

Gawler Rail Electrification Project

Pedestrian Crossing Upgrade, Ovingham Level Crossing

As part of the Gawler Rail Electrification Project, the Department for Infrastructure and Transport (Department) advises that there will be intermittent closures of Exeter Terrace, while construction is undertaken to replace the existing southern pedestrian crossing at Ovingham Railway Station, with a new active pedestrian crossing (in the same location).

The activation of this crossing will be completed in two stages.

The first stage of works involves the construction of a new pedestrian maze and paths. In order to undertake the Stage One works, the existing southern pedestrian crossing at Ovingham Railway Station will be **closed from Monday, 1 March 2021, to early May 2021**, weather permitting.

The second stage of the works involves activating this pedestrian crossing by installing automated safety gates, signals and upgraded signage. These works are expected to take place in the third quarter of 2021.

Location: Ovingham Railway Station, Prospect.

When (Stage One works):

- From Monday, 1 March 2021, to Saturday, 1 May 2021, Exeter Terrace will be intermittently closed to traffic, Monday to Friday between 7am and 7pm, and Saturdays between 7am to 5pm.
- During these times, detour signage will be in place to direct motorists and pedestrians to alternative access (refer to map overleaf).
- The city bound lanes on Torrens Road will be reduced to two lanes in the vicinity of the works (see map overleaf), between 9am and 7pm weekdays, and between 9am and 5pm on Saturday. A speed restriction of 40km/h will be in place during this time.
- Works will not be undertaken on Sundays, and Exeter Terrace will be open to traffic. However, the pedestrian crossing will remain closed, with pedestrian detours in place.
- Access to businesses and residences will be maintained at all times.
- Please take extra care when workers are on site. Observe signage, speed restrictions and take care when travelling through the area.
