

Gawler Rail Electrification Project

Torrens Road and Belford Avenue level crossings temporary closure

As part of the Gawler Rail Electrification Project, the Department for Infrastructure and Transport (the Department) advises of temporary closures of the Torrens Road and Belford Avenue level crossings to undertake essential track maintenance works.

Location: the works will be undertaken within the rail corridor at night to minimise impact to traffic during peak times.

When: Torrens Road and Belford Avenue level crossing will be closed at the same time at the following times:

- Friday 26 February between 11pm and 7am Saturday 27 February
- Saturday 27 February between 11pm and 7am Sunday, 28 February

As previously advised, Belford Avenue and Pym Street level crossings only will also be closed at the following times:

- Sunday, 28 February between 11pm and 11am Monday, 1 March
- Monday, 1 March between 11pm and 11am Tuesday, 2 March

Traffic management and detours:

Both level crossings will be **closed to all traffic** when works are occurring. Detours will be in place directing motorists to alternative crossing points at Torrens Road and Regency Road. Speed restrictions will also apply. Please observe signage, speed restrictions and traffic controllers. Access to residential properties and businesses will be maintained at all times. Pedestrians will be assisted to cross by staff on site (if safe to do so) or directed to the nearest safe crossing point. Please plan ahead, allow extra travel time and take care when travelling through the area.

**BUILDING
WHAT MATTERS**

Torrens Road and Belford Avenue level crossing closure detour

**What you can expect:**

The work is required to maintain the track by compacting the ballast stones under the railway lines through a process called 'tamping'. Tamping is essential to ensure the durability of the track, improve ride quality of trains and is an important part of maintaining track condition. As the work crews move along the railway line, medium levels of noise and possible low-level vibrations can be expected when the tamping machinery is in close proximity to your property. Every effort will be made to minimise disruption to residents and businesses during these works as much as practicably possible.
