the Statement of Cash Flows on a gross basis and the GST component of cash flows arising from investing and financing activities, which is recoverable from, or payable to, the ATO is classified as part of operating cash flows.

Department of Planning, Transport and Infrastructure
Notes to and forming part of the financial statements
for the year ended 30 June 2020

8.3 Significant accounting policies

Significant accounting policies not disclosed elsewhere in this report are detailed below.

Taxation

The department is not subject to income tax. The department is liable for payroll tax, fringe benefits tax, goods and services tax (GST), emergency services levy, income tax equivalents and local government rate equivalents.

The department prepares a Business Activity Statement on behalf of its controlled entities; administered items and other clients to which it provides business services under the grouping provisions of the GST legislation. Under the grouping provisions, the department is liable for the GST payments and entitled to the GST receipts associated with these entities and items. The GST applicable forms part of the receivables and payables recorded in the department's Statement of Financial Position and the GST cash flows recorded in the department's Statement of Cash Flows.

With respect to tax equivalents, the department is liable to pay income tax equivalents to the Consolidated Account in relation to the commercial operations of the Property Directorate. In determining its tax equivalent commitments, the department utilises the 'Accounting Profits' model as prescribed by Treasurer's Instruction 22 -Tax Equivalent Payments. Under this model, income tax expense is calculated separately for each taxable entity by applying the companies' income tax rate (currently 30%) to the accounting profit for the year. Income tax equivalent payments are included in Payments to SA Government in the Statement of Comprehensive Income.

Business Overheads

The department adopts a full cost approach to recognising its infrastructure capital and recurrent works. This methodology requires the allocation of a proportionate share of overheads to these activities. These overhead costs include corporate overheads such as the cost of the traditional corporate areas, general whole of department costs as well as business specific overhead costs.

These costs are allocated using a costing model developed to reflect the proportionate consumption of overheads by output sections.

Contracts in progress

The department acts as project manager for major capital works in relation to government buildings or government accommodation and for a range of minor capital works and maintenance type activities associated with the role of facilities manager. The department charges a fee to recover the cost of its project management activities which is recorded as revenue in accordance with AASB15.

The expenses incurred in undertaking these capital works and/or maintenance activities and the revenue recovered from charging the respective government departments are recognised within the Statement of Financial Position. The net of the expenditure incurred and the revenue recovered is accounted for as a receivable or payable.

Department of Planning, Transport and Infrastructure
Notes to and forming part of the financial statements
for the year ended 30 June 2020

8.3 Significant accounting policies (continued)

Non- Current Assets

Assets have been classified according to their nature and have not been offset unless required or permitted by a specific accounting standard, or where offsetting reflects the substance of the transaction or other event.

Acquisition and Recognition of Non-Current assets

The department capitalises non-current physical assets with an individual or grouped value of \$10,000 or greater in accordance with policies that are consistent with Treasurer's Instructions (Accounting Policy Statements) and the requirements of Accounting Standard AASB 116 *Property, Plant and Equipment*. Exceptions to this policy are assets under construction, land and buildings and assets categorised as "grouped assets" in the department's policy which are capitalised irrespective of their value.

Assets under construction are capitalised from Capital Works in Progress to the appropriate asset classes at the completion of the project. Project costs that do not meet the recognition criteria of an asset are expensed.

APS 1051.A specifies that land under roads acquired before 1 July 2008, are not to be recognised by the department as an asset. However, any land under roads acquired after 1 July 2008 have been recognised by the department in accordance with AASB 1051 *Land Under Roads*, paragraph 15, when the asset recognition criteria is met. Land under roads includes land under roadways, road reserves, footpaths, nature strips and median strips.

Buildings or other structures residing on land acquired for current road projects are not separately recognised in the Statement of Financial Position. The costs incurred in acquiring the buildings in these instances are deemed to be part of the costs of acquiring the land.

Non-current assets are initially recorded at cost or at the value of any liabilities assumed, plus any incidental costs incurred with the acquisition. Where the department acquires assets at no cost, or minimal cost, these items are recorded at their fair value in the Statement of Financial Position. If the assets are acquired at no or nominal value as part of a restructuring of administrative arrangements then the assets are recognised at book value i.e. the amount recorded by the transferor entity immediately prior to the restructure.

Revaluation of Non-Current Assets

In accordance with Treasurer's Instruction (Accounting Policy Statements) the department revalues all its non-current physical assets to their estimated fair value. Revaluations are performed only in instances where the fair value of the asset or asset group at the time of acquisition is greater than \$1.5 million and the estimated useful life is greater than three years.

The department revalues its assets in accordance with the required timelines, depending on the nature or purpose for which that asset is held. Assets are revalued by appropriately qualified valuation professionals, internal experts using external estimators or internal estimates based on recent transactions/indices. All valuers are independent unless otherwise indicated. The Valuer-General is considered an independent valuer as the Valuer-General is independent of the other functions of the department.

When non-current assets are revalued, the department uses the gross method in accounting for most assets with the exception of land and buildings that are subject to commercial leases and held for provision of government agency accommodation and for provision of housing of government employees in remote areas.

Department of Planning, Transport and Infrastructure
Notes to and forming part of the financial statements
for the year ended 30 June 2020

8.3 Significant accounting policies (continued)

If at any time the carrying amount of an asset materially differs from its fair value, the department re-values the asset regardless of when the last valuation took place. Non-current physical assets that are acquired between revaluations are either held at cost until the next valuation, or revalued if the fair value is likely to be materially different from the acquisition value. The department assesses material differences in fair value from notification from business units or changes in circumstances and environmental factors that the department becomes aware of. Revaluation movements are recorded in the Revaluation reserves.

Upon disposal or de-recognition, any revaluation surplus relating to that asset is transferred to retained earnings.

The valuation methodology applied to specific classes of non-current assets under revaluations and the timing of asset valuations are disclosed in the Notes applicable to those assets. See Note 5.

Impairment

All non-current tangible and intangible assets are tested for indication of impairment at each reporting date. Where there is an indication of impairment the recoverable amount is estimated. The recoverable amount is determined as the higher of the asset's fair value less costs of disposal and depreciated replacement cost. An amount by which the asset's carrying amount exceeds the recoverable amount is recorded as an impairment loss. For revalued assets, an impairment loss is offset against the respective asset revaluation surplus. In 2019-20 an assessment was undertaken for impacts of the COVID-19 pandemic and it was deemed that there was not sufficient information/evidence of impairment to assets for 2019-20.

Remediation of Non-Current Assets

Land remediation undertaken by the department is primarily designed to restore the asset to its original state or condition and would not normally meet the criteria for asset recognition under *AASB 116 Property, Plant and Equipment*.

Where remedial work is to be performed in response to a present obligation, either under legislation or under a contractual arrangement to a third party, the department recognises a provision for any future work in accordance with the requirements of *AASB 137 Provisions, Contingent Liabilities and Contingent Assets*. Other land remediation costs are therefore expensed in the period in which the obligation is recognised.

Leases

The department enters into lease arrangements as both lessee and lessor.

A new accounting standard *AASB16 Leases* came into effect in 2019-20 resulting in significant changes to the departments accounting for leases. The transitional impacts of the new standard are disclosed in Note 9.

The Treasurer's Instructions (Accounting Policy Statements) specify the required accounting policies for public authorities in applying AASB 16. These requirements are reflected in the department's accounting policies as follows:

- AASB 16 is not applied to leases of intangible assets;
- Right-of-use assets and lease liabilities are not recognised for leases of low value assets, being assets which have a value of \$15 000 or less, nor short-term leases, being those with a lease term of 12 months or less;
- the department, in the capacity of a lessee, does not include non-lease components in lease amounts;
- Right-of-use assets are subsequently measured applying a cost model; and
- the incremental borrowing rate published by the Department of Treasury and Finance is used when the implicit rate in the lease is not able to be determined.

Department of Planning, Transport and Infrastructure
Notes to and forming part of the financial statements
for the year ended 30 June 2020

Significant accounting policies related to the application of AASB 16 are disclosed under the relevant notes.

Lease activities in the department:

As Lessee:

Commercial Property:

The department is responsible for the management of accommodation arrangements on behalf of other government agencies under Premier and Cabinet Circular PC018 *Government Office Accommodation Framework* (PC018). The department has approximately 300 leases of commercial properties from external parties as well as departmentally owned properties to enable this. Approximately 250 of these external leases include extension options.

Commercial accommodation leases with external parties are non-cancellable with terms ranging from 1 to 22 years. Lease extensions or options are typically renegotiated before the end of the current term. Rent is generally payable monthly in advance. Leases include a fixed rate increase, CPI and/or periodic market review. Major value leases typically have a predetermined fixed rate annual increase (2.5% -3.75%) factored into the lease.

Office accommodation provided to general government sector agencies under PC018 do not meet the definition of a lease under AASB 16. Revenue for these agencies is recognised under AASB 15 and classified as Government accommodation rental income (refer note 4.6). Where the department lessees this accommodation from an external party the department records the Right-of-Use asset and Lease Liability on its statement of financial position.

For some office accommodation provided to the general government sector agencies under PC018 the department provides accommodation incentives (eg fit out). These have been recognised as an asset and are amortised against rental income on a straight line basis over the term of the arrangement with the government sector agency.

Leased accommodation provided by the department outside of the scope PC018 are accounted for as leases under AASB 16. Where the department acts as sub-lessor it recognises a Finance Lease receivable for the net investment in the lease. Refer to Note 6.2.

Lease liabilities are classified as both current and non-current; with the minimum lease payments allocated between borrowing costs and the reduction of lease liability for the period.

Right of Use assets are depreciated over the reasonably certain term of the lease.

Significant judgments/policy:

Reasonably certain

The lease term is the non-cancellable period of a lease including periods covered by an option to extend the lease if the lessee is reasonably certain to exercise this option.

Where a property lease has extension options, these have been included in the value of the ROU asset and Lease liability where the department has assessed the lease extension option(s) is reasonably certain. The department considers all relevant facts and circumstances when making this determination including the whole of government accommodation strategy, economic conditions including relocation costs, operational needs of sub lessee's and relevant factors.

Department of Planning, Transport and Infrastructure
Notes to and forming part of the financial statements
for the year ended 30 June 2020

Lease components

Where a contract contains both lease and non-lease components such as asset maintenance services, the department excludes the non-lease component amounts when determining the lease liability and right-of-use asset amount in accordance with AASB16 and the Treasurer's Instructions (Accounting Policy Statements).

In determining the non-lease component rate for property leases, the department has applied the independently measured Property Council of Australia benchmark rates published for South Australia. This rate is then applied to the minimum lease payments of multi-story office buildings to determine value of the lease liability and lease asset.

Plant and Equipment:

The department leases plant and equipment for its operational use. This includes motor vehicles, office equipment and other plant. Motor vehicles leases are with the South Australian Financing Authority (SAFA).

Motor vehicle leases are non-cancellable, with rental payments monthly in arrears. Lease terms can range from 3 years up to 5 years, no contingent rental provisions exist and no options exist to renew the leases at the end of the lease.

The department has elected not to recognise right-of-use assets and lease liabilities arising from short-term leases of less than 12 months and low value assets, being assets which have a value of \$15 000 or less. These lease payments are recognised as expenses on a straight line basis over the lease term.

Department of Planning, Transport and Infrastructure
Notes to and forming part of the financial statements
for the year ended 30 June 2020

As Lessor:

Government Employee Housing

The department provides housing services on a leasehold basis to government employees based in remote areas of the state. As lessor, the department recognises finance lease receivables in relation to these properties at an amount equal to the net investment in the lease.

Finance lease interest income is recognised based on the periodic rate of return on that net investment. Lease payments from the lessee are applied against the gross investment in the lease to reduce both the principal and the unearned interest income.

Departmental Owned property

The department owns properties such as commercial buildings, land and other operating facilities. Where these properties are leased to other entities they are treated as operating leases because the department retains all the risks and rewards incidental to ownership of the underlying asset. That is the leases are significantly shorter than the useful life of the underlying asset.

The department recognises lease payments from operating leases as rental income on a straight line basis over the term of the lease. Commercial accommodation operating leases are non- cancellable and rent is payable in advance.

Recreational Jetties

The department has entered into leases as lessor, in regards to the Government's Recreational Jetties Divestment Program where jetties have been leased to Councils throughout the state. Peppercorn rents of \$1 per annum apply over the 25 or 99 year lease term for each lease.

Under the terms of the lease agreement, these leases have been categorised as finance leases due to the passing of risks and benefits incidental to ownership to the lessee. The underlying assets have no value recorded in the Financial Statements because all the risks and rewards incidental to ownership of the underlying asset have been transferred to the Councils.

Department of Planning, Transport and Infrastructure
Notes to and forming part of the financial statements
for the year ended 30 June 2020

9 Changes in accounting policy

9.1 AASB 16 leases

AASB 16 sets out a comprehensive model for lessee accounting that addresses recognition, measurement, presentation and disclosure of leases. Lessor accounting is largely unchanged. AASB 16 Leases replaces AASB 117 Leases and related interpretations.

The adoption of AASB 16 Leases from 1 July 2019 resulted in adjustments to the amounts recognised from a lessee perspective in the financial statements:

- AASB 117 Leases only required the recognition of an asset and lease liability in relation to finance leases. AASB 16 Leases applies a comprehensive model to all leases. Applying AASB 16 resulted in leases previously classified as operating leases having right-of-use assets and related lease liabilities being recognised in the Statement of Financial Position.
- AASB 117 Leases resulted in operating lease payments being recognised as an expense under Supplies and Services. AASB 16 Leases largely replaces this with depreciation expenses that represents the use of the right-of-use asset and borrowing costs that represent the cost associated with financing the right-of-use asset.

The adoption of AASB 16 Leases also resulted in the department recognising a finance lease receivable and interest income for subleases where the department assessed all the risks and rewards incidental to head lease (i.e. RoU) were transferred to the sublessee.

Impact on retained earnings

The total impact on the department's retained earnings as at 1 July 2019 is as follows:

	\$'000
<u>Assets</u>	
ROU asset-buildings	722 475
ROU asset-plant and equipment	5 584
Finance Lease Receivable	149 670
<u>Liabilities</u>	
Lease Liability	(1 035 575)
Lease Incentive Liability	39 889
Net impact on equity	(117 957)

The department disclosed in its 2018-19 financial report total undiscounted operating lease commitments as lessee of \$1.040m under AASB117. The opening lease liability for 2019-20 differs from the closing operating lease commitments at 30 June 2019 due to a combination of components that significantly influenced the calculation of the lease liability value for any given lease. These factors include operating leases that no longer meet the definition of a lease, adjustments due to reassessment of lease terms and the definition of non-lease components, the impact of applying discount rates and recognition exemptions for short term and low value leases.

Department of Planning, Transport and Infrastructure
Notes to and forming part of the financial statements
for the year ended 30 June 2020

Accounting policies on transition

AASB 16 sets out accounting policies on transition in its transitional provisions. The Treasurer's Instructions (Accounting Policy Statements) requires certain choices in those transitional provisions to be taken. The department has adopted the following accounting policies:

As Lessee:

- to apply AASB 16 retrospectively. The cumulative effect of initially applying the Standard was recognised at 1 July 2019. Comparatives have not been restated.
- at 1 July 2019 AASB 16 was applied only to contracts that were previously identified as containing a lease under AASB 117 and related interpretations.
- the initial measurement of the lease liability was the present value of the remaining lease payments excluding non-lease components, discounted using the relevant incremental borrowing rate published by the Department of Treasury and Finance as at 1 July 2019 based on the SA Government's cost of borrowing. The average weighted incremental borrowing rate for this purpose was 1.82%.
- the initial measurement of right-of-use assets has been calculated as an amount equal to the lease liability on transition adjusted for prepaid or accrued lease payments and lease incentive liabilities with the exception of leases with a lease liability greater than \$10 million. In these cases, the ROU asset has been calculated at its carrying amount as if the standard had been applied since the lease commencement date.
- the initial measurement of lease liabilities and right-of-use assets excludes all leases that ended by 30 June 2020 (including any relevant reasonably certain extension period) except for vehicles leased from SAFA.
- the use of hindsight used in determining opening balances.

As Lessor:

- as an intermediate lessor under AASB 16, the department is required to evaluate the classification of a sub-lease with reference to the ROU asset associated with the head lease and not with reference to the underlying asset. Consequently, many sub-leases that were classified as operating leases under AASB 117 have been classified as finance leases under the new standard.

Department of Planning, Transport and Infrastructure
Notes to and forming part of the financial statements
for the year ended 30 June 2020

9.2 AASB 15 Revenue from Contracts with Customers

AASB 15 *Revenue from Contracts with Customers* establishes a revenue recognition model for revenue arising from contracts with customers. It requires that revenue be recognised at an amount that reflects the consideration to which an entity expects to be entitled in exchange for transferring goods or services to a customer. AASB 15 supersedes AASB 111 Construction contracts, AASB 118 Revenue and related Interpretations and applies to all revenue arising from contracts with customers.

Impact on retained earnings

There was no impact on the department's retained earnings as at 1 July 2019.

Accounting policies on transition

The department has adopted AASB 15 Revenue from Contracts with Customers on 1 July 2019. The *Treasurer's Instructions (Accounting Policy Statements)* require certain choices in those transitional provisions to be taken. The department has on transition:

- not recognised an adjustment to the opening balance of retained earnings as at 1 July 2019;
- not adopted the completed contract expedient, and therefore has not excluded revenue which was fully recognised in previous years in accordance with the former revenue and income accounting standards; and
- elected not to restate retrospectively contracts for modifications that occurred before 1 July 2019, as there were no contract modifications.

Impacts on the financial statements are explained below together with impacts from adoption of AASB 1058 Income of *Not-for-Profit Entities*.

Ongoing accounting policies

The *Treasurer's Instructions (Accounting Policy Statements)* specify requirements for public authorities in applying AASB 15. These requirements are reflected in the department's accounting policies as follows:

- non-intellectual property licences, low value licences (i.e. assets which have a value of \$15 000 or less) and short-term licences (i.e. being those with a licence term of 12 months or less) are exempt from AASB 15 revenue recognition requirements. The department has elected to recognise revenue at the point in time the licence is issued. This policy has been applied in note 4.2 and notes A12 and A13 of the administered items.
- AASB 15 is applied to a portfolio of contracts with similar characteristics.
- there is no adjustment to the promised amount of consideration for the effects of a significant financing component if the period between the transfer of goods/services and the payment date is one year or less.
- the incremental costs of obtaining a contract are expensed when incurred when the amortisation period of the asset that the department would have recognised is one year or less.
- for measuring progress towards satisfaction of performance obligations when the output method is applied, revenue is recognised in the amount to which there is a right to invoice corresponding directly to the value to the customers of the department's performance completed to date.
- there is no disclosures of certain information relating to remaining performance obligations if the original contract is expected to end within one year or when revenue is recognised in accordance with paragraph B16.

Department of Planning, Transport and Infrastructure
Notes to and forming part of the financial statements
for the year ended 30 June 2020

9.3 AASB 1058 Income of not-for-profit entities

AASB 1058 *Income of Not-for-Profit Entities* establishes new income recognition requirements for not-for-profit entities. Its requirements apply where the consideration to acquire an asset, including cash, is significantly less than fair value principally to the entity to further its objectives. AASB 1058 also contains requirements for the receipt of volunteer services. AASB 1058 supersedes income recognition requirements in AASB 1004 *Contributions*, AASB 118 *Revenue* and AASB 111 *Construction Contracts*. However, elements of AASB 1004 remain in place, primarily in relation to restructures of administrative arrangements and other contributions and distributions by owners.

Accounting policies on transition

On transition, there was no impact on retained earnings.

9.5 Presentation of the financial statements

Treasurer's Instructions (Accounting Policy Statements) issued on 1 June 2020 removed the previous requirement for financial statements to be prepared using the net cost of services format. The net cost of services is the total cost of services less any revenue retained by public authorities involved in the provision of services but does not include items classified as revenues from and payments to the South Australian Government. Presentation of the Statement of Comprehensive Income on an 'income and expense' basis allows information to be presented in such a way that eliminates potential confusion as to the source of funding for the department. As well as changes to the format of the Statement of Comprehensive Income, there are presentational changes to remove the net cost of services format from the Statement of Cash Flows. These statements now show income before expenses, and cash receipts before cash payments. Related disclosures also reflect this changed format.

Department of Planning, Transport and Infrastructure
Notes to and forming part of the financial statements
for the year ended 30 June 2020

10 Outlook

10.1 Unrecognised Contractual Commitments

Commitments include operating, capital and outsourcing arrangements arising from contractual or statutory sources and are disclosed at their nominal value.

The department's capital commitments are predominantly for capital expenditure on construction projects relating to road networks, the purchase of new public transport vehicles and the construction and upgrade of Government buildings and facilities. Where this construction work is being done on behalf of other agencies the cost is recovered accordingly.

The department's expenditure commitments include major service and supply contracts for road and rail maintenance, ferry operations and bus transport services. Accommodation expenses and short term and low value leases that do not meet the definition of a lease under AASB16 have been recognised by the department as an expenditure commitment in 2019-20.

Capital Commitments	2020	2019
	\$'000	\$'000
Capital expenditure contracted for at the reporting date but not recognised as liabilities in the financial report, are payable as follows:		
Within one year	1 072 046	729 076
Later than one year but no later than five years	516 376	219 031
Later than five years	96 298	-
Total Capital Commitments	1 684 720	948 107

Expenditure Commitments	2020	2019
	\$'000	\$'000
Within one year	426 122	341 454
Later than one year but no later than five years	1 169 827	121 810
Later than five years	1 549 904	581 247
Total Expenditure Commitments	3 145 853	1 044 511

Department of Planning, Transport and Infrastructure
Notes to and forming part of the financial statements
for the year ended 30 June 2020

10 Unrecognised Contractual Commitments (continued)

Operating Lease Commitments as Lessee	2020 \$'000	2019 \$'000
Commitments under operating leases at the reporting date but not recognised as liabilities in the financial report, are payable as follows:		
Within one year	-	156 719
Later than one year but no later than five years	-	441 887
Later than five years	-	440 995
Total Operating Lease Commitments as Lessee	-	1 039 601
Representing:		
Cancellable operating leases	-	9 151
Non-cancellable operating leases	-	1 030 450
Total Operating Lease Commitments as Lessee	-	1 039 601
Commitments for minimum lease payments in relation to non-cancellable operating leases are payable as follows:		
Within one year	-	151 305
Later than one year but no later than five years	-	438 220
Later than five years	-	440 925
Total Non-cancellable Operating Lease Commitments as Lessee	-	1 030 450

Operating lease commitments is provided for the comparative year only as AASB 16 Leases does not distinguish between operating and finance leases for the lessee.

Commitments in relation to rental of residential accommodation properties are now disclosed in Other Commitments as they do not meet the definition of a lease in AASB16.

Department of Planning, Transport and Infrastructure
Notes to and forming part of the financial statements
for the year ended 30 June 2020

10 Unrecognised Contractual Commitments (continued)

Operating Lease Commitments as Sub-lessor	2020	2019
	\$'000	\$'000
Commitments under operating subleases at the reporting date but not recognised as receivable in the financial report, are as follows:		
Within one year	-	24 364
Later than one year but no later than five years	-	62 449
Later than five years	-	7 089
Total Operating Lease Commitments as Sub-lessor	-	93 902

Sub-leased receivables under AASB16 are now recognised on the Statement of Financial Position as finance lease receivables.

Operating Lease Commitments as Lessor	2020	2019
	\$'000	\$'000
Commitments under operating leases at the reporting date but not recognised as receivable in the financial report, are as follows:		
Within one year	2 269	1 296
Later than one year but no later than five years	3 331	1 171
Later than five years	-	-
Total Operating Lease Commitments as Lessor	5 600	2 467

The department's operating lease commitments as lessor are for commercial accommodation and access rights to State Owned land sites for departmentally owned properties. These leases relate to office accommodation leased to Public Financial Corporations and Public Non-Financial Corporations and operational sites leased to government agencies. Commercial accommodation leases are con-cancellable with remaining lease terms ranging from 1 to 28 years. Rent is receivable in advance.

Department of Planning, Transport and Infrastructure
Notes to and forming part of the financial statements
for the year ended 30 June 2020

10.2 Contingent Assets and Liabilities

Contingent assets and liabilities are not recognised in the Statement of Financial Position, but are disclosed by way of note.

Contingent Assets

At 30 June 2020, the department:

- holds contract securities which are designed to cover the risk to the department in the event of contractor non-performance or insolvency. In the event of contractor non-performance or insolvency, the department can call upon the contract security to cover any resulting costs incurred.

Contingent Liabilities

At 30 June 2020, the department had:

- possible material exposures resulting from litigation (or pending litigation) in respect of claims for property damage or personal injury;
- received notification of other cases not yet subject to court action or formal claim, which may result in subsequent litigation or arbitration in the future;
- possible material exposure resulting from the ongoing monitoring and treatment of contaminated land assets to bring the land into a position for future use or sale;
- property agreements that provide for additional compensation payments where a property owner purchases a replacement investment property within 12 months; and

In addition, the department is awaiting the outcome of formal and informal proceedings which may result in possible liabilities.

The department is insured by SAicorp, the captive insurer for the Government of South Australia. Final exposure of claims is limited to the deductible excess. The extent of these contingent liabilities cannot be reliably measured at balance date.

10.3 Impact of standards and statements not yet effective

AASB 1059 Service Concession Arrangements – Grantor

AASB 1059 *Service Concession Arrangements – Grantor*, prescribes the accounting for certain arrangements in which an operator provides public services on behalf of a public sector grantor involving a service concession arrangement. This standard applies to reporting periods beginning on or after 1 January 2020.

The Department has reviewed all of its arrangements which the Department has with another entity that includes a service concession asset to assess whether AASB 1059 applies. The following arrangement was identified.

Delivery of Land Titling, Registration and Valuation Services

In 2017-18 the State entered into a contract with a private operator for the delivery of land titling, registration and valuation services to the State. The commercialisation of the State's land services operations resulted in an arrangement that meets the criteria for applying AASB 1059 –Service Concession Arrangements – Grantor when the standard becomes operational in July 2020. In determining the accounting policy to be applied to the transactions under the arrangement, the Department of Treasury and Finance concluded that applying the concepts in AASB 1059 provided the most relevant and reliable information to users.

AASB 1059 requires that the assets of the Government that are used as part of the service concession arrangements must be reclassified as service concession assets and revalued at fair value. Hence, with the transfer back to the department of the SAILIS system from DTF from 1 July 2018, the principles of AASB 1059 have been applied and the system and associated infrastructure have been classified as a service concession asset. See Intangibles Note 5.5.

The department is in the process of valuing the land services registries to be classified as a service concession asset. This asset will be measured at current replacement cost under AASB 1059. Recognition of the land services registry data as a service concession asset will have an impact on periods prior to 2019-20.

The Department will continue to assess the impact of AASB 1059 in 2020-21.

Department of Planning, Transport and Infrastructure
Notes to and forming part of the financial statements
for the year ended 30 June 2020

10.4 COVID-19 pandemic outlook for the department

The COVID-19 pandemic will continue to impact the operations of the department in 2020-21. The key expected impacts include continued implementation of the infrastructure stimulus packages for road infrastructure and safety, the continued decline in passenger transport patronage and the additional public transport network safety measures.

There is insufficient evidence to identify an impact on the valuation on assets and liabilities as a result of the current economic environment. This will continue to be monitored during the coming year.

10.5 Events after the reporting period

Events between 30 June and the date the financial statements are authorised that may have a material impact on the results of subsequent years are set out below.

Restructuring of administrative arrangements

As a result of restructuring of administrative arrangements outlined in the Government Gazette on 29 July 2020, the department will become known as the Department for Infrastructure and Transport.

As a consequence of the restructuring of administrative arrangements the Planning and Development, Office of the Local Government, Land & Built Environments and Office for Design and Architecture South Australia sections will be assigned to the Attorney-General's Department, along with the offices of the Surveyor-General, Valuer-General and Registrar-General.

Adelaide rail transformation project

The delivery of the new tram service model will commence 5 July 2020. These arrangements are currently being assessed for the application of the incoming accounting standard AASB1059 Service Concession Arrangements – Grantor.

As at the date of this report, the SA Government was in the process of procuring train services. Dependent on the outcome of the procurement process, it is expected that a private operator would commence providing train services during 2020-21.

Modernising road maintenance

In 2019-20 the department disclosed that the Government has endorsed a new delivery model for road maintenance services. On 6 July 2020 the department will enter into contractual arrangements for the delivery of the road maintenance services.

The department is not aware of any further events occurring after balance date.

11 Measurement and risk

11.1 Long Service Leave liability - measurement

AASB 119 *Employee Benefits* contains the calculation methodology for long service leave.

The actuarial assessment performed by the Department of Treasury and Finance has provided a basis for the measurement of long service leave and is based on actuarial assumptions on expected future salary and wage levels, experience of employee departures and periods of service. These assumptions are based on employee data over SA Government entities.

AASB 119 *Employee Benefits* requires the use of the yield on long-term Commonwealth Government bonds as the discount rate in the measurement of the long service leave liability. The yield on long term Commonwealth Government bonds has decreased from 1.25% in 2019 to 0.75% in 2020.

This decrease in the bond yield, which is used as the rate to discount future long service leave cash flows, results in an increase in the reported long service leave liability.

The actuarial assessment performed by the Department of Treasury and Finance saw a decrease in the salary inflation rate from 4% in 2019 to 2.5% in 2020 for long service leave liability.

The net financial effect of the changes in the current financial year is a decrease in the long service leave liability of \$5.33 million and employee benefit expense of \$0.483 million. The impact on future periods is impracticable to estimate as the long service leave liability is calculated using a number of assumptions – a key assumption is the long-term discount rate.

The long service leave liability has been allocated between current and non-current liabilities using the leave pattern history of previous years.

Department of Planning, Transport and Infrastructure
Notes to and forming part of the financial statements
for the year ended 30 June 2020

11.2 Fair Value Measurement

AASB 13 *Fair Value Measurement* defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants, in the principal or most advantageous market, at the measurement date.

The department classifies fair value measurement using the following fair value hierarchy that reflects the significance of the inputs used in making the measurements, based on the data and assumptions used in the most recent revaluation.

- Level 1 – traded in active markets and is based on unadjusted quoted prices in active markets for identical assets or liabilities that the entity can access at measurement date. The department does not have any Level 1 assets.
- Level 2 – not traded in an active market and are derived from inputs (inputs other than quoted prices included within Level 1) that are observable for the asset, either directly or indirectly. For example, the department has domestic housing and commercial building assets that are valued by comparing the subject properties to similar properties in similar areas.
- Level 3 – not traded in an active market and are derived from unobservable inputs. Examples in the department include the rail and road networks.

In determining fair value, the department has taken into account the characteristic of the asset (e.g. condition and location of the asset and any restrictions on the sale or use of the asset); and the asset's highest and best use (that is physically possible, legally permissible and financially feasible).

The department's current use is the highest and best use of the asset unless other factors suggest an alternative use is feasible. As the department did not identify any factors to suggest an alternative use, fair value measurement was based on current use.

The carrying amount of non-financial assets with a fair value at the time of acquisition that was less than \$1 million or had an estimated useful life that was less than three years are deemed to approximate fair value.

Refer to Note 5 for disclosure regarding fair value measurement techniques and inputs used to develop fair value measurements for non-financial assets.

In accordance with AASB 13 *Fair Value Measurement* the fair value of non-financial assets must be estimated for recognition and measurement or for disclosure purposes. The department categorises non-financial assets measured at fair value into hierarchy based on the level of inputs used in measurement.

The department had no recurring or non-recurring fair value measurements categorised into Level 1.

Transfers In and Out of Level 3

The department's policy is to recognise transfers in and out of fair value hierarchy levels as at the beginning to the reporting period. Asset transfers in and out of Level 3 are transactional transfers due to changes in the classification of assets and reclassification of some marine land assets to Level 3 due to land zoning, land use and dedications leading to significant unobservable inputs used during valuation.

Department of Planning, Transport and Infrastructure
Notes to and forming part of the financial statements
for the year ended 30 June 2020

11.3 Financial Instruments

Financial risk management

The department has developed a Risk Management policy and associated Framework in accordance with the *Risk Management Policy Statement* issued by the Premier and Treasurer and the principles established in the *Australian Standard Risk Management Principles and Guidelines*. This policy and framework set out the tailored approach to identify and manage risk within the department.

The department's exposure to financial risk (liquidity risk, credit risk and market risk) is low due to the nature of the financial instruments held.

Liquidity Risk

Liquidity risk arises from the possibility that the department is unable to meet its financial obligations as they fall due. The department works with the Department of Treasury and Finance to determine the cash flows associated with its Government approved program of work and to ensure funding is provided through SA Government budgetary processes to meet the expected cash flows.

Refer to Notes 7.1 and 7.2 for further information.

Credit Risk

Credit risk arises when there is the possibility of the department's debtors defaulting on their contractual obligations resulting in a financial loss to the department. The department has policies and procedures in place to ensure business transactions occur with customers with appropriate credit history.

No collateral is held as security and no credit enhancements relate to financial assets held by the department.

Impairment of financial assets

Loss allowances for receivables are measured at an amount equal to lifetime expected credit loss using the simplified approach in *AASB 9*. The department uses an allowance matrix to measure the expected credit loss of receivables from non-government debtors.

The expected credit loss of government debtors is considered to be nil based on the external credit ratings and nature of the counterparties.

To measure the expected credit losses, receivables are grouped based on shared risks characteristics and the days past due. When estimating expected credit loss, the department considers reasonable and supportable information that is relevant and available without undue cost or effort. This includes both quantitative and qualitative information and analysis, based on the department's historical experience and available forward-looking information.

The maximum period considered when estimating expected credit losses is the maximum contractual period over which the department is exposed to credit risk.

Loss rates are calculated based on the probability of a receivable progressing through stages to write off based on the common risk characteristics of the transaction and debtor group.

Department of Planning, Transport and Infrastructure
Notes to and forming part of the financial statements
for the year ended 30 June 2020

11.3 Financial Instruments (continued)

The following table provides information about the exposure to credit risk and expected credit loss for non-government debtors.

	Debtor gross carrying amount \$'000	Loss %	Lifetime expected losses \$'000
Current (not past due)	14 490	2	265
1 – 30 days past due	1 391	5	69
31 – 60 days past due	538	16	89
More than 60 days past due	6 687	19	1 277
Loss allowance			1 700

Loss rates are based on actual history of credit loss adjusted for any changes to any forecast economic conditions that may affect the department's debtor profile.

Impairment losses are presented as net impairment losses within net result, subsequent recoveries of amounts previously written off are credited against the same line item.

Receivables are written off when there is no reasonable expectation of recovery. Indicators that there is no reasonable expectation of recovery include the failure of a debtor to enter into a payment plan with the department and a failure to make contractual payments for a period of greater than 90 days past due.

Receivables with a contractual amount of \$0.065 million written off during the year are still subject to enforcement activity.

The department considers that its cash and cash equivalents have low credit risk based on the external credit ratings of the counterparties and therefore the expected credit loss is nil.

Market Risk

The department enters into business transactions that require the payment of goods or services in a foreign currency. Foreign currency risk associated with significant payments is minimised using a strategy of forward cover contract through SAFA articulated in TI 23 *Management of Foreign Currency Exposures*.

Exposure to interest rate risk may arise through interest bearing liabilities, including borrowings.

The interest expense implicit in any finance lease payment is fixed at the inception of the lease and is calculated using prevailing government borrowing rates as advised by SAFA. The department's revenue base is sufficient for the purpose of servicing its interest and loan repayment commitments.

There have been no changes in risk exposure since the last reporting date.

Department of Planning, Transport and Infrastructure
Notes to and forming part of the financial statements
for the year ended 30 June 2020

11.3 Financial Instruments (continued)

Categorisation of financial instruments

Details of the significant accounting policies and methods adopted including the criteria for recognition, the basis of measurement, and the basis on which income and expenses are recognised with respect to each class of financial asset, financial liability and equity instrument are disclosed in the respective financial asset / liability note.

Classification of financial instruments

The department measures all financial instruments at amortised cost.

Department of Planning, Transport and Infrastructure
Notes to and forming part of the financial statements
for the year ended 30 June 2020

11.3 Financial Instruments (continued)

Category of financial asset and financial liability		Notes	Carrying amount \$'000	Contractual Maturities

Financial Liabilities						
Financial liabilities at cost:	Payables ^(a)	7.1	232 498	209 984	22 514	-
	Lease liability	7.2	15 217	3 293	8 549	3 375
Total financial liabilities			247 715	213 277	31 063	3 375

For 2018-19 the lease liabilities reflect only finance leases recognised in accordance with AASB117.

Receivables and Payables

(a) The receivable and payable amounts disclosed here exclude amounts relating to statutory receivables and payables (e.g. Commonwealth, State and Local Government taxes, fees and charges; Auditor-General's Department audit fees). In government, certain rights to receive or pay cash may not be contractual and therefore, in these situations, the requirements will not apply. Where rights or obligations have their source in legislation such as levies, tax and equivalents, they would be excluded from the disclosure. The standard defines contract as enforceable by law. All amounts recorded are carried at cost.

(b) The receivables amount disclosed here excludes prepayments as they are not financial assets. Prepayments are presented in Note 6.3.

(Programs - refer to note A2)

Department of Planning, Transport and Infrastructure
Notes to and forming part of the Administered Financial Statements
for the year ended 30 June 2020

The Administered Financial Statements include income, expenses, assets and liabilities that the Department of Planning, Transport and Infrastructure (the department) administers on behalf of the SA Government, but does not control.

A1: Basis of preparation and accounting policies

The Basis of Preparation for the Administered Financial Statements is the same as the basis outlined in Note 1.1 for controlled items. The department applies the same accounting policies to the Administered Financial Statements as set out in the notes to the department's financial statements.

A2: Objectives/programs of the Department

The objectives and programs of the department, outlined in Note 1.2 for controlled items, apply equally to the Administered Financial Statements.

The programs of the department are outlined in Note 1.2 for controlled items. Program 3: Roads and Marine, Program 6: Infrastructure Planning and Policy and Program 7: Land Use Planning apply to the Administered Financial Statements.

Department Organisation

The organisational structure of the department outlined in Note 1.2 for controlled items, applies to both the departmental and the Administered Financial Statements.

The Administered Items of the department as at 30 June 2020 comprised the following:

- Compulsory Third Party Insurance
- Emergency services levy
- Expiation receipts
- Firearm receipts
- Flinders Ports — land tax equivalent
- Hospital Fund — contributions
- Lifetime Support Scheme receipts
- Planning and Development Fund
- Planning fees
- Real Property Act Assurance Fund
- Real Property Act Trust Accounts
- Registrar-General and Surveyor-General Statutory Act revenues
- Registration and Licensing collections and disbursements
- Service SA disbursements
- Special Act salaries
- Stamp duty receipts
- West Beach Trust (trading as West Beach Parks) — taxation equivalent regime
- Workers Liens Trust Account.

Department of Planning, Transport and Infrastructure
Notes to and forming part of the Administered Financial Statements
for the year ended 30 June 2020

A3: Transfer Payments

The department makes various transfer payments to eligible beneficiaries in the capacity of an agent responsible for the administration of the transfer process. Amounts relating to these transfer payments are not controlled by the department, since they are made at the discretion of the government in accordance with government policy. The following table lists recipients by class and amounts transferred.

	2020	2019
	\$'000	\$'000
Transfer payments to SA Government Entities		
Department of Treasury and Finance	471 135	443 242
Lifetime Support Authority	160 651	156 186
CTP Regulator	106 530	115 457
South Australian Fire and Emergency Services Commission	48 979	47 706
South Australian Police	12 179	10 534
Other	24 666	16 485
Transfer payment to local government:		
Councils	26 562	18 235
Transfer payment to non-SA Government Entities		
Compulsory Third Party Insurance	310 817	431 299
Refunds	18 844	19 147
National Heavy Vehicle Regulator	14 780	14 571
Other	445	593
Total Transfer Payments	1 195 588	1 273 455

Department of Planning, Transport and Infrastructure
Notes to and forming part of the Administered Financial Statements
for the year ended 30 June 2020

A4: Budgetary Reporting and Explanations of major variances between budget and actual amounts

	Original Budget ⁽¹⁾	Actual	Variance	
				2020
Statement of Comprehensive Income	Note	\$'000	\$'000	
Income				
Appropriations		8 111	19 234	11 123
Fees and charges		265 948	255 015	(10 933)
Collections on behalf of third parties	a	1 050 565	916 043	(134 522)
Interest revenue		496	146	(350)
Other income		-	34 616	34 616
Total Income		1 325 120	1 225 054	(100 066)
Expenses				
Employee benefit expenses		521	708	187
Supplies and services		2 444	3 765	1 321
Grants and subsidies		33 372	47 315	13 943
Disbursements on behalf of third parties	a	1 063 618	919 634	(143 984)
Borrowing costs		121	-	(121)
Payments to Consolidated Account		224 349	223 600	(749)
Other expenses	b	1 325	81 274	79 949
Total Expenses		1 325 750	1 276 296	(49 454)
Net Result		(630)	(51 242)	(50 612)
Total comprehensive result		(630)	(51 242)	(50 612)

The budget performance table compares the department's outcomes against budget information presented to Parliament (2019-20 Budget Paper 4, Volume 3). The budget amounts have not been adjusted to reflect revised budgets or administrative restructures. The budget process is not subject to audit.

The following is a brief explanation of variances between original budget and actual amounts. Explanations are provided for variances where the variance exceeds the greater of 10% of the original budgeted amount and 5% of original budgeted total expenses.

- a) The budget for Compulsory Third Party Insurance was significantly reduced by the premium bands with the commencement of the fully competitive market for Compulsory Third Party Insurance on 1 July 2019.
- b) A total of \$80 million was included in the total proceeds received by the State from the commercialisation of the State's land services operations. This amount was paid to the State for the exclusive right to negotiate for any other registry managed by the State. In 2019-20 this amount has been recognised as an expense within note A9 upon assumption of the unearned liability. Refer to note A21 for additional information.

	\$'000	\$'000
Current		
Current Receivables	1	1
Accrued Revenues	177	86
Total Current Receivables	178	87
Total Receivables	178	87

Refer to Note A27 for information on risk management.

A18: Land

	2020	2019
	\$'000	\$'000
Land		
Land at Fair Value	17 964	17 964
Total Land	17 964	17 964

Reconciliation of Land

The following table shows the movement of Land during 2019-20.

	2020	2019
	\$'000	\$'000
Carrying amount at 1 July	17 964	17 134
Revaluations	-	830
Carrying amount at 30 June	17 964	17 964

Land was revalued to fair value as at 1 July 2018 in accordance with *AASB 116 Property, Plant and Equipment*. The valuation of land was performed by the Valuer-General. The Valuer-General arrived at fair value based on recent market transactions for similar land in the area taking into account size, location, zoning and restricted use. Revaluation is performed every three (3) years.

Department of Planning, Transport and Infrastructure
Notes to and forming part of the Administered Financial Statements
for the year ended 30 June 2020

A19: Payables

	2020	2019
	\$'000	\$'000
Current		
Creditors	17 710	21 407
Accrued Expenses	23 552	30 416
Total Current Payables	41 262	51 823
Total Payables	41 262	51 823

Payables are measured at nominal amounts. Creditors and accruals are raised for all amounts owing but unpaid. Sundry creditors are normally settled within 30 days from the date the invoice is first received.

For further information on risk management refer to Note A27.

A20: Borrowings

	2020	2019

South West Suburbs Drainage Scheme	-	(23)
Balance as at 30 June	-	-

Borrowings represented loans relating to the Metropolitan Drainage Scheme. As at 30 June 2019 the loans for the Metropolitan Drainage Scheme have been extinguished.

For further information on risk management refer to Note A27.

Department of Planning, Transport and Infrastructure
Notes to and forming part of the Administered Financial Statements
for the year ended 30 June 2020

A21: Other Liabilities

	2020	2019
	\$'000	\$'000
Current		
Deferred income	2 546	2 718
Unearned revenue	34 210	38 406
Total current other liabilities	36 756	41 124
Non-Current		
Unearned revenue	1 471 018	1 421 030
Total non-current other liabilities	1 471 018	1 421 030
Total other liabilities	1 507 774	1 462 154

Deferred Income – Land Division Fees

Deferred income consists of revenue received in advance for land division fees under the *Development Act 1993*. Monies received as at 30 June where a Certificate of Approval is yet to be issued are recognised as an unearned revenue liability.

Unearned Revenue – Land Services SA

The department has recognised a liability reflective of the unearned revenue arising from the consideration received for the commercialisation of the State's land services operations. The recognition of the unearned revenue is calculated on a straight line basis over the term of the contract, reducing the liability.

As part of the overall proceeds received from the commercialisation of the State's land services operations, the State received \$80 million for the exclusive right to negotiate for any other registry managed by the State. On 16 December 2019 the Government decided not to proceed with the proposed further commercialisation of State registries and opted to extend the term of the land services commercialisation agreement by seven (7) years. Consequently, the balance of the unearned revenue has increased. The \$80 million has been recognised as an expense within note A9.

The department has applied the concepts of *AASB 1059 Service Concession Arrangements: Grantors*. AASB 1059 was issued by the Australian Accounting Standards Board in July 2017, but will not be a mandatory requirement until 30 June 2021 financial reports. However, its requirements are consistent with industry practice for revenue arising from this type of transaction.

On transition to AASB 1059 in the 2020-21 financial statements, the value of the land titles registry will be recognised as service concession asset. The department is in the process of valuing the data in the land title registry using the cost approach - *current replacement cost* under AASB 1059.

The department will continue to assess the impact of AASB 1059 over the coming year.

Department of Planning, Transport and Infrastructure
Notes to and forming part of the Administered Financial Statements
for the year ended 30 June 2020

A22: Cash Flow Reconciliation

	2020	2019
	\$'000	\$'000

Department of Planning, Transport and Infrastructure
Notes to and forming part of the Administered Financial Statements
for the year ended 30 June 2020

A23: Unrecognised Contractual Commitments

	2020	2019
	\$'000	\$'000
Other Commitments		
Within one year	500	-
Later than one year but not later than five years	500	-
Total Unrecognised Contractual Commitments	1 000	-

The commitment in 2019-20 relates to the project for the delivery of the Greener Neighbourhoods grant program administered by the Planning and Development Fund.

Department of Planning, Transport and Infrastructure
Notes to and forming part of the Administered Financial Statements
for the year ended 30 June 2020

A24: Contingent Assets and Liabilities

The department is not aware of any administered contingent assets or liabilities.

A25: Events After the Reporting Period

As a result of restructuring of administrative arrangements outlined in the Government Gazette on 29 July 2020, the department will become known as the Department for Infrastructure and Transport. As a consequence of this restructuring the offices of the Surveyor-General, Valuer-General and Registrar-General will be assigned to the Attorney-General's Department under the responsibility of the Minister for Planning and Local Government, along with the Planning and Development Fund.

For more information on the impact of the administrative arrangements on the department's administered items, refer to note 10.5 in the 2019-20 financial statements for the Department of Planning, Transport and Infrastructure.

A26: Fair Value Measurement

Fair Value Hierarchy

The fair value of non-financial assets must be estimated for recognition and measurement or for disclosure purposes. The department categorises non-financial assets measured at fair value into hierarchy based on the level of inputs used in measurement.

Fair value measurements recognised in the Statement of Administered Financial Position are categorised into the following levels at 30 June 2020.

The department had no Administered recurring or non-recurring fair value measurements categorised into Level 1 or Level 3.

Fair value measurements at 30 June 2019	2020	Level 2
Recurring Fair Value Measurements	\$'000	\$'000
Land (Note A18)	17 964	17 964
Total Recurring Fair Value Measurements	17 964	17 964

Fair value measurements at 30 June 2018	2019	Level 2
Recurring Fair Value Measurements	\$'000	\$'000
Land (Note A18)	17 964	17 964
Total Recurring Fair Value Measurements	17 964	17 964

Valuation Techniques and Inputs

Valuation techniques used to derive Level 2 fair values are detailed in Note A18. There were no changes in valuation techniques during 2019-20.

A27: Financial Instruments

A27.1 Financial Risk Management

The financial instruments/financial risk management items, conditions and accounting policies of the department, outlined in Note 11 for controlled items, apply equally to the Administered Financial Statements.

The department's exposure to financial risk (liquidity, credit and market) is low due to the financial instruments held.

Liquidity risk arises where the department is unable to meet its financial obligations as they fall due. The department normally settles accounts within 30 days from the date the invoice is first received.

Credit risk arises when there is the possibility of the department's debtors defaulting on their contractual obligations resulting in financial loss to the department.

Exposure to interest rate risk will not arise on the administered interest bearing liabilities and interest bearing assets as the interest rate is fixed over the term of the loans.

Department of Planning, Transport and Infrastructure
Notes to and forming part of the Administered Financial Statements
for the year ended 30 June 2020

A27.2 Categorisation of Financial Instruments

	Carrying Amount (\$'000)	Contract Maturities		
		< 1 year (\$'000)	1-5 years (\$'000)	> 5 years (\$'000)
2020				
Financial Assets				
Cash and cash equivalents	57 351	57 351	-	-
Receivables ^(a)	178	178	-	-
Total Financial Assets	57 529	57 529	-	-
Financial liabilities				
Payables ^(a)	24 232	24 232	-	-
Total Financial Liabilities	24 232	24 232	-	-
2019				
Financial assets				
Cash and cash equivalents	73 625	73 625	-	-
Receivables ^(a)	87	87	-	-
Total Financial Assets	73 712	73 712	-	-
Financial Liabilities				
Payables ^(a)	32 822	32 822	-	-
Total Financial Liabilities	32 822	32 822	-	-

(a) Receivable and payable amounts disclosed exclude amounts relating to statutory receivables and payables (e.g. Commonwealth, State and Local Government taxes, fees and charges; Auditor-General's audit fees). In government, certain rights to receive or pay cash may not be contractual and therefore in these situations, the requirement will not apply. Where rights or obligations have their source in legislation such as levies, tax and equivalents etc. they would be excluded from the disclosure. The standard defines contract as enforceable by law. All amounts recorded are carried at cost (not materially different from amortised cost).

Appendix 2: Contractors engaged by the agency

The following is a summary of external contractors that have been engaged by the agency, the nature of work undertaken, and the actual payments made for work undertaken during the financial year.

Contractors with a contract value below \$10,000

Contractors	Purpose	\$ Actual payment
All contractors below \$10,000 each - combined	Various	\$12,830.00

Contractors with a contract value above \$10,000 each

CONTRACTOR (NAME)	PURPOSE (CONTRACT TITLE)	\$ Awarded Contract Sum incl GST

The contents of the table above reflects contracts entered into by the agency during the financial year which are captured in the agency's contract management system. The agency also enters into a range of contracts as a result of across government service provision arrangements and through discrete purchase orders which are not included. To note, 2019-20 contractor information now includes the category 'goods and services in conjunction with construction', which was previously not reported in the annual report.
