

# DRAFT PLANNING AND DESIGN CODE

→ STATE  
PLANNING  
REFORM

WUDINNA DISTRICT COUNCIL  
- Council Specific Code Extract

October 2019

## Part 1 – Rules of Interpretation

This Part 1 forms part of the Planning and Design Code. It sets out how the Code implements the requirements of section 66 of the Act and instructs the user on how the Code is to be read and applied to development assessed under the *Planning, Development and Infrastructure Act 2016*.

### Introduction

This is the Planning and Design Code under the *Planning, Development and Infrastructure Act 2016* (the Act). As provided by section 65 of the Act, the State Planning Commission (the Commission) is responsible for preparing and maintaining the Planning and Design Code as a statutory instrument under the Act. The Planning and Design Code, and any amendments to the Code, as published on the SA planning portal, have been adopted by the Minister.

As provided by section 66 of the Act, the primary purpose of the Planning and Design Code is to set out a comprehensive set of policies, rules and classifications which may be selected and applied in the various parts of the State through the operation of the Planning and Design Code and the SA planning database for the purposes of development assessment and related matters within the State.

The Planning and Design Code also provides for other matters envisaged by the Act, and regulations made under the Act in Parts 5, 6, 7, 8 and 9.

### Commencement

The commencement date for the Planning and Design Code was 1 July 2019.

Information about amendments to the Planning and Design Code is set out in Appendix 1.

### Preliminary

Library of classification criteria (Deemed-to-Satisfy criteria), policies and rules

In addition to the classification of development, the Planning and Design Code sets out a comprehensive set of policies and rules that may be selected and applied in the various parts of the State for the purposes of the assessment of performance assessed and restricted development.

The policies and rules are collated and organised into Zones, Subzones, Overlays and General Development Policies. Together they form a library of policies (“the Code Library”). The policies that make up the library have no application in their own right, but apply according to the scheme outlined in the following paragraphs.

The policies are applied to development by reference to classes of development, and spatial location.

Zones, Subzones and Overlays are assigned spatial boundaries in the various parts of the State through the operation of the SA planning database.

### Classification of development

The Planning and Design Code classifies various classes of development as:

- a) accepted development (see section 104(1) of the Act); and
- b) deemed-to-satisfy development (see section 105(a) of the Act); and
- c) restricted development (see section 108(1)(a) of the Act).

All development is classified firstly by reference to its location and the Zone, Subzone and Overlays that are applicable to the location. Classification tables applicable to each Zone identify Accepted Development, Deemed-to-Satisfy development and Restricted Development.

## Accepted Development

The Code classifies development as Accepted Development in an Accepted Development Classification Table relative to a particular Zone.

An Accepted Development Classification Table for each Zone specifies criteria which must be met in order for specified classes of development to be classified as Accepted Development within the Zone. For a development to be Accepted Development all criteria applicable to a class of development must be satisfied.

## Deemed-to-Satisfy Development

The Code classifies development as deemed-to-satisfy development in a Deemed-to-Satisfy Development Classification Table relative to a particular Zone.

A Deemed-to-Satisfy Classification Table for each Zone specifies criteria which must be met in order for specified classes of development to be classified as deemed-to-satisfy development within the Zone. For a development to be deemed-to-satisfy development all criteria applicable to a class of development must be satisfied.

A deemed-to-Satisfy development does not require assessment against the policies and rules applicable to performance assessed development, and must be granted a consent subject to the requirements of section 106 of the Act.

## Restricted Development

The Code classifies development as restricted development in a Restricted Development Table relative to each Zone. Restricted development is a form of impact assessed development for the purposes of assessment under the Act.

Performance Assessed Development - Application of Policies to Govern Performance assessed development

All development not classified as accepted, deemed-to-satisfy, restricted or impact assessed is to be assessed on its merits against the Planning and Design Code, as contemplated by section 107 of the Act. This is referred to as performance assessed development.

## Application of Policies to Classes of Development

The Code applies policies to classes of development through an Applicable Policies for Performance Assessed Development Table relative to each Zone.

An Applicable Policies for Performance Assessed Development Table for each Zone specifies the policies and rules (selected from the Code library) that apply to classes of development within the Zone, including by the application of policies within Subzones and Overlays, together with the relevant General Development Policies. The Applicable Policies for Performance Assessed Development Tables also contain rules for application of the policies under the heading "Applicable Policies" including rules relating to the application of Desired Outcome policies and Designated Performance Features. The policies specified in the Applicable Policies for Performance Assessed Development Table constitute the policies applicable to the class of development within the Zone to the exclusion of all other policies within the Code library, and no other policies are applicable.

Development that does not fall within one of the specified classes of development in an Applicable Policies for Performance Assessed Development Table is designated in the Table as "All Other Development". In respect of all other development, all policies from the Zone and Subzone, and all policies in Overlays that have application to the spatial location of the development, and all General Development Policies, are selected and applied for the purpose of assessment.

## Relevant Provisions

For the purposes of section 102 of the Act the relevant authority must assess the development against the applicable policies specified by the Zone Applicable Policies for Performance Assessed Development Table that are relevant to the particular development. For the avoidance of doubt, the relevant authority may determine that one or more applicable policies is not relevant to a particular development.

## Policies – Desired Outcomes and Performance Outcomes

Zone, Subzone, Overlay and General Development Policies are comprised of desired outcomes and performance outcomes. These are applicable to performance assessed development and to restricted development.

Desired outcomes are policies designed to aid the interpretation of performance outcomes by setting a general policy agenda for a Zone, Subzone, Overlay or General Development Policies module. Where a relevant authority is uncertain as to whether or how a performance outcome applies to a development, the desired outcome(s) may inform its consideration of the relevance and application of a performance outcome, or in assessing the merits of the development against the applicable performance outcomes collectively.

Performance outcomes are policies designed to facilitate assessment according to specified factors, including land use, site dimensions and land division, built form and character and hazard risk minimisation.

In order to assist a relevant authority to interpret the performance outcomes, in some cases the policy includes a standard outcome which will generally meet the corresponding performance outcome (a *designated performance feature* or DPF). Without derogating from the need to assess development on its merits against all relevant policies, a DPF provides a guide to the relevant authority as to what is generally considered to satisfy the corresponding performance outcome but does not derogate from the discretion to determine that the outcome is met in another way.

## Restricted Development

For the purpose of restricted development in all Zones, all policies and rules relative to the spatial location of the development together with all General Development Policies are applicable and may be determined by the Commission to be relevant for the purposes of a particular restricted development pursuant to s110(10) of the Act.

## Spatial Information

Spatial boundaries of Zones, Subzones and Overlays in relation to the parts of the State to which the Planning and Design Code applies are accessed through the SA planning database.

The classifications, rules and policies applicable to a particular class of Zone, or to a Subzone or Overlay determined in the manner set out in this Introduction, are applied to the various parts of the State by reference to the correspondingly named Zones, Subzones and Overlays that the SA planning database provides access to.

## Hierarchy of Policies/Modification of Provisions

Where there is an inconsistency between provisions in the library of policies, and for the purpose of section 66(3)(b) of the Act, the following rules will apply to the extent of any inconsistency between policies:

the provisions of an Overlay will prevail over all other policies applying in the particular case;

- a) a Subzone policy will prevail over a Zone policy or a General Development Policy; and
- b) a Zone policy will prevail over a General Development Policy.

## Procedural Matters – Referrals

The Code also interacts with Schedule 9 of the Planning, Development and Infrastructure (General) Regulations 2017 for the purposes of section 122 of the Act. Schedule 9 prescribes development that, by reference to location, class or other features as specified in each item in the table in clause 3 of Schedule 9, and class as specified by the Code, must be referred to a body prescribed in Schedule 9. For the purposes of the specified items in the table in clause 3 of Schedule 9, the Code contains Referral Tables relative to Overlays, Zones and General Development modules. Referral Tables specify classes of development requiring referral to a prescribed body by the mechanism described in paragraph 6.2.

Referral Tables specify classes of development to which an item in the table in clause 3 of Schedule 9, identified by reference to the prescribed referral body, applies. In addition, Referral Tables identify the purpose of the referral (that being a matter that is considered by the Commission under section 66(2)(e)(ii) of the Act as being appropriate to include in the Code). Development that is within a class specified by the Referral Table, and otherwise within the corresponding item in the table in clause 3 of Schedule 9, must be referred to the prescribed referral body pursuant to s122 of the Act.

## Interpretation

### Definitions and Other Rules of Interpretation

A term used in the Planning and Design Code may have a meaning specifically assigned to that term by one of the following:

- a) the *Planning, Development and Infrastructure Act 2016* (the Act);
- b) the *Acts Interpretation Act 1915* (South Australia);
- c) the definitions in Parts 7 and 8 of the Planning and Design Code.

In the event a term has been assigned a meaning in more than one of the Code's parts (ie. a Zone, Subzone, Overlay, or General Development Policy), the meaning contained in the part that sits highest in the hierarchy of policies under clause 4 in Part 1 will prevail.

A reference in the Planning and Design Code to an Act includes a reference to any regulations or instrument made under the Act, and where an Act, regulation or instrument has been amended or replaced, if the context permits, includes a reference to the amended or replaced Act, regulations or instrument.

A reference in the Planning and Design Code to a specific resource document or standard, means the latest version of the resource document or standard.

Unless otherwise indicated, a reference in the Planning and Design Code to a Part, section or table is a reference to a Part, section or table of the Code.

Part 2 – Zones and Sub Zones

## Business Neighbourhood Zone

Table 4 – Restricted Development Classification

| Class of Development  | Exclusions  |
|---|---|
| The following Classes of Development are classified as Restricted subject to any 'Exclusions' |   |
| General industry  |   |
| Motor repair station  |   |
| Shop  | Restaurant<br><br>Any other shop with a gross leasable floor area less than 500m <sup>2</sup> |

### Procedural Matters (PM)

| Notification  |
|---|
| <p>All classes of performance assessed development are excluded from notification except where they involve any of the following:</p> <p>(a) development identified as "all other code assessed development" in Business Neighbourhood Zone Table 3</p> <p>(b) development that fails to comply with DPF 3.1</p> <p>(c) hotel</p> <p>(d) industry</p> <p>(e) shop, office or consulting room with a floor area exceeding 250m<sup>2</sup></p> |

### Assessment Provisions

#### Desired Outcome (DO)

##### DO 1

A low rise medium density environment accommodating a variety of housing and accommodation types co-existing with a mix of low impact employment-generating land uses.

#### Performance Outcomes and Deemed to Satisfy / Designated Performance Outcome Criteria

##### Land Use and Intensity

##### PO 1.1

Shops, office, consulting room and other low impact non-residential uses supported by a variety of compact, medium density housing and accommodation types.

##### DTS/DPF 1.1

Development comprises one or more of the following land uses:

- Dwelling
- Community facility
- Consulting room
- Office
- Shop

#### PO 1.2

Small scale business and commercial land uses complement the prevailing neighbourhood character.

#### DTS/DPF 1.2

The gross leasable floor area of a shop, office or consulting room does not exceed 250m<sup>2</sup>.

### Built Form and Character

#### PO 2.1

Buildings are of a scale and design that complements surrounding built form, streetscapes and local character.

#### DTS/DPF 2.1

None are applicable.

#### PO 2.2

Development provides attractive landscaping to the primary street frontage.

#### DTS/DPF 2.2

None are applicable.

#### PO 2.3

Site coverage is limited to provide space for landscaping, open space and pervious areas.

#### DTS/DPF 2.3

Site coverage does not exceed 60% of site area.

### Building height and setbacks

#### PO 3.1

Buildings are of low-to-medium rise scale, with the highest intensity of built form at the centre of the zone and lower scale built form adjoining a zone primarily intended to accommodate residential development.

#### DTS/DPF 3.1

Building height does not exceed:

- a. 2 building levels or 9 metres on sites adjoining a residential allotment within a different zone; or
- b. 3 building levels or 12 metres in all other cases.

#### PO 3.2

Buildings set back from primary street boundaries to contribute to a consistent streetscape.

#### DTS/DPF 3.2

Buildings set back from the primary street frontage the lesser of the following:

- (a) the average of any existing buildings on either of the adjoining sites having frontage to the same street; or
- (b) not less than 5m where no building exists on an adjoining site.

#### PO 3.3

Buildings set back from secondary street boundaries (other than rear laneways) to contribute to a consistent streetscape.

#### DTS/DPF 3.3

Buildings set back from the secondary street frontage:

- (a) the average of any existing buildings on adjoining sites having frontage to the same street; or
- (b) not less than 0.9m where no building exists on an adjoining site.

#### PO 3.4

Boundary walls are limited in height and length to manage impacts on adjoining properties.

#### DTS/DPF 3.4

Except where the development is a dwelling located on a central site within a row dwelling development, buildings with side boundary walls are sited on only one side boundary and either:

- a. adjoin or abut a boundary wall of a building on adjoining land for the same length and height; or
- b. do not exceed the following:
  - i. 3m in height from the top of the footings;
  - ii. 10m in length;
  - iii. when combined with other walls on the boundary of the subject development site, maximum 45% of the length of the boundary; and
- c. are setback at least 3 metres from any other existing or proposed boundary walls on the subject land.

#### PO 3.5

Dwellings in a semi-detached, row or terrace arrangement maintain space between buildings consistent with a suburban streetscape character.

#### DTS/DPF 3.5

Dwellings in a semi-detached or row arrangement are setback at least 900mm from side boundaries shared with allotments outside the development site.

#### PO 3.6

Buildings are set back from side boundaries to provide:

- (a) separation between dwellings in a way that complements the established character of the locality; and
- (b) access to natural light and ventilation for neighbours.

#### DTS/DPF 3.6

Other than walls located on a side boundary, buildings are set back at least 0.9 metres from side boundaries.

#### PO 3.7

Buildings are set back from rear boundaries to provide:

- (a) separation between dwellings in a way that complements the established character of the locality;
- (b) access to natural light and ventilation for neighbours;
- (c) open space recreational opportunities; and
- (d) space for landscaping and vegetation.

#### DTS/DPF 3.7

1 Buildings are set back from the rear boundary at least:

- (a) 3m for the first building level; and
- (b) 5m for any second building level.

## Land Division

#### PO 4.1

Land division and site amalgamation that creates allotments that vary in size and are suitable for a variety of residential and commercial activities and that improve the level of development integration.

#### DTS/DPF 4.1

None are applicable.

## Advertisements

#### PO 5.1

Freestanding advertisements are not visually dominant within the locality.

## DTS/DPF 5.1

Freestanding advertisements:

- (a) do not exceed 6m in height above natural ground level; and
- (b) do not have a face that exceeds 4m<sup>2</sup> per side.

## Procedural Matters (PM)

### Notification

All classes of performance assessed development are excluded from notification except where they involve any of the following:

- (a) development identified as “all other code assessed development” in Business Neighbourhood Zone Table 3
- (b) development that fails to comply with DPF 3.1
- (c) hotel
- (d) industry
- (e) shop, office or consulting room with a floor area exceeding 250m<sup>2</sup>

## Community Facilities Zone

Table 1 – Accepted Development Classification

| <b>Class of Development</b><br>The following Classes of Development are classified as Accepted Development subject to meeting the 'Accepted Development Classification Criteria'  | <b>Accepted Development Classification Criteria</b>   |
|---|---|
| <b>Building work on railway land</b>  | <ol style="list-style-type: none"> <li>1 Building work is associated with a railway</li> <li>2 It is situated (or to be situated) on railway land</li> <li>3 It is required for the conduct or maintenance of railway activities.</li> </ol>  |
| <b>Internal building work</b><br>Except where any of the following apply: <ul style="list-style-type: none"> <li>• Historic Area Overlay</li> <li>• Local Heritage Place identified in the Local Heritage Place Overlay</li> <li>• State Heritage Area Overlay</li> <li>• State Heritage Place identified in the State Heritage Place Overlay</li> </ul>  | <ol style="list-style-type: none"> <li>3 There will be no increase in the total floor area of the building</li> <li>4 There will be no alteration to the external appearance of the building.</li> </ol>  |
| <b>Private bushfire shelters</b><br>Except where any of the following apply: <ul style="list-style-type: none"> <li>• Character Preservation District Overlay</li> <li>• Coastal Areas Overlay</li> <li>• Hazards (Acid Sulfate Soils) Overlay</li> <li>• Hazards (Flooding) Overlay</li> <li>• Character Area Overlay</li> <li>• Historic Area Overlay</li> <li>• Local Heritage Place Overlay</li> <li>• State Heritage Area Overlay</li> <li>• State Heritage Place Overlay</li> </ul> | <ol style="list-style-type: none"> <li>1 The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system</li> <li>2 Primary street setback – at least as far back as the building to which it is ancillary</li> <li>3 Secondary street setback – at least 900mm from the boundary of the allotment</li> <li>4 At least 6m from the corner of an allotment which abuts the intersection of two or more roads (other than where a 4m x 4m allotment cut-off is already in place).</li> </ol> |

|   |   |
|---|---|
| <ul style="list-style-type: none"> <li>• Native Vegetation Overlay</li> <li>• State Significant Native Vegetation Overlay</li> <li>• Ramsar Wetlands Overlay</li> <li>• River Murray Flood Plain Overlay</li> <li>• Sloping Land Overlay</li> <li>• Water Resources Overlay</li> </ul>  |   |
| <p><b>Shade sail</b><br/> Except where any of the following apply:</p> <ul style="list-style-type: none"> <li>• Character Preservation District Overlay</li> <li>• Coastal Areas Overlay</li> <li>• Hazards (Acid Sulfate Soils) Overlay</li> <li>• Character Area Overlay</li> <li>• Historic Area Overlay</li> <li>• Local Heritage Place Overlay</li> <li>• State Heritage Area Overlay</li> <li>• State Heritage Place Overlay</li> <li>• Native Vegetation Overlay</li> <li>• State Significant Native Vegetation Overlay</li> <li>• Ramsar Wetlands Overlay</li> <li>• River Murray Flood Plain Overlay</li> <li>• Sloping Land Overlay</li> <li>• Water Resources Overlay</li> </ul> | <p>8 The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system</p> <p>9 Shade sail consists of permeable material</p> <p>10 The total area of the sail - does not exceed 40m<sup>2</sup></p> <p>11 No part of the shade sail will be:</p> <ul style="list-style-type: none"> <li>(a) 3m above ground or floor level (depending on where it is situated) at any place within 900mm of a boundary of the allotment</li> <li>(b) 5m above ground or floor level (depending on where it is situated) within any other part of the allotment</li> </ul> <p>12 Primary street setback – at least as far back as the building line of the building to which it is ancillary</p> <p>13 If any part of the sail will be situated on a boundary of the allotment, the length of sail along a boundary does not exceed 8m</p> <p>14 In a case where any part of the sail or a supporting structure will be situated on a side boundary of the allotment — the length of the sail and any such supporting structure together with all relevant walls or structures located along the boundary will not exceed 45% of the length of the boundary.</p> |
| <p><b>Solar photovoltaic panels (roof mounted)</b><br/> Except where any of the following apply:</p> <ul style="list-style-type: none"> <li>• Historic Area Overlay</li> <li>• Local Heritage Place identified in the Local Heritage Place Overlay</li> <li>• State Heritage Area Overlay</li> <li>• State Heritage Place identified in the State Heritage Place Overlay</li> </ul>   | <p>4 Panels are installed parallel to the roof of a building and with the underside surface of the panel not being more than 100mm above the surface of the roof</p> <p>5 Panels and associated components do not overhang any part of the roof</p> <p>6 Does not apply to system with a generating capacity of more than 5MW that is to be connected to the State's power system.</p>  |

**Class of Development**

**Applicable Policies**

The following policies are applicable to the assessment of the identified Class of Development. Policies referred to are Performance Outcome policies, and any associated Designated Performance Features. Relevant Desired Outcomes are not listed, but automatically apply in relation to a Performance Assessed Development.  
Where a development comprises more than one Class of Development the relevant policies will be taken to be the sum of the applicable policies for each Class of Development.

## Assessment Provisions

### Desired Outcomes (DO)

#### DO 1

Provision of a range of public and private community, educational, recreational and health care facilities.

### Performance Outcomes and Deemed to Satisfy / Designated Performance Outcome Criteria

#### Land Use and Intensity

##### PO 1.1

Development is associated with or ancillary to the provision of community, educational, recreational and / or health care services.

##### DTS/DPF 1.1

Development comprises one or more of the following land uses:

- Consulting room
- Educational establishment
- Indoor recreation facility
- Office
- Place of worship
- Pre-school
- Recreation area
- Shop

##### PO 1.2

Integration and coordination of adjoining land uses to enhance accessibility and efficiency in service delivery.

##### DTS/DPF 1.2

None are applicable.

##### PO 1.3

Development avoids inhibiting or prejudicing future delivery of community, educational, recreational or health care services.

##### DTS/DPF 1.3

None are applicable.

### Built Form and Character

#### PO 2.1

A range of low to medium rise buildings, with the highest intensity of built form at the centre of the zone and lower scale at the peripheral zone interface.

##### DTS/DPF 2.1

Building height does not exceed a maximum height specified in the *Building Height Technical and Numeric Variations Overlay*.

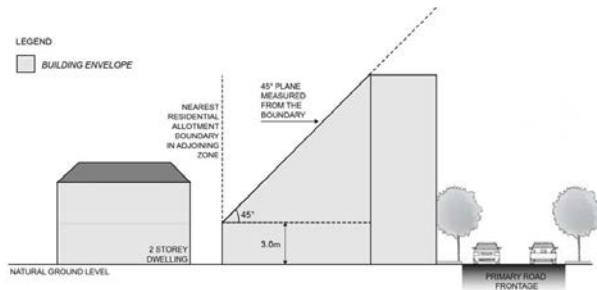

### Interface Height

#### PO 3.1

Buildings mitigate visual impacts of building massing on residential development within a neighbourhood zone.

### DTS/DPF 3.1

Buildings constructed within a building envelope provided by a 45 degree plane measured from a height of 3 metres above natural ground level at the allotment boundary of a residential allotment within a neighbourhood zone as shown in the following diagram (except where this boundary is a southern boundary in which case DTS/DPF 3.2 will apply, or where this boundary is the primary street boundary):

### PO 3.2

Buildings mitigate overshadowing of residential development within a neighbourhood zone.

### DTS/DPF 3.2

Buildings on sites with a southern boundary adjoining a residential allotment within a neighbourhood zone are constructed within a building envelope provided by a 30 degree plane grading north measured from a height of 3m above natural ground level at the southern boundary, as shown in the following diagram:

### Procedural Matters (PM)

#### Notification of Performance assessed development

All classes of development are excluded from notification except where it involves any of the following:

- the site of the development is adjacent land to land in a different zone
- development identified as "all other code assessed development" in Community Facilities Zone Table 3

## Conservation Zone

Table 1 – Accepted Development Classification

| <b>Class of Development</b><br>The following Classes of Development are classified as Accepted Development subject to meeting the 'Accepted Development Classification Criteria'   | <b>Accepted Development Classification Criteria</b>   |
|--|---|
| <b>Building work on railway land</b>   | 4 Building work is associated with a railway<br>5 It is situated (or to be situated) on railway land<br>6 It is required for the conduct or maintenance of railway activities.  |
| <b>Internal building work</b><br>Except where any of the following apply: <ul style="list-style-type: none"> <li>• A Historic Shipwreck identified in the Historic Shipwrecks Overlay</li> <li>• State Heritage Area Overlay</li> <li>• A State Heritage Place identified in the State Heritage Place Overlay</li> </ul> | 1 There will be no increase in the total floor area of the building<br>2 There will be no alteration to the external appearance of the building.  |
| <b>Private bushfire shelters</b><br>Except where any of the following apply: <ul style="list-style-type: none"> <li>• Coastal Areas Overlay</li> <li>• Hazards (Acid Sulfate Soils) Overlay</li> <li>• Hazards (Flooding) General Overlay</li> <li>• Historic Area Overlay</li> </ul>                                    | 1 The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system<br>2 Primary street setback – at least as far back as the building to which it is ancillary<br>3 Secondary street setback – at least 900mm from the boundary of the allotment<br>4 At least 6m from the corner of an allotment which abuts the intersection of two or more roads (other than where a 4m x 4m allotment cut-off is already in place). |

- Historic Shipwrecks Overlay
- Local Heritage Place Overlay
- Native Vegetation Overlay
- Ramsar Wetlands Overlay
- River Murray Flood Plain Overlay
- Significant Landscape Protection Overlay
- Sloping Land Overlay
- State Heritage Area Overlay
- State Heritage Place Overlay
- State Significant Native Vegetation Overlay
- Water Resources Overlay

**Shade sail**

Except where any of the following apply:

- Coastal Areas Overlay
- Hazards (Acid Sulfate Soils) Overlay
- Hazards (Flooding) General Overlay
- Historic Area Overlay
- Historic Shipwrecks Overlay
- Local Heritage Place Overlay
- Native Vegetation Overlay
- Ramsar Wetlands Overlay
- River Murray Flood Plain Overlay
- Significant Landscape Protection Overlay

- 1 The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system
- 2 Shade sail consists of permeable material
- 3 The total area of the sail - does not exceed 40m<sup>2</sup>
- 4 No part of the shade sail will be:
  - (a) 3m above ground or floor level (depending on where it is situated) at any place within 900mm of a boundary of the allotment
  - (b) 5m above ground or floor level (depending on where it is situated) within any other part of the allotment
- 5 Primary street setback – at least as far back as the building line of the building to which it is ancillary
- 6 If any part of the sail will be situated on a boundary of the allotment, the length of sail along a boundary does not exceed 8m
- 7 In a case where any part of the sail or a supporting structure will be situated on a side boundary of the allotment — the length of the sail and any such supporting structure together with all

|  |   |
|--|---|
| <ul style="list-style-type: none"> <li>• Sloping Land Overlay</li> <li>• State Heritage Area Overlay</li> <li>• State Heritage Place Overlay</li> <li>• State Significant Native Vegetation Overlay</li> <li>• Water Resources Overlay</li> </ul>  | <p>relevant walls or structures located along the boundary will not exceed 45% of the length of the boundary.</p>   |
| <p><b>Solar photovoltaic panels (roof mounted)</b><br/> Except where any of the following apply:</p> <ul style="list-style-type: none"> <li>• Historic Area Overlay</li> <li>• A Local Heritage Place identified in the Local Heritage Place Overlay</li> <li>• State Heritage Area Overlay</li> <li>• A State Heritage Place identified in the State Heritage Place Overlay</li> </ul>  | <ol style="list-style-type: none"> <li>7 Panels are installed parallel to the roof of a building and with the underside surface of the panel not being more than 100mm above the surface of the roof</li> <li>8 Panels and associated components do not overhang any part of the roof</li> <li>9 Does not apply to system with a generating capacity of more than 5MW that is to be connected to the State's power system.</li> </ol>   |
| <p><b>Water tank (above ground)</b><br/> Except where any of the following apply:</p> <ul style="list-style-type: none"> <li>• Character Preservation District Overlay</li> <li>• Coastal Areas Overlay</li> <li>• Hazards (Flooding) Overlay</li> <li>• Historic Area Overlay</li> <li>• Historic Shipwrecks Overlay</li> <li>• Local Heritage Place Overlay</li> <li>• Native Vegetation Overlay</li> <li>• Ramsar Wetlands Overlay</li> <li>• River Murray Flood Plain Overlay</li> <li>• Significant Landscape Protection Overlay</li> </ul> | <ol style="list-style-type: none"> <li>8 The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system</li> <li>9 The tank is part of a roof drainage system</li> <li>10 Total floor area - not exceeding 15m<sup>2</sup></li> <li>11 The tank is located wholly above ground</li> <li>12 Tank height – does not exceed 4m above natural ground level</li> <li>13 Primary street setback – at least as far back as the building line of the building to which it is ancillary</li> <li>14 In the case of a tank made of metal – the tank is pre-colour treated or painted in a non-reflective colour.</li> </ol> |

- Sloping Land Overlay
- State Heritage Area Overlay
- State Heritage Place Overlay
- State Significant Native Vegetation Overlay
- Water Resources Overlay

**Water tank (underground)**

Except where any of the following apply:

- Character Preservation District Overlay
- Coastal Areas Overlay
- Hazards (Acid Sulfate Soils) Overlay
- Historic Shipwrecks Overlay
- Native Vegetation Overlay
- Ramsar Wetlands Overlay
- Sloping Land Overlay
- State Significant Native Vegetation Overlay
- Water Resources Overlay

- 5 The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system
- 6 The tank (including any associated pump) is located wholly below the level of the ground.

| <b>Class of Development</b><br>The following Classes of Development are classified as Restricted subject to any 'Exclusions' | <b>Exclusions</b>   |
|--|---|
| <b>Dwelling</b>  | Detached dwelling in the <b>Dwelling Subzone</b> where it will not result in more than one dwelling per allotment.<br>In the <b>Small-scale Settlement Subzone</b> .  |
| <b>Land division</b>   | Where Conservation Zone DTS / DPF 2.1 is met.<br>In the <b>Visitor Experience Subzone</b> to create an allotment with an area of 5ha or more for existing tourist accommodation.<br>In the <b>Small Scale Settlement Subzone</b> .  |
| <b>Tourist Accommodation</b>   | In the <b>Visitor Experience Subzone</b> .<br>In an area proclaimed under the <i>National Parks and Wildlife Act 1972</i> and is contemplated by the relevant 'management plan' prepared in accordance with that Act.<br>In an area proclaimed under the <i>Wilderness Protection Act 1992</i> and is contemplated by the relevant 'plan of management' prepared in accordance with that Act. |

## Assessment Provisions (AP)

### Desired Outcome (DO)

#### DO 1

The conservation and enhancement of the natural environment and natural ecological processes for their historic, scientific, landscape, faunal habitat, biodiversity and cultural values and provision of opportunities for the public to experience these through low-impact recreational and tourism development.

### Performance Outcomes and Deemed to Satisfy / Designated Performance Outcome Criteria

#### Land Use

##### PO 1.1

Small-scale, low-impact land uses that provide for the conservation and protection of the area, while allowing the public to experience these important environmental assets.

##### DTS/DPF 1.1

Development comprises one or more of the following land uses:

- Advertisement
- Camp ground
- Farming
- Public amenity
- Renewable energy facility

## PO 1.2

Development primarily in the form of:

- (a) directional, identification and/or interpretative advertisements and/or advertising hoardings for conservation management and tourist information purposes;
- (b) scientific monitoring structures or facilities;
- (c) small-scale facility associated with the interpretation and appreciation of natural and cultural heritage such as public amenities, camping grounds, remote shelters or huts; or
- (d) structures for conservation management purposes.

## DTS 1.2

None are applicable.

## PO 1.3

Farming activities occur on already cleared land and outside of areas containing native vegetation, coastal dunes and wetlands of national importance.

## DTS 1.3

None are applicable.

## Land Division

### PO 2.1

Land division supports the management or improvement of the natural environment and does not result in any additional allotments, nor allotments with frontage or access to the coast.

### DTS/DPF 2.1

Land division that does not create any additional allotments, nor any additional allotments with frontage or direct access to the coast and is for the:

- (a) creation of a public road or a public reserve; or
- (b) minor adjustment of allotment boundaries to remove an anomaly in existing boundaries with respect to the location of existing buildings or structures

## Environmental Protection

### PO 3.1

Development avoids important nesting or breeding areas or areas that are important for the movement/migration patterns of fauna.

### DTS 3.1

None are applicable.

## Built Form and Character

### PO 4.1

Development sited and designed unobtrusively to minimise the visual impact on the natural environment by:

- (a) using low reflective materials and finishes that blend with, and colours that complement, the surrounding landscape;
- (b) being located below hilltops and ridgelines; and
- (c) being screened by existing vegetation.

### DTS 4.1

None are applicable.

### PO 4.2

Development sited and designed to minimise impacts on the natural environment by:

- (a) containing construction and built form within a tightly defined site boundary; and
- (b) minimising the extent of earthworks.

#### DTS 4.2

None are applicable.

#### PO 4.3

Recreation or visitor facilities located in publicly accessible areas in proximity to recreation trails to minimise impact on the natural environment.

#### DTS 4.3

None are applicable.

#### PO 4.4

Development does not obscure existing public views to landscape, river or seascape features and is not visibly prominent from key public vantage points, including public roads or car parking areas.

#### DTS 4.4

None are applicable.

### Access and Car Parking

#### PO 5.1

Vehicle access points are limited to minimise impact on the natural environment.

#### DTS/DPF 5.1

No more than one vehicle access point is provided to a site, landmark or lookout.

#### PO 5.2

Roads and vehicle access ways are located to minimise vegetation clearance and are constructed of permeable materials.

#### DTS 5.2

None are applicable.

#### PO 5.3

Roads are of a width and route to encourage low speeds and to minimise impact on the natural environment.

#### DTS 5.3

None are applicable.

#### PO 5.4

Recreational trails and access ways located to direct the public away from sensitive areas to minimise impact on the natural environment.

#### DTS 5.4

None are applicable.

#### PO 5.5

Recreational trails are raised or surfaced with permeable materials to minimise impact on the natural environment.

#### DTS/DPF 5.5

Pedestrian access ways/Recreational trails are raised or constructed of permeable materials.

#### PO 5.6

Car parking areas designed to minimise impact on the natural environment.

#### DTS/DPF 5.6

Car parking areas:

- (a) are constructed of permeable material; and

- (b) are located on already legally cleared land; and
- (c) are consolidated in one location.

## Advertisement

### PO 6.1

Advertisements limited to those needed for direction, identification and/or interpretation of environmental or cultural values and recreational and tourism facilities.

### DTS/DPF 6.1

Advertisements are for one or more of the following:

- (a) direction;
- (b) identification and interpretation of environmental values; or
- (c) identification of recreational and tourism facilities.

### PO 6.2

Advertisements limited in number and size to minimise impact on the visual and natural environment.

### DTS/DPF 6.2

Total combined area of advertisement(s) is not greater than 2m<sup>2</sup> on any one site.

## Landscaping

### PO 7.1

Screening and planting is provided to buildings and structures and comprises locally indigenous species to enhance the natural environment.

### DTS 7.1

None are applicable.

## Hazard Risk Minimisation

### PO 8.1

Habitable buildings designed and sited to manage the risks of natural hazards on personal and public safety and property.

### DTS 8.1

None are applicable.

## Concept Plans

### PO 9.1

Development is compatible with the outcomes sought by any relevant Concept Plan contained within the *Concept Plans Technical and Numeric Variation Overlay*

### DTS 9.1

None are applicable

## Procedural Matters (PM)

### Notification

All classes of performance assessed development is excluded from notification except where they involve any of the following:

- (a) the site of the development is adjacent to land in a different zone
- (b) development identified as "all other code assessed development" in Conservation Zone Table 3.

## Notification

### Placement of Notices – Exemptions for Performance Assessed Development

None specified.

### Placement of Notices – Exemptions for Restricted Development

None specified.

## Deferred Urban Zone

Table 1 – Accepted Development Classification

| <b>Class of Development</b><br>The following Classes of Development are classified as Accepted Development subject to meeting the 'Accepted Development Classification Criteria'  | <b>Accepted Development Classification Criteria</b>   |
|---|---|
| <b>Building work on railway land</b>  | 7 Building work is associated with a railway<br>1 It is situated (or to be situated) on railway land<br>2 It is required for the conduct or maintenance of railway activities.  |
| <b>Carport</b><br>Except where any of the following apply: <ul style="list-style-type: none"><li>• Character Preservation District Overlay</li><li>• Coastal Areas Overlay</li><li>• Hazards (Flooding) Overlay</li><li>• Historic Area Overlay</li><li>• Historic Shipwrecks Overlay</li><li>• Local Heritage Place Overlay</li><li>• State Heritage Place Overlay</li><li>• Native Vegetation Overlay</li><li>• State Significant Native Vegetation Overlay</li></ul> | 1 The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system<br>2 It is ancillary to a dwelling erected on the site<br>3 Primary street setback – at least 5.5m from the primary street boundary and as far back as the building line of the building to which it is ancillary<br>4 Secondary street setback – at least 900mm from the boundary of the allotment (if the land has boundaries on two or more roads)<br>5 Total floor area - does not exceed 40m <sup>2</sup><br>6 Post height - does not exceed 3m measured from natural ground level (and not including a gable end)<br>7 Building height - does not exceed 5m<br>8 If situated on or abutting a boundary (not being a boundary with a primary street or secondary street) – a length not exceeding 10m unless:<br>(a) a longer wall or structure exists on the adjacent site and is situated on the same allotment boundary; and |

|   |   |
|---|---|
| <ul style="list-style-type: none"> <li>• Ramsar Wetlands Overlay</li> <li>• River Murray Flood Plain Overlay</li> <li>• Sloping Land Overlay</li> <li>• Future Road Widening Overlay where an existing access is altered or a new access is created</li> <li>• Key Railway Crossings Overlay where an existing access is altered or a new access is created</li> <li>• Major Urban Transport Routes Overlay where an existing access is altered or a new access is created</li> <li>• Non-stop Corridor Overlay where an existing access is altered or a new access is created</li> <li>• Urban Transport Routes Overlay where an existing access is altered or a new access is created</li> <li>• Water Resources Overlay</li> </ul> | <p>(b) the proposed wall or structure will be built along the same length of boundary as the existing adjacent wall or structure to the same or lesser extent</p> <p>9 If the carport abuts or is situated on the boundary of the allotment (not being a boundary with a primary street or secondary street):</p> <p>(a) it will not result in all relevant walls or structures located along the boundary exceeding 45% of the length of the boundary; and</p> <p>(b) it will not be located within 3m of any other wall along the same boundary unless on an adjacent site on that boundary there is an existing wall of a building that would be adjacent to or abut the proposed wall or structure</p> <p>10 The total roofed area of all existing or proposed buildings on the allotment does not exceed 60% of the area of the allotment</p> <p>11 Door opening for vehicle access – does not exceed, in total, 7m in width or 50% of the width of the allotment frontage (whichever lesser)</p> <p>12 Internal dimensions – does not exceed 3.2m in width and 6m in length between all fences, walls and doors</p> <p>13 The carport:</p> <p>(a) is located so that vehicle access:</p> <p style="margin-left: 40px;">i. is provided via a lawfully existing or authorised driveway or access point or an access point for which consent has been granted as part of an application for the division of land; or</p> <p style="margin-left: 40px;">ii. will use a driveway that:</p> <p style="margin-left: 80px;">A. is not located within 6 metres of an intersection of 2 or more roads or a pedestrian actuated crossing; and</p> <p style="margin-left: 80px;">B. will not interfere with an item of street furniture (including directional signs, lighting, seating and weather shelters), other infrastructure, or a tree; or</p> <p style="margin-left: 40px;">iii. if adjacent a kerbed road, will be via a kerb that is designed to allow a vehicle to roll over it; and</p> <p>(b) is located so that the gradient from the place of access on the boundary of the allotment to the finished floor level at the front of the carport when the work is completed is not steeper than 1:4 on average; and</p> <p>(c) The centre of the driveway at the public road boundary is no more than 25 degree deviation from the centre of the front of the covered car parking space for which it provides vehicle access</p> |
| <p><b>Internal building work</b></p>  | <p>5 There will be no increase in the total floor area of the building</p>  |

|   |  |
|---|--|
| <p>Except where any of the following apply:</p> <ul style="list-style-type: none"> <li>• A Historic Shipwreck identified in the Historic Shipwrecks Overlay</li> <li>• A Local Heritage Place identified in the Local Heritage Place Overlay</li> <li>• A State Heritage Place identified in the State Heritage Place Overlay</li> </ul>  | <p>6 There will be no alteration to the external appearance of the building.</p>   |

## Assessment Provisions

### Desired Outcome (DO)

#### DO 1

To safeguard land for future urban growth.

### Performance Outcomes and Deemed to Satisfy / Designated Performance Outcome Criteria

#### Land Use and Intensity

##### PO 1.1

Development that is incompatible, prejudicial or detrimental to the orderly and efficient servicing and conversion of the land for future urban growth does not occur.

##### DTS/DPF 1.1

None are applicable.

#### Built Form and Character

##### PO 2.1

Development maintains an open character.

##### DTS/DPF 2.1

None are applicable

##### PO 2.2

Buildings limited to those that:

- (a) are ancillary to and necessary to support existing land use activities on the same allotment;
- (b) are for the purposes of public infrastructure.

##### DTS/DPF 2.2

None are applicable

#### Land Division

##### PO 3.1

Land division limited to that which:

- (a) corrects anomalies in the placement of allotment boundaries with respect to the location of existing buildings or structures; or
- (b) enables the provision of public infrastructure.

##### DTS/DPF 3.1

Land division is for:

- (a) the alteration of allotment boundaries, where no additional allotments are created; or
- (b) the purpose of providing public infrastructure.

#### Concept Plans

##### PO 4.1

Development is compatible with the outcomes sought by any relevant Concept Plan contained within the *Concept Plans Technical and Numeric Variation Overlay*.

##### DTS 4.1

None are applicable.

#### Procedural Matters

### Notification

All classes of performance assessed development are excluded from notification except where they involve any of the following:

- (a) the site of the development is adjacent land to land in a different zone

(b) development identified as "all other code assessed development" in Deferred Urban Zone Table 3

Placement of Notices – Exemptions for Performance Assessed Development

None specified.

Placement of Notices – Exemptions for Restricted Development

None specified.

## Employment Zone

Table 1 – Accepted Development Classification

| <b>Class of Development</b><br>The following Classes of Development are classified as Accepted Development subject to meeting the 'Accepted Development Classification Criteria'  | <b>Accepted Development Classification Criteria</b>  |
|---|--|
| <b>Building work on railway land</b>  | <ol style="list-style-type: none"> <li>1 Building work is associated with a railway</li> <li>2 It is situated (or to be situated) on railway land</li> <li>3 It is required for the conduct or maintenance of railway activities.</li> </ol>   |
| <b>Internal building work</b><br>Except where any of the following apply: <ul style="list-style-type: none"> <li>• A Local Heritage Place identified in the Local Heritage Place Overlay</li> <li>• State Heritage Area Overlay</li> <li>• A State Heritage Place identified in the State Heritage Place Overlay</li> </ul>   | <ol style="list-style-type: none"> <li>1 There will be no increase in the total floor area of the building</li> <li>2 There will be no alteration to the external appearance of the building.</li> </ol>   |
| <b>Shade sail</b><br>Except where any of the following apply: <ul style="list-style-type: none"> <li>• Character Preservation District Overlay</li> <li>• Coastal Areas Overlay</li> <li>• Character Area Overlay</li> <li>• Historic Area Overlay</li> <li>• Local Heritage Place Overlay</li> <li>• State Heritage Area Overlay</li> <li>• State Heritage Place Overlay</li> <li>• Native Vegetation Overlay</li> <li>• State Significant Native Vegetation Overlay</li> <li>• River Murray Flood Plain Overlay</li> <li>• Sloping Land Overlay</li> <li>• Water Resources Overlay</li> </ul> | <ol style="list-style-type: none"> <li>1 The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system</li> <li>2 Shade sail consists of permeable material</li> <li>3 The total area of the sail - does not exceed 40m<sup>2</sup></li> <li>4 No part of the shade sail will be:                             <ol style="list-style-type: none"> <li>(a) 3m above ground or floor level (depending on where it is situated) at any place within 900mm of a boundary of the allotment</li> <li>(b) 5m above ground or floor level (depending on where it is situated) within any other part of the allotment</li> </ol> </li> <li>5 Primary street setback – at least as far back as the building line of the building to which it is ancillary</li> <li>6 If any part of the sail will be situated on a boundary of the allotment, the length of sail along a boundary does not exceed 8m</li> <li>7 In a case where any part of the sail or a supporting structure will be situated on a side boundary of the allotment – the length of the sail and any such supporting structure together with all relevant walls or structures located along the boundary will not exceed 45% of the length of the boundary.</li> </ol> |

|--|---|
| <b>Industry</b>  | <b>Special Industry</b>   |
| <b>Shop</b>  | Where: <ul style="list-style-type: none"> <li>(a) the gross leasable floor area is no more than 1000m<sup>2</sup>: or</li> <li>(b) it is a bulky goods outlet; or</li> <li>(c) it is ancillary to an industry on the same allotment.</li> </ul> |

## Assessment Provisions (AP)

### Desired Outcomes (DO)

#### DO 1

A comprehensive range of industrial, logistical, warehousing, storage, research and training land uses together with compatible business activities generating wealth and employment for the State.

#### DO 2

Employment generating uses are arranged to:

- (a) support the efficient movement of goods and materials on land in the vicinity of major transport infrastructure such as ports and intermodal freight facilities;
- (b) maintain access to waterfront areas for uses that benefit from direct water access including harbour facilities, port related industry and warehousing, ship building and related support industries;
- (c) create new and enhance existing business clusters;
- (d) support opportunities for the convenient co-location of rural related industries and allied businesses that may detract from scenic rural landscapes; and
- (e) be compatible with its location and setting to manage adverse impacts on the amenity of land in adjacent zones.

#### DO 3

Development achieves a pleasant visual amenity when viewed from adjacent arterial roads, adjoining zones and entrance ways to cities, towns and settlements.

## Performance Outcomes and Deemed to Satisfy / Designated Performance Outcome Criteria

### Land Use and Intensity

#### PO 1.1

Development primarily for a range of higher impacting land uses including general industry, warehouse, transport distribution and the like supplemented by other compatible development so as not to unduly impede the use of land in other ownership in the zone for employment generating land uses, particularly those parts of the zone unaffected by an interface with another zone that would be sensitive impact generating uses.

#### DTS/DPF 1.1

Development comprises one or more of the following land uses:

- Automotive collision repair
- Electricity substation
- Fuel depot
- General industry
- Light Industry
- Motor repair station
- Public service depot
- Retail fuel outlet
- Service trade premises
- Shop
- Store
- Telecommunications facility
- Training facility
- Warehouse

#### PO 1.2

Development adjacent land in another zone used for or primarily accommodating residential development incorporates a range of low impact non-residential uses to mitigate adverse amenity and safety impacts on the adjoining zone.

#### DTS/DPF 1.2

Development involving any of the following uses on a site adjacent land in another zone used for or expected to be primarily used for residential purposes:

- Bulky goods outlet
- Consulting room
- Indoor recreation facility
- Light industry
- Office
- Research facility
- Service trade premises
- Store
- Training facility.

#### PO 1.3

Shops, other than a bulky goods outlet and shops not ancillary to an industry, primarily cater to the surrounding workforce to enhance the amenity of the zone for those workers.

#### DTS/DPF 1.3

Shop:

- (a) with a gross leasable floor area up to 500m<sup>2</sup>;
- (b) in the form of a bulky goods outlet; or
- (c) ancillary to and located on the same allotment as an industry.

#### PO 1.4

Residential development is subordinate and necessary to support the efficient management, security and/or operational aspects of a non-residential land use.

#### DTS/DPF 1.4

None are applicable.

## Site Dimensions and Land Division

#### PO 2.1

Land division creating allotments of a size and shape suitable for a range of industrial, transport, warehouse and other similar or complementary land uses that support employment generation.

#### DTS/DPF 2.1

Allotments have:

- (a) an area of 2500m<sup>2</sup> or more; and
- (b) a frontage width of 30m or more.

## Built Form and Character

#### PO 3.1

Development that achieves distinctive building, landscape and streetscape design to achieve high visual and environmental amenity particularly along arterial roads, zone boundaries and public open spaces.

#### DTS/DPF 3.1

None are applicable.

#### PO 3.2

Building facades facing a boundary of a zone primarily intended to accommodate sensitive receivers, public road, or public open space incorporate design elements to add visual interest by considering the following:

- (a) a variety of building finishes and avoid elevations that consist solely of metal cladding;
- (b) using materials with a low reflectivity; and
- (c) techniques to add visual interest and reduce large expanses of blank walls including modulation and incorporation of offices and showrooms along elevations visible to a public road.

#### DTS/DPF 3.2

None are applicable.

#### PO 3.3

Buildings set back from the primary street boundary to contribute to a consistent streetscape.

#### DTS/DPF 3.3

Buildings are no closer to the primary street frontage than:

- (a) the average of existing buildings on adjoining sites with the same primary street frontage and, if there is only one such building, the setback of that building; or
- (b) where no building exists on an adjoining site.
  - i. 8m or more for buildings up to 6m high;
  - ii. not less than 10m for buildings greater than 6m high.

#### PO 3.4

Buildings setback from secondary street boundaries to accommodate the provision of landscaping between buildings and the road to enhance the appearance of land and buildings when viewed from the street.

#### DTS/DPF 3.4

Buildings setback 4m or more from a secondary street boundary.

#### PO 3.5

Buildings are sited to accommodate vehicle access to the rear of a site for deliveries, maintenance and emergency purposes.

#### DTS/DPF 3.5

Buildings setback 3m or more from at least one side boundary, unless an alternative means for vehicular access to the rear of the site is available.

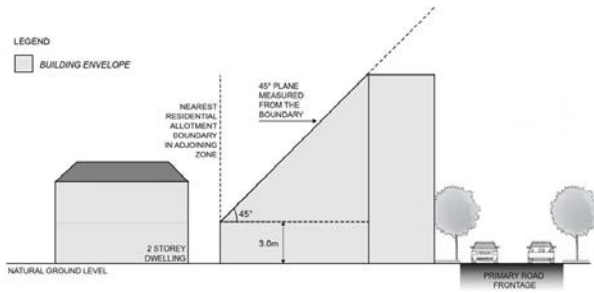

## Interface Height

#### PO 4.1

Buildings mitigate visual impacts of building massing on residential development within a neighbourhood zone.

#### DTS/DPF 4.1

Buildings constructed within a building envelope provided by a 45 degree plane measured from a height of 3 metres above natural ground level at the allotment boundary of a residential allotment within a neighbourhood zone as shown in the following diagram (except where this boundary is a southern boundary in which case DTS/DPF 4.2 will apply, or where this boundary is the primary street boundary):

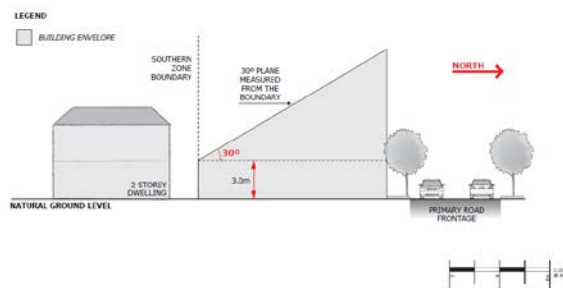

#### PO 4.2

Buildings mitigate overshadowing of residential development within a neighbourhood zone.

#### DTS/DPF 4.2

Buildings on sites with a southern boundary adjoining a residential allotment within a neighbourhood zone are constructed within a building envelope provided by a 30 degree plane grading north measured from a height of 3m above natural ground level at the southern boundary, as shown in the following diagram:

## Landscaping

#### PO 5.1

Landscaping provided along public roads and thoroughfares and zone boundaries to enhance the visual appearance of development and soften the impact of larger buildings when viewed from public spaces and adjacent land outside the zone.

#### DTS/DPF 5.1

Other than to accommodate a lawfully existing or authorised driveway or access point or an access point for which consent has been granted as part of an application for the division of land, a landscaped area is provided within the development site (excluding any land required for road widening purposes):

- (a) where a building is setback less than 3m from the street boundary - within the area remaining between a relevant building and the street boundary; or
- (b) in accordance with the following:

| Minimum width | Description  |
|---------------|--|
| 5m            | Along any boundary with a Highway, Freeway or Expressway.  |
| 5m            | Along any boundary on the perimeter of the zone not fronting a public road or thoroughfare, except where the adjacent zone is one of the following: <ul style="list-style-type: none"> <li>(a) → Employment (Bulk Handling) Zone;</li> <li>(b) → Suburban Employment Zone;</li> <li>(c) → Resource Extraction Zone.</li> </ul> |
| 3m            | Along any boundary on the perimeter of the zone that fronts a public road or thoroughfare.   |
| 3m            | Along an arterial or main road frontage within the zone (and not on the perimeter of the zone)   |

#### PO 5.2

Development incorporates areas for landscaping to enhance the overall amenity of the site and locality.

#### DTS/DPF 5.2

Landscape areas comprise:

- (a) not less than 10 percent of the site; and
- (b) a dimension of at least 1.5m.

#### PO 5.3

Landscape areas incorporate a range of plant species of varying heights at maturity, including tree species with a canopy above clear stems, to complement the scale of relevant buildings.

#### DTS/DPF 5.3

None are applicable.

### Fencing

#### PO 6.1

Fencing exceeding 2.1m in height integrated and designed to complement the appearance of land and buildings and does not form a dominant visual feature from adjacent streets to enhance the character of employment areas.

#### DTS/DPF /DPF 6.1

Fencing exceeding 2.1m in height:

- (a) located behind a façade of an associated building located on the same site; or
- (b) located behind a landscaped area along relevant street frontages; or
- (c) consists of visually permeable materials with landscaping behind.

### Advertisements

#### PO 7.1

Freestanding advertisements do not create a visually dominant element within the locality.

DTS/DPF /DPF 7.1

Freestanding advertisements:

- (a) do not exceed 6m in height; and
- (b) do not have a sign face exceeding 8m<sup>2</sup> per side.

Procedural Matters (PM)

**Notification**

All classes of performance assessed development are excluded from notification except where they involve any of the following:

- (a) the site of the development is adjacent land to land in a different zone
- (b) development identified as "all other code assessed development" in Employment Zone Table 3
- (c) dwelling
- (d) pre-school
- (e) bulky goods outlet
- (f) shop exceeding 500m<sup>2</sup> other than where associated with an industry on the same allotment
- (g) tourist accommodation.

**Placement of Notices – Exemptions for Performance Assessed Development**

None specified.

**Placement of Notices – Exemptions for Restricted Development**

None specified.

## Employment (Bulk Handling) Zone

Table 1 – Accepted Development Classification

| <b>Class of Development</b><br>The following Classes of Development are classified as Accepted Development subject to meeting the 'Accepted Development Classification Criteria'  | <b>Accepted Development Classification Criteria</b>   |
|---|---|
| <b>Building work on railway land</b>  | 4 Building work is associated with a railway<br>5 It is situated (or to be situated) on railway land<br>6 It is required for the conduct or maintenance of railway activities.  |
| <b>Carport</b><br>Except where any of the following apply: <ul style="list-style-type: none"> <li>• Coastal Areas Overlay</li> <li>• Hazards (Flooding) Overlay</li> <li>• Historic Area Overlay</li> <li>• Local Heritage Place Overlay</li> <li>• State Heritage Area Overlay</li> <li>• State Heritage Place Overlay</li> <li>• Native Vegetation Overlay</li> <li>• State Significant Native Vegetation Overlay</li> <li>• River Murray Flood Plain Overlay</li> <li>• Sloping Land Overlay</li> <li>• Key Railway Crossings Overlay where an existing access is altered or a new access is created</li> <li>• Major Urban Transport Routes Overlay where an existing access is altered or a new access is created</li> </ul> | 14 The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system<br>15 It is ancillary to an office erected on the site<br>16 Primary street setback – at least 5.5m from the primary street boundary and as far back as the building line of the building to which it is ancillary<br>17 Secondary street setback – at least 900mm from the boundary of the allotment (if the land has boundaries on two or more roads)<br>18 Total floor area - does not exceed 40m <sup>2</sup><br>19 Post height - does not exceed 3m measured from natural ground level (and not including a gable end)<br>20 Building height - does not exceed 5m<br>21 If situated on or abutting a boundary (not being a boundary with a primary street or secondary street) – a length not exceeding 10m unless: <ul style="list-style-type: none"> <li>(a) a longer wall or structure exists on the adjacent site and is situated on the same allotment boundary; and</li> <li>(b) the proposed wall or structure will be built along the same length of boundary as the existing adjacent wall or structure to the same or lesser extent</li> </ul> |

- Urban Transport Routes Overlay where an existing access is altered or a new access is created
- Water Resources Overlay

- 22 If the carport abuts or is situated on the boundary of the allotment (not being a boundary with a primary street or secondary street):
- (a) it will not result in all relevant walls or structures located along the boundary exceeding 45% of the length of the boundary; and
  - (b) it will not be located within 3m of any other wall along the same boundary unless on an adjacent site on that boundary there is an existing wall of a building that would be adjacent to or abut the proposed wall or structure
- 23 The total roofed area of all existing or proposed buildings on the allotment does not exceed 60% of the area of the allotment
- 24 Door opening for vehicle access – does not exceed, in total, 7m in width or 50% of the width of the allotment frontage (whichever lesser)
- 25 Internal dimensions – does not exceed 3.2m in width and 6m in length between all fences, walls and doors
- 26 The carport:
- (a) is located so that vehicle access:
    - i. is provided via a lawfully existing or authorised driveway or access point or an access point for which consent has been granted as part of an application for the division of land; or
    - ii. will use a driveway that:
      - A. is not located within 6 metres of an intersection of 2 or more roads or a pedestrian actuated crossing; and
      - B. will not interfere with an item of street furniture (including directional signs, lighting, seating and weather shelters), other infrastructure, or a tree; or
    - iii. if adjacent a kerbed road, will be via a kerb that is designed to allow a vehicle to roll over it; and
  - (b) is located so that the gradient from the place of access on the boundary of the allotment to the finished floor level at the front of the carport when the work is completed is not steeper than 1:4 on average; and
  - (c) The centre of the driveway at the public road boundary is no more than 25 degree deviation from the centre of the front of the covered car parking space for which it provides vehicle access

|  |   |
|--|---|
| <p><b>Internal building work</b><br/> Except where any of the following apply:</p> <ul style="list-style-type: none"> <li>• A Local Heritage Place identified in the Local Heritage Place Overlay</li> <li>• State Heritage Area Overlay</li> <li>• A State Heritage Place identified in the State Heritage Place Overlay</li> </ul>   | <p>3 There will be no increase in the total floor area of the building</p> <p>4 There will be no alteration to the external appearance of the building.</p>   |
| <p><b>Outbuilding (in the form of a garage)</b><br/> Except where any of the following apply:</p> <ul style="list-style-type: none"> <li>• Coastal Areas Overlay</li> <li>• Hazards (Flooding) Overlay</li> <li>• Historic Area Overlay</li> <li>• Local Heritage Place Overlay</li> <li>• State Heritage Area Overlay</li> <li>• State Heritage Place Overlay</li> <li>• Native Vegetation Overlay</li> <li>• State Significant Native Vegetation Overlay</li> <li>• River Murray Flood Plain Overlay</li> <li>• Sloping Land Overlay</li> <li>• Key Railway Crossings Overlay where an existing access is altered or a new access is created</li> <li>• Major Urban Transport Routes Overlay where an existing access is altered or a new access is created</li> <li>• Urban Transport Routes Overlay where an existing access is altered or a new access is created</li> <li>• Water Resources Overlay</li> </ul> | <p>29 The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system</p> <p>30 It is detached from and ancillary to an office erected on the site</p> <p>31 Primary street setback – at least 5.5m from the primary street boundary and as far back as the building line of the building to which it is ancillary</p> <p>32 Secondary street setback – at least 900mm from the boundary of the allotment (if the land has boundaries on two or more roads)</p> <p>33 Total floor area - does not exceed 40m<sup>2</sup></p> <p>34 Wall height - does not exceed 3m measured from natural ground level (and not including a gable end)</p> <p>35 Building height - does not exceed 5m</p> <p>36 If situated on or abutting a boundary (not being a boundary with a primary street or secondary street) – a length not exceeding 10m unless:</p> <p>(a) a longer wall or structure exists on the adjacent site and is situated on the same allotment boundary; and</p> <p>(b) the proposed wall or structure will be built along the same length of boundary as the existing adjacent wall or structure to the same or lesser extent</p> <p>37 If the outbuilding abuts or is situated on the boundary of the allotment (not being a boundary with a primary street or secondary street):</p> <p>(a) it will not result in all relevant walls or structures located along the boundary exceeding 45% of the length of the boundary; and</p> |

|  |   |
|--|---|
|  | <p>(b) it will not be located within 3m of any other wall along the same boundary unless on an adjacent site on that boundary there is an existing wall of a building that would be adjacent to or abut the proposed wall or structure</p> <p>38 Total roofed area of all existing and proposed buildings on the allotment - does not exceed 60%</p> <p>39 Internal dimensions – exceed 3.2m in width and 6m in length between all walls and doors</p> <p>40 Door opening for vehicle access – does not exceed, in total, 7m in width or 50% of the width of the allotment frontage (whichever lesser)</p> <p>41 The garage:</p> <p>(a) is located so that vehicle access:</p> <ul style="list-style-type: none"> <li>i. is provided via a lawfully existing or authorised driveway or access point or an access point for which consent has been granted as part of an application for the division of land; or</li> <li>ii. will use a driveway that: <ul style="list-style-type: none"> <li>A. is not located within 6 metres of an intersection of 2 or more roads or a pedestrian actuated crossing; and</li> <li>B. will not interfere with an item of street furniture (including directional signs, lighting, seating and weather shelters), other infrastructure, or a tree; or</li> </ul> </li> <li>iii. if adjacent a kerbed road, will be via a kerb that is designed to allow a vehicle to roll over it; and</li> </ul> <p>(b) is located so that the gradient from the place of access on the boundary of the allotment to the finished floor level at the front of the carport when the work is completed is not steeper than 1:4 on average; and</p> <p>(c) The centre of the driveway at the public road boundary is no more than 25 degree deviation from the centre of the front of the covered car parking space for which it provides vehicle access</p> <p>42 If clad in sheet metal—is pre-colour treated or painted in a non-reflective colour.</p> |
| <p><b>Solar photovoltaic panels (roof mounted)</b><br/> Except where any of the following apply:</p> <ul style="list-style-type: none"> <li>• Historic Area Overlay</li> </ul> | <p>4 Panels are installed parallel to the roof of a building and with the underside surface of the panel not being more than 100mm above the surface of the roof</p> <p>5 Panels and associated components do not overhang any part of the roof</p>   |

|   |  |
|---|--|
| <ul style="list-style-type: none"> <li>• A Local Heritage Place identified in the Local Heritage Place Overlay</li> <li>• State Heritage Area Overlay</li> <li>• A State Heritage Place identified in the State Heritage Place Overlay</li> </ul>   | <p>6 Does not apply to system with a generating capacity of more than 5MW that is to be connected to the State's power system.</p>   |
| <p><b>Water tank (above ground)</b><br/> Except where any of the following apply<br/> Except where any of the following apply:</p> <ul style="list-style-type: none"> <li>• Coastal Areas Overlay</li> <li>• Hazards (Flooding) Overlay</li> <li>• Historic Area Overlay</li> <li>• Local Heritage Place Overlay</li> <li>• State Heritage Area Overlay</li> <li>• State Heritage Place Overlay</li> <li>• Native Vegetation Overlay</li> <li>• State Significant Native Vegetation Overlay</li> <li>• River Murray Flood Plain Overlay</li> <li>• Sloping Land Overlay</li> <li>• Water Resources Overlay</li> </ul> | <p>8 The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system</p> <p>9 The tank is part of a roof drainage system</p> <p>10 Total floor area - not exceeding 15m<sup>2</sup></p> <p>11 The tank is located wholly above ground</p> <p>12 Tank height – does not exceed 4m above natural ground level</p> <p>13 Primary street setback – at least as far back as the building line of the building to which it is ancillary</p> <p>14 In the case of a tank made of metal – the tank is pre-colour treated or painted in a non-reflective colour.</p> |
| <p><b>Water tank (underground)</b><br/> Except where any of the following apply:</p> <ul style="list-style-type: none"> <li>• Coastal Areas Overlay</li> <li>• Native Vegetation Overlay</li> <li>• State Significant Native Vegetation Overlay</li> <li>• Sloping Land Overlay</li> <li>• Water Resources Overlay</li> </ul>   | <p>3 The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system</p> <p>4 The tank (including any associated pump) is located wholly below the level of the ground.</p>   |

Table 4 – Restricted Development Classification

| <b>Class of Development</b><br>The following Classes of Development are classified as Restricted subject to any 'Exclusions' | <b>Exclusions</b>  |
|--|--|
| <b>Dwelling</b>  | Where ancillary to a non-residential land use and will not result in more than one dwelling on an allotment. |

## Assessment Provisions (AP)

### Desired Outcomes (DO)

#### DO 1

A zone in which agricultural and other commodities are received, stored and dispatched in bulk to generate wealth and employment for the State.

#### DO 2

Development achieves a pleasant visual amenity when viewed from: adjacent arterial roads; adjoining zones and; entrance ways to towns, settlements and cities.

### Performance Outcomes and Deemed to Satisfy / Designated Performance Outcome Criteria

#### Land Use and Intensity

##### PO 1.1

Development primarily in the form of facilities for the handling and storage of bulk commodities to enhance economic activity and supply chain efficiencies.

##### DTS/DPF 1.1

Development comprises one or more of the following land uses:

- Advertisement
- Bulk handling facility including bunkers and silos for the reception, storage and dispatch of commodities in bulk
- Office in association with a facility for the reception, storage and dispatch of commodities in bulk
- Truck parking area
- Store.

##### PO 1.2

Value-adding industries, including the processing and packaging of commodities, that complement facilities for the reception, storage and dispatch of agricultural and other commodities in bulk to enhance the use of the zone and local job opportunities.

##### DTS/DPF 1.2

None are applicable.

##### PO 1.3

Office associated with and ancillary to facilities for the handling and storage of bulk commodities to support the management and operational aspects of those facilities.

##### DTS/DPF 1.3

Office:

- (f) in association with and ancillary to a facility for the reception, storage and dispatch of commodities in bulk; and
- (g) with a gross leasable floor area up to 150m<sup>2</sup>.

#### Land Division

##### PO 2.1

Land division that creates allotments that are of a size and shape suitable for bulk handling and complementary uses.

DTS/DPF 2.1

None are applicable.

## Fencing

PO 3.1

Fencing exceeding 2.1m in height integrated and designed to complement the appearance of land and buildings and does not form a dominant visual feature from adjacent streets to enhance the character of employment areas.

DTS/DPF /DPF 3.1

Fencing exceeding 2.1m in height:

- (a) located behind a façade of an associated building located on the same site; or
- (b) located behind a landscaped area along relevant street frontages; or
- (c) consists of visually permeable materials with landscaping behind.

## Advertisements

PO 4.1

Freestanding advertisements do not create a visually dominant element within the locality.

DTS/DPF /DPF 4.1

Freestanding advertisements:

- (c) up to 4m in height from natural ground level; and
- (d) with a sign face up to 6m<sup>2</sup> per side.

## Procedural Matters (PM)

| <b>Notification</b>   |
|---|
| All classes of performance assessed development are excluded from notification except where they involve any of the following: <ul style="list-style-type: none"><li>(a) the site of the development is adjacent land to land in a different zone</li><li>(b) development identified as “all other code assessed development” in Employment (Bulk Handling) Zone Table 3.</li></ul> |
| <b>Placement of Notices – Exemptions for Performance Assessed Development</b>   |
| None specified.   |
| <b>Placement of Notices – Exemptions for Restricted Development</b>   |
| None specified.   |

## Infrastructure (Airfield) Zone

Table 1 – Accepted Development Classification

| <b>Class of Development</b><br>The following Classes of Development are classified as Accepted Development subject to meeting the 'Accepted Development Classification Criteria'  | <b>Accepted Development Classification Criteria</b>   |
|---|---|
| <p><b>Carport</b><br/>                     Except where any of the following apply:<br/>                     Except where any of the following apply:</p> <ul style="list-style-type: none"> <li>• Coastal Areas Overlay</li> <li>• Hazards (Flooding) Overlay</li> <li>• State Heritage Place Overlay</li> <li>• Native Vegetation Overlay</li> <li>• State Significant Native Vegetation Overlay</li> <li>• Sloping Land Overlay</li> <li>• Key Outback and Rural Routes Overlay where an existing access is altered or a new access is created</li> <li>• Major Urban Transport Routes Overlay where an existing access is altered or a new access is created</li> <li>• Urban Transport Routes Overlay where an existing access is altered or a new access is created</li> <li>• Water Resources Overlay</li> </ul> | <ol style="list-style-type: none"> <li>1 The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system</li> <li>2 It is ancillary to a dwelling erected on the site</li> <li>3 Primary street setback – at least 5.5m from the primary street boundary and as far back as the building line of the building to which it is ancillary</li> <li>4 Secondary street setback – at least 900mm from the boundary of the allotment (if the land has boundaries on two or more roads)</li> <li>5 Total floor area - does not exceed 40m<sup>2</sup></li> <li>6 Post height - does not exceed 3m measured from natural ground level (and not including a gable end)</li> <li>7 Building height - does not exceed 5m</li> <li>8 If situated on or abutting a boundary (not being a boundary with a primary street or secondary street) – a length not exceeding 10m unless:                         <ol style="list-style-type: none"> <li>(a) a longer wall or structure exists on the adjacent site and is situated on the same allotment boundary; and</li> <li>(b) the proposed wall or structure will be built along the same length of boundary as the existing adjacent wall or structure to the same or lesser extent</li> </ol> </li> <li>9 If the carport abuts or is situated on the boundary of the allotment (not being a boundary with a primary street or secondary street):                         <ol style="list-style-type: none"> <li>(a) it will not result in all relevant walls or structures located along the boundary exceeding 45% of the length of the boundary; and</li> <li>(b) it will not be located within 3m of any other wall along the same boundary unless on an adjacent site on that boundary there is an existing wall of a building that would be adjacent to or abut the proposed wall or structure</li> </ol> </li> <li>10 The total roofed area of all existing or proposed buildings on the allotment does not exceed 60% of the area of the allotment</li> <li>11 Door opening for vehicle access – does not exceed, in total, 7m in width or 50% of the width of the allotment frontage (whichever lesser)</li> </ol> |

|  |  |
|--|--|
|  | <p>12 Internal dimensions – does not exceed 3.2m in width and 6m in length between all fences, walls and doors</p> <p>13 The carport:</p> <p>(a) is located so that vehicle access:</p> <ol style="list-style-type: none"> <li>i. is provided via a lawfully existing or authorised driveway or access point or an access point for which consent has been granted as part of an application for the division of land; or</li> <li>ii. will use a driveway that: <ol style="list-style-type: none"> <li>A. is not located within 6 metres of an intersection of 2 or more roads or a pedestrian actuated crossing; and</li> <li>B. will not interfere with an item of street furniture (including directional signs, lighting, seating and weather shelters), other infrastructure, or a tree; or</li> </ol> </li> <li>iii. if adjacent a kerbed road, will be via a kerb that is designed to allow a vehicle to roll over it; and</li> </ol> <p>(b) is located so that the gradient from the place of access on the boundary of the allotment to the finished floor level at the front of the carport when the work is completed is not steeper than 1:4 on average; and</p> <p>(c) The centre of the driveway at the public road boundary is no more than 25 degree deviation from the centre of the front of the covered car parking space for which it provides vehicle access</p> |
| <p><b>Internal building work</b><br/> Except where any of the following apply:</p> <ul style="list-style-type: none"> <li>• A State Heritage Place identified in the State Heritage Place Overlay</li> </ul>   | <ol style="list-style-type: none"> <li>1 There will be no increase in the total floor area of the building</li> <li>2 There will be no alteration to the external appearance of the building.</li> </ol>   |

**Class of Development**

**Applicable Policies**

The following policies are applicable to the assessment of the identified Class of Development. Policies referred to are Performance Outcome policies, and any associated Designated Performance Features. Relevant Desired Outcomes are not listed, but automatically apply in relation to a Performance Assessed Development.  
 Where a development comprises more than one Class of Development the relevant policies will be taken to be the sum of the applicable policies for each Class of Development.

| <b>All other Code Assessed Development</b> | All                 | All  | None  | Any Relevant Overlays: All                                    |

The following policies are applicable to the assessment of the identified Class of Development. Policies referred to are Performance Outcome policies, and any associated Designated Performance Features. Relevant Desired Outcomes are not listed, but automatically apply in relation to a Performance Assessed Development.

Where a development comprises more than one Class of Development the relevant policies will be taken to be the sum of the applicable policies for each Class of Development.

Table 4 –Restricted Development Classification

| <b>Class of Development</b><br>The following Classes of Development are classified as Restricted subject to any 'Exclusions' | <b>Exclusions</b>   |
|--|---|
| <b>Shop</b>  | Where:<br><br>(a) the gross leasable floor area is no more than 250m <sup>2</sup> ; or<br><br>(b) it is ancillary to and located on the same allotment as an airfield passenger terminal. |

## Assessment Provisions (AP)

### Desired Outcome (DO)

#### DO 1

A zone providing for aviation operations together with allied and complementary activities to support the long term ongoing use and expansion of airfield development and activities for commercial freight and passenger transport as well as aviation related recreational pursuits.

### Performance Outcomes and Deemed to Satisfy / Designated Performance Outcome Criteria

#### Land Use

##### PO 1.1

Development primary catering for take-off and landing, on-ground movement, maintenance, repair and storage of aircraft, as well as facilities associated with the handling of freight and passengers to enhance the safe and efficient transportation of people and cargo by air.

##### DTS/DPF 1.1

Development comprises one or more of the following land uses:

- Aircraft operational facilities beacons, transmitting installations and their associated towers
- Aircraft control tower
- Light industry associated with, and ancillary to, aviation activities
- Passenger and/or air freight terminal
- Aircraft hangar
- Shop within the terminal building
- Store associated with, and ancillary to, aviation activities
- Fuel depot associated with aviation and airport related purposes
- Office associated with, and ancillary to, aviation activities
- Flight simulation and training facility.

##### PO 1.2

Development does not impede aviation operations and the expansion of airfields.

##### DTS/DPF 1.2

None are applicable.

## Built Form and Character

### PO 2.1

Development of a scale and design consistent with the role and function of the airfield and complementary to the wider setting.

### DTS/DPF 2.1

None are applicable.

## Land Division

### PO 3.1

Land division suitable for the intended use of the land where it maintains the efficient and safety operations of the airfield.

### DTS/DPF 3.1

None are applicable.

## Hazard Management

### PO 4.1

Movement between aircraft taxiways and open runway corridors and areas used for non-aviation purposes is regulated through the incorporation of fencing or other barriers to mitigate hazard to aircraft operations and provide for the safety of users and occupiers of land use for non-aviation purposes.

### DTS/DPF 4.1

None are applicable.

### PO 4.2

Landscaping uses species to minimise the nesting and attraction of birds and spread of leaf and other debris to mitigate hazard to aircraft.

### DTS/DPF 4.2

None are applicable.

## Advertisements

### PO 5.1

Advertisements limited to those in connection with the terminal building and the display of business services on non-residential premises to mitigate visual clutter and untidiness.

### DTS/DPF 5.1

None are applicable.

## Procedural Matters (PM)

### Notification of Performance assessed development

All classes of performance assessed development are excluded from notification except where they involve any of the following:

- (a) the site of the development is adjacent land to land in a different zone that is located within the area of council
- (b) development identified as “all other code assessed development” in Infrastructure (Airfield) Zone Table 3.

### Placement of Notices – Exemptions for Performance Assessed Development

None specified.

### Placement of Notices – Exemptions for Restricted Development

None specified.

## Open Space Zone

Table 1 – Accepted Development Classification

**Outbuilding (in the form of a garage)**

Except where any of the following apply:

- Character Preservation District Overlay
- Coastal Areas Overlay
- Hazards (Acid Sulfate Soils) Overlay
- Hazards (Flooding) Overlay
- Character Area Overlay
- Historic Area Overlay
- Local Heritage Place Overlay
- State Heritage Area Overlay
- State Heritage Place Overlay
- Native Vegetation Overlay
- State Significant Native Vegetation Overlay
- Ramsar Wetlands Overlay
- River Murray Flood Plain Overlay
- Sloping Land Overlay
- Future Road Widening Overlay where an existing access is altered or a new access is created
- Key Railway Crossings Overlay where an existing access is altered or a new access is created
- Key Outback and Rural Routes Overlay where an existing access is altered or a new access is created
- Major Urban Transport Routes Overlay where an existing access

- 1 The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system
- 2 It is detached from and ancillary to a dwelling erected on the site.
- 3 Primary street setback – at least 5.5m from the primary street boundary and as far back as the building line of the building to which it is ancillary
- 4 Secondary street setback – at least 900mm from the boundary of the allotment (if the land has boundaries on two or more roads)
- 5 Total floor area - does not exceed 40m<sup>2</sup>
- 6 Wall height - does not exceed 3m measured from natural ground level (and not including a gable end)
- 7 Building height - does not exceed 5m
- 8 If situated on or abutting a boundary (not being a boundary with a primary street or secondary street) – a length not exceeding 10m unless:
  - (a) a longer wall or structure exists on the adjacent site and is situated on the same allotment boundary; and
  - (b) the proposed wall or structure will be built along the same length of boundary as the existing adjacent wall or structure to the same or lesser extent
- 9 If the outbuilding abuts or is situated on the boundary of the allotment (not being a boundary with a primary street or secondary street):
  - (a) it will not result in all relevant walls or structures located along the boundary exceeding 45% of the length of the boundary; and
  - (b) it will not be located within 3m of any other wall along the same boundary unless on an adjacent site on that boundary there is an existing wall of a building that would be adjacent to or abut the proposed wall or structure
- 10 Total roofed area of all existing and proposed buildings on the allotment - does not exceed 60%
- 11 Internal dimensions – exceed 3.2m in width and 6m in length between all walls and doors
- 12 Door opening for vehicle access – does not exceed, in total, 7m in width or 50% of the width of the allotment frontage (whichever lesser)
- 13 The garage:
  - (a) is located so that vehicle access:

**Class of Development**

The following Classes of Development are classified as Deemed-to-Satisfy Development subject to meeting the 'Deemed-to-Satisfy Development Classification Criteria'

**Deemed-to-Satisfy Development Classification Criteria**

Provisions referred to are Deemed-to-Satisfy Criteria  
 Where a development comprises more than one Class of Development the relevant criteria will be taken to be the sum of the criteria for each Class of Development.

| Nil  |                   |

## Assessment Provisions (AP)

### Desired Outcome (DO)

#### DO 1

Areas of natural and landscaped open space that provide visual relief to the built environment for the enjoyment of the community.

### Performance Outcomes and Deemed to Satisfy / Designated Performance Outcome Criteria

#### Land Use and Intensity

##### PO 1.1

Development is associated with or ancillary to the provision of unstructured outdoor passive and active recreation facilities.

##### DTS/DPF 1.1

Development comprises one or more of the following land uses:

- Open space
- Outdoor sports courts
- Recreation area
- Sporting ovals and fields

##### PO 1.2

Buildings are limited in number and size to provide a natural, landscaped setting.

##### DTS/DPF 1.2

None are applicable.

##### PO 1.3

Shops including restaurants are of a scale that is subordinate to the principal open space and recreation use of the land.

##### DTS/DPF 1.3

Shop gross leasable floor area does not exceed 50m<sup>2</sup>.

##### PO 1.4

Offices are of a scale that is subordinate to the principal open space use of the land.

##### DTS/DPF 1.4

Office gross leasable floor area does not exceed 80m<sup>2</sup>.

### Built Form and Character

#### PO 2.1

Development sited unobtrusively so as not to spoil the open space character or interrupt views of natural or landscape features.

##### DTS/DPF 2.1

None are applicable.

#### PO 2.2

Playgrounds are ancillary to and enhance enjoyment of areas of open space.

##### DTS/DPF 2.2

Playgrounds:

- (a) do not occupy more than 200m<sup>2</sup> in area; and
- (b) have a building height that does not exceed 3m.

#### PO 2.3

Outbuildings are of a scale that mitigates visual impacts of buildings on natural or landscape features.

#### DTS/DPF 2.3

Outbuildings have a:

- (a) floor area that does not exceed 80m<sup>2</sup>;
- (b) wall height that does not exceed 3m; and
- (c) building height that does not exceed 5m.

### Land Division

#### PO 3.1

Land division supports the provision of open space

#### DTS/DPF 3.1

Land division is for the purposes of:

- (a) the creation of a public road or a public reserve; or
- (b) a minor adjustment of allotment boundaries to remove an anomaly in existing boundaries with respect to the location of existing buildings or structures.

### Procedural Matters

#### **Notification of Performance assessed development**

Performance assessed development is excluded from notification except where it involves any of the following:

- (a) the site of the development is adjacent land to land in a different zone
- (b) any development that is identified (either partly or wholly) as 'All other Code Assessed Development' in Open Space Zone - Table 3.

## Recreation Zone

Table 1 – Accepted Development Classification

| <b>Class of Development</b><br>The following Classes of Development are classified as Accepted Development subject to meeting the 'Accepted Development Classification Criteria'  | <b>Accepted Development Classification Criteria</b>  |
|---|--|
| <b>Building work on railway land</b>  | <ol style="list-style-type: none"> <li>1 Building work is associated with a railway</li> <li>2 It is situated (or to be situated) on railway land</li> <li>3 It is required for the conduct or maintenance of railway activities.</li> </ol>   |
| <b>Carport</b><br>Except where any of the following apply: <ul style="list-style-type: none"> <li>• Character Preservation District Overlay</li> <li>• Coastal Areas Overlay</li> <li>• Hazards (Flooding) Overlay</li> <li>• Historic Area Overlay</li> <li>• Local Heritage Place Overlay</li> <li>• State Heritage Area Overlay</li> <li>• State Heritage Place Overlay</li> <li>• Native Vegetation Overlay</li> <li>• State Significant Native Vegetation Overlay</li> <li>• River Murray Flood Plain Overlay</li> <li>• Sloping Land Overlay</li> <li>• Future Road Widening Overlay where an existing access is altered or a new access is created</li> <li>• Key Railway Crossings Overlay where an existing access is altered or a new access is created</li> <li>• Key Outback and Rural Routes Overlay where an existing access</li> </ul> | <ol style="list-style-type: none"> <li>1 The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system</li> <li>2 It is ancillary to a dwelling erected on the site</li> <li>3 Primary street setback – at least 5.5m from the primary street boundary and as far back as the building line of the building to which it is ancillary</li> <li>4 Secondary street setback – at least 900mm from the boundary of the allotment (if the land has boundaries on two or more roads)</li> <li>5 Total floor area - does not exceed 40m<sup>2</sup></li> <li>6 Post height - does not exceed 3m measured from natural ground level (and not including a gable end)</li> <li>7 Building height - does not exceed 5m</li> <li>8 If situated on or abutting a boundary (not being a boundary with a primary street or secondary street) – a length not exceeding 10m unless:                         <ol style="list-style-type: none"> <li>(a) a longer wall or structure exists on the adjacent site and is situated on the same allotment boundary; and</li> <li>(b) the proposed wall or structure will be built along the same length of boundary as the existing adjacent wall or structure to the same or lesser extent</li> </ol> </li> <li>9 If the carport abuts or is situated on the boundary of the allotment (not being a boundary with a primary street or secondary street):</li> </ol> |

|  |  |
|--|--|
| <p>is altered or a new access is created</p> <ul style="list-style-type: none"> <li>• Major Urban Transport Routes Overlay where an existing access is altered or a new access is created</li> <li>• Non-stop Corridor Overlay where an existing access is altered or a new access is created</li> <li>• Urban Transport Routes Overlay where an existing access is altered or a new access is created</li> <li>• Water Resources Overlay</li> </ul> | <ul style="list-style-type: none"> <li>(a) it will not result in all relevant walls or structures located along the boundary exceeding 45% of the length of the boundary; and</li> <li>(b) it will not be located within 3m of any other wall along the same boundary unless on an adjacent site on that boundary there is an existing wall of a building that would be adjacent to or abut the proposed wall or structure</li> </ul> <p>10 The total roofed area of all existing or proposed buildings on the allotment does not exceed 60% of the area of the allotment</p> <p>11 Door opening for vehicle access – does not exceed, in total, 7m in width or 50% of the width of the allotment frontage (whichever lesser)</p> <p>12 Internal dimensions – does not exceed 3.2m in width and 6m in length between all fences, walls and doors</p> <p>13 The carport:</p> <ul style="list-style-type: none"> <li>(a) is located so that vehicle access: <ul style="list-style-type: none"> <li>i. is provided via a lawfully existing or authorised driveway or access point or an access point for which consent has been granted as part of an application for the division of land; or</li> <li>ii. will use a driveway that: <ul style="list-style-type: none"> <li>A. is not located within 6 metres of an intersection of 2 or more roads or a pedestrian actuated crossing; and</li> <li>B. will not interfere with an item of street furniture (including directional signs, lighting, seating and weather shelters), other infrastructure, or a tree; or</li> </ul> </li> <li>iii. if adjacent a kerbed road, will be via a kerb that is designed to allow a vehicle to roll over it; and</li> </ul> </li> <li>(b) is located so that the gradient from the place of access on the boundary of the allotment to the finished floor level at the front of the carport when the work is completed is not steeper than 1:4 on average; and</li> <li>(c) The centre of the driveway at the public road boundary is no more than 25 degree deviation from the centre of the front of the covered car parking space for which it provides vehicle access</li> </ul> |
| <p><b>Demolition</b><br/> Except where any of the following apply:</p> <ul style="list-style-type: none"> <li>• Historic Area Overlay</li> </ul>   | <p>None.</p>   |

|   |   |
|---|---|
| <ul style="list-style-type: none"> <li>• A Local Heritage Place identified in the Local Heritage Place Overlay</li> <li>• State Heritage Area Overlay</li> <li>• A State Heritage Place identified in the State Heritage Place Overlay</li> </ul>   |   |

Table 4 – Restricted Development Classification

| <b>Class of Development</b>                                       |
|---|
| The following Classes of Development are classified as Restricted |
| <b>None Specified</b>   |

## Assessment Provisions (AP)

### Desired Outcome (DO)

#### DO 1

Provision of a range of accessible recreational facilities.

### Performance Outcomes and Deemed to Satisfy / Designated Performance Outcome Criteria

#### Land Use and Intensity

##### PO 1.1

Development is associated with or ancillary to the provision of structured, unstructured, active and / or passive recreational facilities.

##### DTS/DPF 1.1

Development comprises one or more of the following land uses:

- Change rooms
- Golf course
- Indoor recreation facility
- Open space
- Outdoor sports courts
- Recreation area
- Sporting clubrooms
- Sporting ovals and fields

##### PO 1.2

Shops including restaurants are of a scale that is subordinate to the principal recreational use of land.

##### DTS/DPF 1.2

Shop gross leasable floor area does not exceed 80m<sup>2</sup>.

##### PO 1.3

Offices are of a scale that is subordinate to the principal recreational use of land.

##### DTS/DPF 1.3

Office gross leasable floor area does not exceed 80m<sup>2</sup>.

### Built Form and Character

#### PO 2.1

Buildings designed and sited to manage visual impacts.

##### DTS/DPF 2.1

Buildings are set back:

- (a) 50m or greater from a primary street frontage; and
- (b) 50m from the boundary of an allotment containing, or zoned to primarily accommodate, a sensitive receiver in other ownership.

#### PO 2.2

Outbuildings of a scale that manages visual impacts.

##### DTS/DPF 2.2

Outbuildings have a:

- (a) floor area that does not exceed 80m<sup>2</sup>;
- (b) wall height that does not exceed 3m; and
- (c) building height that does not exceed 5m.

## Land Division

### PO 3.1

Land division supports the provision of recreational facilities

### DTS/DPF 3.1

Land division is for the purposes of:

- (a) the creation of a public road or a public reserve; or
- (b) a minor adjustment of allotment boundaries to remove an anomaly in existing boundaries with respect to the location of existing buildings or structures.

## Concept Plans

### PO 4.1

Development is compatible with the outcomes sought by any relevant Concept Plan contained within the *Concept Plans Technical and Numeric Variation Overlay*.

### DTS 4.1

None are applicable.

## Procedural Matters (PM)

### Notification of Performance assessed

Performance assessed development is excluded from notification except where it involves any of the following:

- (a) the development is located adjacent to the boundary of a zone that primarily intends to accommodate sensitive receivers; or
- (b) the development falls within the category of 'all other code assessed development' in Recreation Zone - Table 3.

### Placement of Notices – Exemptions for Performance Assessed Development

None specified.

### Placement of Notices – Exemptions for Restricted Development

None specified.

## Remote Areas Zone

Table 1 – Accepted Development Classification

## Class of Development

The following Classes of Development are classified as Accepted Development subject to meeting the 'Accepted Development Classification Criteria'

## Accepted Development Classification Criteria

- is altered or a new access is created
- Urban Transport Routes Overlay where an existing access is altered or a new access is created
- Water Resources Overlay

- 22 If the carport abuts or is situated on the boundary of the allotment (not being a boundary with a primary street or secondary street):
- (a) it will not result in all relevant walls or structures located along the boundary exceeding 45% of the length of the boundary; and
  - (b) it will not be located within 3m of any other wall along the same boundary unless on an adjacent site on that boundary there is an existing wall of a building that would be adjacent to or abut the proposed wall or structure
- 23 Door opening for vehicle access – does not exceed, in total, 7m in width or 50% of the width of the allotment frontage (whichever lesser)
- 24 Internal dimensions – does not exceed 3.2m in width and 6m in length between all fences, walls and doors
- 25 The carport:
- (a) is located so that vehicle access:
    - i. is provided via a lawfully existing or authorised driveway or access point or an access point for which consent has been granted as part of an application for the division of land; or
    - ii. will use a driveway that:
      - A. is not located within 6 metres of an intersection of 2 or more roads or a pedestrian actuated crossing; and
      - B. will not interfere with an item of street furniture (including directional signs, lighting, seating and weather shelters), other infrastructure, or a tree; or
    - iii. if adjacent a kerbed road, will be via a kerb that is designed to allow a vehicle to roll over it; and
  - (b) is located so that the gradient from the place of access on the boundary of the allotment to the finished floor level at the front of the carport when the work is completed is not steeper than 1:4 on average; and

**Class of Development**

The following Classes of Development are classified as Accepted Development subject to meeting the 'Accepted Development Classification Criteria'

**Accepted Development Classification Criteria**

26 The centre of the driveway at the public road boundary is no more than 25 degree deviation from the centre of the front of the covered car parking space for which it provides vehicle access

**Internal building work**

Except where any of the following apply:

- A Historic Shipwreck identified in the Historic Shipwrecks Overlay
- State Heritage Area Overlay
- A State Heritage Place identified in the State Heritage Place Overlay

- 3 There will be no increase in the total floor area of the building
- 4 There will be no alteration to the external appearance of the building.

**Outbuilding (in the form of a Garage)**

Except where any of the following apply:

- Coastal Areas Overlay
- Historic Shipwrecks Overlay
- State Heritage Area Overlay
- State Heritage Place Overlay
- Native Vegetation Overlay
- State Significant Native Vegetation Overlay
- Significant Landscape Protection Overlay
- Ramsar Wetlands Overlay
- River Murray Flood Plain Overlay

- 1 The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system
- 2 It is detached from and ancillary to a dwelling erected on the site.
- 3 Primary street setback – at least 5.5m from the primary street boundary and as far back as the building line of the building to which it is ancillary
- 4 Secondary street setback – at least 900mm from the boundary of the allotment (if the land has boundaries on two or more roads)
- 5 Total floor area - does not exceed 60m<sup>2</sup>
- 6 Wall height - does not exceed 3m measured from natural ground level (and not including a gable end)
- 7 Building height - does not exceed 5m
- 8 If situated on or abutting a boundary (not being a boundary with a primary street or secondary street) – a length not exceeding 10m unless:

## Class of Development

The following Classes of Development are classified as Accepted Development subject to meeting the 'Accepted Development Classification Criteria'

## Accepted Development Classification Criteria

- Sloping Land Overlay
- Key Railway Crossings Overlay where an existing access is altered or a new access is created
- Key Outback and Rural Routes Overlay where an existing access is altered or a new access is created
- Urban Transport Routes Overlay where an existing access is altered or a new access is created
- Water Resources Overlay

- (a) a longer wall or structure exists on the adjacent site and is situated on the same allotment boundary; and
  - (b) the proposed wall or structure will be built along the same length of boundary as the existing adjacent wall or structure to the same or lesser extent
- 9 If the outbuilding abuts or is situated on the boundary of the allotment (not being a boundary with a primary street or secondary street):
- (a) it will not result in all relevant walls or structures located along the boundary exceeding 45% of the length of the boundary; and
  - (b) it will not be located within 3m of any other wall along the same boundary unless on an adjacent site on that boundary there is an existing wall of a building that would be adjacent to or abut the proposed wall or structure
- 10 Internal dimensions – exceed 3.2m in width and 6m in length between all walls and doors
- 11 Door opening for vehicle access – does not exceed, in total, 7m in width or 50% of the width of the allotment frontage (whichever lesser)
- 12 The garage:
- o is located so that vehicle access:
    - i. is provided via a lawfully existing or authorised driveway or access point or an access point for which consent has been granted as part of an application for the division of land; or
    - ii. will use a driveway that:
      - A. is not located within 6 metres of an intersection of 2 or more roads or a pedestrian actuated crossing; and
      - B. will not interfere with an item of street furniture (including directional signs, lighting, seating and weather shelters), other infrastructure, or a tree; or
    - iii. if adjacent a kerbed road, will be via a kerb that is designed to allow a vehicle to roll over it; and

**Class of Development**

The following Classes of Development are classified as Accepted Development subject to meeting the 'Accepted Development Classification Criteria'

**Accepted Development Classification Criteria**

- o is located so that the gradient from the place of access on the boundary of the allotment to the finished floor level at the front of the carport when the work is completed is not steeper than 1:4 on average; and
- o The centre of the driveway at the public road boundary is no more than 25 degree deviation from the centre of the front of the covered car parking space for which it provides vehicle access

13 If clad in sheet metal—is pre-colour treated or painted in a non-reflective colour.

**Outbuilding (not being a garage)**

Except where any of the following apply:

- Coastal Areas Overlay
- Historic Shipwrecks Overlay
- State Heritage Area Overlay
- State Heritage Place Overlay
- Native Vegetation Overlay
- State Significant Native Vegetation Overlay
- Significant Landscape Protection Overlay
- Ramsar Wetlands Overlay
- River Murray Flood Plain Overlay
- Sloping Land Overlay
- Water Resources Overlay

- 1 The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system
- 2 It is detached from and ancillary to a dwelling erected on the site
- 3 Primary street setback – at least as far back as the building line of the building to which it is ancillary
- 4 Secondary street setback – at least 900mm from the boundary of the allotment (if the land has boundaries on two or more roads)
- 5 Side boundary setbacks – at least 900mm from the boundary of the allotment
- 6 Total floor area does not exceed 60m<sup>2</sup>
- 7 Wall height - does not exceed 3m measured from natural ground level (and not including a gable end)
- 8 Building height - does not exceed 5m
- 9 If situated on or abutting a boundary (not being a boundary with a primary street or secondary street) – a length not exceeding 10m unless:
  - (a) a longer wall or structure exists on the adjacent site and is situated on the same allotment boundary; and
  - (b) the proposed wall or structure will be built along the same length of boundary as the existing adjacent wall or structure to the same or lesser extent

**Class of Development**

The following Classes of Development are classified as Accepted Development subject to meeting the 'Accepted Development Classification Criteria'

**Accepted Development Classification Criteria**

- 10 If the outbuilding abuts or is situated on the boundary of the allotment (not being a boundary with a primary street or secondary street):
  - (a) it will not result in all relevant walls or structures located along the boundary exceeding 45% of the length of the boundary; and
  - (b) will not be located within 3m of any other wall along the same boundary unless on an adjacent site on that boundary there is an existing wall of a building that would be adjacent to or abut the proposed wall or structure
- 9 If clad in sheet metal—is pre-colour treated or painted in a non-reflective colour.

**Private bushfire shelters**

Except where any of the following apply:

- Coastal Areas Overlay
- Historic Shipwrecks Overlay
- State Heritage Area Overlay
- State Heritage Place Overlay
- Native Vegetation Overlay
- State Significant Native Vegetation Overlay
- Significant Landscape Protection Overlay
- Ramsar Wetlands Overlay
- River Murray Flood Plain Overlay
- Sloping Land Overlay
- Water Resources Overlay

- 10 The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system
- 11 Primary street setback – at least as far back as the building to which it is ancillary
- 12 Secondary street setback – at least 900mm from the boundary of the allotment
- 13 At least 6m from the corner of an allotment which abuts the intersection of two or more roads (other than where a 4m x 4m allotment cut-off is already in place).

**Protective tree netting structure**

- 8 development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system

| <p><b>Class of Development</b></p> <p>The following Classes of Development are classified as Accepted Development subject to meeting the 'Accepted Development Classification Criteria'</p>  | <p><b>Accepted Development Classification Criteria</b></p>   |
|--|--|
| <p>Except where any of the following apply:</p> <ul style="list-style-type: none"> <li>• Coastal Areas Overlay</li> <li>• State Heritage Area Overlay</li> <li>• State Heritage Place Overlay</li> <li>• State Significant Native Vegetation Overlay</li> <li>• Significant Landscape Protection Overlay</li> <li>• Ramsar Wetlands Overlay</li> <li>• River Murray Flood Plain Overlay</li> <li>• Sloping Land Overlay</li> <li>• Water Protection Area Overlay</li> <li>• Water Resources Overlay</li> </ul> | <p>9 No part of the protective tree netting structure will be more than 6m above natural ground level (depending on where it is situated)</p> <p>10 Netting visible from the outside of the protective tree netting structure is of a low light-reflective nature, and, in the case of a structure that has side netting, the side netting is of a dark colour</p> <p>11 In the case of a development on a site that is within a Hazards (Bushfire - Outback) Overlay, Hazards (Bushfire – Regional) Overlay, Hazards (Bushfire - General Risk) Overlay, Hazards (Bushfire Medium - Risk) Overlay or Hazards (Bushfire - High Risk) Overlay, the protective tree netting structure provides for access to the site in accordance with the following:</p> <ul style="list-style-type: none"> <li>(c) no part of the protective tree netting structure (including cables and points of attachment of cables (known as "auger" or "anchor" points) will be within 5m of any boundary of the site; or</li> <li>(d) does not prevent access or movement of vehicles of 4m height and 3.5m width (or less) on any access road or track (including fire tracks) on the site</li> </ul> <p>12 No part of the netting canopy of the protective tree netting structure:</p> <ul style="list-style-type: none"> <li>(c) will cover native vegetation; or</li> <li>(d) will be within 5m of a road (including any road reserve)</li> </ul> <p>13 The points of attachment of any cables will not be located:</p> <ul style="list-style-type: none"> <li>(c) outside the boundaries of the site; or</li> <li>(d) within a watercourse (within the meaning of the Natural Resources Management Act 2004)</li> </ul> <p>14 In relation to a dwelling located on an allotment adjoining the site on which the protective tree netting structure is located, the protective tree netting structure complies with the following:</p> <ul style="list-style-type: none"> <li>(c) if the netting canopy nearest the dwelling on the adjoining allotment is 4m or less above ground level (depending on where it is situated), no part of the netting canopy is within 10m of the dwelling</li> </ul> |

**Class of Development**

The following Classes of Development are classified as Accepted Development subject to meeting the 'Accepted Development Classification Criteria'

**Accepted Development Classification Criteria**

(d) in any other case, no part of the netting canopy is within 15m of the dwelling.

**Shade sail**

Except where any of the following apply:

- Coastal Areas Overlay
- Historic Shipwrecks Overlay
- State Heritage Area Overlay
- State Heritage Place Overlay
- Native Vegetation Overlay
- State Significant Native Vegetation Overlay
- Significant Landscape Protection Overlay
- Ramsar Wetlands Overlay
- River Murray Flood Plain Overlay
- Sloping Land Overlay
- Water Resources Overlay

29 The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system

30 Shade sail consists of permeable material

31 The total area of the sail - does not exceed 40m<sup>2</sup>

32 No part of the shade sail will be:

(a) 3m above ground or floor level (depending on where it is situated) at any place within 900mm of a boundary of the allotment

(b) 5m above ground or floor level (depending on where it is situated) within any other part of the allotment

33 Primary street setback – at least as far back as the building line of the building to which it is ancillary

34 If any part of the sail will be situated on a boundary of the allotment, the length of sail along a boundary does not exceed 8m

35 In a case where any part of the sail or a supporting structure will be situated on a side boundary of the allotment — the length of the sail and any such supporting structure together with all relevant walls or structures located along the boundary will not exceed 45% of the length of the boundary.

**Solar photovoltaic panels (roof mounted)**

16 Panels are installed parallel to the roof of a building and with the underside surface of the panel not being more than 100mm above the surface of the roof

17 Panels and associated components do not overhang any part of the roof

**Class of Development**

The following Classes of Development are classified as Accepted Development subject to meeting the 'Accepted Development Classification Criteria'

**Accepted Development Classification Criteria**

Except where any of the following apply:

- State Heritage Area Overlay
- A State Heritage Place identified in the State Heritage Place Overlay

18 Does not apply to system with a generating capacity of more than 5MW that is to be connected to the State's power system.

**Solar photovoltaic panels (ground mounted)**

- Coastal Areas Overlay
- Hazards (Acid Sulfate Soils) Overlay
- River Murray Flood Plain Overlay
- Significant Landscape Protection Overlay
- State Significant Native Vegetation Overlay
- RAMSAR Wetlands Overlay
- State Heritage Area Overlay
- A State Heritage Place identified in the State Heritage Place Overlay

- 1 The system is freestanding rather than attached to a building or other structure.
- 2 No part of the system:
  - (a) is more than 4 metres in height (measured as a height above the natural surface of the ground);
  - (b) is within 100 metres of a dwelling not associated with the system (whether the dwelling is on the same allotment as the system or another allotment); and
  - (c) is within 10 metres of a boundary of an allotment containing a dwelling not associated with the system.
- 3 The generating capacity of the system does not exceed 30 kW.
- 4 Does not result in the clearance of any native vegetation

**Spa pool**  
**Swimming pool**

Except where any of the following apply:

- Coastal Areas Overlay
- Hazards (Flooding) Overlay

- 16 The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system
- 17 It is ancillary to a dwelling erected on the site
- 18 Allotment boundary setback – not less than 1m
- 19 Primary street setback – at least as far back as the building line of the building to which it is ancillary
- 20 Location of filtration system from a dwelling on an adjoining allotment:

**Class of Development**

The following Classes of Development are classified as Accepted Development subject to meeting the 'Accepted Development Classification Criteria'

**Accepted Development Classification Criteria**

- Historic Shipwrecks Overlay
- State Heritage Area Overlay
- State Heritage Place Overlay
- Native Vegetation Overlay
- State Significant Native Vegetation Overlay
- Significant Landscape Protection Overlay
- Ramsar Wetlands Overlay
- River Murray Flood Plain Overlay
- Sloping Land Overlay
- Water Resources Overlay

- (a) not less than 5m where the filtration system is located inside a solid structure that will have material impact on the transmission of noise
- (b) not less than 12m in any other case.

**Verandah**

Except where any of the following apply:

Except where any of the following apply:

- TBC

- 25 The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system
- 26 It is ancillary to a dwelling erected on the site
- 27 Primary street setback – as far back as the building line of the building to which it is ancillary
- 28 Total floor area - does not exceed 60m<sup>2</sup>
- 29 Post height - does not exceed 3m measured from natural ground level
- 30 Building height - does not exceed 5m
- 31 Length - does not exceed 10m if any part of the structure abuts or is situated on a boundary of the allotment

**Water tank (underground)**

- 13 The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system
- 14 The tank (including any associated pump) is located wholly below the level of the ground.

**Class of Development**

The following Classes of Development are classified as Accepted Development subject to meeting the 'Accepted Development Classification Criteria'

**Accepted Development Classification Criteria**

Except where any of the following apply:

- Coastal Areas Overlay
- Hazards (Acid Sulfate soils) Overlay
- Historic Shipwrecks Overlay
- Native Vegetation Overlay
- State Significant Native Vegetation Overlay
- Ramsar Wetlands Overlay
- Sloping Land Overlay
- Water Resources Overlay.

Any of the following where it is located within the boundary of a mining settlement associated with an approved mining lease that has been granted final development approval:

- Accommodation units
- Building or building work
- Bus terminal
- Car parking area
- Commercial development
- Community facility
- Industry
- Infrastructure
- Office

Building Near Airfields: PO 1.1  
Coastal Areas: All

**Class of Development**

**Applicable Policies**

The following policies are applicable to the assessment of the identified Class of Development. Policies referred to are Performance Outcome policies, and any associated Designated Performance Features. Relevant Desired Outcomes are not listed, but automatically apply in relation to a Performance Assessed Development.  
 Where a development comprises more than one Class of Development the relevant policies will be taken to be the sum of the applicable policies for each Class of Development.

| <b>None Specified</b>  |  |

## Assessment Provisions

### Desired Outcome (DO)

#### DO 1

A diverse range of activities from pastoral, grazing and farming activities, agricultural processing and transportation, mining and petroleum (and associated settlement activities), the generation and storage of energy, pipelines or infrastructure, aerospace and defence related facilities (and associated settlement activities), tourism, remote settlements, Aboriginal lands and related rural land activities.

### Performance Outcomes and Deemed to Satisfy / Designated Performance Outcome Criteria

#### Land Use and Intensity

##### PO 1.1

The productive value of land for a range of rural activities.

##### DTS/DPF 1.1

Development comprises one or more of the following land uses:

- (a) Advertisement
- (b) Agricultural building
- (c) Carport
- (d) Demolition
- (e) Detached dwelling
- (f) Dwelling addition
- (g) Excavation and filling
- (h) Farming
- (i) Intensive animal husbandry
- (j) Outbuilding
- (k) Small-scale ground mounted solar power facility
- (l) Solar farm
- (m) Stock sales yard
- (n) Stock slaughter works
- (o) Tourist accommodation
- (p) Verandah
- (q) Wind farm

#### Built Form and Character

##### PO 2.1

Development sited and designed to protect natural features and the conservation value of the area.

##### DTS/DPF 2.1

None are applicable.

##### PO 2.2

Large buildings designed and sited to reduce impacts on scenic and rural vistas by:

- (a) having substantial setbacks from boundaries and adjacent public roads
- (b) using low reflective materials and finishes that blend with the surrounding landscape; and
- (c) being located below ridgelines where practicable.

##### DTS/DPF 2.2

Building are:

- (a) of a height no greater than 2 building levels and 9m; and
- (b) setback at least 40m from any allotment boundary or public road.

## Hazard Risk Minimisation

### PO 3.1

Habitable buildings designed and sited to manage the risks of natural hazards on personal and public safety and property.

### DTS/DPF 3.1

None are applicable.

## Procedural Matters (PM)

### Notification

All classes of performance assessed development are excluded from notification except where they involve any of the following:

- (a) the site of the development is adjacent land to land in a different zone
- (b) development identified as "all other code assessed development" in Remote Areas Zone Table 3
- (c) wind farm and ancillary development including electricity substation, maintenance sheds, access roads, and connecting power-lines where the base of any wind turbine is 2,000m or less from:
  - (i) an existing dwelling or tourist accommodation that is not associated with the wind farm;
  - (ii) a proposed dwelling or tourist accommodation for which an operable planning consent exists;
  - (iii) the boundaries of any airfield, airport, Local Infrastructure (Airfield) Zone, Settlement Zone, Township Zone or any State Heritage Area Overlay;
- (d) wind monitoring mast and ancillary development.

## Rural Zone

Table 1 – Accepted Development Classification

| <b>Class of Development</b><br><br>The following Classes of Development are classified as Accepted Development subject to meeting the 'Accepted Development Classification Criteria'  | <b>Accepted Development Classification Criteria</b>  |
|---|--|
| <b>Building work on railway land</b>  | <ol style="list-style-type: none"> <li>1 Building work is associated with a railway</li> <li>2 It is situated (or to be situated) on railway land</li> <li>3 It is required for the conduct or maintenance of railway activities.</li> </ol>   |
| <b>Carport</b><br><br>Except where any of the following apply: <ul style="list-style-type: none"> <li>• Character Preservation District Overlay</li> <li>• Coastal Areas Overlay</li> <li>• Hazards (Acid Sulfate Soils) Overlay</li> <li>• Hazards (Flooding) Overlay</li> <li>• Historic Area Overlay</li> <li>• Historic Shipwrecks Overlay</li> <li>• Local Heritage Place Overlay</li> <li>• State Heritage Area Overlay</li> <li>• State Heritage Place Overlay</li> <li>• Native Vegetation Overlay</li> <li>• State Significant Native Vegetation Overlay</li> <li>• Significant Landscape Protection Overlay</li> <li>• Ramsar Wetlands Overlay</li> <li>• River Murray Flood Plain Overlay</li> </ul> | <ol style="list-style-type: none"> <li>1 The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system</li> <li>2 It is ancillary to a dwelling erected on the site</li> <li>3 Primary street setback – at least 5.5m from the primary street boundary and as far back as the building line of the building to which it is ancillary</li> <li>4 Secondary street setback – at least 900mm from the boundary of the allotment (if the land has boundaries on two or more roads)</li> <li>5 Total floor area - does not exceed 60m<sup>2</sup></li> <li>6 Post height - does not exceed 3m measured from natural ground level (and not including a gable end)</li> <li>7 Building height - does not exceed 5m</li> <li>8 If situated on or abutting a boundary (not being a boundary with a primary street or secondary street) – a length not exceeding 10m unless:                         <ol style="list-style-type: none"> <li>(a) a longer wall or structure exists on the adjacent site and is situated on the same allotment boundary; and</li> <li>(b) the proposed wall or structure will be built along the same length of boundary as the existing adjacent wall or structure to the same or lesser extent</li> </ol> </li> <li>9 If the carport abuts or is situated on the boundary of the allotment (not being a boundary with a primary street or secondary street):                         <ol style="list-style-type: none"> <li>(a) it will not result in all relevant walls or structures located along the boundary exceeding 45% of the length of the boundary; and</li> </ol> </li> </ol> |

## Class of Development

The following Classes of Development are classified as Accepted Development subject to meeting the 'Accepted Development Classification Criteria'

- Sloping Land Overlay
- Future Road Widening Overlay where an existing access is altered or a new access is created
- Key Railway Crossings Overlay where an existing access is altered or a new access is created
- Key Outback and Rural Routes Overlay where an existing access is altered or a new access is created
- Major Urban Transport Routes Overlay where an existing access is altered or a new access is created
- Non-stop Corridor Overlay where an existing access is altered or a new access is created
- Urban Transport Routes Overlay where an existing access is altered or a new access is created
- Water Resources Overlay

## Accepted Development Classification Criteria

- (b) it will not be located within 3m of any other wall along the same boundary unless on an adjacent site on that boundary there is an existing wall of a building that would be adjacent to or abut the proposed wall or structure
- 10 Door opening for vehicle access – does not exceed, in total, 7m in width or 50% of the width of the allotment frontage (whichever lesser)
- 11 Internal dimensions – does not exceed 3.2m in width and 6m in length between all fences, walls and doors
- 12 The carport:
  - (a) is located so that vehicle access:
    - i. is provided via a lawfully existing or authorised driveway or access point or an access point for which consent has been granted as part of an application for the division of land; or
    - ii. will use a driveway that:
      - A. is not located within 6 metres of an intersection of 2 or more roads or a pedestrian actuated crossing; and
      - B. will not interfere with an item of street furniture (including directional signs, lighting, seating and weather shelters), other infrastructure, or a tree; or
    - iii. if adjacent a kerbed road, will be via a kerb that is designed to allow a vehicle to roll over it; and
  - (b) is located so that the gradient from the place of access on the boundary of the allotment to the finished floor level at the front of the carport when the work is completed is not steeper than 1:4 on average; and
  - (c) The centre of the driveway at the public road boundary is no more than 25 degree deviation from the centre of the front of the covered car parking space for which it provides vehicle access

## Demolition

None.

**Class of Development**

The following Classes of Development are classified as Accepted Development subject to meeting the 'Accepted Development Classification Criteria'

**Accepted Development Classification Criteria**

Except where any of the following apply:

- Historic Area Overlay
- Historic Shipwreck identified in the Historic Shipwrecks Overlay
- Local Heritage Place identified in the Local Heritage Place Overlay
- State Heritage Area Overlay
- State Heritage Place identified in the State Heritage Place Overlay

**Farming**

- 1 There is no excavation or filling of land
- 2 Does not involve the erection, construction or alteration of, or addition to, any building or structure
- 3 Does not involve the clearance of native vegetation

**Internal building work**

Except where any of the following apply:

- Historic Shipwreck identified in the Historic Shipwrecks Overlay
- Local Heritage Place identified in the Local Heritage Place Overlay
- State Heritage Area Overlay
- State Heritage Place identified in the State Heritage Place Overlay

- 1 There will be no increase in the total floor area of the building
- 2 There will be no alteration to the external appearance of the building.

**Class of Development**

The following Classes of Development are classified as Accepted Development subject to meeting the 'Accepted Development Classification Criteria'

- Historic Area Overlay
- Historic Shipwrecks Overlay
- Local Heritage Place Overlay
- State Heritage Area Overlay
- State Heritage Place Overlay
- Native Vegetation Overlay
- State Significant Native Vegetation Overlay
- Significant Landscape Protection Overlay
- Ramsar Wetlands Overlay
- River Murray Flood Plain Overlay
- Sloping Land Overlay
- Water Resources Overlay

**Accepted Development Classification Criteria**

- 7 Wall height - does not exceed 3m measured from natural ground level (and not including a gable end)
- 8 Building height - does not exceed 5m
- 9 If situated on or abutting a boundary (not being a boundary with a primary street or secondary street) – a length not exceeding 10m unless:
  - (a) a longer wall or structure exists on the adjacent site and is situated on the same allotment boundary; and
  - (b) the proposed wall or structure will be built along the same length of boundary as the existing adjacent wall or structure to the same or lesser extent
- 10 If the outbuilding abuts or is situated on the boundary of the allotment (not being a boundary with a primary street or secondary street):
  - (a) it will not result in all relevant walls or structures located along the boundary exceeding 45% of the length of the boundary; and
  - (b) will not be located within 3m of any other wall along the same boundary unless on an adjacent site on that boundary there is an existing wall of a building that would be adjacent to or abut the proposed wall or structure
- 11 If clad in sheet metal—is pre-colour treated or painted in a non-reflective colour.

**Private bushfire shelters**

Except where any of the following apply:

- Character Preservation District Overlay
- Coastal Areas Overlay
- Hazards (Acid Sulfate Soils) Overlay
- Hazards (Flooding) Overlay
- Historic Area Overlay

- 1 The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system
- 2 Primary street setback – at least as far back as the building to which it is ancillary
- 3 Secondary street setback – at least 900mm from the boundary of the allotment
- 4 At least 6m from the corner of an allotment which abuts the intersection of two or more roads (other than where a 4m x 4m allotment cut-off is already in place).

**Class of Development**

The following Classes of Development are classified as Accepted Development subject to meeting the 'Accepted Development Classification Criteria'

- Historic Shipwrecks Overlay
- Local Heritage Place Overlay
- State Heritage Area Overlay
- State Heritage Place Overlay
- Native Vegetation Overlay
- State Significant Native Vegetation Overlay
- Significant Landscape Protection Overlay
- Ramsar Wetlands Overlay
- River Murray Flood Plain Overlay
- Sloping Land Overlay
- Water Resources Overlay

**Protective tree netting structure**

Except where any of the following apply:

- Coastal Areas Overlay
- Hazards (Acid Sulfate Soils) Overlay
- Historic Area Overlay
- Historic Shipwrecks Overlay
- Local Heritage Place Overlay
- State Heritage Area Overlay
- State Heritage Place Overlay
- State Significant Native Vegetation Overlay
- Significant Landscape Protection Overlay
- Ramsar Wetlands Overlay

**Accepted Development Classification Criteria**

- 1 The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system
- 2 No part of the protective tree netting structure will be more than 6m above natural ground level (depending on where it is situated)
- 3 Netting visible from the outside of the protective tree netting structure is of a low light-reflective nature, and, in the case of a structure that has side netting, the side netting is of a dark colour
- 4 In the case of a development on a site that is within a Hazards (Bushfire - Outback) Overlay, Hazards (Bushfire – Regional) Overlay, Hazards (Bushfire - General Risk) Overlay, Hazards (Bushfire Medium - Risk) Overlay or Hazards (Bushfire - High Risk) Overlay, the protective tree netting structure provides for access to the site in accordance with the following:

**Class of Development**

The following Classes of Development are classified as Accepted Development subject to meeting the 'Accepted Development Classification Criteria'

- River Murray Flood Plain Overlay
- Sloping Land Overlay
- Water Protection Area Overlay
- Water Resources Overlay

**Accepted Development Classification Criteria**

- (a) no part of the protective tree netting structure (including cables and points of attachment of cables (known as "auger" or "anchor" points) will be within 5m of any boundary of the site; or
- (b) does not prevent access or movement of vehicles of 4m height and 3.5m width (or less) on any access road or track (including fire tracks) on the site
- 5 No part of the netting canopy of the protective tree netting structure:
  - (a) will cover native vegetation; or
  - (b) will be within 5m of a road (including any road reserve)
- 6 The points of attachment of any cables will not be located:
  - (a) outside the boundaries of the site; or
  - (b) within a watercourse (within the meaning of the Natural Resources Management Act 2004)
- 7 In relation to a dwelling located on an allotment adjoining the site on which the protective tree netting structure is located, the protective tree netting structure complies with the following:
  - (a) if the netting canopy nearest the dwelling on the adjoining allotment is 4m or less above ground level (depending on where it is situated), no part of the netting canopy is within 10m of the dwelling
  - (b) in any other case, no part of the netting canopy is within 15m of the dwelling.

**Shade sail**

Except where any of the following apply:

- Character Preservation District Overlay
- Coastal Areas Overlay
- Hazards (Acid Sulfate Soils) Overlay

- 1 The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system
- 2 Shade sail consists of permeable material
- 3 The total area of the sail - does not exceed 40m<sup>2</sup>
- 4 No part of the shade sail will be:
  - (a) 3m above ground or floor level (depending on where it is situated) at any place within 900mm of a boundary of the allotment
  - (b) 5m above ground or floor level (depending on where it is situated) within any other part of the allotment

## Class of Development

The following Classes of Development are classified as Accepted Development subject to meeting the 'Accepted Development Classification Criteria'

## Accepted Development Classification Criteria

- Historic Area Overlay
- Historic Shipwrecks Overlay
- Local Heritage Place Overlay
- State Heritage Area Overlay
- State Heritage Place Overlay
- Native Vegetation Overlay
- State Significant Native Vegetation Overlay
- Significant Landscape Protection Overlay
- Ramsar Wetlands Overlay
- River Murray Flood Plain Overlay
- Sloping Land Overlay
- Water Resources Overlay

- 5 Primary street setback – at least as far back as the building line of the building to which it is ancillary
- 6 If any part of the sail will be situated on a boundary of the allotment, the length of sail along a boundary does not exceed 8m
- 7 In a case where any part of the sail or a supporting structure will be situated on a side boundary of the allotment — the length of the sail and any such supporting structure together with all relevant walls or structures located along the boundary will not exceed 45% of the length of the boundary.

### Solar photovoltaic panels (roof mounted)

Except where any of the following apply:

- Historic Area Overlay
- Local Heritage Place identified in the Local Heritage Place Overlay
- State Heritage Area Overlay
- State Heritage Place identified in the State Heritage Place Overlay

- 1 Panels are installed parallel to the roof of a building and with the underside surface of the panel not being more than 100mm above the surface of the roof
- 2 Panels and associated components do not overhang any part of the roof
- 3 Does not apply to system with a generating capacity of more than 5MW that is to be connected to the State's power system.

### Solar photovoltaic panels (ground mounted)

- 5 The system is freestanding rather than attached to a building or other structure.
- 6 No part of the system:

**Class of Development**

The following Classes of Development are classified as Accepted Development subject to meeting the 'Accepted Development Classification Criteria'

**Accepted Development Classification Criteria**

Except where any of the following apply:

- Character Preservation District Overlay
- Historic Area Overlay
- Local Heritage Place identified in the Local Heritage Place Overlay
- State Heritage Area Overlay
- State Heritage Place identified in the State Heritage Place Overlay
- State Significant Native Vegetation Overlay

- (c) is more than 4 metres in height (measured as a height above the natural surface of the ground);
  - (d) is within 100 metres of a dwelling not associated with the system (whether the dwelling is on the same allotment as the system or another allotment); and
  - (e) is within 10 metres of a boundary of an allotment containing a dwelling not associated with the system.
- 7 The generating capacity of the system does not exceed 30 kW
  - 8 Does not result in the clearance of any native vegetation.

**Spa pool**

**Swimming pool**

Except where any of the following apply:

- Character Preservation District Overlay
- Coastal Areas Overlay
- Hazards (Acid Sulfate Soils) Overlay
- Hazards (Flooding) Overlay
- Historic Area Overlay
- Local Heritage Place Overlay
- State Heritage Area Overlay
- State Heritage Place Overlay
- Native Vegetation Overlay

- 1 The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system
- 2 It is ancillary to a dwelling erected on the site
- 3 Allotment boundary setback – not less than 1m
- 4 Primary street setback – at least as far back as the building line of the building to which it is ancillary
- 5 Location of filtration system from a dwelling on an adjoining allotment:
  - (a) not less than 5m where the filtration system is located inside a solid structure that will have material impact on the transmission of noise
  - (b) not less than 12m in any other case.

**Class of Development**

**Accepted Development Classification Criteria**

The following Classes of Development are classified as Accepted Development subject to meeting the 'Accepted Development Classification Criteria'

- State Significant Native Vegetation Overlay
- Significant Landscape Protection Overlay
- Ramsar Wetlands Overlay
- River Murray Flood Plain Overlay
- Sloping Land Overlay
- Water Resources Overlay

**Verandah**

Except where any of the following apply:

- Character Preservation District Overlay
- Coastal Areas Overlay
- Hazards (Acid Sulfate Soils) Overlay
- Hazards (Flooding) Overlay
- Historic Area Overlay
- Local Heritage Place Overlay
- State Heritage Area Overlay
- State Heritage Place Overlay
- Native Vegetation Overlay
- State Significant Native Vegetation Overlay
- Significant Landscape Protection Overlay
- Ramsar Wetlands Overlay
- River Murray Flood Plain Overlay

- 1 The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system
- 2 It is ancillary to a dwelling erected on the site
- 3 Primary street setback – as far back as the building line of the building to which it is ancillary
- 4 Total floor area - does not exceed 60m<sup>2</sup>
- 5 Post height - does not exceed 3m measured from natural ground level
- 6 Building height - does not exceed 5m
- 7 Length - does not exceed 10m if any part of the structure abuts or is situated on a boundary of the allotment

**Class of Development**

The following Classes of Development are classified as Accepted Development subject to meeting the 'Accepted Development Classification Criteria'

**Accepted Development Classification Criteria**

Water Resources Overlay

**Water tank (above ground)**

Except where any of the following apply:

- Character Preservation District Overlay
- Coastal Areas Overlay
- Hazards (Flooding) Overlay
- Historic Area Overlay
- Local Heritage Place Overlay
- State Heritage Area Overlay
- State Heritage Place Overlay
- Native Vegetation Overlay
- State Significant Native Vegetation Overlay
- Significant Landscape Protection Overlay
- Ramsar Wetlands Overlay
- River Murray Flood Plain Overlay
- Sloping Land Overlay
- Water Resources Overlay

- 1 The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system
- 2 The tank is part of a roof drainage system
- 3 Total floor area - not exceeding 15m<sup>2</sup>
- 4 The tank is located wholly above ground
- 5 Tank height – does not exceed 4m above natural ground level
- 6 Primary street setback – at least as far back as the building line of the building to which it is ancillary
- 7 In the case of a tank made of metal – the tank is pre-colour treated or painted in a non-reflective colour.

**Water tank (underground)**

Except where any of the following apply:

- Character Preservation District Overlay
- Coastal Areas Overlay

- 1 The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system
- 2 The tank (including any associated pump) is located wholly below the level of the ground.

Table 4 –Restricted Development Classification

| <b>Class of Development</b><br>The following Classes of Development are classified as Restricted subject to any 'Exclusions'                   | <b>Exclusions</b>  |
|--|--|
| <b>Dwelling</b> within the Limited Dwelling Overlay  | Except where it is a replacement dwelling.   |
| <b>Land Division</b> within the Limited Land Division Overlay  | Except where it involves a boundary realignment.   |
| <b>Land Division</b> creating additional allotments for residential purposes within the Significant Industry Interface Overlay                 |  |
| <b>Renewable energy facility</b> within either the:<br>(a) Significant Landscape Protection Overlay<br>(b) Character Preservation Area Overlay |  |
| <b>Shop</b>  | Except where:<br>(a) it is ancillary to and located on the same allotment or adjoining allotment used for primary production or value adding and offers for sale or consumption produce or goods that are primarily sourced, produced or manufactured on the same allotment or from the region; or<br>(b) it has a gross leasable floor area less than 250m <sup>2</sup> ; or<br>(c) it is a restaurant. |

## Assessment Provisions

### Desired Outcomes (DO)

#### DO 1

A zone supporting the economic prosperity of South Australia primarily through the production, processing, storage and distribution of primary produce, forestry and the generation of energy from renewable sources.

#### DO 2

A zone supporting diversification of existing businesses that promote value adding, such as industry, storage and warehousing activities, the sale and consumption of primary produce, tourist development and accommodation.

### Performance Outcomes and Deemed to Satisfy / Designated Performance Outcome Criteria

#### Land Use and Intensity

##### PO 1.1

The productive value of rural land for a range of primary production activities and associated value adding, processing, warehousing and distribution is supported, protected and maintained.

##### DTS/DPF 1.1

Development comprises one or more of the following land uses:

- (a) Advertisement
- (b) Agricultural building
- (c) Brewery
- (d) Carport
- (e) Cidery
- (f) Distillery
- (g) Demolition
- (h) Detached dwelling
- (i) Dwelling addition
- (j) Excavation and filling
- (k) Farming
- (l) Fence
- (m) Horse keeping
- (n) Horticulture

- (o) Industry
- (p) Intensive animal husbandry
- (q) Low intensity animal husbandry
- (r) Outbuilding
- (s) Shop
- (t) Small-scale ground mounted solar power facility
- (u) Tourist accommodation
- (v) Transport distribution
- (w) Verandah
- (x) Warehouse
- (y) Winery

## Siting and Design

### PO 2.1

Development is provided with suitable vehicle access.

### DTS/DPF 2.1

Development is serviced by an all-weather trafficable public road.

### PO 2.2

Buildings are generally located on flat land to avoid cut and fill and the associated visual impacts.

### DTS/DPF 2.2

Buildings:

- (a) are sited on land with a slope not greater than 10% (1-in-10); and
- (b) do not result excavation and filling of land that is greater than 1.5 metres from natural ground level.

## Horticulture

### PO 3.1

Horticulture is located and conducted on land that has the physical capability of supporting the activity and in a manner that:

- (a) enhances the productivity of the land for the growing of food and produce in a sustainable manner;
- (b) avoids adverse interface conflicts with other land uses;
- (c) utilises sound environmental practices to mitigate negative impacts on natural resources and water quality;

- (d) is sympathetic to surrounding rural landscape character and amenity, where horticulture is proposed to be carried out in an enclosed building such as such as greenhouses.

#### DTS/DPF 3.1

Horticultural activities:

- (a) are conducted on an allotment with an area of at least 1ha;
- (b) are sited on land with a slope not greater than 10% (1-in10);
- (c) are not conducted within 50m of a watercourse or native vegetation;
- (d) do not involve the clearance of native vegetation;
- (e) abut an existing horticulture activity;
- (f) are not conducted within 100m of a sensitive receiver in other ownership;
- (g) provide for a headland area between plantings and property boundaries of at least 10m in width; and
- (h) where carried out in an enclosed building such as a greenhouse, the building has a total floor area not greater than 250m<sup>2</sup>;
- (i) in the form of olive growing, is not located within 500 metres of a conservation or national park.

### Rural Industry

#### PO 4.1

Industry (including beverage production and washing, processing, bottling and packaging activities), storage, warehousing, transport distribution or similar activities:

- (a) are directly related to and add value to primary production and/or commodities and materials sourced from rural areas; and
- (b) realise efficiencies in primary production.

#### DTS/DPF 4.1

Industries, storage, warehousing and transport distribution activities:

- (a) are directly related to and ancillary to a primary production use on the same or adjoining allotment;
- (b) are located on an allotment not less than 20ha in area;
- (c) have a total floor area not exceeding 250m<sup>2</sup>.

#### PO 4.2

Industry, storage, warehousing, transport distribution or similar activities are sited, designed and of a scale that maintains rural character and function and respects landscape amenity.

## DTS/DPF 4.2

Buildings and associated activities:

- (a) are setback at least 100m from all road and allotment boundaries;
- (b) are not sited within 200m of a sensitive receiver in other ownership;
- (c) have building height not greater than 10m above natural ground level; and
- (d) incorporate the loading and unloading of vehicles within the confines of the allotment.

## Dwellings

### PO 5.1

Residential development is ancillary to, and does not compromise, primary production.

### DTS/DPF 5.1

Dwellings:

- (a) are located on an allotment with an area not less than that specified in the *Minimum Allotment Size Technical and Numeric Variation Overlay*;
- (b) are located on and have a demonstrated connection with an allotment used for primary production or value adding; will not result in more than one dwelling on an allotment.

### PO 5.2

Development creating a second dwelling on an allotment should not compromise primary production and value adding industries, or result in the fragmentation of land.

### DTS/DPF 5.2

A secondary dwelling on an allotment is:

- (a) located within 20 metres of an existing dwelling on the same allotment;
- (b) utilises existing infrastructure and vehicle access used by an existing dwelling; and
- (c) located on an allotment not less than 40ha in area.

### PO 5.3

Residential development resulting in more than one dwelling on an allotment:

- (a) supports aging in place for the owner of the allotment;
- (b) is in the form of a manager's residence or workers' accommodation;

- (c) is located within 20 metres of an existing dwelling on the same allotment;
- (d) does not compromise primary production or value adding industries;
- (e) utilises existing infrastructure and vehicle access used by an existing dwelling

#### DTS/DPF 5.3

None are applicable.

#### PO 5.4

Dwellings are sited, designed and of a scale that maintains a pleasant rural character and amenity.

#### DTS/DPF 5.4

Dwellings:

- (a) are setback from all allotment boundaries by at least 40m;
- (b) do not exceed 2 building levels and 9 metres measured from the top of the footings; and
- (c) have a wall height that is no greater than 6 metres.

#### PO 5.5

Dwelling additions are sited, designed and of a scale that maintains a pleasant rural character and amenity.

#### DTS/DPF 5.5

Additions or alterations to an existing dwelling:

- (a) are setback behind the main façade of the existing dwelling;
- (b) do not exceed 2 building levels and 9 metres measured from the top of the footings; and
- (c) have a wall height that is no greater than 6 metres.

## Shops, Tourism and Function Centres

#### PO 6.1

Shops are associated with an existing primary production use or value adding industry within the region.

#### DTS/DPF 6.1

Shops:

- (a) are ancillary to and located on the same allotment or an adjoining allotment used for primary production or value adding;
- (b) offer for sale or consumption produce or goods that are primarily sourced, produced or manufactured on the same allotment or from the region;
- (c) have a gross leasable floor area not exceeding 100m<sup>2</sup>;

(d) have an area for the display of produce or goods external to a building not exceeding 25m<sup>2</sup>.

#### PO 6.2

Shops that are proposed in new buildings are sited, designed and of a scale that maintains a pleasant rural character and amenity.

#### DTS/DPF 6.2

Shops in new buildings:

- (a) are setback from all allotment boundaries by at least 40m;
- (b) are not sited within 100m of a sensitive receiver in other ownership; and
- (c) have a building height that does not exceed 7m above natural ground level.

#### PO 6.3

Tourist accommodation is associated with the primary use of the land for primary production or value adding industry.

#### DTS/DPF 6.3

Tourist accommodation:

- (a) is ancillary to and located on the same allotment or an adjoining allotment used for primary production or value adding;
- (b) in relation to the area used for accommodation, does not exceed 100m<sup>2</sup>.

#### PO 6.4

Tourist accommodation proposed in a new building or buildings are sited, designed and of a scale that maintains a pleasant rural character and amenity.

#### DTS/DPF 6.4

Tourist accommodation in new buildings:

- (a) is setback from all allotment boundaries by at least 40m; and
- (b) have a building height that does not exceed 7m above natural ground level.

#### PO 6.5

Function centres are associated with the primary use of the land for primary production or value adding industry.

#### DTS/DPF 6.5

Function centres:

- (a) are ancillary to and located on the same allotment or an adjoining allotment used for primary production or value adding;
- (b) do not result in more than 75 seats for customer dining purposes.

#### PO 6.6

Function centres are sited, designed and of a scale that maintains a pleasant natural and rural character and amenity.

#### DTS/DPF 6.6

Function centres:

- (a) are located on an allotment having an area of at least 5ha;
- (b) are setback from all property boundaries by at least 40m;
- (c) are not sited within 100m of a sensitive receiver in other ownership; and
- (d) have a building height that does not exceed 9m above natural ground level.

### Offices

#### PO 7.1

Offices are directly related to and associated with the primary use of the land for primary production or value adding industry

#### DTS/DPF 7.1

Offices:

- (a) are ancillary to and located on the same allotment or an adjoining allotment used for primary production or value adding;
- (b) have a gross leasable floor area not exceeding 100m<sup>2</sup>.

### Adaptive Reuse of Existing Buildings

#### PO 8.1

Adaptive reuse of existing buildings for small-scale shops, offices, tourist accommodation or ancillary rural activities.

#### DTS/DPF 8.1

Development within an existing building is for:

- (a) a shop;
- (b) office; or
- (c) tourist accommodation.

### Renewable Energy Facilities

#### PO 9.1

Renewable energy facilities and ancillary development minimises significant fragmentation or displacement of existing primary production.

#### DTS/DPF 9.1

None are applicable.

#### PO 9.2

Small-scale ground mounted solar power facilities support rural production or value adding industries.

#### DTS/DPF 9.2

Solar power facilities:

- (a) do not generate more than 30KW;
- (b) generate power which is to be used wholly in association with a primary production industry, a value adding industry or local infrastructure facility on the same allotment;
- (c) do not have a panel size exceeding 80m<sup>2</sup> or 4m in height per structure;
- (d) do not involve more than 2 panel structures per allotment;
- (e) are setback at least 10m from adjoining allotments in other ownership; and
- (f) are not located within 100m of a dwelling in other ownership.

### Built Form and Character

#### PO 10.1

Large buildings designed and sited to reduce impacts on scenic and rural vistas by:

- (a) having substantial setbacks from boundaries and adjacent public roads;
- (b) using low reflective materials and finishes that blend with the surrounding landscape; and
- (c) being located below ridgelines

#### DTS/DPF 10.1

None are applicable.

### Land Division

#### PO 11.1

Land division, including boundary realignments promotes productive, efficient and sustainable primary production.

#### DTS/DPF 11.1

Allotments have an area not less than that specified in the *Minimum Allotment Size Technical and Numeric Variation Overlay*.

## Agricultural Buildings

### PO 12.1

Agricultural buildings and associated activities are sited, designed and of a scale that maintains rural character and function and respects landscape amenity.

### DTS/DPF 12.1

- (a) Agricultural buildings:
- (b) are located on an allotment having an area of at least 10ha;
- (c) are setback at least 50m from an allotment boundary;
- (d) have a building height not exceeding 10m above natural ground level;
- (e) do not exceed 250m<sup>2</sup> in total floor area; and
- (f) incorporate the loading and unloading of vehicles within the confines of the allotment.

## Outbuildings, Carports and Verandahs

### PO 13.1

Outbuildings are sited, designed and of a scale that maintain a pleasant rural character and amenity.

### DTS/DPF 13.1

Outbuildings:

- (a) have a primary street setback that is at least as far back as the building to which it is ancillary;
- (b) have a total floor area that does not exceed 150m<sup>2</sup>;
- (c) have walls that do not exceed 5m in height measured from natural ground level and not including a gable end;
- (d) have a total roof height that does not exceed 6m measured from natural ground level; and
- (e) are limited to no more than 2 outbuildings on the same allotment.

### PO 13.2

Carports and verandahs are sited, designed and of a scale that maintain a pleasant rural character and amenity.

### DTS/DPF 13.2

Carports and verandahs have a:

- (a) primary street setback that is at least as far back as the building to which it is ancillary;
- (b) total floor area that does not exceed 80m<sup>2</sup>;
- (c) post height that does not exceed 3m measured from natural ground level and not including a gable end; and
- (d) total roof height that does not exceed 5m measured from natural ground level.

## Concept Plans

### PO 14.1

Development is compatible with the outcomes sought by any relevant Concept Plan contained within the *Concept Plans Technical and Numeric Variation Overlay*.

### DTS 14.1

None are applicable

## Procedural Matters (PM)

### Notification

All classes of performance assessed development are excluded from notification except where they involve any of the following:

- (a) the site of the development is adjacent to land in a different zone
- (b) development identified as "all other code assessed development" in Rural Zone Table 3
- (c) detached dwelling
- (d) industry, storage, transport distribution and/or warehousing with a total floor area greater than 250m<sup>2</sup>
- (e) renewable energy facilities other than a solar power facility that does not generate more than 30KW
- (f) shop with a gross leasable area greater than 200m<sup>2</sup>
- (g) tourist accommodation with a total floor area greater than 200m<sup>2</sup>
- (h) wind farm
- (i) wind monitoring mast
- (j) workers' accommodation

## Rural Living Zone

Table 1 – Accepted Development Classification

| <b>Class of Development</b><br>The following Classes of Development are classified as Accepted Development subject to meeting the 'Accepted Development Classification Criteria'   | <b>Accepted Development Classification Criteria</b>  |
|--|--|
| <b>Building work on railway land</b><br><br>Except where any of the following apply:   | 4 Building work is associated with a railway<br>5 It is situated (or to be situated) on railway land<br>6 It is required for the conduct or maintenance of railway activities.   |
| <b>Carport</b><br><br>Except where any of the following apply: <ul style="list-style-type: none"> <li>• Character Preservation District Overlay</li> <li>• Coastal Areas Overlay</li> <li>• Hazards (Acid Sulfate Soils) Overlay</li> <li>• Hazards (Flooding) Overlay</li> <li>• Historic Area Overlay</li> <li>• Local Heritage Place Overlay</li> <li>• State Heritage Area Overlay</li> <li>• State Heritage Place Overlay</li> <li>• Native Vegetation Overlay</li> <li>• State Significant Native Vegetation Overlay</li> <li>• Significant Landscape Protection Overlay</li> <li>• Ramsar Wetlands Overlay</li> </ul> | 13 The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system<br>14 It is ancillary to a dwelling erected on the site<br>15 Primary street setback – at least 5.5m from the primary street boundary and as far back as the building line of the building to which it is ancillary<br>16 Secondary street setback – at least 900mm from the boundary of the allotment (if the land has boundaries on two or more roads)<br>17 Total floor area - does not exceed 40m <sup>2</sup><br>18 Post height - does not exceed 3m measured from natural ground level (and not including a gable end)<br>19 Building height - does not exceed 5m<br>20 If situated on or abutting a boundary (not being a boundary with a primary street or secondary street) – a length not exceeding 10m unless: <ul style="list-style-type: none"> <li>(a) a longer wall or structure exists on the adjacent site and is situated on the same allotment boundary; and</li> </ul> |

| <b>Class of Development</b><br>The following Classes of Development are classified as Accepted Development subject to meeting the 'Accepted Development Classification Criteria'   | <b>Accepted Development Classification Criteria</b>   |
|--|---|
| <ul style="list-style-type: none"> <li>• River Murray Flood Plain Overlay</li> <li>• Sloping Land Overlay</li> <li>• Key Railway Crossings Overlay where an existing access is altered or a new access is created</li> <li>• Key Outback and Rural Routes Overlay where an existing access is altered or a new access is created</li> <li>• Major Urban Transport Routes Overlay where an existing access is altered or a new access is created</li> <li>• Non-stop Corridor Overlay where an existing access is altered or a new access is created</li> <li>• Urban Transport Routes Overlay where an existing access is altered or a new access is created</li> <li>• Water Resources Overlay</li> </ul> | <p>(b) the proposed wall or structure will be built along the same length of boundary as the existing adjacent wall or structure to the same or lesser extent</p> <p>21 If the carport abuts or is situated on the boundary of the allotment (not being a boundary with a primary street or secondary street):</p> <p>(a) it will not result in all relevant walls or structures located along the boundary exceeding 45% of the length of the boundary; and</p> <p>(b) it will not be located within 3m of any other wall along the same boundary unless on an adjacent site on that boundary there is an existing wall of a building that would be adjacent to or abut the proposed wall or structure</p> <p>22 The total roofed area of all existing or proposed buildings on the allotment does not exceed 60% of the area of the allotment</p> <p>23 Door opening for vehicle access – does not exceed, in total, 7m in width or 50% of the width of the allotment frontage (whichever lesser)</p> <p>24 Internal dimensions – does not exceed 3.2m in width and 6m in length between all fences, walls and doors</p> <p>25 The carport:</p> <p>(a) is located so that vehicle access:</p> <p style="padding-left: 20px;">i. is provided via a lawfully existing or authorised driveway or access point or an access point for which consent has been granted as part of an application for the division of land; or</p> <p style="padding-left: 20px;">ii. will use a driveway that:</p> <p style="padding-left: 40px;">A. is not located within 6 metres of an intersection of 2 or more roads or a pedestrian actuated crossing; and</p> <p style="padding-left: 40px;">B. will not interfere with an item of street furniture (including directional signs, lighting, seating and weather shelters), other infrastructure, or a tree; or</p> |

| <b>Class of Development</b><br>The following Classes of Development are classified as Accepted Development subject to meeting the 'Accepted Development Classification Criteria'   | <b>Accepted Development Classification Criteria</b>  |
|--|--|
|  | iii. if adjacent a kerbed road, will be via a kerb that is designed to allow a vehicle to roll over it; and<br>(b) is located so that the gradient from the place of access on the boundary of the allotment to the finished floor level at the front of the carport when the work is completed is not steeper than 1:4 on average; and<br>(c) The centre of the driveway at the public road boundary is no more than 25 degree deviation from the centre of the front of the covered car parking space for which it provides vehicle access |
| <b>Demolition</b><br>Except where any of the following apply: <ul style="list-style-type: none"> <li>• Historic Area Overlay</li> <li>• Local Heritage Place identified in the Local Heritage Place Overlay</li> <li>• State Heritage Area Overlay</li> <li>• State Heritage Place identified in the State Heritage Place Overlay</li> </ul> | None.  |
| <b>Internal building work</b><br>Except where any of the following apply: <ul style="list-style-type: none"> <li>• Local Heritage Place identified in the Local Heritage Place Overlay</li> <li>• State Heritage Area Overlay</li> </ul>   | 5 There will be no increase in the total floor area of the building<br>6 There will be no alteration to the external appearance of the building.   |

| <b>Class of Development</b><br>The following Classes of Development are classified as Accepted Development subject to meeting the 'Accepted Development Classification Criteria'  | <b>Accepted Development Classification Criteria</b>   |
|---|---|
| <ul style="list-style-type: none"> <li>State Heritage Place identified in the State Heritage Place Overlay.</li> </ul>  |   |
| <p><b>Outbuilding (in the form of a garage)</b></p> <p>Except where any of the following apply:</p> <ul style="list-style-type: none"> <li>Character Preservation District Overlay</li> <li>Coastal Areas Overlay</li> <li>Hazards (Acid Sulfate Soils) Overlay</li> <li>Hazards (Flooding) Overlay</li> <li>Historic Area Overlay</li> <li>Local Heritage Place Overlay</li> <li>State Heritage Area Overlay</li> <li>State Heritage Place Overlay</li> <li>Native Vegetation Overlay</li> <li>State Significant Native Vegetation Overlay</li> <li>Significant Landscape Protection Overlay</li> <li>Ramsar Wetlands Overlay</li> <li>River Murray Flood Plain Overlay</li> <li>Sloping Land Overlay</li> <li>Key Railway Crossings Overlay where an existing access is altered or a new access is created</li> </ul> | <p>15 The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system</p> <p>16 It is detached from and ancillary to a dwelling erected on the site.</p> <p>17 Primary street setback – at least 5.5m from the primary street boundary and as far back as the building line of the building to which it is ancillary</p> <p>18 Secondary street setback – at least 900mm from the boundary of the allotment (if the land has boundaries on two or more roads)</p> <p>19 Total floor area - does not exceed 60m<sup>2</sup></p> <p>20 Wall height - does not exceed 3m measured from natural ground level (and not including a gable end)</p> <p>21 Building height - does not exceed 5m</p> <p>22 If situated on or abutting a boundary (not being a boundary with a primary street or secondary street) – a length not exceeding 10m unless:</p> <p>(a) a longer wall or structure exists on the adjacent site and is situated on the same allotment boundary; and</p> <p>(b) the proposed wall or structure will be built along the same length of boundary as the existing adjacent wall or structure to the same or lesser extent</p> <p>23 If the outbuilding abuts or is situated on the boundary of the allotment (not being a boundary with a primary street or secondary street):</p> <p>(a) it will not result in all relevant walls or structures located along the boundary exceeding 45% of the length of the boundary; and</p> |

| <b>Class of Development</b><br>The following Classes of Development are classified as Accepted Development subject to meeting the 'Accepted Development Classification Criteria'   | <b>Accepted Development Classification Criteria</b>   |
|--|---|

## Assessment Provisions

### Desired Outcome (DO)

#### DO 1

A spacious, secluded and peaceful residential lifestyle within semi-rural or semi-natural environments, providing opportunities for a range of low-intensity rural activities and home based business activities that complement that lifestyle choice.

### Performance Outcomes and Deemed to Satisfy / Designated Performance Outcome Criteria

#### Land Use and Intensity

##### PO 1.1

Residential development that:

- (a) is consistent with a private, peaceful and semi-rural or natural character; and
- (b) does not place additional demands on existing local services and infrastructure.

##### DTS/DPF 1.1

Not more than one dwelling per allotment.

##### PO 1.2

Animal keeping and horse keeping of a scale that is ancillary to and in association with the residential use of the land.

##### DTS/DPF 1.2

The keeping of animals:

- (a) is ancillary to a dwelling located on the same allotment;
- (b) takes place on an allotment with an area of at least 1ha; and
- (c) for horse keeping, is limited to not more than 2 horses per allotment.

##### PO 1.3

Horse keeping only undertaken if the horses are accommodated within a stable or shelter with supplementary feeding to maintain pasture cover

##### DTS/DPF 1.3

Horse keeping includes the provision of:

- (a) stabling or similar sheltering; and
- (b) a grazing area of at least 0.5ha.

#### PO 1.4

Non-residential development that complements the semi-rural or semi-natural residential character and amenity that:

- a. is ancillary to a dwelling erected on the same allotment;
- b. comprises small-scale commercial uses including offices, shops and consulting rooms;
- c. comprises small-scale light industrial uses; and
- d. avoids adverse interface conflicts with other land uses.

#### DTS/DPF 1.4

None are applicable.

#### PO 1.5

Shop, consulting rooms, offices and light industrial development of a scale that does not adversely impact the semi-rural or semi-natural residential character and amenity of a locality.

#### DTS/DPF 1.5

Total floor area does not exceed:

- (a) in relation to a shop, consulting room or office - 100m<sup>2</sup>
- (b) in relation to a light industry - 100m<sup>2</sup>.

### Built Form and Character

#### PO 2.1

Dwellings are sufficiently separated from site boundaries and of a scale that reinforces the semi-rural or semi-natural character and amenity.

#### DTS/DPF 2.1

Dwellings:

- (a) are setback from all allotment boundaries by at least 15m;
- (b) have a building height that is no greater than 2 building levels and 9 metres; and
- (c) have a wall height is no greater than 6 metres.

#### PO 2.2

Non-residential buildings designed and sited to minimise visual impact on the surrounding locality by:

- (a) having substantial setbacks from boundaries and adjacent public roads;
- (b) using low reflective materials and finishes that blend with the surrounding landscape; and

(c) being located below ridgelines.

#### DTS/DPF 2.2

Buildings and structures:

- (a) do not exceed 100m<sup>2</sup> in total floor area;
- (b) are setback from all allotment boundaries by at least 25m;
- (c) if clad in sheet metal, is pre-colour treated or painted in a non-reflective colour;
- (d) have a building height that is no greater than 1 building level and 6 metres; and
- (e) have a wall height is no greater than 3 metres.

#### PO 2.3

Buildings, structures and associated facilities for the keeping of animals are sited, designed and of a scale and appearance that reinforces the semi-rural or semi-natural character and amenity.

#### DTS/DPF 2.3

Kennels, stables, shelters and associated yards:

- (a) are setback from all allotment boundaries by at least 25m;
- (b) have a building height that is no greater than 5m above natural ground level;
- (c) do not exceed 100m<sup>2</sup> in area; and
- (d) do not comprise more than 10% of the area of the allotment.

#### PO 2.4

Dwelling additions are sited, designed and of a scale that reinforce the semi-rural or semi-natural character and amenity.

#### DTS/DPF 2.4

Additions or alterations to an existing dwelling:

- (a) are setback behind the main façade of the existing dwelling;
- (b) have a building height that is no greater than 2 building levels and 9 metres; and
- (c) have a wall height no greater than 6 metres.

#### PO 2.5

Outbuildings are sited, designed and of a scale that reinforce the semi-rural or semi-natural character and amenity.

#### DTS/DPF 2.5

##### Outbuildings:

- (a) have a primary street setback that is at least as far back as the building to which it is ancillary;
- (b) have a total floor area that does not exceed 100m<sup>2</sup>;
- (c) have walls that do not exceed 4m in height measured from natural ground level and not including a gable end;
- (d) have a total roof height that does not exceed 5m;
- (e) if clad in sheet metal, are pre-colour treated or painted in a non-reflective colour; and
- (f) are limited to no more than 2 outbuildings on the same allotment.

#### PO 2.6

Carports and verandahs are sited, designed and of a scale that reinforce the semi-rural or semi-natural character and amenity.

#### DTS/DPF 2.6

##### Carports and verandahs have a:

- (a) primary street setback that is at least as far back as the building to which it is ancillary;
- (b) total floor area that does not exceed 80m<sup>2</sup>;
- (c) post height that does not exceed 3m measured from natural ground level and not including a gable end; and
- (d) total roof height that does not exceed 5m.

## Land Division

#### PO 3.1

##### Allotments are a suitable size and dimension to:

- (a) contribute to the existing semi-rural settlement pattern; and
- (b) accommodate the intended use of the land.

#### DTS/DPF 3.1

##### Allotments have:

- (a) an area not less than that specified in the *Minimum Allotment Size Technical and Numeric Variation Overlay*; and
- (b) a frontage to a public road not less than 50m; or

in the case of a battleaxe allotment, a frontage to a public road not less than 6m and a maximum driveway 'handle' length of no more than 30m.

## Rural Settlement Zone

Table 1 – Accepted Development Classification

| <b>Class of Development</b><br>The following Classes of Development are classified as Accepted Development subject to meeting the 'Accepted Development Classification Criteria'  | <b>Accepted Development Classification Criteria</b>  |
|---|--|
| <b>Building work on railway land</b>  | 7 Building work is associated with a railway<br>8 It is situated (or to be situated) on railway land<br>9 It is required for the conduct or maintenance of railway activities.   |
| <b>Carport</b><br>Except where any of the following apply: <ul style="list-style-type: none"> <li>• Character Preservation District Overlay</li> <li>• Coastal Areas Overlay</li> <li>• Hazards (Acid Sulfate Soils) Overlay</li> <li>• Hazards (Flooding) Overlay</li> <li>• Historic Area Overlay</li> <li>• Local Heritage Place Overlay</li> <li>• State Heritage Place Overlay</li> <li>• Native Vegetation Overlay</li> <li>• State Significant Native Vegetation Overlay</li> <li>• Ramsar Wetlands Overlay</li> <li>• River Murray Flood Plain Overlay</li> <li>• Sloping Land Overlay</li> <li>• Key Outback and Rural Routes Overlay where an existing access is altered or a new access is created</li> <li>• Major Urban Transport Routes Overlay where an existing access</li> </ul> | 26 The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system<br>27 It is ancillary to a dwelling erected on the site<br>28 Primary street setback – at least 5.5m from the primary street boundary and as far back as the building line of the building to which it is ancillary<br>29 Secondary street setback – at least 900mm from the boundary of the allotment (if the land has boundaries on two or more roads)<br>30 Total floor area - does not exceed 40m <sup>2</sup><br>31 Post height - does not exceed 3m measured from natural ground level (and not including a gable end)<br>32 Building height - does not exceed 5m<br>33 If situated on or abutting a boundary (not being a boundary with a primary street or secondary street) – a length not exceeding 10m unless: <ul style="list-style-type: none"> <li>(a) a longer wall or structure exists on the adjacent site and is situated on the same allotment boundary; and</li> <li>(b) the proposed wall or structure will be built along the same length of boundary as the existing adjacent wall or structure to the same or lesser extent</li> </ul> 34 If the carport abuts or is situated on the boundary of the allotment (not being a boundary with a primary street or secondary street): |

## Class of Development

The following Classes of Development are classified as Accepted Development subject to meeting the 'Accepted Development Classification Criteria'

- is altered or a new access is created
- Urban Transport Routes Overlay where an existing access is altered or a new access is created
- Water Resources Overlay

## Accepted Development Classification Criteria

- (a) it will not result in all relevant walls or structures located along the boundary exceeding 45% of the length of the boundary; and
  - (b) it will not be located within 3m of any other wall along the same boundary unless on an adjacent site on that boundary there is an existing wall of a building that would be adjacent to or abut the proposed wall or structure
- 35 The total roofed area of all existing or proposed buildings on the allotment does not exceed 60% of the area of the allotment
- 36 Door opening for vehicle access – does not exceed, in total, 7m in width or 50% of the width of the allotment frontage (whichever lesser)
- 37 Internal dimensions – does not exceed 3.2m in width and 6m in length between all fences, walls and doors
- 38 The carport:
- (a) is located so that vehicle access:
    - i. is provided via a lawfully existing or authorised driveway or access point or an access point for which consent has been granted as part of an application for the division of land; or
    - ii. will use a driveway that:
      - A. is not located within 6 metres of an intersection of 2 or more roads or a pedestrian actuated crossing; and
      - B. will not interfere with an item of street furniture (including directional signs, lighting, seating and weather shelters), other infrastructure, or a tree; or
    - iii. if adjacent a kerbed road, will be via a kerb that is designed to allow a vehicle to roll over it; and
  - (b) is located so that the gradient from the place of access on the boundary of the allotment to the finished floor level at the front of the carport when the work is completed is not steeper than 1:4 on average; and

| <b>Class of Development</b><br>The following Classes of Development are classified as Accepted Development subject to meeting the 'Accepted Development Classification Criteria'   | <b>Accepted Development Classification Criteria</b>   |
|--|---|
|  | (c) The centre of the driveway at the public road boundary is no more than 25 degree deviation from the centre of the front of the covered car parking space for which it provides vehicle access   |
| <b>Internal building work</b><br>Except where any of the following apply: <ul style="list-style-type: none"> <li>• Local Heritage Place identified in the Local Heritage Place Overlay</li> <li>• State Heritage Place identified in the State Heritage Place Overlay</li> </ul>   | 7 There will be no increase in the total floor area of the building<br>8 There will be no alteration to the external appearance of the building.  |

## Class of Development

The following Classes of Development are classified as Accepted Development subject to meeting the 'Accepted Development Classification Criteria'

## Accepted Development Classification Criteria

|   |   |
|---|---|
| <ul style="list-style-type: none"><li>• is altered or a new access is created</li><li>• Major Urban Transport Routes Overlay where an existing access is altered or a new access is created</li><li>• Urban Transport Routes Overlay where an existing access is altered or a new access is created</li><li>• Water Resources Overlay</li></ul> | <p>37 If the outbuilding abuts or is situated on the boundary of the allotment (not being a boundary with a primary street or secondary street):</p> <ul style="list-style-type: none"><li>(a) it will not result in all relevant walls or structures located along the boundary exceeding 45% of the length of the boundary; and</li><li>(b) it will not be located within 3m of any other wall along the same boundary unless on an adjacent site on that boundary there is an existing wall of a building that would be adjacent to or abut the proposed wall or structure</li></ul> <p>38 Total roofed area of all existing and proposed buildings on the allotment - does not exceed 60%</p> <p>39 Internal dimensions – exceed 3.2m in width and 6m in length between all walls and doors</p> <p>40 Door opening for vehicle access – does not exceed, in total, 7m in width or 50% of the width of the allotment frontage (whichever lesser)</p> <p>41 The garage:</p> <ul style="list-style-type: none"><li>(a) is located so that vehicle access:<ul style="list-style-type: none"><li>i. is provided via a lawfully existing or authorised driveway or access point or an access point for which consent has been granted as part of an application for the division of land; or</li><li>ii. will use a driveway that:<ul style="list-style-type: none"><li>A. is not located within 6 metres of an intersection of 2 or more roads or a pedestrian actuated crossing; and</li><li>B. will not interfere with an item of street furniture (including directional signs, lighting, seating and weather shelters), other infrastructure, or a tree; or</li></ul></li><li>iii. if adjacent a kerbed road, will be via a kerb that is designed to allow a vehicle to roll over it; and</li></ul></li><li>(b) is located so that the gradient from the place of access on the boundary of the allotment to the finished floor level at the front of the carport when the work is completed is not steeper than 1:4 on average; and</li></ul> |
|---|---|

**Class of Development**

The following Classes of Development are classified as Accepted Development subject to meeting the 'Accepted Development Classification Criteria'

**Accepted Development Classification Criteria**

(c) The centre of the driveway at the public road boundary is no more than 25 degree deviation from the centre of the front of the covered car parking space for which it provides vehicle access  
42 If clad in sheet metal—is pre-colour treated or painted in a non-reflective colour.

**Outbuilding (not being a garage)**

Except where any of the following apply:  
Except where any of the following apply:

- Character Preservation District Overlay
- Coastal Areas Overlay
- Hazards (Acid Sulfate Soils) Overlay
- Hazards (Flooding) Overlay
- Historic Area Overlay
- Local Heritage Place Overlay
- State Heritage Place Overlay
- Native Vegetation Overlay
- State Significant Native Vegetation Overlay
- Ramsar Wetlands Overlay
- River Murray Flood Plain Overlay
- Sloping Land Overlay
- Water Resources Overlay

- 24 The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system
- 25 It is detached from and ancillary to a dwelling erected on the site
- 26 Primary street setback – at least as far back as the building line of the building to which it is ancillary
- 27 Secondary street setback – at least 900mm from the boundary of the allotment (if the land has boundaries on two or more roads)
- 28 Side boundary setbacks – at least 900mm from the boundary of the allotment
- 29 Total floor area does not exceed 40m<sup>2</sup>
- 30 Wall height - does not exceed 3m measured from natural ground level (and not including a gable end)
- 31 Building height - does not exceed 5m
- 32 If situated on or abutting a boundary (not being a boundary with a primary street or secondary street) – a length not exceeding 10m unless:
  - (a) a longer wall or structure exists on the adjacent site and is situated on the same allotment boundary; and
  - (b) the proposed wall or structure will be built along the same length of boundary as the existing adjacent wall or structure to the same or lesser extent
- 33 If the outbuilding abuts or is situated on the boundary of the allotment (not being a boundary with a primary street or secondary street):
  - (a) it will not result in all relevant walls or structures located along the boundary exceeding 45% of the length of the boundary; and

**Class of Development**

The following Classes of Development are classified as Accepted Development subject to meeting the 'Accepted Development Classification Criteria'

**Accepted Development Classification Criteria**

(b) will not be located within 3m of any other wall along the same boundary unless on an adjacent site on that boundary there is an existing wall of a building that would be adjacent to or abut the proposed wall or structure  
34 Total roofed area of all existing and proposed buildings on the allotment - does not exceed 60%  
35 If clad in sheet metal—is pre-colour treated or painted in a non-reflective colour.

**Private bushfire shelters**

Except where any of the following apply:

- Character Preservation District Overlay
- Coastal Areas Overlay
- Hazards (Acid Sulfate Soils) Overlay
- Hazards (Flooding) Overlay
- Historic Area Overlay
- Local Heritage Place Overlay
- State Heritage Place Overlay
- Native Vegetation Overlay
- State Significant Native Vegetation Overlay
- Ramsar Wetlands Overlay
- River Murray Flood Plain Overlay
- Sloping Land Overlay
- Water Resources Overlay

9 The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system  
10 Primary street setback – at least as far back as the building to which it is ancillary  
11 Secondary street setback – at least 900mm from the boundary of the allotment  
12 At least 6m from the corner of an allotment which abuts the intersection of two or more roads (other than where a 4m x 4m allotment cut-off is already in place).

**Shade sail**

Except where any of the following apply:

- Character Preservation District Overlay

15 The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system

### Class of Development

The following Classes of Development are classified as Accepted Development subject to meeting the 'Accepted Development Classification Criteria'

### Accepted Development Classification Criteria

- Coastal Areas Overlay
- Hazards (Acid Sulfate Soils) Overlay
- Hazards (Flooding) Overlay
- Historic Area Overlay
- Local Heritage Place Overlay
- State Heritage Place Overlay
- Native Vegetation Overlay
- State Significant Native Vegetation Overlay
- Ramsar Wetlands Overlay
- River Murray Flood Plain Overlay
- Sloping Land Overlay
- Water Resources Overlay

- 16 Shade sail consists of permeable material
- 17 The total area of the sail - does not exceed 40m<sup>2</sup>
- 18 No part of the shade sail will be:
  - (a) 3m above ground or floor level (depending on where it is situated) at any place within 900mm of a boundary of the allotment
  - (b) 5m above ground or floor level (depending on where it is situated) within any other part of the allotment
- 19 Primary street setback – at least as far back as the building line of the building to which it is ancillary
- 20 If any part of the sail will be situated on a boundary of the allotment, the length of sail along a boundary does not exceed 8m
- 21 In a case where any part of the sail or a supporting structure will be situated on a side boundary of the allotment — the length of the sail and any such supporting structure together with all relevant walls or structures located along the boundary will not exceed 45% of the length of the boundary.

### Solar photovoltaic panels (roof mounted)

Except where any of the following apply:

- Historic Area Overlay
- Local Heritage Place identified in the Local Heritage Place Overlay
- State Heritage Place identified in the State Heritage Place Overlay

- 7 Panels are installed parallel to the roof of a building and with the underside surface of the panel not being more than 100mm above the surface of the roof
- 8 Panels and associated components do not overhang any part of the roof
- 9 Does not apply to system with a generating capacity of more than 5MW that is to be connected to the State's power system.

### Spa pool Swimming pool

Except where any of the following apply:

- 26 The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system
- 27 It is ancillary to a dwelling erected on the site
- 28 Allotment boundary setback – not less than 1m

| <p><b>Verandah</b><br/> Except where any of the following apply:</p> <ul style="list-style-type: none"> <li>• Character Preservation District Overlay</li> <li>• Coastal Areas Overlay</li> <li>• Hazards (Acid Sulfate Soils) Overlay</li> <li>• Hazards (Flooding) Overlay</li> <li>• Historic Area Overlay</li> <li>• Local Heritage Place Overlay</li> <li>• State Heritage Place Overlay</li> <li>• Native Vegetation Overlay</li> <li>• State Significant Native Vegetation Overlay</li> <li>• Ramsar Wetlands Overlay</li> </ul>   | <p>16 The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system</p> <p>17 It is ancillary to a dwelling erected on the site</p> <p>18 Primary street setback – as far back as the building line of the building to which it is ancillary</p> <p>19 Total floor area - does not exceed 40m<sup>2</sup></p> <p>20 Post height - does not exceed 3m measured from natural ground level</p> <p>21 Building height - does not exceed 5m</p> <p>22 Length - does not exceed 10m if any part of the structure abuts or is situated on a boundary of the allotment</p> <p>23 Total roofed area of all existing and proposed buildings on the allotment - does not exceed 60%.</p> |

## Class of Development

The following Classes of Development are classified as Accepted Development subject to meeting the 'Accepted Development Classification Criteria'

## Accepted Development Classification Criteria

- River Murray Flood Plain Overlay
- Water Resources Overlay

### Water tank (above ground)

Except where any of the following apply:

- Character Preservation District Overlay
- Coastal Areas Overlay
- Hazards (Flooding) Overlay
- Historic Area Overlay
- Local Heritage Place Overlay
- State Heritage Place Overlay
- Native Vegetation Overlay
- State Significant Native Vegetation Overlay
- Ramsar Wetlands Overlay
- River Murray Flood Plain Overlay
- Sloping Land Overlay
- Water Resources Overlay

- 15 The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system
- 16 The tank is part of a roof drainage system
- 17 Total floor area - not exceeding 15m<sup>2</sup>
- 18 The tank is located wholly above ground
- 19 Tank height – does not exceed 4m above natural ground level
- 20 Primary street setback – at least as far back as the building line of the building to which it is ancillary
- 21 In the case of a tank made of metal – the tank is pre-colour treated or painted in a non-reflective colour.

### Water tank (underground)

Except where any of the following apply:

- Character Preservation District Overlay
- Coastal Areas Overlay
- Hazards (Acid Sulfate Soils) Overlay
- Native Vegetation Overlay
- State Significant Native Vegetation Overlay
- Ramsar Wetlands Overlay
- Sloping Land Overlay

- 5 The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system
- 6 The tank (including any associated pump) is located wholly below the level of the ground.

**Class of Development**

The following Classes of Development are classified as Accepted Development subject to meeting the 'Accepted Development Classification Criteria'

- Water Resources Overlay

**Accepted Development Classification Criteria**

## Assessment Provisions (AP)

### Desired Outcome (DO)

#### DO 1

A small mixed-use settlement supporting a limited range of residential development, tourist, recreation and community facilities grouped together to serve the local community and visiting public.

#### DO 2

Development that contributes to and enhances the local context and development pattern comprising the settlement.

### Performance Outcomes and Deemed to Satisfy / Designated Performance Outcome Criteria

#### Land Use and Intensity

##### PO 1.1

Low-scale and low-density residential development that complements the residential character and amenity within the locality.

##### DTS/DPF 1.1

Development comprising detached dwellings.

##### PO 1.2

Small-scale retail, business and commercial development that provide a range of goods and services to the settlement community and visitors to the area.

##### DTS/DPF 1.2

The gross leasable floor area of a shop, office or consulting room does not exceed 150m<sup>2</sup>.

##### PO 1.3

Small-scale light industry, store and warehousing activities that supply a local service to the community and nearby businesses.

##### DTS/DPF 1.3

The gross leasable floor area of a building plus any outdoor space used for a light industry, store or warehouse does not exceed 80m<sup>2</sup>.

##### PO 1.4

Small-scale tourist accommodation that supports the visiting public and holiday makers.

##### DTS/DPF 1.4

None are applicable.

##### PO 1.5

Local service facilities and retail activities are grouped together or in close proximity to establish identifiable settlement service locations.

##### DTS/DPF 1.5

Development located adjacent to a site containing an existing non-residential use with the same primary street frontage.

### Built Form and Character

#### PO 2.1

Buildings contribute to a low-rise character and complement the height of nearby buildings.

#### DTS/DPF 2.1

Building height (excluding garages, carports and outbuildings) is no greater than 2 building levels and 9m and wall height that is no greater than 6m.

#### PO 2.2

Buildings set back from primary street boundary to complement the existing streetscape character.

#### DTS/DPF 2.2

Buildings are no closer to the primary street boundary than:

- (a) the average of existing buildings on adjoining sites with the same primary street frontage and, if there is only one such building, the setback of that building; or
- (b) 8m, if no building exists on an adjoining site with the same primary street frontage.

#### PO 2.3

Buildings are setback from a secondary street boundary to maintain a consistent pattern of separation between building walls and public thoroughfares on corner sites within the settlement.

#### DTS/DPF 2.3

Buildings are no closer than 2.5 metres to the secondary street boundary.

#### PO 2.4

Dwellings are setback from rear boundaries to provide:

- (a) access to natural light and ventilation for neighbours;
- (b) open space recreational opportunities; and
- (c) space for landscaping and vegetation.

#### DTS/DPF 2.4

Dwellings no closer to the rear boundary of the site than the following:

- (a) 4m for the ground floor of a building; and
- (b) 6m for the upper floor of a building.

#### PO 2.5

Buildings are setback from side boundaries to:

- (a) establish separation between buildings to complement the established character within a locality; and
- (b) provide access to natural light and ventilation for neighbours.

#### DTS/DPF 2.5

Other than walls located on a side boundary, buildings are setback from side boundaries:

- (a) at least 900mm where the wall height is up to 3m;
- (b) other than for a wall facing a southern side boundary, at least 900mm plus 1/3 of the wall height above 3m; and
- (c) at least 1900mm plus 1/3 of the wall height above 3m for walls facing a southern side boundary.

#### PO 2.6

Boundary walls are limited in height and length to mitigate adverse impacts on the amenity of adjoining land users, including through an unreasonable loss of natural light and ventilation.

#### DTS/DPF 2.6

For buildings that do not have a common wall, any wall sited on or abutting a side allotment boundary:

- (a) does not exceed 3m in height from the top of the footings;

- (b) does not exceed 8m in length;
- (c) when combined with other walls on the boundary, does not exceed 45% of the length of the boundary; and is setback at least 3 metres from any existing or proposed boundary walls.

## Site Dimensions and Land Division

### PO 3.1

Allotments are of suitable size and dimension to contribute to a pattern of development that is consistent with the settlement.

### DTS/DPF 3.1

Development accords with the following:

- (a) for sites connected to mains sewer or Community Wastewater Management System, site areas (or allotment areas in the case of land division) are not less than the minimum allotment area specified in the *Minimum Allotment Size Technical and Numeric Variation Overlay*;
- (b) for sites without connection to mains sewer or Community Wastewater Management System, site areas (or allotment areas in the case of land division) are not less than the greater of:
  - (i) 1200m<sup>2</sup>; or
  - (ii) the minimum allotment area specified in the *Minimum Allotment Size Technical and Numeric Variation Overlay*; andsite frontages not less than 20m.

## Procedural Matters (PM)

### Notification of Performance assessed development

All classes of performance assessed development is excluded from notification except where they involve any of the following:

- (a) the site of the development is adjacent land to land in a different zone
- (b) development identified as "all other code assessed development" in Settlement Zone Table 3
- (c) buildings exceeding 2 building levels or over 9m in height
- (d) development involving the creation of four or more additional dwellings or allotments
- (e) shop, office, or consulting room in excess of 100m<sup>2</sup> in gross leasable floor area
- (f) light industry, warehouse or store where the gross leasable floor area of the buildings plus any outdoor space used for any of these uses exceeds 80m<sup>2</sup>.

## Suburban Employment Zone

Table 1 – Accepted Development Classification

| <b>Class of Development</b><br>The following Classes of Development are classified as Accepted Development subject to meeting the 'Accepted Development Classification Criteria'  | <b>Accepted Development Classification Criteria</b>   |
|---|---|
| <b>Building work on railway land</b>  | <ol style="list-style-type: none"> <li>1 Building work is associated with a railway</li> <li>2 It is situated (or to be situated) on railway land</li> <li>3 It is required for the conduct or maintenance of railway activities.</li> </ol>  |
| <b>Internal building work</b><br>Except where any of the following apply: <ul style="list-style-type: none"> <li>• A Local Heritage Place identified in the Local Heritage Place Overlay</li> <li>• State Heritage Area Overlay</li> <li>• A State Heritage Place identified in the State Heritage Place Overlay</li> </ul>   | <ol style="list-style-type: none"> <li>1 There will be no increase in the total floor area of the building</li> <li>2 There will be no alteration to the external appearance of the building.</li> </ol>  |
| <b>Shade sail</b><br>Except where any of the following apply: <ul style="list-style-type: none"> <li>• Character Preservation District Overlay</li> <li>• Coastal Areas Overlay</li> <li>• Character Area Overlay</li> <li>• Historic Area Overlay</li> <li>• Local Heritage Place Overlay</li> <li>• State Heritage Area Overlay</li> <li>• State Heritage Place Overlay</li> <li>• Native Vegetation Overlay</li> <li>• State Significant Native Vegetation Overlay</li> <li>• River Murray Flood Plain Overlay</li> <li>• Sloping Land Overlay</li> <li>• Water Resources Overlay</li> </ul> | <ol style="list-style-type: none"> <li>8 The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system</li> <li>9 Shade sail consists of permeable material</li> <li>10 The total area of the sail - does not exceed 40m<sup>2</sup></li> <li>11 No part of the shade sail will be:                             <ol style="list-style-type: none"> <li>(a) 3m above ground or floor level (depending on where it is situated) at any place within 900mm of a boundary of the allotment</li> <li>(b) 5m above ground or floor level (depending on where it is situated) within any other part of the allotment</li> </ol> </li> <li>12 Primary street setback – at least as far back as the building line of the building to which it is ancillary</li> <li>13 If any part of the sail will be situated on a boundary of the allotment, the length of sail along a boundary does not exceed 8m</li> <li>14 In a case where any part of the sail or a supporting structure will be situated on a side boundary of the allotment – the length of the sail and any such supporting structure together with all relevant walls or structures located along the boundary will not exceed 45% of the length of the boundary.</li> </ol> |

|   |   |
|---|---|
| <p><b>Solar photovoltaic panels (roof mounted)</b><br/> Except where any of the following apply:</p> <ul style="list-style-type: none"> <li>• Historic Area Overlay</li> <li>• A Local Heritage Place identified in the Local Heritage Place Overlay</li> <li>• State Heritage Area Overlay</li> <li>• A State Heritage Place identified in the State Heritage Place Overlay</li> </ul>   | <ol style="list-style-type: none"> <li>4 Panels are installed parallel to the roof of a building and with the underside surface of the panel not being more than 100mm above the surface of the roof</li> <li>5 Panels and associated components do not overhang any part of the roof</li> <li>6 Does not apply to system with a generating capacity of more than 5MW that is to be connected to the State's power system.</li> </ol>   |
| <p><b>Water tank (above ground)</b><br/> Except where any of the following apply:</p> <ul style="list-style-type: none"> <li>• Character Preservation District Overlay</li> <li>• Coastal Areas Overlay</li> <li>• Hazards (Flooding) Overlay</li> <li>• Character Area Overlay</li> <li>• Historic Area Overlay</li> <li>• Local Heritage Place Overlay</li> <li>• State Heritage Area Overlay</li> <li>• State Heritage Place Overlay</li> <li>• Native Vegetation Overlay</li> <li>• State Significant Native Vegetation Overlay</li> <li>• River Murray Flood Plain Overlay</li> <li>• Sloping Land Overlay</li> <li>• Water Resources Overlay</li> </ul> | <ol style="list-style-type: none"> <li>8 The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system</li> <li>9 The tank is part of a roof drainage system</li> <li>10 Total floor area - not exceeding 15m<sup>2</sup></li> <li>11 The tank is located wholly above ground</li> <li>12 Tank height – does not exceed 4m above natural ground level</li> <li>13 Primary street setback – at least as far back as the building line of the building to which it is ancillary</li> <li>14 In the case of a tank made of metal – the tank is pre-colour treated or painted in a non-reflective colour.</li> </ol> |
| <p><b>Water tank (underground)</b><br/> Except where any of the following apply:</p> <ul style="list-style-type: none"> <li>• Character Preservation District Overlay</li> <li>• Coastal Areas Overlay</li> <li>• Native Vegetation Overlay</li> <li>• State Significant Native Vegetation Overlay</li> <li>• Sloping Land Overlay</li> <li>• Water Resources Overlay</li> </ul>  | <ol style="list-style-type: none"> <li>3 The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system</li> <li>4 The tank (including any associated pump) is located wholly below the level of the ground.</li> </ol>   |

|--|---|
| <b>Industry</b>  | Light industry  |
| <b>Shop</b>  | Where:<br>(d) the gross leasable floor area is no more than 1000m <sup>2</sup> : or<br>(e) it is a bulky goods outlet; or<br>(f) it is ancillary to a light industry on the same allotment. |
| <b>Waste reception, storage, treatment or disposal</b>   |   |
| <b>Wrecking yard</b>   |   |

## Assessment Provisions

### Desired Outcomes (DO)

#### DO 1

A zone supporting a diverse range of low impact light industrial, commercial and business activities that complement the role of other zones accommodating significant industrial, shopping and business activities.

#### Performance Outcomes and Deemed to Satisfy / Designated Performance Outcome Criteria

### Land Use and Intensity

#### PO 1.1

A range of employment generating light industrial, service trade, motor repair and other compatible businesses servicing the local community that do not produce objectionable emissions.

#### DTS/DPF 1.1

Development comprises one or more of the following land uses:

- Bulky goods outlet
- Consulting room
- Indoor recreation facility
- Light industry
- Office
- Research facility
- Service trade premises
- Shop
- Store
- Training facility
- Tourist accommodation
- Retail fuel outlet
- Place of worship
- Motor repair station.

#### PO 1.2

Shops, other than bulky goods outlets, provide a local convenience service to meet the day to day needs of the local community and surrounding businesses as well as support the sale of products made on-site as a supplement to a business activity to enhance local job opportunities.

#### DTS/DPF1.2

Shop:

- a. with a gross leasable floor area up to 500m<sup>2</sup>;
- b. in the form of a bulky goods outlet; or
- c. ancillary to and located on the same allotment as a light industry.

### Built Form and Character

#### PO 2.1

Development achieves distinctive building, landscape and streetscape design to achieve high visual and environmental amenity particularly along arterial roads, zone boundaries and public open spaces.

#### DTS/DPF 2.1

None are applicable.

#### PO 2.2

Building facades facing a boundary of a zone primarily intended to accommodate residential development, public roads, or public open space incorporate design elements to add visual interest by considering the following:

- (a) a variety of building finishes and avoid elevations that consist solely of metal cladding;
- (b) using materials with a low reflectivity; and

- (c) techniques to add visual interest and reduce large expanses of blank walls including modulation and incorporation of offices and showrooms along elevations visible to a public road.

#### DTS/DPF 2.2

None are applicable.

### Building height and setbacks

#### PO 3.1

Buildings set back from the primary street boundary to contribute to a consistent streetscape.

#### DTS/DPF3.1

Buildings are no closer to the primary street frontage than:

- (a) the average of existing buildings on adjoining sites with the same primary street frontage and, if there is only one such building, the setback of that building; or
- (b) where no building exists on an adjoining site, 3m or more.

#### PO 3.2

Buildings set back from a secondary street boundary to accommodate the provision of landscaping between buildings and the street to enhance the appearance of land and buildings when viewed from the street.

#### DTS/DPF3.2

Buildings are no closer than 2m to the secondary street boundary.

#### PO 3.3

Buildings set back from rear access ways to provide adequate manoeuvrability for vehicles to enter and exit the site.

#### DTS/DPF3.3

Buildings are setback from the rear access way:

- (a) where the access way is 6.5m wide or more, no requirement; or
- (b) where the access way is less than 6.5m wide, the distance equal to the additional width required to make the access way at least 6.5m wide.

#### PO 3.4

Buildings are sited to accommodate vehicle access to the rear of a site for deliveries, maintenance and emergency purposes.

#### DTS/DPF3.4

Buildings setback at least 3m from at least one side boundary, unless an alternative means for vehicular access to the rear of the site is available.

#### PO 3.5

Buildings adjoining a zone primarily intended to accommodate residential development are sited and designed to minimise visual impacts from building bulk.

#### DTS/DPF 3.5

Buildings constructed within a building envelope provided by a 45 degree plane, measured from a height of 3m above natural ground level at the allotment boundary of a zone primarily intended to accommodate residential development as shown in the following diagram, except where the relevant boundary is a southern boundary, or where this boundary is the primary street boundary.

### PO 3.6

Buildings are constructed to minimise overshadowing of sensitive receivers outside the zone.

#### DTS/DPF 3.6

Buildings on sites with a southern boundary adjoining a residential allotment within a different zone are constructed within a building envelope provided by a 30-degree plane grading north measured from a height of 3m above natural ground level at the southern boundary, as shown in the following diagram:

## Site Dimensions and Land Division

### PO 4.1

Land division that creates allotments that vary in size and are suitable for a variety of commercial and business activities.

#### DTS/DPF4.1

Allotments have:

- (a) an area of 1250m<sup>2</sup> or more; and
- (b) a frontage of 20 metres or more.

## Landscaping

### PO 5.1

Landscaping provided to enhance the visual appearance of development when viewed from public roads and thoroughfares.

#### DTS/DPF 5.1

Other than to accommodate a lawfully existing or authorised driveway or access point or an access point for which consent has been granted as part of an application for the division of land, a landscaped area is provided within the development site (excluding any land required for road widening purposes):

- a. where a building is setback less than 3m from the street boundary – 1m or more within the area remaining between a relevant building and the street boundary; or
- b. at least 1.5m wide.

### PO 5.2

Development incorporates areas for landscaping to enhance the overall amenity of the site and locality.

#### DTS/DPF 5.2

Landscape areas comprise:

- (c) not less than 10 percent of the site;
- (d) a dimension of at least 1.5m.

## Advertisements

### PO 6.1

Freestanding advertisements are not visually dominant within the locality.

#### DTS/DPF 6.1

Freestanding advertisements:

- (a) do not exceed 4m in height above natural ground level; and

(b) do not have a face that exceeds  $3m^2$ .

**Notification of Performance assessed development**

All classes of performance assessed development are excluded from notification except where it involves any of the following:

(a)

**Placement of Notices – Exemptions for Performance Assessed Development**

None specified.

**Placement of Notices – Exemptions for Restricted Development**

None specified.

## Suburban Neighbourhood Zone

Table 1 – Accepted Development Classification

| <b>Class of Development</b><br>The following Classes of Development are classified as Accepted Development subject to meeting the 'Accepted Development Classification Criteria'  | <b>Accepted Development Classification Criteria</b>  |
|---|--|
| <p><b>Carport</b><br/>                     Except where any of the following apply:</p> <ul style="list-style-type: none"> <li>• Building Near Airfields Overlay</li> <li>• Character Preservation District Overlay</li> <li>• Coastal Areas Overlay</li> <li>• Hazards (Acid Sulfate Soils) Overlay</li> <li>• Hazards (Flooding) Overlay</li> <li>• Character Area Overlay</li> <li>• Historic Area Overlay</li> <li>• Local Heritage Place Overlay</li> <li>• State Heritage Area Overlay</li> <li>• State Heritage Place Overlay</li> <li>• Native Vegetation Overlay</li> <li>• State Significant Native Vegetation Overlay</li> <li>• Ramsar Wetlands Overlay</li> <li>• River Murray Flood Plain Overlay</li> <li>• Sloping Land Overlay</li> <li>• Future Road Widening Overlay where an existing access is altered or a new access is created</li> <li>• Key Railway Crossings Overlay where an existing access is altered or a new access is created</li> </ul> | <ol style="list-style-type: none"> <li>1 The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system</li> <li>2 It is ancillary to a dwelling erected on the site</li> <li>3 Primary street setback – at least 5.5m from the primary street boundary and as far back as the building line of the building to which it is ancillary</li> <li>4 Secondary street setback – at least 900mm from the boundary of the allotment (if the land has boundaries on two or more roads)</li> <li>5 Total floor area - does not exceed 40m<sup>2</sup></li> <li>6 Post height - does not exceed 3m measured from natural ground level (and not including a gable end)</li> <li>7 Building height - does not exceed 5m</li> <li>8 If situated on or abutting a boundary (not being a boundary with a primary street or secondary street) – a length not exceeding 10m unless:                         <ol style="list-style-type: none"> <li>(a) a longer wall or structure exists on the adjacent site and is situated on the same allotment boundary; and</li> <li>(b) the proposed wall or structure will be built along the same length of boundary as the existing adjacent wall or structure to the same or lesser extent</li> </ol> </li> <li>9 If the carport abuts or is situated on the boundary of the allotment (not being a boundary with a primary street or secondary street):                         <ol style="list-style-type: none"> <li>(a) it will not result in all relevant walls or structures located along the boundary exceeding 45% of the length of the boundary; and</li> </ol> </li> </ol> |

| <b>Demolition</b><br>Except where any of the following apply:   | None.  |

**Class of Development**

The following Classes of Development are classified as Accepted Development subject to meeting the 'Accepted Development Classification Criteria'

**Accepted Development Classification Criteria**

- Historic Area Overlay
  - A Local Heritage Place identified in the Local Heritage Place Overlay
  - State Heritage Area Overlay
- A State Heritage Place identified in the State Heritage Place Overlay

**Internal building work**

Except where any of the following apply:

- A Local Heritage Place identified in the Local Heritage Place Overlay
  - State Heritage Area Overlay
- A State Heritage Place identified in the State Heritage Place Overlay

- 1 There will be no increase in the total floor area of the building
- 2 There will be no alteration to the external appearance of the building.

**Outbuilding (in the form of a garage)**

Except where any of the following apply:

- Character Preservation District Overlay
- Coastal Areas Overlay
- Hazards (Acid Sulfate Soils) Overlay
- Hazards (Flooding) Overlay
- Character Area Overlay
- Historic Area Overlay
- Local Heritage Place Overlay
- State Heritage Area Overlay
- State Heritage Place Overlay
- Native Vegetation Overlay
- State Significant Native Vegetation Overlay

- 1 The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system
- 2 It is detached from and ancillary to a dwelling erected on the site.
- 3 Primary street setback – at least 5.5m from the primary street boundary and as far back as the building line of the building to which it is ancillary
- 4 Secondary street setback – at least 900mm from the boundary of the allotment (if the land has boundaries on two or more roads)
- 5 Total floor area - does not exceed 40m<sup>2</sup>
- 6 Wall height - does not exceed 3m measured from natural ground level (and not including a gable end)
- 7 Building height - does not exceed 5m
- 8 If situated on or abutting a boundary (not being a boundary with a primary street or secondary street) – a length not exceeding 10m unless:

## Class of Development

The following Classes of Development are classified as Accepted Development subject to meeting the 'Accepted Development Classification Criteria'

- Ramsar Wetlands Overlay
- River Murray Flood Plain Overlay
- Sloping Land Overlay
- Future Road Widening Overlay where an existing access is altered or a new access is created
- Key Railway Crossings Overlay where an existing access is altered or a new access is created
- Key Outback and Rural Routes Overlay where an existing access is altered or a new access is created
- Major Urban Transport Routes Overlay where an existing access is altered or a new access is created
- Non-stop Corridor Overlay where an existing access is altered or a new access is created
- Urban Transport Routes Overlay where an existing access is altered or a new access is created
- Water Resources Overlay

## Accepted Development Classification Criteria

- (a) a longer wall or structure exists on the adjacent site and is situated on the same allotment boundary; and
  - (b) the proposed wall or structure will be built along the same length of boundary as the existing adjacent wall or structure to the same or lesser extent
- 9 If the outbuilding abuts or is situated on the boundary of the allotment (not being a boundary with a primary street or secondary street):
- (a) it will not result in all relevant walls or structures located along the boundary exceeding 45% of the length of the boundary; and
  - (b) it will not be located within 3m of any other wall along the same boundary unless on an adjacent site on that boundary there is an existing wall of a building that would be adjacent to or abut the proposed wall or structure
- 10 Total roofed area of all existing and proposed buildings on the allotment - does not exceed 50%
- 11 Door opening for vehicle access – does not exceed, in total, 7m in width or 50% of the width of the allotment frontage (whichever lesser)
- 12 The garage:
- (a) is located so that vehicle access:
    - i. is provided via a lawfully existing or authorised driveway or access point or an access point for which consent has been granted as part of an application for the division of land; or
    - ii. will use a driveway that:
      - A. is not located within 6 metres of an intersection of 2 or more roads or a pedestrian actuated crossing; and
      - B. will not interfere with an item of street furniture (including directional signs, lighting, seating and weather shelters), other infrastructure, or a tree; or
    - iii. if adjacent a kerbed road, will be via a kerb that is designed to allow a vehicle to roll over it; and

**Class of Development**

The following Classes of Development are classified as Accepted Development subject to meeting the 'Accepted Development Classification Criteria'

**Accepted Development Classification Criteria**

- (b) is located so that the gradient from the place of access on the boundary of the allotment to the finished floor level at the front of the carport when the work is completed is not steeper than 1:4 on average; and
  - (c) The centre of the driveway at the public road boundary is no more than 25 degree deviation from the centre of the front of the covered car parking space for which it provides vehicle access
- 1 If clad in sheet metal—is pre-colour treated or painted in a non-reflective colour.

**Outbuilding (not being a garage)**

Except where any of the following apply:

- Character Preservation District Overlay
- Coastal Areas Overlay
- Hazards (Acid Sulfate Soils) Overlay
- Hazards (Flooding) Overlay
- Character Area Overlay
- Historic Area Overlay
- Local Heritage Place Overlay
- State Heritage Area Overlay
- State Heritage Place Overlay
- Native Vegetation Overlay
- State Significant Native Vegetation Overlay
- Ramsar Wetlands Overlay
- River Murray Flood Plain Overlay
- Sloping Land Overlay
- Water Resources Overlay

- 36 The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system
- 37 It is detached from and ancillary to a dwelling erected on the site
- 38 Primary street setback – at least as far back as the building line of the building to which it is ancillary
- 39 Secondary street setback – at least 900mm from the boundary of the allotment (if the land has boundaries on two or more roads)
- 40 Side boundary setbacks – at least 900mm from the boundary of the allotment
- 41 Total floor area does not exceed 40m<sup>2</sup>
- 42 Wall height - does not exceed 3m measured from natural ground level (and not including a gable end)
- 43 Building height - does not exceed 5m
- 44 If situated on or abutting a boundary (not being a boundary with a primary street or secondary street) – a length not exceeding 10m unless:
  - (a) a longer wall or structure exists on the adjacent site and is situated on the same allotment boundary; and
  - (b) the proposed wall or structure will be built along the same length of boundary as the existing adjacent wall or structure to the same or lesser extent

**Class of Development**

The following Classes of Development are classified as Accepted Development subject to meeting the 'Accepted Development Classification Criteria'

**Accepted Development Classification Criteria**

45 If the outbuilding abuts or is situated on the boundary of the allotment (not being a boundary with a primary street or secondary street):  
(a) it will not result in all relevant walls or structures located along the boundary exceeding 45% of the length of the boundary; and  
(b) will not be located within 3m of any other wall along the same boundary unless on an adjacent site on that boundary there is an existing wall of a building that would be adjacent to or abut the proposed wall or structure  
46 Total roofed area of all existing and proposed buildings on the allotment - does not exceed 50%  
If clad in sheet metal—is pre-colour treated or painted in a non-reflective colour.

**Shade sail**

Except where any of the following apply:

- Character Preservation District Overlay
- Coastal Areas Overlay
- Hazards (Acid Sulfate Soils) Overlay
- Character Area Overlay
- Historic Area Overlay
- Local Heritage Place Overlay
- State Heritage Area Overlay
- State Heritage Place Overlay
- State Significant Native Vegetation Overlay
- Ramsar Wetlands Overlay
- River Murray Flood Plain Overlay
- Sloping Land Overlay
- Water Resources Overlay

22 The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system  
23 Shade sail consists of permeable material  
24 The total area of the sail - does not exceed 40m<sup>2</sup>  
25 No part of the shade sail will be:  
(a) 3m above ground or floor level (depending on where it is situated) at any place within 900mm of a boundary of the allotment  
(b) 5m above ground or floor level (depending on where it is situated) within any other part of the allotment  
26 Primary street setback – at least as far back as the building line of the building to which it is ancillary  
27 If any part of the sail will be situated on a boundary of the allotment, the length of sail along a boundary does not exceed 8m  
8 In a case where any part of the sail or a supporting structure will be situated on a side boundary of the allotment — the length of the sail and any such supporting structure

| <b>Class of Development</b><br>The following Classes of Development are classified as Accepted Development subject to meeting the 'Accepted Development Classification Criteria'  | <b>Accepted Development Classification Criteria</b>  |
|---|--|
|   | together with all relevant walls or structures located along the boundary will not exceed 45% of the length of the boundary.   |
| <b>Solar photovoltaic panels (roof mounted)</b><br>Except where any of the following apply: <ul style="list-style-type: none"> <li>• Historic Area Overlay</li> <li>• A Local Heritage Place identified in the Local Heritage Place Overlay</li> <li>• State Heritage Area Overlay</li> </ul> A State Heritage Place identified in the State Heritage Place Overlay   | 10 Panels are installed parallel to the roof of a building and with the underside surface of the panel not being more than 100mm above the surface of the roof<br>11 Panels and associated components do not overhang any part of the roof<br>Does not apply to system with a generating capacity of more than 5MW that is to be connected to the State's power system.  |
| <b>Spa pool</b><br><b>Swimming pool</b><br>Except where any of the following apply: <ul style="list-style-type: none"> <li>• Character Preservation District Overlay</li> <li>• Coastal Areas Overlay</li> <li>• Hazards (Acid Sulfate Soils) Overlay</li> <li>• Hazards (Flooding) Overlay</li> <li>• Character Area Overlay</li> <li>• Historic Area Overlay</li> <li>• Local Heritage Place Overlay</li> <li>• State Heritage Area Overlay</li> <li>• State Heritage Place Overlay</li> <li>• Native Vegetation Overlay</li> <li>• State Significant Native Vegetation Overlay</li> <li>• Ramsar Wetlands Overlay</li> </ul> | 31 The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system<br>32 It is ancillary to a dwelling erected on the site<br>33 Allotment boundary setback – not less than 1m<br>34 Primary street setback – at least as far back as the building line of the building to which it is ancillary<br>35 Location of filtration system from a dwelling on an adjoining allotment: <ul style="list-style-type: none"> <li>(a) not less than 5m where the filtration system is located inside a solid structure that will have material impact on the transmission of noise</li> </ul> not less than 12m in any other case. |

## Class of Development

The following Classes of Development are classified as Accepted Development subject to meeting the 'Accepted Development Classification Criteria'

## Accepted Development Classification Criteria

- River Murray Flood Plain Overlay
  - Sloping Land Overlay
- Water Resources Overlay.

### Verandah

Except where any of the following apply:

- Character Preservation District Overlay
- Coastal Areas Overlay
- Hazards (Acid Sulfate Soils) Overlay
- Hazards (Flooding) Overlay
- Character Area Overlay
- Historic Area Overlay
- Local Heritage Place Overlay
- State Heritage Area Overlay
- State Heritage Place Overlay
- Native Vegetation Overlay
- State Significant Native Vegetation Overlay
- Ramsar Wetlands Overlay
- River Murray Flood Plain Overlay

Water Resources Overlay

### Water tank (above ground)

Except where any of the following apply:

- Character Preservation District Overlay
- Coastal Areas Overlay
- Hazards (Flooding) Overlay
- Character Area Overlay
- Historic Area Overlay

- 24 The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system
- 25 It is ancillary to a dwelling erected on the site
- 26 Primary street setback – as far back as the building line of the building to which it is ancillary
- 27 Total floor area - does not exceed 40m<sup>2</sup>
- 28 Post height - does not exceed 3m measured from natural ground level
- 29 Building height - does not exceed 5m
- 30 Length - does not exceed 10m if any part of the structure abuts or is situated on a boundary of the allotment
- 9 Total roofed area of all existing and proposed buildings on the allotment - does not exceed 50%.

- 22 The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system
- 23 The tank is part of a roof drainage system
- 24 Total floor area - not exceeding 15m<sup>2</sup>
- 25 The tank is located wholly above ground
- 26 Tank height – does not exceed 4m above natural ground level

**Class of Development**

The following Classes of Development are classified as Accepted Development subject to meeting the 'Accepted Development Classification Criteria'

- Local Heritage Place Overlay
  - State Heritage Area Overlay
  - State Heritage Place Overlay
  - Native Vegetation Overlay
  - State Significant Native Vegetation Overlay
  - Ramsar Wetlands Overlay
  - River Murray Flood Plain Overlay
  - Sloping Land Overlay
- Water Resources Overlay

**Water tank (underground)**

Except where any of the following apply:

- Character Preservation District Overlay
  - Coastal Areas Overlay
  - Hazards (Acid Sulfate Soils) Overlay
  - Native Vegetation Overlay
  - State Significant Native Vegetation Overlay
  - Ramsar Wetlands Overlay
  - Sloping Land Overlay
- Water Resources Overlay

**Accepted Development Classification Criteria**

27 Primary street setback – at least as far back as the building line of the building to which it is ancillary

1 In the case of a tank made of metal – the tank is pre-colour treated or painted in a non-reflective colour.

7 The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system

The tank (including any associated pump) is located wholly below the level of the ground.

Table 2 – Deemed-to-Satisfy Development Classification

| <b>Class of Development</b><br>The following Classes of Development are classified as Deemed-to-Satisfy Development subject to meeting the 'Deemed-to-Satisfy Development Classification Criteria'   | <b>Deemed-to-Satisfy Development Classification Criteria</b><br>Provisions referred to are Deemed-to-Satisfy Criteria<br>Where a development comprises more than one Class of Development the relevant criteria will be taken to be the sum of the criteria for each Class of Development. |  |  |   |

**Class of Development**

**Applicable Policies**

The following policies are applicable to the assessment of the identified Class of Development.

Policies referred to are Performance Outcome policies, and any associated Designated Performance Features. Relevant Desired Outcomes are not listed, but automatically apply in relation to a Performance Assessed Development.

Where a development comprises more than one Class of Development the relevant policies will be taken to be the sum of the applicable policies for each Class of Development.

Table 4 – Restricted Development Classification

| <b>Class of Development</b><br>The following Classes of Development are classified as Restricted subject to any 'Exclusions' | <b>Exclusions</b>  |
|--|--|
| <b>Shop</b>  | <b>With a gross leasable area less than 1000m<sup>2</sup>.</b> |

## Assessment Provisions (AP)

### Desired Outcome (DO)

#### DO 1

Low or very low-density housing that is consistent with the existing local context and development pattern. Services and community facilities will contribute to making the neighbourhood a convenient place to live without compromising residential amenity and character.

#### DO 2

Development on sloping land that is sensitive to the topography of the area and minimises environmental and visual impacts.

### Performance Outcomes and Deemed to Satisfy / Designated Performance Outcome Criteria

#### Land Use and Intensity

##### PO 1.1

Residential development and supporting uses that provide housing and supporting services and facilities that preserve a low density residential character.

##### DTS 1.1

Development comprises one or more of the following land uses:

Community facility

Dwelling

Educational establishment

Office

Pre-school

Recreation area

Shop.

##### PO 1.2

Dwellings complement the low-density or very-low density character of the neighbourhood.

##### DTS 1.2

None are applicable.

##### PO 1.3

Shops, consulting rooms and offices of a scale to maintain the amenity of nearby residents.

##### DTS 1.3

Other than a change in the use of an existing building that has been lawfully used as a shop, office or consulting room (or any combination thereof), shops, offices and consulting rooms do not exceed 100m<sup>2</sup> in gross leasable floor area (individually or combined).

##### PO 1.4

Larger scale shops, offices and consulting rooms established on higher order roads and adjacent existing commercial and retail precincts.

##### DTS/DPF 1.4

Shop, consulting room and office:

- (a) floor area does not exceed 200m<sup>2</sup>; and
- (b) are located on sites with a frontage to an arterial or collector road or adjacent a Main Street or Activity Centre Zone.

#### PO 1.5

Non-residential development located and designed to improve community accessibility to services, primarily in the form of:

- (a) commercial uses including small scale offices, personal and domestic services and consulting rooms;
- (b) community services such as educational establishments, community centres, places of worship, pre-schools, childcare and other health and welfare services;
- (c) services and facilities ancillary to the function or operation of supported accommodation or retirement facilities;
- (d) open space and recreation facilities.

#### DTS 1.5

None are applicable

#### PO 1.6

Non-residential development compatible with the low density suburban character and amenity.

#### DTS 1.6

None are applicable

### Site Dimensions and Land Division

#### PO 2.1

Allotments/sites created for residential purposes are of suitable size and dimension and are compatible with the housing pattern consistent to the locality.

#### DTS/DPF 2.1

Where the allotment has a slope less than 12.5% (1-in-8), development accords with the following:

- a) site areas (or allotment areas in the case of land division) not less than the minimum allotment size specified in the *Minimum Allotment Size Technical and Numeric Variation Overlay*; and
- b) site frontages not less than the minimum allotment frontage specified in the *Minimum Allotment Frontage Technical and Numeric Variation Overlay*.

#### PO 2.2

Allotments/sites created for residential purposes are of suitable size and dimension to accommodate residential development that is sensitive to the topography of the locality.

#### DTS/DPF 2.2

Where the allotment has a slope equal to or greater than 12.5% (1-in-8), development accords with the greater of the following:

- (a) the site areas and site frontages specified in DTS/DPF 2.1; or
- (b) the site areas and site frontages specified below:

| Development Type   | Gradient    | Minimum Site Area (m <sup>2</sup> ) | Minimum Frontage (m) |
|--------------------|-------------|-------------------------------------|----------------------|
| All Dwelling Types | >1:8 & <1:4 | 1000                                | 15                   |
|                    | ≥1:4        | 1500                                | 20                   |

## Site coverage

### PO 3.1

Building footprints consistent with the character and pattern of a low-density suburban neighbourhood and provide sufficient space around buildings to limit visual impact, provide an attractive outlook and access to light and ventilation.

### DTS / DPF 3.1

The development does not result in a total roofed area (excluding eaves of a dwelling) on the site exceeding 50%.

## Building Height

### PO 4.1

Buildings contribute to a low-rise suburban character and complement the height of nearby buildings.

### DTS/DPF 4.1

Building height (excluding garages, carports and outbuildings) no greater than that specified in the *Building Height Technical and Numeric Variations Overlay*.

## Primary Street Setback

### PO 5.1

Buildings are setback from primary street boundaries to complement the existing suburban streetscape character.

### DTS/DPF 4.1

Buildings are setback from the primary street boundary either:

- (a) at least the average of existing buildings on the adjoining sites which face the same street; or
- (b) in relation to a site on the corner of two streets or adjacent a public space or thoroughfare, at least the distance of existing buildings on the adjacent site or the closest site away from the corner, public space or thoroughfare that contains a building facing the same primary street without crossing another street, public space or thoroughfare; or
- (c) at least 8m where no buildings exist on the adjoining or adjacent sites.

## Secondary Street Setback

### PO 6.1

Buildings are set back from secondary street boundaries to maintain a pattern of separation between buildings and public streets and reinforce streetscape character.

### DTS/DPF 6.1

Buildings are set back at least 900mm from the boundary of the allotment with the secondary street frontage, or if a dwelling on any adjoining allotment is closer to the secondary street than 900

millimetres, the distance of that dwelling from the boundary with the secondary street (being, if relevant, the lesser of the 2 distances).

## Boundary Walls

PO 7.1

Boundary walls are limited in height and length to manage impacts on adjoining properties.

DTS/DPF 7.1

Except where the dwelling is located on a central site within a row dwelling or terrace arrangement, dwellings with side boundary walls are sited on only one side boundary, and either:

- (a) adjoin or abut a boundary wall of a building on adjoining land for the same length and height;  
or
- (b) do not exceed the following:
  - (i) 3m in height from the top of the footings;
  - (ii) 10m in length;
  - (iii) when combined with other walls on the boundary of the subject development site, maximum 45% of the length of the boundary; and
  - (iv) setback at least 3 metres from any other existing or proposed boundary walls on the subject land.

PO 7.2

Dwellings in a semi-detached, row or terrace arrangement maintain space between buildings consistent with a low density suburban streetscape character.

DTS / DPF 7.2

Dwellings in a semi-detached, row or terrace arrangement are setback from side boundaries shared with allotments outside the development site at least the minimum distance identified in DTS / DPF 6.1.

## Side Boundary Setback

PO 8.1

Buildings are set back from side boundaries to provide:

- (a) separation between dwellings in a way that complements the established character of the locality; and
- (b) access to natural light and ventilation for neighbours.

DTS/DPF 8.1

Buildings are setback from the side boundary at least:

- A. On sites greater than 800m<sup>2</sup>:
  - (i) Other than a wall facing a southern boundary 1900mm
  - (ii) At least 1900mm plus a 1/3 of the wall height above 3m measured from the top of the footings for walls facing a southern boundary
  
- B. On sites less than 800m<sup>2</sup>, and other than walls located on a side boundary:
  - (i) at least 900mm where the wall is up to 3m measured from the top of the footings;
  - (ii) other than for a wall facing a southern side boundary, at least 900mm plus 1/3 of the wall height above 3m measured from the top of the footings; and

- (iii) at least 1900mm plus 1/3 of the wall height above 3m measured from the top of the footings for walls facing a southern side boundary.

## Rear Boundary Setback

PO 9.1

Buildings are set back from rear boundaries to provide:

- (a) separation between dwellings in a way that complements the established character of the locality;
- (b) access to natural light and ventilation for neighbours;
- (c) private opens space; and
- (d) space for landscaping and vegetation.

DTS/DPF 9.1

Buildings are set back from the rear boundary at least:

- (a) 3m for the first building level; and
- (b) 5m for any second building level.

## Procedural Matters (PM)

### Notification

All classes of performance assessed development are excluded from notification except where they involve any of the following:

- (a) the site of the development is adjacent land to land in a different zone
- (b) development identified as "all other code assessed development" in Suburban Neighbourhood (Low Density) Zone Table 3;
- (c) development involving the creation of four or more additional dwellings or allotments; or
- (d) development exceed the height specified in DTS / DPF 4.1.

## Township Activity Centre Zone

Table 1 – Accepted Development Classification

| <b>Class of Development</b><br>The following Classes of Development are classified as Accepted Development subject to meeting the 'Accepted Development Classification Criteria' | <b>Accepted Development Classification Criteria</b>   |
|--|---|
| <b>Air handling unit, air conditioning system or exhaust fan including any associated components and any associated building alteration or addition</b>                          | 1 The item will be installed on or within an existing building<br>2 The item being installed does not encroach on a public street or affect the ability of the building to resist the spread of fire.<br>3 If the associated building is in a Local Heritage Area Overlay or State Heritage Area Overlay, no part of the item, when |

|  |  |
|--|--|
| <p><b>necessary or incidental to its installation</b><br/> Except where any of the following apply:</p> <ul style="list-style-type: none"> <li>• State Heritage Place Overlay</li> <li>• Local Heritage Place Overlay</li> </ul>   | <p>installed, will be able to be seen by a person standing at ground level in a public street.</p>   |
| <p><b>Internal building work</b><br/> Except where any of the following apply:</p> <ul style="list-style-type: none"> <li>• State Heritage Place Overlay</li> <li>• Local Heritage Place Overlay</li> </ul>  | <ol style="list-style-type: none"> <li>1 There will be no increase in the total floor area of the building</li> <li>2 There will be no alteration to the external appearance of the building.</li> </ol>   |
| <p><b>Shade sail</b><br/> Except where any of the following apply:</p> <ul style="list-style-type: none"> <li>• Airport Building Heights (Regulated) Overlay</li> <li>• Building Near Airfields Overlay</li> <li>• Defence Aviation Area Overlay</li> <li>• Local Heritage Place Overlay</li> <li>• Historic Area Overlay</li> <li>• River Murray Tributaries Area Overlay</li> <li>• Murray Darling Basin Overlay</li> <li>• State Heritage Place Overlay</li> <li>• State Heritage Area Overlay</li> </ul> | <ol style="list-style-type: none"> <li>1 The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system</li> <li>2 Shade sail consists of permeable material</li> <li>3 The total area of the sail - does not exceed 40m<sup>2</sup></li> <li>4 No part of the shade sail will be: <ol style="list-style-type: none"> <li>(a) 3m above ground or floor level (depending on where it is situated) at any place within 900mm of a boundary of the allotment</li> <li>(b) 5m above ground or floor level (depending on where it is situated) within any other part of the allotment</li> </ol> </li> <li>5 Primary street setback – at least as far back as the building line of the building to which it is ancillary</li> <li>6 If any part of the sail will be situated on a boundary of the allotment, the length of sail along a boundary does not exceed 8m</li> <li>7 In a case where any part of the sail or a supporting structure will be situated on a side boundary of the allotment – the length of the sail and any such supporting structure together with all relevant walls or structures located along the boundary will not exceed 45% of the length of the boundary.</li> </ol> |
| <p><b>Solar photovoltaic panels (roof mounted)</b><br/> Except where any of the following apply:</p> <ul style="list-style-type: none"> <li>• State Heritage Area Overlay</li> <li>• State Heritage Place Overlay</li> <li>• Local Heritage Place Overlay</li> </ul>   | <ol style="list-style-type: none"> <li>1 Panels are installed parallel to the roof of a building and with the underside surface of the panel not being more than 100mm above the surface of the roof</li> <li>2 Panels and associated components do not overhang any part of the roof</li> <li>3 Does not apply to system with a generating capacity of more than 5MW that is to be connected to the State's power system.</li> </ol>  |

**Water tank (underground)**

- 2 The development will not be built, or encroach, on an area that is, or will be, required for a sewerage system or waste control system
- 3 The tank (including any associated pump) is located wholly below the level of the ground.

Table 2 – Deemed-to-Satisfy Development Classification

| <u>Industry</u>   | <u>Light industry</u> |

Assessment Provisions

Desired Outcomes (DO)

DO 1

A cohesive, active, accessible and welcoming centre for local residents and visitors to shop, work, meet, entertain and relax in an attractive and safe environment.

DO 2

The range of land uses that occur in the centre will provide important services to town residents, rural hinterland and the broader region.

Performance Outcomes and Deemed to Satisfy / Designated Performance Outcome Criteria

Land Use and Intensity

PO 1.1

Retail, office, entertainment, health and recreation related uses supplemented by other businesses that provide a range of goods and services to the local community and the surrounding district.

DTS/DPF 1.1

Development comprises one or more of the following land uses:

- Cinema
- Community facility
- Consulting room
- Educational establishment
- Emergency services facility
- Health facility
- Hospital
- Hotel
- Indoor recreation facility
- Library
- Office
- Place of worship
- Pre-school
- Public transport terminal
- Recreation area
- Restaurant
- Retail fuel outlet
- Service trade premises
- Shop
- Tourist accommodation.

#### PO 1.2

Residential development that does not prejudice the operation of existing or future retail, office, entertainment or recreation related activity within the zone

#### DTS/DPF 1.2

Dwellings are:

- (a) developed in conjunction with non-residential uses; and
- (b) sited either behind or above non-residential uses on the same allotment

#### PO 1.3

Tourist accommodation and visitor attractions that support the visiting public and holiday makers.

#### DTS 1.3

None are applicable.

#### PO 1.4

Bulky goods outlets are sited and designed to achieve or maintain a vibrant and interesting streetscape within retail areas.

#### DTS/DPF 1.4

Bulky goods outlets with a gross leaseable area of 500m<sup>2</sup> or more are located towards the periphery of the zone.

### Built Form and Character

#### PO 2.1

Buildings are sited and designed to create pedestrian, vehicular and visual linkages between the various built-form elements within the zone and adjoining main roads.

#### DTS 2.1

None are applicable.

#### PO 2.2

Buildings are sited and designed to create streetscapes and spaces that encourage social interaction.

#### DTS 2.2

None are applicable.

### Building height and setbacks

#### PO 3.1

Buildings set back from primary and secondary street boundaries to contribute to the consistent established streetscape.

#### DTS/DPF 3.1

Buildings set back from road boundaries to align with buildings on adjoining land.

#### PO 3.2

Building height of a low to medium rise that complements the established streetscape and minimises impact on adjoining residential properties.

#### DTS/DPF 3.2

Building height does not exceed:

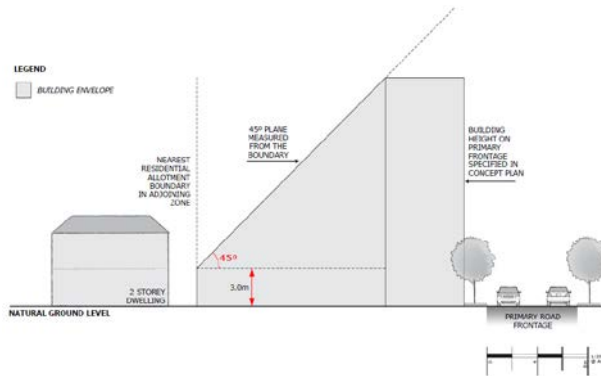

- (a) where provided, the relevant maximum height provided within the *Building Height Technical and Numeric Variation Overlay*; or
- (b) in all other cases – 3 building levels or 12 metres.

### PO 3.3

Buildings mitigate visual impacts of building massing on residential development within a neighbourhood zone.

#### DTS / DPF 3.3

Buildings constructed within a building envelope provided by a 45 degree plane measured from a height of 3 metres above natural ground level at the allotment boundary of a residential allotment within a neighbourhood zone as shown in the following diagram (except where this boundary is a southern boundary in which case DTS/DPF 3.4 will apply, or where this boundary is the primary street boundary):

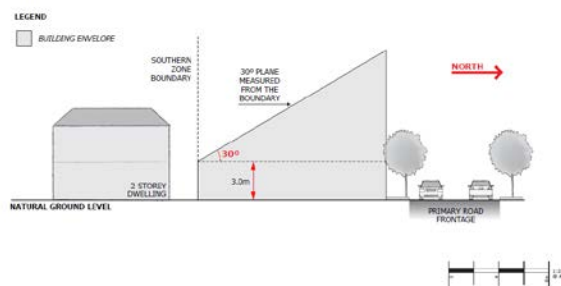

### PO 3.4

Buildings mitigate overshadowing of residential development within a neighbourhood zone.

#### DTS / DPF 3.4

Buildings on sites with a southern boundary adjoining a residential allotment within a **neighbourhood zone** are constructed within a building envelope provided by a 30 degree plane grading north measured from a height of 3m above natural ground level at the southern boundary, as shown in the following diagram:

## Land division

### PO 4.1

Land division that creates allotments that vary in size and are suitable for a variety of business and community facilities.

#### DTS 4.1

None are applicable.

## Advertisements

### PO 5.1

Freestanding advertisements that identify the associated business without creating a visually dominant element within the locality.

DTS 5.1

Freestanding advertisements:

- (a) do not exceed 8m in height; and
- (b) do not have a sign face that exceeds 6m<sup>2</sup> per side.

Procedural Matters (PM)

**Notification of Performance assessed development**

All classes of performance assessed development are excluded from notification except where they involve any of the following:

development on a site located adjacent a dwelling within a neighbourhood zone and which comprises:

- (a) development defined as ‘all other code assessed development’ in Township Activity Centre Zone Table 3
- (b) construction of a building which fails to comply with DTS 3.2 to 3.4 (inclusive)
- (c) the construction of or change of use to a retail fuel outlet, educational establishment, emergency services facility, entertainment venue, hospital, hotel, light industry

**Placement of Notices – Exemptions for Performance Assessed Development**

None specified.

**Placement of Notices – Exemptions for Restricted Development**

None specified.

Part 3 – Overlays

## Dwelling Excision Overlay

### Assessment Provisions (AP)

#### Desired Outcomes (DO)

##### DO 1

Creation of allotments to accommodate existing dwellings in primary production areas limited to avoid undermining primary production.

#### Performance Outcomes and Deemed to Satisfy / Designated Performance Outcome Criteria

##### Land Division

###### PO 1.1

Land division to create an additional allotment to accommodate an existing dwelling limited to where it can be demonstrated that:

- (a) the dwelling is surplus to a productive land use; and
- (b) continuation of primary production land use will not be undermined.

###### DTS/DPF 1.1

No additional allotments are created.

###### PO 1.2

Land division to create an allotment to accommodate a surplus dwelling:

- (a) results in an allotment that supports rural living for the surplus dwelling; and
- (b) ensures that all other allotments are of a size to support primary production.

###### DTS/DPF 1.2

Land division creates no more than two allotments of which:

- (a) one allotment:
  - a. is 1 hectare or more in area;
  - b. has no boundary that is closer than 40m to an existing dwelling; and
  - c. has a driveway 'handle' of no more than 50 metres in length if it is of a battle-axe configuration;
- (b) the other allotment has an area not less than that identified in the *Minimum Allotment Size Technical and Numeric Variation Overlay*.

#### Procedural Matters (PM)

| Referrals                       |               |                     |
|---------------------------------|---------------|---------------------|
| Class of Development / Activity | Referral Body | Purpose of Referral |
| None                            | None          | None                |

## Limited Land Division Overlay

Assessment Provisions (AP)

Desired Outcomes (DO)

DO 1

Limitation of land fragmentation to pursue various outcomes.

Performance Outcomes and Deemed to Satisfy / Designated Performance Outcome Criteria

General

PO 1.1

Land division does not result in the creation of an additional allotment.

DTS/DPF 1.1

No additional allotments are created.

Procedural Matters (PM)

| Referrals                       |               |                     |
|---------------------------------|---------------|---------------------|
| Class of Development / Activity | Referral Body | Purpose of Referral |

Part 4 – General Development Policies

## Advertisements

### Assessment Provisions (AP)

#### Desired Outcome (DO)

##### DO 1

Advertisements and advertising hoardings are designed appropriate to context, are efficient and effective in communicating with the public, are limited in number to avoid clutter, and do not create hazard.

### Performance Outcomes and Deemed to Satisfy / Designated Performance Outcome Criteria

#### Appearance

##### PO 1.1

Advertisements are compatible and integrated with the design of the building and/or land they are located on.

##### DTS/DPF 1.1

Advertisements attached to a building:

- (a) if located below canopy level, are flush with a wall;
- (b) if located at canopy level, are in the form of a fascia sign;
- (c) if located above a canopy:
  - i. are flush with a wall;
  - ii. do not have any part rising above parapet height; and
  - iii. are not attached to the roof of the building.
- (d) if attached to the side of a verandah, do not exceed the width of the verandah or project from the verandah;
- (e) if attached to the front of a verandah, do not exceed the length of the verandah or project from the verandah;
- (f) if attached to a two storey building, have no part located above the finished floor level of the second storey of the building; and
- (g) where they are flush with a wall, do not, in combination with any other existing sign, cover more than 15% of the building facade to which they are attached.

##### PO 1.2

Advertisements designed to conceal their supporting advertising hoarding from view.

##### DTS 1.2

None are applicable.

##### PO 1.3

Advertising located so as to not encroach on public land or the land of an adjacent allotment.

##### DTS/DPF 1.3

Advertisements and/or advertising hoardings are:

- (a) completely contained within the boundaries of the site; or
- (b) if a road widening is applicable, advertising and/or advertising hoarding are completely contained within the proposed property boundary realignment.

#### PO 1.4

Where possible advertisements on public land are integrated with existing structures and infrastructure.

#### DTS/DPF 1.4

An advertisement on public land:

- (a) achieves Advertisements DTS/DPF 1.1; or
- (b) is integrated with a bus shelter and it is not to be illuminated.

#### PO 1.5

Advertisements and/or advertising hoarding of a scale and size appropriate to the character of the locality.

#### DTS / DPF 1.5

Advertising and/or advertising hoardings meet the area and height requirements set out in [Advertisements Table 1 – Maximum Size and Height Requirements](#)

### Proliferation of Advertisements

#### PO 2.1

Proliferation of advertisements minimised to avoid visual clutter and untidiness.

#### DTS/DPF 2.1

No more than one advertisement is displayed on each public road per occupancy.

#### PO 2.2

Multiple-business or activity advertisements co-located and coordinated to avoid visual clutter and untidiness.

#### DTS/DPF 2.2

Advertisements for multiple-business or activity complex incorporating information regarding each business or activity in a single advertisement fixture or structure.

### Advertising Content

#### PO 3.1

Content of advertisements primarily limited to information relating to the lawful use of land they are located on.

#### DTS/DPF 3.1

An advertisement does not contain third party content.

### Amenity Impacts

#### PO 4.1

Light spill from advertisement illumination does not unreasonably compromise amenity of adjacent and proximate sensitive receivers.

#### DTS/DPF 4.1

An advertisement does not incorporate any illumination.

## Safety

### PO 5.1

Advertisements and/or advertising hoardings erected on a verandah or project from a building wall designed and located to allow for safe and convenient pedestrian access.

### DTS/DPF 5.1

An advertisement with a minimum clearance of 2.5m between the top of the footway and base of the underside of the sign.

### PO 5.2

Advertisements and/or advertising hoardings do not distract or create a hazard to drivers through excessive illumination.

### DTS/DPF 5.2

No advertisement illumination is proposed.

### PO 5.3

Advertisements and/or advertising hoardings do not create a hazard to drivers by:

- (a) being liable to interpretation by drivers as an official traffic sign or signal;
- (b) obscuring or impairing a driver's view of official traffic signs or signals; or
- (c) obscuring or impairing a driver's view of features of a road that are potentially hazardous (such as junctions, bends, changes in width and traffic control devices) or other road or rail vehicles at/or approaching level crossings.

### DTS/DPF 5.3

DTS/DPF 1.1, 1.2, 5.1, 5.2 and 5.5 are met.

### PO 5.4

Advertisements and/or advertising hoardings do not create a hazard by distracting drivers from the primary driving task at a location where the demands on driver concentration are high.

### DTS/DPF 5.4

An advertisement and/or advertising hoarding not located along or adjacent to a road having a speed limit of 80km/h or more.

### PO 5.5

Advertisements and/or advertising hoardings provide sufficient clearance from the road carriageway to allow for safe and convenient movement by all road users

### DTS/DPF 5.5

Where the advertisement or advertising hoarding is:

- (a) on a kerbed road with a speed zone of 60km/h or less, the advertisement or advertising hoarding is located at least 0.6m from the roadside edge of the kerb;
- (b) on an unkerbed road with a speed zone of 60km/h or less, the advertisement or advertising hoarding is located at least 5.5m from the edge of the seal; or
- (c) on any other kerbed or unkerbed road, the advertisement or advertising hoarding is located a minimum of the following distance from the roadside edge of the kerb or the seal:
  - i. 110 km/h road – 14m
  - ii. 100 km/h road – 13m

iii.90 km/h road – 10m

iv.70 or 80 km/h road – 8.5m

Table 1 – Maximum Size and Height Requirements

| <b>Advertisements and Advertising Hoardings</b>            |                              |  |                                |

## Animal Keeping and Horse Keeping

### Assessment Provisions (AP)

### Desired Outcomes (DO)

#### DO 1

Animals kept at a density that is not beyond the carrying capacity of the land and in a manner that minimises adverse effects on the environment, local amenity and surrounding development.

### Performance Outcomes and Deemed to Satisfy / Designated Performance Outcome Criteria

#### Siting and Design

##### PO 1.1

Animal keeping, horse keeping and associated activities do not create adverse impacts on the environment or the amenity of the locality.

##### DTS/DPF 1.1

None are applicable

##### PO 1.2

Animal keeping and horse keeping located and managed to minimise the potential transmission of disease to other operations where animals are kept.

##### DTS/DPF 1.2

None are applicable

#### Horse Keeping

##### PO 2.1

Water from stable wash-down areas directed to appropriate absorption areas and/or drainage pits to minimise pollution of land and water.

##### DTS/DPF 2.1

None are applicable

##### PO 2.2

Stables, horse shelters or associated yards sited appropriate distances away from sensitive receivers and/or allotments in other ownership to avoid adverse impacts from dust, erosion and odour.

##### DTS/DPF 2.2

None are applicable

Stables, horse shelters and/or associated yards sited in accordance with the following:

- (a) 30m or more from any sensitive receivers or approved sensitive receivers on land in other ownership;
- (b) where an adjacent allotment is vacant and in other ownership, 30m or more from the boundary of that allotment.

##### PO 2.3

All areas accessible to horses separated from septic tank effluent disposal areas to protect the integrity of that system. Kennel flooring constructed with an impervious material to facilitate regular cleaning.

#### DTS/DPF 2.3

Septic tank effluent disposal areas enclosed with a horse proof barrier such as a fence to exclude horses from this area.

#### PO 2.4

To minimise environmental harm and adverse impacts on water resources, stables, horse shelters or associated yards are appropriately setback from a watercourse.

#### DTS/DPF 2.4

Stables, horse shelters or associated yards setback 50m or more from a watercourse

#### PO 2.5

Stables, horse shelters or associated yards are established on slopes that are stable to minimise risk of soil erosion and water run-off.

#### DTS/DPF 2.5

Stables, horse shelters or associated yards not located on land with a slope greater than 10% (1-in-10).

### Kennels

#### PO 3.1

Kennel flooring constructed with an impervious material to facilitate regular cleaning.

#### DTS/DPF 3.1

The floor of kennels:

- (a) constructed of impervious concrete; and
- (b) designed to be self-draining when washed down.

#### PO 3.2

Kennels and exercise yards designed and sited to minimise noise nuisance to neighbours through measures such as:

- (a) adopting appropriate separation distances; and
- (b) orientating openings away from sensitive receivers.

#### DTS/DPF 3.2

Kennels sited 500m or more from the nearest sensitive receiver on land in other ownership.

#### PO 3.3

Dogs are regularly observed and managed to minimise nuisance impact on adjoining sensitive receivers from animal behaviour.

#### DTS/DPF 3.3

Kennels sited in association with a permanent dwelling on the land.

### Wastes

#### PO 4.1

Storage of manure, used litter and other wastes (other than waste water lagoons) is sited, designed, constructed and managed to:

- (a) avoid attracting and harbouring vermin;
- (b) avoid polluting water resources; and

(c) be located outside 1% AEP flood event areas.

[DTS/DPF 4.1](#)

None are applicable

## Aquaculture

### Assessment Provisions (AP)

### Desired Outcomes (DO)

#### DO 1

Development of aquaculture facilities in an ecologically, economically and socially sustainable manner to support a fair and equitable sharing of marine, coastal and inland resources and mitigate conflict with other water-based and land-based uses.

### Performance Outcomes and Deemed to Satisfy / Designated Performance Outcome Criteria

#### Land Based Aquaculture

##### PO 1.1

Land-based aquaculture and associated components sited and designed to avoid adverse impacts on nearby sensitive receivers.

##### DTS/DPF 1.1

Land-based aquaculture and associated components located:

- (a) 200m or more from a sensitive receiver in other ownership; or
- (b) 500m or more from the boundary of a zone primarily intended to accommodate sensitive receivers.

##### PO 1.2

Land-based aquaculture and associated components sited and designed to prevent surface flows from entering ponds in a 1% AEP sea flood level event.

##### DTS/DPF 1.2

None are applicable.

##### PO 1.3

Land-based aquaculture and associated components sited and designed to prevent pond leakage that would pollute groundwater.

##### DTS/DPF 1.3

None are applicable.

##### PO 1.4

Land-based aquaculture and associated components sited and designed to prevent farmed species escaping and entering into any waters.

##### DTS/DPF 1.4

None are applicable.

##### PO 1.5

Land-based aquaculture and associated components, including intake and discharge pipes, designed to minimise the need to traverse sensitive areas to minimise impact on the natural environment.

##### DTS/DPF 1.5

None are applicable.

#### PO 1.6

Pipe inlet and outlets associated with land-based aquaculture sited and designed to minimise the risk of disease transmission.

#### DTS/DPF 1.6

None are applicable.

#### PO 1.7

Storage areas associated with aquaculture activity integrated with the use of the land and sited and designed to minimise visual impact on the surrounding environment.

#### DTS/DPF 1.7

None are applicable.

### Marine Based Aquaculture

#### PO 2.1

Marine aquaculture sited and designed to minimise adverse impacts on sensitive ecological areas including:

- (a) creeks, and estuaries;
- (b) wetlands;
- (c) significant seagrass and mangrove communities; and
- (d) marine habitats and ecosystems.

#### DTS/DPF 2.1

None are applicable.

#### PO 2.2

Marine aquaculture sited in areas with adequate water current to disperse sediments to prevent the build-up of waste.

#### DTS/DPF 2.2

None are applicable.

#### PO 2.3

Marine aquaculture incorporates measures to ensure satisfactory removal and disposal of litter, disused material, shells, debris, detritus, dead animals and animal waste from the development to prevent pollution of waters, wetlands, or the nearby coastline.

#### DTS/DPF 2.3

None are applicable.

#### PO 2.4

Marine aquaculture designed to not involve discharge of human waste on the site, on any adjacent land or into nearby waters.

#### DTS/DPF 2.4

None are applicable

#### PO 2.5

Marine aquaculture (other than inter-tidal aquaculture) located an appropriate distance seaward of the high water mark.

#### DTS/DPF 2.5

Marine aquaculture development located 100m or more seaward of the high water mark.

#### PO 2.6

Marine aquaculture sited and designed to not obstruct or interfere with:

- (a) areas of high public use;
- (b) areas, including beaches, used for recreational activities such as swimming, fishing, skiing, sailing and other water sports.

#### DTS/DPF 2.6

None are applicable

#### PO 2.7

Marine aquaculture sited and designed to minimise interference and obstruction to the natural processes of the coastal and marine environment.

#### DTS/DPF 2.7

None are applicable

#### PO 2.8

Marine aquaculture sited and designed at a sufficient height above the sea floor and in a manner to minimise seabed damage.

#### DTS/DPF 2.8

None are applicable

#### PO 2.9

Marine aquaculture designed to be as unobtrusive as practicable by incorporating measures such as:

- (a) using feed hoppers that are painted in subdued colours and suspended as close as possible to the water surface;
- (b) positioning of structures to protrude the minimum distance practicable above the water surface;
- (c) avoiding the use of shelters and structures above cages and platforms unless necessary to exclude predators and protected species from interacting with the farming structures and/or stock inside the cages, or for safety reasons; and
- (d) positioning racks, floats and other farm structures in visually unobtrusive locations from the shoreline.

#### DTS/DPF 2.9

None are applicable

#### PO 2.10

Access, launching and maintenance facilities utilise existing established roads, tracks, ramps and paths to or from the sea where possible.

#### DTS/DPF 2.10

None are applicable

#### PO 2.11

Access, launching and maintenance facilities developed as common user facilities and co-located where practicable to mitigate adverse impacts on coastal areas.

#### DTS/DPF 2.11

None are applicable

#### PO 2.12

Marine aquaculture sited to minimise potential impacts on, and to protect the integrity of, reserves under the *National Parks and Wildlife Act 1972*.

#### DTS/DPF 2.12

Marine aquaculture located 1000m or more seaward of the boundary of any reserve under the *National Parks and Wildlife Act 1972*.

#### PO 2.13

Onshore storage, cooling and processing facilities that do not impair the coastline and its visual amenity and:

- (a) sited, designed, landscaped and developed at a scale and using external materials to minimise any adverse visual impact on the coastal landscape;
- (b) sited and designed with appropriate vehicular access arrangement; and
- (c) incorporate appropriate waste treatment and disposal.

#### DTS/DPF 2.13

None are applicable

### Navigation and Safety

#### PO 3.1

Marine aquaculture sites are suitably marked to maintain navigational safety.

#### DTS/DPF 3.1

None are applicable

#### PO 3.2

Marine aquaculture sited to provide adequate separation between farms for safe navigation.

#### DTS/DPF 3.2

None are applicable

#### PO 3.3

Structures secured and/or weighted to prevent drifting from the licensed site.

#### DTS/DPF 3.3

None are applicable

### Environmental Management

#### PO 4.1

Marine aquaculture is maintained to prevent hazards to people and wildlife, including breeding grounds and habitats of native marine mammals and terrestrial fauna, especially migratory species.

#### DTS/DPF 4.1

None are applicable

#### PO 4.2

Marine aquaculture designed to facilitate the relocation or removal of structures in the case of emergency such as oil spills, algal blooms and altered water flows.

DTS/DPF 4.2

None are applicable

PO 4.3

Marine aquaculture that provides for progressive or future reclamation of disturbed areas ahead of, or upon, decommissioning.

DTS/DPF 4.3

None are applicable

## Beverage Production in Rural Areas

### Assessment Provisions (AP)

#### Desired Outcome (DO)

##### DO 1

Mitigation of potential amenity and environmental impacts of value-adding beverage production facilities such as wineries, distilleries, cideries and breweries.

### Performance Outcomes and Deemed to Satisfy / Designated Performance Outcome Criteria

#### Odour and Noise

##### PO 1.1

Beverage production activities are designed and sited to minimise odour impacts on amenity.

##### DTS/DPF 1.1

None are applicable

##### PO 1.2

Beverage production activities are designed and sited to minimise noise impacts on sensitive receivers.

##### DTS/DPF 1.2

None are applicable

##### PO 1.3

Fermentation, distillation, manufacturing, storage, packaging and bottling activities occur within enclosed buildings.

##### DTS/DPF 1.3

None are applicable

##### PO 1.4

Breweries designed to minimise odours emitted during boiling and fermentation stages of production.

##### DTS/DPF 1.4

Brew kettles are fitted with a vapour condenser.

##### PO 1.5

Beverage production solid wastes stored in a manner that minimises odour impacts on sensitive receivers in other ownership.

##### DTS/DPF 1.5

Solid waste is collected and stored in sealed containers and removed from the site within 48 hours.

#### Water Quality

##### PO 2.1

Beverage production wastewater management systems (including wastewater irrigation) setback from watercourses to minimise adverse impacts on water resources.

##### DTS/DPF 2.1

Wastewater management systems are setback 50m or more from the banks of watercourses and bores.

#### PO 2.2

Water resources are protected from pollution by ensuring development does not involve the storage or disposal of chemicals or hazardous substances in a manner that would pose a water pollution risk.

#### DTS/DPF 2.2

None are applicable

#### PO 2.3

Stormwater run-off from areas subject to contamination by beverage production activities (including vehicle movements and machinery operations) is drained to an onsite stormwater treatment system.

#### DTS/DPF 2.3

None are applicable

#### PO 2.4

Stormwater run-off from areas not likely to be subject to contamination by beverage production and associated activities (such as roof catchments and clean hard paved surfaces) is diverted away from beverage production areas and wastewater management systems.

#### DTS/DPF 2.4

None are applicable

### Wastewater Irrigation

#### PO 3.1

Beverage production wastewater irrigation systems designed and located to not contaminate soil and surface and ground water resources or damage crops.

#### DTS/DPF 3.1

None are applicable

#### PO 3.2

Beverage production wastewater irrigation systems designed and located to minimise impact on amenity and avoid spray drift onto adjoining land.

#### DTS/DPF 3.2

Beverage production wastewater is not irrigated within 50 metres of any dwelling in other ownership.

#### PO 3.3

Beverage production wastewater is not irrigated onto:

- (a) waterlogged areas;
- (b) land within 50 metres of a creek, swamp or domestic or stock water bore;
- (c) land subject to flooding;
- (d) steeply sloping land; or
- (e) rocky or highly permeable soil overlaying an unconfined aquifer.

#### DTS/DPF 3.3

None are applicable

## Bulk Handling and Storage Facilities

### Assessment Provisions (AP)

#### Desired Outcomes (DO)

##### DO 1

Facilities for the bulk handling and storage of agricultural, mineral, petroleum, rock, ore or other similar commodities designed to minimise adverse impacts on transport networks, the landscape and surrounding land uses.

### Performance Outcomes and Deemed to Satisfy / Designated Performance Outcome Criteria

#### Siting and Design

##### PO 1.1

Bulk handling and storage facilities sited and designed to minimise risks of adverse air quality and noise impacts on sensitive receivers.

##### DTS/DPF 1.1

Facilities for the handling, storage and dispatch of commodities in bulk (excluding processing), meet the following minimum separation distances from sensitive receivers:

- (a) bulk handling of agricultural crop products, rock, ores, minerals, petroleum products or chemicals at a wharf or wharf side facility: 300m or more
- (b) bulk petroleum storage: 500m or more
- (c) coal handling with:
  - i. capacity up to 1 tonne per day or a storage capacity up to 50 tonnes: 500m or more
  - ii. capacity exceeding 1 tonne per day or a storage capacity exceeding 50 tonnes: 1,000m or more.

#### Buffers and Landscaping

##### PO 2.1

Bulk handling and storage facilities incorporate a buffer area for the establishment of dense landscaping adjacent road frontages.

##### DTS/DPF 2.1

None are applicable

##### PO 2.2

Bulk handling and storage facilities incorporate landscaping to assist with screening and dust filtration.

##### DTS/DPF 2.2

None are applicable

#### Access and Parking

##### PO 3.1

Roadways and vehicle parking areas associated with bulk handling and storage facilities designed and surfaced to control dust emissions and drag out of material from the site.

##### DTS/DPF 3.1

Roadways and vehicle parking areas are sealed with an all-weather surface.

Slipways, Wharves and Pontoons

PO 4.1

Slipways, wharves and pontoons used for the handling of bulk materials (such as fuel, oil, catch, bait and the like) incorporate catchment devices to avoid the release of materials into adjacent waters.

DTS/DPF 4.1

None are applicable.

## Clearance from Overhead Powerlines

Assessment Provisions (AP)

Desired Outcome (DO)

DO 1

Protection of human health and safety when undertaking development in the vicinity of overhead transmission powerlines.

Performance Outcomes and Deemed to Satisfy / Designated Performance Outcome Criteria

PO 1.1

Buildings are adequately separated from aboveground powerlines to minimise potential hazard to people and property.

DTS/DPF 1.1

One of the following is satisfied:

- (a) a declaration is provided by or on behalf of the applicant to the effect that the proposal would not be contrary to the regulations prescribed for the purposes of section 86 of the *Electricity Act 1996*; or
- (b) there are no above ground powerlines adjoining the site that is the subject of the proposed development.

## Design in Urban Areas

### Assessment Provisions (AP)

#### Desired Outcome (DO)

##### DO 1

Development that is:

- (a) contextual – by considering, recognising and carefully responding to its natural surroundings and positively contributing to the character of the immediate area;
- (b) durable – fit for purpose, adaptable and long lasting;
- (c) inclusive – by integrating landscape design to optimise pedestrian and cyclist usability, privacy and equitable access, and also promote the provision of quality spaces integrated with the public realm that can be used for access and recreation and help optimise security and safety both internally and within the public realm, for occupants and visitors alike; and
- (d) sustainable – by integrating sustainable techniques into the design and siting of development and landscaping to improve community health, urban heat, water management, environmental performance, biodiversity and local amenity and to minimise energy consumption.

### Performance Outcomes and Deemed to Satisfy / Designated Performance Outcome Criteria

#### ALL DEVELOPMENT

##### External Appearance

##### PO 1.1

Buildings that reinforce corners through changes in setback, articulation, materials, colour and massing (including height, width, bulk, roof form and slope).

##### DTS 1.1

None are applicable.

##### PO 1.2

Where zero or minor setbacks are desirable, development provides shelter over footpaths to positively contribute to the walkability and comfort of the public realm.

##### DTS 1.2

None are applicable.

##### PO 1.3

Buildings (other than ancillary buildings, group dwellings or buildings on a battle-axe allotment) designed so the main façade faces the primary street frontage of the land on which they are situated.

##### DTS 1.3

None are applicable.

##### PO 1.4

Plant, exhaust and intake vents and other technical equipment integrated into the building design to minimise visibility from the public realm and negative impacts on residential amenity by:

- (a) positioning plant and equipment discretely, in unobtrusive locations as viewed from public roads and spaces;
- (b) screening rooftop plant and equipment from view; and
- (c) when located on the roof of non-residential development, locating the plant and equipment as far as practicable from adjacent sensitive land uses.

**DTS / DPF 1.4**

Development does not incorporate any structures that protrude beyond the roofline.

**PO 1.5**

The negative visual impact of outdoor storage, waste management, loading and service areas is minimised by integrating them into the building design and screening them from public view (such as fencing, landscaping and built form) taking into account the form of development contemplated in the relevant zone.

**DTS 1.5**

None are applicable.

Safety

**PO 2.1**

Development maximises opportunities for passive surveillance of the public realm by providing clear lines of sight, appropriate lighting and the use of visually permeable screening wherever practicable.

**DTS 2.1**

None are applicable.

**PO 2.2**

Development designed to differentiate public, communal and private areas.

**DTS 2.2**

None are applicable.

**PO 2.3**

Buildings designed with safe, perceptible and direct access from public street frontages and vehicle parking areas.

**DTS 2.3**

None are applicable.

**PO 2.4**

Development at street level designed to maximise opportunities for passive surveillance of adjacent public realm.

**DTS 2.4**

None are applicable.

**PO 2.5**

Common areas and entry points of buildings (such as the foyer areas of residential buildings), and non-residential land uses at street level, maximise passive surveillance from the public realm to the inside of the building at night.

**DTS 2.5**

None are applicable.

Landscaping

**PO 3.1**

Landscaped (including trees), permeable open spaces incorporated to:

- (a) minimise heat absorption and reflection;
- (b) maximise shade and shelter;
- (c) maximise stormwater infiltration; and
- (d) enhance the appearance of land and streetscapes.

**DTS 3.1**

None are applicable.

## Environmental Performance

**PO 4.1**

Buildings sited, oriented and designed to maximise natural sunlight access and ventilation to main activity areas, habitable rooms, common areas and open spaces.

**DTS 4.1**

None are applicable.

**PO 4.2**

Buildings sited and designed to maximise passive environmental performance and minimise energy consumption and reliance on mechanical systems, such as heating and cooling.

**DTS 4.2**

None are applicable.

**PO 4.3**

Buildings incorporate climate responsive techniques and features such as building and window orientation, use of eaves, verandahs and shading structures, water harvesting, at ground landscaping, green walls, green roofs and photovoltaic cells.

**DTS 4.3**

None are applicable.

## Water Sensitive Design

**PO 5.1**

Development sited and designed to maintain natural hydrological systems without negatively impacting:

- (a) the quantity and quality of surface and groundwater;
- (b) the depth and directional flow of surface and groundwater; or
- (c) the quality and function of natural springs.

**DTS 5.1**

None are applicable.

## Car parking appearance

**PO 6.1**

Development facing the street designed to minimise the negative impacts of any semi-basement and under-croft car parking on streetscapes.

**DTS/DPF 6.1**

The protrusion of semi-basement and undercroft car parking structures does not exceed 1.2m above finished ground level and is screened through appropriate plantings, except in a location or zone where a continuous ground floor façade aligned with the front property boundary is desired.

**PO 6.2**

Vehicle parking areas appropriately located, designed and constructed to minimise impacts on adjacent sensitive receivers through measures such as ensuring they are attractively developed and landscaped, screen fenced, and the like.

**DTS 6.2**

None are applicable.

**PO 6.3**

Pedestrian connections that are safe, legible, direct and accessible are provided between parking areas and the development.

**DTS 6.3**

None are applicable.

**PO 6.4**

Street level vehicle parking areas that are open to the sky are landscaped to provide shade and reduce solar heat absorption and reflection.

**DTS / DPF 6.4**

Vehicle parking areas that are open to the sky and comprise 10 or more car parking spaces include a shade tree with a mature canopy of 4m diameter spaced for each 10 car parking spaces provided and a landscaped strip on any road frontage of a minimum dimension of 1m.

**PO 6.5**

Vehicle parking areas are landscaped along public frontages, allotment boundaries and between double rows of parking spaces.

**DTS / DPF 6.5**

Vehicle parking areas comprising 10 or more car parking spaces contain a vegetated landscaped strip of a minimum dimension of:

- (a) 1m along all public road frontages and allotment boundaries; and
- (b) 0.6m between double rows of car parking spaces.

**PO 6.6**

Vehicle parking areas and associated driveways are landscaped to shade and positively contribute to amenity.

**DTS 6.6**

None are applicable.

**PO 6.7**

Vehicle parking areas and accessways incorporate integrated stormwater management techniques such as permeable or porous surfaces, infiltration systems, drainage swales or rain gardens that integrate with landscaping requirements.

**DTS 6.7**

None are applicable.

**Earthworks****PO 7.1**

Development, including any associated driveways and access tracks, minimises the need for earthworks to limit disturbance to natural topography.

**DTS / DPF 7.1**

Development does not involve either:

- (a) excavation exceeding a vertical height of 1m;
- (b) filling exceeding a vertical height of 1m; or
- (c) a total combined excavation and filling vertical height of 2m or more.

Fences and walls

**PO 8.1**

Fences, walls and retaining walls of sufficient height to maintain privacy and security without unreasonably impacting visual amenity and adjoining land's access to sunlight.

**DTS 8.1**

None are applicable.

**PO 8.2**

Landscaping incorporated on the low side of retaining walls that are visible from public roads and public open space to minimise visual impacts.

**DTS / DPF 8.2**

A vegetated landscaped strip 500mm deep or more is provided against the low side of a retaining wall.

## ALL DEVELOPMENT - 4 OR MORE BUILDING LEVELS

External Appearance

**PO 9.1**

Buildings positively contribute to the character of the local area by responding to local context.

**DTS 9.1**

None are applicable.

**PO 9.2**

Fine-grain detail at street level and a mixture of materials at lower building levels near the public interface are provided to reinforce a human scale.

**DTS 9.2**

None are applicable.

**PO 9.3**

Buildings designed to reduce visual mass by breaking up building façades into distinct elements.

**DTS 9.3**

None are applicable.

**PO 9.4**

Boundary walls visible from public land include visually interesting treatments to break up large blank elevations.

**DTS 9.4**

None are applicable.

**PO 9.5**

External materials and finishes are durable and age well to minimise ongoing maintenance requirements.

**DTS / DPF 9.5**

Buildings utilise a combination (or thereof) of the following external materials and finishes:

- (a) masonry;
- (b) natural stone; and
- (c) pre-finished materials that minimise staining, discolouring or deterioration.

**PO 9.6**

Street facing building elevations designed to provide attractive, high quality and pedestrian friendly street frontages.

**DTS / DPF 9.6**

Building street frontages incorporate:

- (a) active uses such as shops or offices;
- (b) prominent entry areas for multi-storey buildings (where it is a common entry);
- (c) habitable rooms of dwellings; and
- (d) areas of communal public realm with public art or the like, where consistent with the Zone and/or sub zone provisions.

**PO 9.7**

Entrances to multi-storey buildings are safe, attractive, welcoming, functional and contribute to streetscape character.

**DTS / DPF 9.7**

Entrances to multi-storey buildings:

- (a) oriented towards the street;
- (b) clearly visible and easily identifiable from the street and vehicle parking areas;
- (c) designed to be prominent, accentuated and a welcoming feature if there are no active or occupied ground floor uses;
- (d) provide shelter, a sense of personal address and transitional space around the entry;
- (e) located as close as practicable to the lift and / or lobby access to minimise the need for long access corridors; and
- (f) avoid the creation of potential areas of entrapment.

**PO 9.8**

Building services, plant and mechanical equipment screened from view from the public realm.

**DTS 9.8**

None are applicable.

## Landscaping

**PO 10.1**

Development facing a street provides a well landscaped area that contains a deep soil space to accommodate a tree of a species and size adequate to provide shade, contribute to tree canopy targets and soften the appearance of buildings.

**DTS / DPF 10.1**

Buildings provide a 4m by 4m deep soil space in front of the building to accommodate a medium to large tree, except where no building setback from front property boundaries is desired.

**PO 10.2**

Deep soil zones provided to retain existing vegetation or provide areas that can accommodate new deep root vegetation, including tall trees with large canopies to provide shade and soften the appearance of multi storey buildings.

**DTS / DPF 10.2**

Multi-storey development provides deep soil zones and incorporate trees at not less than the following rates, except in a location or zone where full site coverage is desired:

| Site-area                           | Minimum-deep-soil-area   | Minimum-dimension | Tree/-deep-soil-zones                               |
|-------------------------------------|--|-------------------|---|
| <300m <sup>2</sup>                  | 10m <sup>2</sup>   | 1.5m              | 1-small-tree/-10m <sup>2</sup> -deep-soil           |
| 300-1500m <sup>2</sup>              | 7%-site-area   | 3m                | 1-medium-tree/-30m <sup>2</sup> -deep-soil          |
| >1500m <sup>2</sup>                 | 7%-site-area   | 6m                | 1-large-or-medium-tree/-60m <sup>2</sup> -deep-soil |
| Tree-size-and-site-area-definitions |  |                   |   |
| Small-tree                          | 4-6m-mature-height-and-<4m-canopy-spread                           |                   |   |
| Medium-tree                         | 6-12m-mature-height-and-4-8m-canopy-spread                         |                   |   |
| Large-tree                          | 12m-mature-height-and->8m-canopy-spread                            |                   |   |
| Site-area                           | The-total-area-for-development-site, not-average-area-per-dwelling |                   |   |

### PO 10.3

Deep soil zones provided with access to natural light to assist in maintaining vegetation health.

### DTS 10.3

None are applicable.

### PO 10.4

Unless separated by a public road or reserve, development sites adjacent to any zone that has a primary purpose of accommodating low rise residential development incorporate a deep soil zone along the common boundary, to enable medium to large trees to be retained or established to assist in screening new buildings of 3 or more storeys in height.

### DTS / DPF 10.4

Building elements of 3 or more storeys in height are set back at least 6m from a zone boundary in which a deep soil zone area is incorporated.

### Environmental

### PO 11.1

Development minimises detrimental micro-climatic impacts on adjacent land and buildings.

**DTS 11.1**

None are applicable.

**PO 11.2**

Development incorporates sustainable design techniques and features such as window orientation, eaves and shading structures, water harvesting, green walls, and roof designs that enable the provision of rain water tanks (where they are not provided elsewhere on site), green roofs and photovoltaic cells.

**DTS 11.2**

None are applicable.

**PO 11.3**

Development of 5 or more storeys, or 21m or more in height (as measured from natural ground level and excluding rooftop mounted mechanical plant and equipment), designed to minimise the impacts of wind through measures such as:

- (a) a podium at the base of a tall tower and aligned with the street to deflect wind away from the street;
- (b) substantial verandahs around a building to deflect downward travelling wind flows over pedestrian areas;
- (c) the placement of buildings and use of setbacks to deflect the wind at ground level; and / or
- (d) avoid tall shear facades that create windy conditions at street level.

**DTS 11.3**

None are applicable.

*Site Facilities / Waste Storage*

**PO 12.1**

Development provides dedicated area for on-site collection and sorting of recyclable materials and refuse, green organic waste and wash bay facilities for the ongoing maintenance of bins that is adequate in size considering the number and nature of the activities they will serve and the frequency of collection.

**DTS 12.1**

None are applicable.

**PO 12.2**

Communal waste storage and collection areas located, enclosed and designed to be screened from view from the public domain, open space and dwellings.

**DTS 12.2**

None are applicable.

**PO 12.3**

Communal waste storage and collection areas designed to be well ventilated and located away from habitable rooms.

**DTS 12.3**

None are applicable.

**PO 12.4**

Communal waste storage and collection areas designed to allow waste and recycling collection vehicles to enter and leave the site without reversing.

**DTS 12.4**

None are applicable.

**PO 12.5**

For mixed use developments, non-residential waste and recycling storage areas and access provide opportunities for on-site management of food waste through composting or other waste recovery as appropriate.

**DTS 12.5**

None are applicable.

## Car Parking

**PO 13.1**

Multi-level vehicle parking structures designed to contribute to active street frontages and complement neighbouring buildings.

**DTS/ DPF 13.1**

Multi-level vehicle parking structures within buildings to:

- (a) provide land uses such as commercial, retail or other non-car parking uses along ground floor street frontages; and
- (b) incorporate facade treatments along major street frontages that are sufficiently enclosed and detailed to complement adjacent buildings.

**PO 13.2**

Multi-level vehicle parking structures within buildings complement the surrounding built form in terms of height, massing and scale.

**DTS 13.2**

None are applicable.

**ALL RESIDENTIAL DEVELOPMENT**

## External Appearance

**PO 14.1**

Dwellings incorporate windows facing primary street frontages to encourage passive surveillance and make a positive contribution to the streetscape.

**DTS/DPF 14.1**

Each dwelling with a frontage to a public street includes at least one window with a total window area of at least 2m<sup>2</sup> facing the primary street, from a habitable room that has a minimum room dimension of 2.7m.

**PO 14.2**

Dwellings incorporate entry doors within street frontages to address the street and provide a legible entry point for visitors.

**DTS/DPF 14.2**

Dwellings with a frontage to a public street have the entry door facing the public street.

## Outlook and Amenity

**PO 15.1**

Primary living rooms have an external outlook to provide a high standard of amenity for occupants.

**DTS / DPF 15.1**

Primary living rooms (other than kitchens) incorporate a window with an external outlook towards the street frontage or private open space.

**PO 15.2**

Bedrooms separated or shielded from active communal recreation areas, common access areas and vehicle parking areas and access ways to mitigate noise and artificial light intrusion.

**DTS 15.2**

None are applicable.

## Ancillary Development

**PO 16.1**

Residential ancillary buildings and structures sited and designed to not detract from the streetscape or appearance of buildings on the site or neighbouring properties.

**DTS / DPF 16.1**

Residential ancillary buildings and structures:

- (a) are not being constructed, added to or altered so that any part is situated:
  - i. in front of any part of the building line of the dwelling to which it is ancillary; or
  - ii. within 900mm of a boundary of the allotment with a secondary street (if the land has boundaries on two or more roads);
- (b) in the case of a garage or carport, the garage or carport is setback at least 5.5m from the boundary of the primary street;
- (c) not exceeding 7m or 50% of the site frontage (whichever is the lesser) when facing a primary street or secondary street;
- (d) if situated on a boundary (not being a boundary with a primary street or secondary street), a length not exceeding 10m unless:
  - i. a longer wall or structure exists on the adjacent site and is situated on the same allotment boundary; and
  - ii. the proposed wall or structure will be built along the same length of boundary as the existing adjacent wall or structure to the same or lesser extent;
- (e) if situated on a boundary of the allotment (not being a boundary with a primary street or secondary street), all walls or structures on the boundary not exceeding 45% of the length of that boundary;
- (f) will not be located within 3m of any other wall along the same boundary unless on an adjacent site on that boundary there is an existing wall of a building that would be adjacent to or abut the proposed wall or structure;
- (g) have a wall height or post height not exceeding 3m above natural ground level;
- (h) have a roof height where no part of the roof is more than 5m above the natural ground level; and
- (i) if clad in sheet metal, is pre-colour treated or painted in a non-reflective colour.

**PO 16.2**

Ancillary buildings and structures do not impede on-site functional requirements such as private open space provision, car parking requirements or result in over-development of the site.

**DTS / DPF 16.2**

Ancillary buildings and structures do not result in:

- (a) less private open space than specified in Design in Urban Areas Table 1 – Outdoor Open Space;
- (b) less on-site car parking than specified in Transport, Access and Parking Table 1 - Off-street Car Parking Requirements; and
- (c) the total roofed floor area of all existing or proposed ancillary building(s) or structure(s) exceeding 60m<sup>2</sup>.

**PO 16.3**

Fixed plant and equipment in the form of pumps and/or filtration systems for a swimming pool or spa positioned and/or housed to not cause unreasonable noise nuisance to adjacent sensitive receivers.

**DTS/DPF 16.3**

The pump and/or filtration system is ancillary to a dwelling erected on the same site and is:

- (a) enclosed in a solid acoustic structure that is located at least 5m from the nearest habitable room located on an adjoining allotment; or
- (b) located at least 12m from the nearest habitable room located on an adjoining allotment.

Flooding

**PO 17.1**

Residential accommodation sited, designed and constructed to prevent the entry of floodwaters where the entry of flood waters is likely to result in undue damage to or compromise ongoing activities within buildings.

**DTS / DPF 17.1**

Residential accommodation has a ground finished floor level 300mm above the top of the kerb level of the primary street.

**RESIDENTIAL DEVELOPMENT - 3 BUILDING LEVELS OR LESS**

External appearance

**PO 18.1**

Garaging designed to not detract from the streetscape or appearance of a dwelling.

**DTS/DPF 18.1**

Garages and carports facing a street:

- (a) do not exceed 7m in width or 50% of the sites frontage (whichever is less); and
- (b) are situated so that no part of the garage or carport will be in front of any part of the building line of the dwelling
- (c) are setback at least 5.5m from the boundary of the primary street; and
- (d) unless the dwelling has two storeys along the street frontage:
  - i. have single width car parking with a maximum garage door not exceeding 3.5m on sites with a frontage of 12m; or less
  - ii. have a garage door not exceeding 50% of the site frontage or 7m (whichever is less) on sites with a frontage greater than 12m.

**PO 18.2**

Dwelling facades make a positive contribution to streetscapes and common areas by providing variation of light and shadow and creating a sense of depth.

**DTS/DPF 18.2**

Each dwelling includes at least 3 of the following design features within each façade facing a public road or common driveway:

- (a) a minimum of 30% of the façade is setback an additional 300mm from the primary building line;
- (b) a porch or portico that projects at least 1m from the building façade that is open on at least 2 sides;
- (c) a balcony that projects from the building façade;
- (d) a verandah that projects at least 1m from the building façade;
- (e) eaves surrounding the dwelling of a minimum 450mm width;
- (f) a minimum 30% of the upper level projects forward from the lower level primary building line.

### PO 18.3

The apparent mass of larger buildings is reduced when viewed from adjoining allotments or public streets.

### DTS/DPF 18.3

Buildings of 2 or more building levels and a length exceeding 20m adjacent a secondary street or side boundary incorporate a step back of the building façade of more than 300mm for a minimum length of 1m, at least every 10m.

Overlooking / Visual Privacy

### PO 19.1

Development mitigates direct overlooking of habitable rooms and private open spaces of dwellings.

### DTS / DPF 19.1

Upper level windows facing side or rear boundaries shared with an allotment put to residential use:

- are permanently obscured to a height of 1.5m above finished floor level that is fixed or not capable of being opened more than 200mm;
- have sill heights greater than or equal to 1.5m above finished floor level; or
- incorporate screening to a height of 1.5m above finished floor level; and
- the building will not have a balcony or terrace on an upper building level, other than where the longest side of that balcony or terrace will face a road (including any road reserve), or reserve (including any land held as open space), and is at least 15m from the private open space of any other dwelling.

Private Open Space

### PO 20.1

Dwellings provided with suitable sized areas of usable private open space to meet the needs of occupants.

### DTS / DPF 20.1

Private open space provided in accordance with Design in Urban Areas Table 1 - Outdoor Open Space.

### PO 20.2

Private open space positioned to provide convenient access from internal living areas.

### DTS / DPF 20.2

Private open space is directly accessible from a habitable room, other than a bedroom or study.

### PO 20.3

Private open space is positioned and designed to:

- provide useable outdoor space that suits the needs of occupants;
- take advantage of desirable orientation and vistas;
- animate the street frontage by encouraging activity between buildings and public streets;
- adequately define public and private space when located forward of the building; and
- prolong activity along street frontages by protecting against inclement weather.

**DTS / DPF 20.3**

A portion of the private open space specified in DTS 20.1 can be provided forward of the primary building line where:

- (a) the area is fenced to a maximum height of 1.8m;
- (b) the area incorporates a verandah with a minimum dimension of 1.5m
- (c) an area is provided behind the primary building line that has the minimum dimensions identified in DTS 20.1;

Landscaping

**PO 21.1**

Soft landscaping incorporated into development to:

- (a) minimise heat absorption and reflection;
- (b) contribute shade and shelter;
- (c) provide for stormwater infiltration and biodiversity; and
- (d) enhance the appearance of land and streetscapes.

**DTS / DPF 21.1**

Residential development incorporates areas for soft landscaping with a minimum dimension of 0.5 metres provided in accordance with the following:

(a)

| Dwelling-site-area-(or-in-the-case-of-residential-flat-or-group-average-site-area)-(square-metres)⌘ | %-of-site-⌘ |
|---|-------------|
| <200⌘   | 15%⌘        |
| 201--450⌘   | 20%⌘        |
| >450⌘   | 25%⌘        |

; and

- (b) 25% of any land between the road boundary and the primary building line is provided for soft landscaping with a minimum dimension of 0.5 metres.

**PO 21.2**

Tree planting provided to:

- (a) contribute shade and shelter;
- (b) improve outlook for occupants of buildings;
- (c) reduce the apparent mass of buildings;
- (d) contribute to biodiversity;
- (e) mitigate urban heat; and
- (f) improve the amenity and character of streetscapes and contribute to attractive vistas.

**DTS / DPF 21.2**

Tree planting is provided in accordance with the following tables:

(a)

| Allotment-size        | Tree-size* and-number-required-per-dwelling |
|-----------------------|---|
| <450m <sup>2</sup>    | 1 small tree per dwelling                   |
| 450-800m <sup>2</sup> | 1 medium tree                               |
| 800m <sup>2</sup> +   | 1 large tree                                |

\*refer Table DTS 21.2 Tree Size

| Table-DTS-21.2-Tree-Size |               |               |  |
|--------------------------|---------------|---------------|--|
| Tree-Size                | Mature-Height | Mature-spread | Min-soil-area                              |
| Small                    | 4-6m          | 2-4m          | 10m <sup>2</sup> and min dimension of 1.5m |
| Medium                   | 6-12m         | 4-8m          | 30m <sup>2</sup> and min dimension of 2m   |
| Large                    | >12m          | >8m           | 60m <sup>2</sup> and min dimension of 4m   |

Table DTS 21.2 Tree Size

(b) The following discounts apply where existing trees are retained on the subject land that are not a species identified in Regulation 3F(4)(b):

| Retained-tree-height | Retained-tree-spread | Retained-soil-area-within-development-site | Discount-applied |
|----------------------|----------------------|--|------------------|
| 4-6m                 | <4m                  | 10m <sup>2</sup> and min dimension of 1.5m | 2 small          |
| 6-12m                | 4-8m                 | 30m <sup>2</sup> and min dimension of 3m   | 2 medium         |
| >12m                 | >8m                  | 60m <sup>2</sup> and min dimension of 6m   | 2 large          |

(c) Trees can be replaced with smaller trees in accordance with the following rates:

| Tree-size*  | Equivalent-planting             |
|-------------|---------------------------------|
| Medium tree | 2 small trees                   |
| Large tree  | 4 small trees or 2 medium trees |

\*refer Table DTS 21.2 Tree Size

Water Sensitive Design

**PO 22.1**

Residential development designed to capture and re-use stormwater to:

(a) maximise conservation of water resources;

- (b) manage peak stormwater runoff flows and volume to ensure the carrying capacities of downstream systems are not overloaded; and
- (c) manage stormwater runoff quality.

**DTS / DPF 22.1**

Residential development in the form of:

- (a) detached, semi-detached or row dwellings include a retention rainwater tank storage:
  - i. connected to at least 80% of the roof area of the dwelling (row dwelling), or at least 60% of the roof area of the dwelling (detached and semi-detached dwellings);
  - ii. connected to all toilets and either the laundry cold water outlets or hot water service;
  - iii. that has a minimum total capacity in accordance with Table 1, and
  - iv. the roof is at least 80% of the impervious area; or

Table 1: Retention Rainwater Tank

| Allotment size (m <sup>2</sup> ) | Minimum site % perviousness | Minimum rainwater tank volume | Additional site permeability discount opportunity |                                   |
|----------------------------------|-----------------------------|-------------------------------|---|-----------------------------------|
|                                  |                             |                               | Site % perviousness                               | Minimum rainwater tank volume (L) |
| <200                             | 15%                         | 2,000                         |   |                                   |
| 201-400                          | 20%                         | 3,000                         | 30%   | 2,000                             |
| 400-500                          | 25%                         | 5,000                         | 35%   | 3,000                             |

- (a) hammerhead dwellings have driveways and pathways constructed of a minimum of 50% permeable or porous material and include a retention rainwater tank storage:
  - i. connected to at least 60% of the roof area of the dwelling;
  - ii. connected to all toilets and either the laundry cold water outlets or hot water service; and
  - iii. that has a minimum total capacity in accordance with Table 2.

Table 2: Retention Rainwater Tank Option

| Allotment size (m <sup>2</sup> ) | Site % perviousness | Rainwater tank volume (L) |
|----------------------------------|---------------------|---------------------------|
| <200                             | 15%                 | 2,000                     |
| 201-400                          | 20%                 | 3,000                     |
| 401-500                          | 25%                 | 5,000                     |

**PO 22.2**

Development creating 5-19 dwellings includes stormwater management systems that minimise the discharge of sediment, suspended solids, organic matter, nutrients, bacteria, litter and other contaminants to the stormwater system, watercourses or other water bodies.

**DTS 22.2**

Development creating 5-19 dwellings is accompanied by an approved Stormwater Management Plan that achieves the following stormwater runoff outcomes:

- (a) 80 per cent reduction in average annual total suspended solids;
- (b) 60 per cent reduction in average annual total phosphorus; and
- (c) 45 per cent reduction in average annual total nitrogen.

**PO 22.3**

Development creating 5-19 dwellings includes a stormwater management system designed to mitigate peak flows and manage the rate and duration of stormwater discharges from the site to ensure the carrying capacities of downstream systems are not overloaded.

### **DTS 22.3**

Development creating 5-19 dwellings

- (a) maintains:
  - i. a pre-development peak flow rate from the site based upon a 0.35 runoff coefficient for the 5-year ARI (18.1% AEP) 30 minute storm; and
  - ii. the stormwater runoff time to peak to match that of the pre-development condition; or
- (b) capture and retain the difference in pre-development runoff volume (based upon a 0.35 runoff coefficient) vs post development runoff volume from the site for a 5-year ARI (18.1% AEP) 30 minute storm; and
- (c) manage site generated stormwater runoff up to and including the 100 –year ARI flood event (1% AEP) to avoid flooding of buildings.

Car parking, access and manoeuvrability

### **PO 23.1**

Covered car parking spaces are of dimensions to be functional, accessible and convenient.

### **DTS / DPF 23.1**

Covered car parking spaces:

- (a) where enclosed by fencing or walls, have:
  - i. a minimum internal width of 3.2m and length of 6.0m for a single space;
  - ii. a minimum internal width of 6.0m and length of 6.0m for a double space (side by side); and
  - iii. a minimum internal width of 3.2m and length of 11m for a double space (tandem); or
- (b) where not enclosed by fencing, walls or garage doors, have:
  - i. a minimum width of 3.0m and minimum length of 5.5m for a single space;
  - ii. a minimum width of 5.2m and minimum length of 5.5m for a double (side by side) space; and
  - iii. a minimum width of 3.0m and minimum length of 10.4m for a double (tandem) space.

### **PO 23.2**

Uncovered car parking space are of dimensions to be functional, accessible and convenient.

### **DTS / DPF 23.2**

Uncovered car parking spaces have a minimum width of 2.4m and a minimum length of 5.5m.

### **PO 23.3**

Driveways and access points located and designed to facilitate safe access and egress while maximising land available for street tree planting, landscaped street frontages and on-street parking.

### **DTS / DPF 23.3**

Driveways and access points:

- (a) for sites with a frontage to a public road of 12m or less, have a maximum width of 3.2m measured at the property boundary and are the only access point provided on the site; or
- (b) for sites with a frontage to a public road greater than 12m:
  - i. have a maximum width of 6m measured at the property and are the only access point provided on the site; or
  - ii. have a maximum width of 3.2 metres measured at the property boundary and no more than two access points are provided on site.

### **PO 23.4**

Vehicle access is safe, convenient, minimises interruption to the operation of public roads and does not interfere with street infrastructure or street trees.

#### **DTS / DPF 23.4**

Vehicle access to designated car parking spaces:

- (a) is provided via a lawfully existing or authorised driveway or access point or an access point for which consent has been granted as part of an application for the division of land
- (b) where newly proposed, is setback:
  - (a) 500mm or more from any street furniture, street pole, infrastructure services pit, or other stormwater or utility infrastructure unless consent is provided from the asset owner;
  - (b) 2m or more from a street tree unless consent is provided from the tree owner;
  - (c) 6m or more from the tangent point of an intersection of 2 or more roads or a pedestrian-actuated crossing.

#### **PO 23.5**

Driveways are designed to enable safe and convenient vehicle movements from the public road to on-site parking spaces.

#### **DTS/ DPF 23.5**

Driveways are designed and sited so that:

- (a) the gradient from the place of access on the boundary of the allotment to the finished floor level at the front of the garage or carport when work is completed is not steeper than 1:4 on average; and
- (b) the centre of the driveway at the public road boundary is no more than 25 degree deviation from the centre of the front of the covered car parking space for which it provides vehicle access.

#### **PO 23.6**

Driveways and access points are designed and distributed to optimise the provision of on-street visitor parking (where on-street parking is appropriate).

#### **DTS / DPF 23.6**

Where on-street parking is available directly adjacent the site, parking is retained in accordance with the following requirements:

- (a) 1 on-street car park per 3 proposed dwellings (rounded up to the nearest whole number); and
- (b) minimum car park length of 6m.

Waste storage

#### **PO 24.1**

Provision is made for the convenient storage of waste bins in a location screened from public view.

#### **DTS / DPF 24.1**

Dwellings are provided with:

- (a) an area of 3m<sup>2</sup> or more for the storage of waste (separate from any designated car parking spaces or private open space) is provided behind the building line; and
- (b) a continuous unobstructed path of travel with a minimum width of 800mm between the waste bin storage area and the street.

Design of Transportable Dwellings

#### **PO 25.1**

The sub-floor space beneath transportable buildings enclosed to give the appearance of a permanent structure.

#### **DTS 25.1**

None are applicable.

## RESIDENTIAL DEVELOPMENT - 4 OR MORE BUILDING LEVELS (INCLUDING SERVICED APARTMENTS)

### Outlook and Visual Privacy

#### **PO 26.1**

Ground level dwellings have a satisfactory short range visual outlook to public, communal or private open space.

#### **DTS / DPF 26.1**

Buildings:

- (a) provide a habitable room at ground or first level with a window facing toward the street; and
- (b) limit the height / extent of solid walls or fences facing the street to 1.2m high above the footpath level or, where higher, to 50% of the site frontage.

#### **PO 26.2**

The visual privacy of ground level dwellings within multi-level buildings is protected.

#### **DTS / DPF 26.2**

The finished floor level of ground level dwellings in multi-storey developments is raised by up to 1.2m.

### Private Open Space

#### **PO 27.1**

Dwellings provided with suitable sized areas of usable private open space to meet the needs of occupants.

#### **DTS / DPF 27.1**

Private open space provided in accordance with Design in Urban Areas Table 1 - Outdoor Open Space.

### Apartment Amenity

#### **PO 28.1**

Residential accommodation within multi-level buildings have habitable rooms, windows and balconies designed and positioned to be separated from those of other dwellings and accommodation to provide visual and acoustic privacy and allow for natural ventilation and the infiltration of daylight into interior and outdoor spaces.

#### **DTS / DPF 28.1**

Habitable rooms and balconies of independent dwellings and accommodation are separated by at least 6m from one another where there is a direct 'line of sight' between them and 3m or more from a side or rear property boundary.

#### **PO 28.2**

Balconies are designed, positioned and integrated into the overall architectural form and detail of the development to:

- (a) respond to daylight, wind, and acoustic conditions to maximise comfort and provide visual privacy; and
- (b) allow views and casual surveillance of the street while providing for safety and visual privacy of nearby living spaces and private outdoor areas.

#### **DTS / DPF 28.2**

Balconies utilise a combination (or thereof) of the following design elements:

- (a) sun screens;
- (b) pergolas;
- (c) louvres;
- (d) green facades; or

(e) openable walls.

**PO 28.3**

Balconies are of sufficient size and depth to accommodate outdoor seating and promote indoor / outdoor living.

**DTS / DPF 28.3**

Balconies open directly from a habitable room and incorporate:

- (a) a minimum dimension of 2m or more and are well proportioned to accommodate a table and 2 chairs;  
or
- (b) a minimum dimension of 2.4m and are well proportioned to accommodate a table and 4 chairs.

**PO 28.4**

Dwellings are provided with sufficient space for storage to meet likely occupant needs.

**DTS / DPF 28.4**

Dwellings (not including student accommodation or serviced apartments) are provided with storage at the following rates:

- (a) studio: 6m<sup>3</sup> or more;
- (b) 1 bedroom dwelling / apartment: 8m<sup>3</sup> or more;
- (c) bedroom dwelling / apartment: 10m<sup>3</sup> or more; and
- (d) 3+ bedroom dwelling / apartment: 12m<sup>3</sup>; and
- (e) 50% or more of the storage volume is provided within the dwelling.

**PO 28.5**

Universal design features are incorporated to provide options for people living with disabilities or limited mobility and / or to facilitate ageing in place.

**DTS 28.5**

None are applicable.

Apartment Configuration

**PO 29.1**

Buildings containing in excess of 10 dwellings provide a variety of dwelling sizes and a range in the number of bedrooms per dwelling to contribute to housing diversity.

**DTS / DPF 29.1**

Buildings containing in excess of 10 dwellings provide at least one of each of the following:

- (a) studio (where there is no separate bedroom);
- (b) 1 bedroom dwelling / apartment with a floor area of at least 50m<sup>2</sup>;
- (c) 2 bedroom dwelling / apartment with a floor area of at least 65m<sup>2</sup>; and
- (d) 3+ bedroom dwelling / apartment with a floor area of at least 80m<sup>2</sup>, and any dwelling over 3 bedrooms provides an additional 15m<sup>2</sup> for every additional bedroom.

**PO 29.2**

Dwellings located on the ground floor of multi-level buildings with 3 or more bedrooms have the windows of their habitable rooms overlooking internal courtyard space or other public space, where possible.

**DTS 29.2**

None are applicable.

## Common Areas

### PO 30.1

The size of lifts, lobbies and corridors is sufficient to accommodate movement of bicycles, strollers, mobility aids and visitor waiting areas.

### DTS / DPF 30.1

Common corridor or circulation areas:

- (a) have a minimum ceiling height of 2.7m;
- (b) provide access to no more than 8 dwellings; and
- (c) incorporate a wider section of apartment entries where the corridors exceed 12m in length from a core.

## GROUP DWELLINGS, RESIDENTIAL FLAT BUILDINGS AND BATTLE-AXE DEVELOPMENT

### Amenity

### PO 31.1

Dwellings are of a suitable size to provide high standard of amenity for occupants.

### DTS / DPF 31.1

Dwellings have a minimum internal floor area in accordance with the following table:

| <b>Bedrooms</b>                             | <b>Minimum-internal-floor-area</b>   |
|---|--|
| Studio (where there is no separate bedroom) | 35m <sup>2</sup>   |
| 1-bed                                       | 50m <sup>2</sup>   |
| 2-bed                                       | 65m <sup>2</sup>   |
| 3+ bed                                      | 80m <sup>2</sup> , and any dwelling over 3 bedrooms provides an additional 15m <sup>2</sup> for every additional bedroom |

### PO 31.2

The orientation and siting of buildings minimises impacts on the amenity, outlook and privacy of occupants and neighbours.

### DTS / DPF 31.1

None are applicable.

### PO 31.3

Development maximises the number of dwellings that face public open space and public streets and limits dwellings oriented towards neighbouring properties.

### DTS 31.3

None are applicable.

## Communal Open Space

### **PO 32.1**

Communal open space provided where private open space provision is inadequate to meet the needs of occupants or where the nature of the development is such that private open space is not ordinarily provided.

### **DTS 32.1**

None are applicable.

## Car parking, access and manoeuvrability

### **PO 33.1**

Driveways and access points are designed and distributed to optimise the provision of on-street visitor parking (where on-street parking is appropriate).

### **DTS / DPF 33.1**

Where on-street parking is available directly adjacent the site, parking is retained in accordance with the following requirements:

- (a) 1 on-street car park per 3 proposed dwellings (rounded up to the nearest whole number); and
- (b) minimum car park length of 6m.

### **PO 33.2**

The number of vehicular access points onto public roads is minimised to reduce interruption of the footpath and positively contribute to public safety and walkability.

### **DTS / DPF 33.2**

Access to group dwellings or dwellings within a residential flat building provided via a single common driveway.

### **PO 33.3**

Driveways, access points, access tracks and parking areas are designed and constructed to allow adequate movement and manoeuvrability of the types of vehicles that are reasonably anticipated.

### **DTS / DPF 33.3**

Battle-axe driveways and driveways that service more than one dwelling satisfy the following:

- (a) a width of 3m or more;
- (b) for driveways servicing three or more dwellings which exceed 30m in length, incorporate a least one vehicle passing point with a width of 5m or more and a length of 6m or more, and an additional passing point at least every 30m thereafter;
- (c) locate the passing point in (b) within 12m of the primary street boundary; and
- (d) a width of 5m or more for at least the first 6m from the primary street boundary where located on an arterial road.

### **PO 33.4**

Driveways that service more than one dwelling are designed to allow passenger vehicles to enter and exit the site in a safe and convenient manner.

### **DTS / DPF 33.4**

Driveways providing access to more than one dwelling allow a B85 passenger vehicle to enter and exit all dedicated car parks and garages in a forward direction without requiring more than a 2-point-turn manoeuvre.

### **PO 33.5**

Dwellings are adequately separated from common driveways and manoeuvring areas.

**DTS/DPF 33.5**

Dwellings are at least 1.5m from any vehicle movement path required to achieve DTS 34.3.

Landscaping

**PO 34.1**

Landscaping is provided between dwellings and common driveways to improve the outlook for occupants and improve the appearance of common areas.

**DTS/ DPF 34.1**

Other than where located directly in front of a garage or directly adjacent a building entry door, soft landscaping with a minimum dimension of 1m is provided between a dwelling and common driveway.

**PO 34.2**

Landscaping is provided that improves the appearance of common driveways.

**DTS / DPF 34.2**

Where a common driveway is located directly adjacent the side or rear boundary of the site, soft landscaping with a minimum dimension of 1m is provided between the driveway and site boundary (excluding along the perimeter of a passing point required in DTS 34.3).

Site Facilities / Waste Storage

**PO 35.1**

Provision is made for suitable mailbox facilities close to the major pedestrian entry to the site or conveniently located considering the nature of accommodation and mobility of occupants.

**DTS 35.1**

None are applicable.

**PO 35.2**

Provision is made for suitable external clothes drying facilities.

**DTS 35.2**

None are applicable.

**PO 35.3**

Provision is made for suitable household waste and recyclable material storage facilities conveniently located away, or screened, from public view.

**DTS 35.3**

None are applicable.

**PO 35.4**

Waste and recyclable material storage areas are located away from dwellings.

**DTS / DPF 35.4**

Dedicated waste and recyclable material storage areas are located at least 3m from any habitable room window.

**PO 35.5**

Provision is made for on-site waste collection where 10 or more bins are to be collected at any one time.

**DTS 35.5**

None are applicable.

## SUPPORTED ACCOMMODATION, HOUSING FOR AGED PERSONS, AND PEOPLE WITH DISABILITIES

### Siting and Configuration

#### **PO 36.1**

Supported accommodation and housing for aged persons and people with disabilities located where on-site movement of residents is not unduly restricted by the slope of the land.

#### **DTS 36.1**

None are applicable.

### Movement and Access

#### **PO 37.1**

Development designed to support safe and convenient access and movement for residents by providing:

- (a) ground-level access or lifted access to all units;
- (b) level entry porches, ramps, paths, driveways, passenger loading areas and areas adjacent to footpaths that allow for the passing of wheelchairs and resting places;
- (c) car parks with gradients no steeper than 1-in-40, and of sufficient area to provide for wheelchair manoeuvrability; and
- (d) kerb ramps at pedestrian crossing points.

#### **DTS 37.1**

None are applicable.

### Communal Open Space

#### **PO 38.1**

Development designed to provide attractive, convenient and comfortable indoor and outdoor communal areas to be used by residents and visitors alike.

#### **DTS 38.1**

None are applicable.

#### **PO 38.2**

Communal open space provided where private open space provision is inadequate to meet the needs of occupants or where the nature of the development is such that private open space is not ordinarily provided (such as supported accommodation).

#### **DTS 38.2**

None are applicable.

### Site Facilities / Waste Storage

#### **PO 39.1**

Development designed to provide storage areas for personal items and specialised equipment such as small electric powered vehicles, including facilities for the recharging of small electric powered vehicles.

#### **DTS 39.1**

None are applicable.

#### **PO 39.2**

Provision is made for suitable mailbox facilities close to the major pedestrian entry to the site or conveniently located considering the nature of accommodation and mobility of occupants.

#### **DTS 39.2**

None are applicable.

**PO 39.3**

Provision is made for suitable external clothes drying facilities.

**DTS 39.3**

None are applicable.

**PO 39.4**

Provision is made for suitable household waste and recyclable material storage facilities conveniently located away, or screened, from view.

**DTS 39.4**

None are applicable.

**PO 39.5**

Waste and recyclable material storage areas are located away from dwellings.

**DTS / DPF 39.5**

Dedicated waste and recyclable material storage areas are located at least 3m from any habitable room window.

**PO 39.6**

Provision is made for on-site waste collection where 10 or more bins are to be collected at any one time.

**DTS 39.6**

None are applicable.

**PO 39.7**

Services including gas and water meters conveniently located and screened from public view.

**DTS 39.7**

None are applicable.

**STUDENT ACCOMMODATION****PO 40.1**

Student accommodation is designed to provide safe, secure, attractive, convenient and comfortable living conditions for residents, including an internal layout and facilities that are designed to provide sufficient space and amenity for the requirements of student life and promote social interaction. DTS / DPF 41.1

Student accommodation provides:

- (a) a range of living options that meet a variety of accommodation needs, such as one bedroom, two bedroom and disability access units;
- (b) common or shared facilities to enable a more efficient use of space, including:
  - i. shared cooking, laundry and external drying facilities;
  - ii. internal and external communal and private open space provided in accordance with Design in Urban Areas Table 1 - Outdoor Open Space;
  - iii. common storage facilities at the rate of 8 cubic metres for every 2 dwellings or students;
  - iv. common on-site parking to meet anticipated demand in accordance with Transport, Access and Parking Table 1 - Off-street Car Parking Requirements ; and
  - v. secure and sheltered bicycle parking at the rate of one space for every 2 students.

**PO 40.2**

Student accommodation designed to provide easy adaptation of the building to accommodate an alternative use of the building in the event it is no longer required for student housing.

#### **DTS 40.2**

None are applicable.

### **ALL NON-RESIDENTIAL DEVELOPMENT**

Water Sensitive Design

#### **PO 41.1**

Development likely to result in risk of export of sediment, suspended solids, organic matter, nutrients, oil and grease include stormwater management systems designed to minimise pollutants entering stormwater.

#### **DTS/DPF 41.1**

Development includes stormwater management systems designed to achieve the following gross pollutant outcomes:

- (a) 80 per cent reduction in average annual total suspended solids;
- (b) 60 per cent reduction in average annual total phosphorus;
- (c) 45 per cent reduction in average annual total nitrogen;
- (d) 90 per cent reduction of litter/gross pollutants compared to untreated stormwater runoff; and
- (e) no visible oils/grease for flows up to the 1-in-3 month average return interval flood peak flow.

#### **PO 41.2**

Water discharged from a development site to be of a physical, chemical and biological condition equivalent to or better than its pre-developed state.

#### **DTS 41.2**

None are applicable.

#### **PO 41.3**

Development includes stormwater management systems to mitigate peak flows and manage the rate and duration of stormwater discharges from the site to ensure the carrying capacities of downstream systems are not overloaded.

#### **DTS / DPF 41.3**

Development includes stormwater management systems that:

- (a) maintain a pre-development peak flow rate from the site, based upon a 0.35 runoff coefficient for the 20-year ARI (5% AEP) 30 minute storm, unless a lower performance measure is specified in an approved catchment based Stormwater Management Plan;
- (b) maintains the stormwater runoff time to peak to match that of the pre-development; and
- (c) manages up to and including the 100-year ARI flood event (1% AEP) to avoid flooding of buildings.

Wash-down and Waste Loading and Unloading

#### **PO 42.1**

Areas for activities including loading and unloading, storage of waste refuse bins in commercial and industrial development or wash-down areas used for the cleaning of vehicles, plant or equipment that are:

- (a) designed to contain all wastewater likely to pollute stormwater within a bunded and roofed area to exclude the entry of external surface stormwater run-off;
- (b) paved with an impervious material to facilitate wastewater collection;
- (c) of sufficient size to prevent 'splash-out' or 'over-spray' of wastewater from the wash-down area; and
- (d) designed to drain wastewater to either:
  - i. a treatment device such as a sediment trap and coalescing plate oil separator with subsequent disposal to a sewer, private or Community Wastewater Management Scheme; or

- ii. a holding tank and its subsequent removal off-site on a regular basis.

**DTS 42.1**

None are applicable.

Table 1 - Outdoor Open Space

| Dwelling Type  | Dwelling / Site Configuration                     | Minimum Rate   |
|--|---|--|
| Detached dwelling<br>Semi-detached dwelling<br>Row dwelling<br>Group dwelling                                  | Site area >1,000m <sup>2</sup>                    | Total area: 20% of total site area<br>Adjacent to habitable room: 10% total site area / minimum dimension 4m.                            |
|  | Site area 500m <sup>2</sup> – 1,000m <sup>2</sup> | Total area: 80m <sup>2</sup><br>Adjacent to habitable room: 24m <sup>2</sup> / minimum dimension 4m.                                     |
|  | Site area 300m <sup>2</sup> - 500m <sup>2</sup>   | Total area: 60m <sup>2</sup><br>Adjacent to habitable room: 16m <sup>2</sup> / minimum dimension 4m.                                     |
|  | Site area <300m <sup>2</sup>                      | Total area: 24m <sup>2</sup><br>Adjacent to habitable room: 16m <sup>2</sup> / minimum dimension 3m                                      |
| Cabin or caravan (permanently fixed to the ground) in a Residential Park Zone or Caravan and Tourist Park Zone |   | Total area: 16m <sup>2</sup> , which may be used as second car parking space, provided on each site intended for residential occupation. |
| Apartments   | Dwellings at ground level:                        |  |
|  | - All types                                       | 15m <sup>2</sup> / minimum dimension 3m  |
|  | Dwellings located above ground level:             |  |
|  | - Studio  | 4m <sup>2</sup> / minimum dimension 1.8m   |
|  | - One bedroom dwelling                            | 8m <sup>2</sup> / minimum dimension 2.1m   |
|  | - Two bedroom dwelling                            | 11m <sup>2</sup> / minimum dimension 2.4m  |
| - Three + bedroom dwelling   | 15 m <sup>2</sup> / minimum dimension 2.6m        |  |

## Design in Rural Areas

### Assessment Provisions (AP)

#### Desired Outcome (DO)

##### DO 1

Development that is:

- (a) contextual – by considering, recognising and carefully responding to its natural surroundings and positively contributing to the character of the immediate area;
- (b) durable – fit for purpose, adaptable and long lasting;
- (c) inclusive – by integrating landscape design to optimise pedestrian and cyclist usability, privacy and equitable access, and also promote the provision of quality spaces integrated with the public realm that can be used for access and recreation and help optimise security and safety both internally and within the public realm, for occupants and visitors alike; and
- (d) sustainable – by integrating sustainable techniques into the design and siting of development and landscaping to improve community health, urban heat, water management, environmental performance, biodiversity and local amenity and to minimise energy consumption.

### Performance Outcomes and Deemed to Satisfy / Designated Performance Outcome Criteria

#### ALL DEVELOPMENT

##### External Appearance

###### PO 1.1

Buildings that reinforce corners through changes in setback, articulation, materials, colour and massing (including height, width, bulk, roof form and slope).

###### DTS 1.1

None are applicable.

###### PO 1.2

Where zero or minor setbacks are desirable, development provides shelter over footpaths to positively contribute to the walkability and comfort of the public realm.

###### DTS 1.2

None are applicable.

###### PO 1.3

Buildings (other than ancillary buildings, group dwellings or buildings on a battle-axe allotment) designed so the main façade faces the primary street frontage of the land on which they are situated.

###### DTS 1.3

None are applicable.

###### PO 1.4

Plant, exhaust and intake vents and other technical equipment integrated into the building design to minimise visibility from the public realm and negative impacts on residential amenity by:

- (a) positioning plant and equipment discretely, in unobtrusive locations as viewed from public roads and spaces;
- (b) screening rooftop plant and equipment from view; and

- (c) when located on the roof of non-residential development, locating the plant and equipment as far as practicable from adjacent sensitive land uses.

#### DTS / DPF 1.4

Development does not incorporate any structures that protrude beyond the roofline.

#### PO 1.5

The negative visual impact of outdoor storage, waste management, loading and service areas is minimised by integrating them into the building design and screening them from public view (such as fencing, landscaping and built form) taking into account the form of development contemplated in the relevant zone.

#### DTS 1.5

None are applicable.

#### Safety

#### PO 2.1

Development maximises opportunities for passive surveillance of the public realm by providing clear lines of sight, appropriate lighting and the use of visually permeable screening wherever practicable.

#### DTS 2.1

None are applicable.

#### PO 2.2

Development designed to differentiate public, communal and private areas.

#### DTS 2.2

None are applicable.

#### PO 2.3

Buildings designed with safe, perceptible and direct access from public street frontages and vehicle parking areas.

#### DTS 2.3

None are applicable.

#### PO 2.4

Development at street level designed to maximise opportunities for passive surveillance of adjacent public realm.

#### DTS 2.4

None are applicable.

#### PO 2.5

Common areas and entry points of buildings (such as the foyer areas of residential buildings), and non-residential land uses at street level, maximise passive surveillance from the public realm to the inside of the building at night.

#### DTS 2.5

None are applicable.

#### Landscaping

#### PO 3.1

Landscaped (including trees), permeable open spaces incorporated to:

- (a) minimise heat absorption and reflection;
- (b) maximise shade and shelter;
- (c) maximise stormwater infiltration; and
- (d) enhance the appearance of land and streetscapes.

#### DTS 3.1

None are applicable.

### Environmental Performance

#### PO 4.1

Buildings sited, oriented and designed to maximise natural sunlight access and ventilation to main activity areas, habitable rooms, common areas and open spaces.

#### DTS 4.1

None are applicable.

#### PO 4.2

Buildings sited and designed to maximise passive environmental performance and minimise energy consumption and reliance on mechanical systems, such as heating and cooling.

#### DTS 4.2

None are applicable.

#### PO 4.3

Buildings incorporate climate responsive techniques and features such as building and window orientation, use of eaves, verandahs and shading structures, water harvesting, at ground landscaping, green walls, green roofs and photovoltaic cells.

#### DTS 4.3

None are applicable.

### Water Sensitive Design

#### PO 5.1

Development sited and designed to maintain natural hydrological systems without negatively impacting:

- (a) the quantity and quality of surface and groundwater;
- (b) the depth and directional flow of surface and groundwater; or
- (c) the quality and function of natural springs.

#### DTS 5.1

None are applicable.

### On-site Waste Treatment Systems

#### PO 6.1

Dedicated on-site effluent disposal areas that do not include any areas to be used for, or could be reasonably foreseen to be used for, private open space, driveways or car parking.

#### DTS / DPF 6.1

Effluent disposal drainage areas do not:

- (a) encroach within an area used as private open space or would result in less private open space than that specified in Design in Rural Areas Table 1 - Private Open Space;
- (b) use an area also used as a driveway; and

- (c) encroach within an area used for on-site car parking or would result in less on-site car parking than that specified in Transport, Access and Parking Table 1 - Off-Street Car Parking Requirements.

#### Car parking appearance

##### PO 7.1

Development facing the street designed to minimise the negative impacts of any semi-basement and under-croft car parking on the street scape.

##### DTS / DPF 7.1

The protrusion of undercroft car parks to not exceed 1.2m above finished ground level and screened through appropriate plantings, except in a location or zone where a continuous ground floor façade aligned with the front property boundary is desired.

##### PO 7.2

Vehicle parking areas appropriately located, designed and constructed to minimise impacts on adjacent sensitive receivers through measures such as ensuring they are attractively developed and landscaped, screen fenced, and the like.

##### DTS 7.2

None are applicable.

##### PO 7.3

Pedestrian connections that are safe, legible, direct and accessible are provided between parking areas and the development.

##### DTS 7.3

None are applicable.

##### PO 7.4

Street level vehicle parking areas that are open to the sky are landscaped to provide shade and reduce solar heat absorption and reflection.

##### DTS / DPF 7.4

Vehicle parking areas that are open to the sky and comprise 10 or more car parking spaces, include a shade tree with a mature canopy of 4m diameter spaced for each 10 car parking spaces provided and a landscaped strip on any road frontage of a minimum dimension of 1m.

##### PO 7.5

Vehicle parking areas are landscaped along public frontages, allotment boundaries and between double rows of parking spaces.

##### DTS / DPF 7.5

Vehicle parking areas comprising 10 or more car parking spaces contain a vegetated landscaped strip of a minimum dimension of:

- (a) 1m along all public road frontages and allotment boundaries; and
- (b) 0.6m between double rows of car parking spaces.

##### PO 7.6

Vehicle parking areas and associated driveways are landscaped to shade and positively contribute to amenity.

##### DTS 7.6

None are applicable.

#### PO 7.7

Vehicle parking areas and accessways incorporate integrated stormwater management techniques such as permeable or porous surfaces, infiltration systems, drainage swales or rain gardens that integrate with landscaping requirements.

#### DTS 7.7

None are applicable.

#### Earthworks

##### PO 8.1

Development, including any associated driveways and access tracks, minimise the need for earthworks to limit disturbance to natural topography.

##### DTS / DPF 8.1

Development does not involve either:

- (a) excavation exceeding a vertical height of 1m;
- (b) filling exceeding a vertical height of 1m; or
- (c) a total combined excavation and filling vertical height of 2m or more.

#### Fences and walls

##### PO 9.1

Fences, walls and retaining walls alongside and rear boundaries of sufficient height to maintain privacy and security without unreasonably impacting visual amenity and adjoining land's access to sunlight.

##### DTS 9.1

None are applicable.

##### PO 9.2

Landscaping incorporated on the low side of retaining walls that are visible from public roads and public open space to minimise visual impacts.

##### DTS / DPF 9.2

A vegetated landscaped strip 500mm deep or more is provided against the low side of a retaining wall.

## ALL RESIDENTIAL DEVELOPMENT

#### External appearance

##### PO 10.1

Dwellings incorporate windows along primary street frontages to encourage passive surveillance and make a positive contribution to the streetscape.

##### DTS/DPF 10.1

Each dwelling with a frontage to a public street includes at least one window (or windows) with a total window area of at least 2m<sup>2</sup> facing the primary street, from a habitable room that has minimum room dimension of 2.7m.

##### PO 10.2

Dwellings incorporate entry doors within street frontages to address the street and provide a legible entry point for visitors.

##### DTS/DPF 10.2

Dwellings with a frontage to a public street has the entry door facing the public street.

## Outlook and amenity

### PO 11.1

Primary living rooms have an external outlook to provide a high standard of amenity for occupants.

### DTS / DPF 11.1

Primary living rooms (other than kitchens) incorporate a window with an external outlook towards the street frontage or private open space.

### PO 11.2

Bedrooms separated or shielded from active communal recreation areas, common access areas and vehicle parking areas and access ways to mitigate noise and artificial light intrusion.

### DTS 11.2

None are applicable.

## Ancillary Development

### PO 12.1

Residential ancillary buildings and structures sited and designed to not detract from the streetscape or appearance of buildings on the site or neighbouring properties.

### DTS / DPF 12.1

Residential ancillary buildings and structures:

- (a) are not being constructed, added to or altered so that any part is situation:
  - i. in front of any part of the building line of the dwelling to
  - ii. within 900mm of a boundary of the allotment with a secondary street (if the land has boundaries on two or more roads)
- (b) in the case of a garage or carport, the garage or carport is setback at least 5.5m from the boundary of the primary street;
- (c) not exceeding 7m or 50% of the site frontage (whichever is the lesser) when facing a primary street or secondary street;
- (d) if situated on a boundary (not being a boundary with a primary street or secondary street), a length not exceeding 10m unless:
  - i. a longer wall or structure exists on the adjacent site and is situated on the same allotment boundary; and
  - ii. the proposed wall or structure will be built along the same length of boundary as the existing adjacent wall or structure to the same or lesser extent
- (e) if situated on a boundary of the allotment (not being a boundary with a primary street or secondary street), all walls or structures on the boundary not exceeding 45% of the length of that boundary;
- (f) will not be located within 3m of any other wall along the same boundary unless on an adjacent site on that boundary there is an existing wall of a building that would be adjacent to or abut the proposed wall or structure;
- (g) have a wall height or post height not exceeding 3m above natural ground level;
- (h) have a roof height where no part of the roof is more than 5m above the natural ground level; and
- (i) if clad in sheet metal, is pre-colour treated or painted in a non-reflective colour.

### PO 12.2

Ancillary buildings and structures do not impede on-site functional requirements such as private open space provision, car parking requirements or result in over-development of the site.

#### DTS / DPF 12.2

Ancillary buildings and structures do not result in:

- (a) less private open space than specified in Design in Rural Areas Table 1 – Outdoor Open Space;
- (b) less on-site car parking than specified in Transport, Access and Parking Table 1 - Off-street Car Parking Requirements; and
- (c) the total roofed floor area of all existing or proposed ancillary building(s) or structure(s) exceeding 60m<sup>2</sup>.

#### PO 12.3

Fixed plant and equipment in the form of pumps and/or filtration systems for a swimming pool or spa positioned and/or housed to not cause unreasonable noise nuisance to adjacent sensitive receivers.

#### DTS/DPF 12.3

The pump and/or filtration system is ancillary to a dwelling erected on the same site and is:

- (a) enclosed in a solid acoustic structure that is located at least 5m from the nearest habitable room located on an adjoining allotment; or
- (b) located at least 12m from the nearest habitable room located on an adjoining allotment.

## RESIDENTIAL DEVELOPMENT - 3 BUILDING LEVELS OR LESS

### External appearance

#### PO 13.1

Garaging designed to not detract from the streetscape or appearance of a dwelling.

#### DTS/DPF 13.1

Garages and carports facing a street:

- (a) do not exceed 7m in width or 50% of the sites frontage (whichever is less); and
- (b) are situated so that no part of the garage or carport will be in front of any part of the building line of the dwelling
- (c) are setback at least 5.5m from the boundary of the primary street;
- (d) unless the dwelling has two storeys along the street frontage:
  - i. have single width car parking with a maximum garage door not exceeding 3.5m on sites with a frontage of 12m or less
  - ii. have a garage door not exceeding 50% of the site frontage or 7m (whichever is less) on sites with a frontage greater than 12m.

#### PO 13.2

Dwelling facades make a positive contribution to streetscapes and common areas by providing variation of light and shadow and creating a sense of depth.

#### DTS/DPF 13.2

Each dwelling includes at least 3 of the following design features along each façade facing a public road or common driveway:

- (a) a minimum of 30% of the façade is setback an additional 300mm from the primary building line;
- (b) a porch or portico that projects at least 1m from the building façade that is open on at least 2 sides;
- (c) a balcony that projects from the building façade;
- (d) a verandah that projects at least 1m from the building façade;
- (e) eaves surrounding the dwelling of a minimum 450mm width;
- (f) a minimum 30% of the upper level projects forward from the lower level primary building line.

### PO 13.3

The apparent mass of larger buildings is reduced when viewed from adjoining allotments or public streets.

### DTS/DPF 13.3

Buildings of 2 or more building levels and a length exceeding 20m adjacent a secondary street or side boundary incorporate a step back of the building façade of at least 300mm for a minimum length of 1m, at least every 10m.

### Overlooking / Visual Privacy

#### PO 14.1

Development mitigates direct overlooking of habitable rooms and private open spaces of dwellings.

#### DTS / DPF 14.1

Upper level windows facing side or rear boundaries shared with an allotment put to residential use:

- (a) are permanently obscured to a height of 1.5m above finished floor level that is fixed or not capable of being opened more than 200mm;
- (b) have sill heights greater than or equal to 1.5m above finished floor level; or
- (c) incorporate screening to a height of 1.5m above finished floor level; and
- (d) the building will not have a balcony or terrace on an upper building level, other than where the longest side of that balcony or terrace will face a road (including any road reserve), or reserve (including any land held as open space), and is at least 15m from the private open space of any other dwelling.

### Private Open Space

#### PO 15.1

Dwellings provided with suitable sized areas of usable private open space to meet the needs of occupants.

#### DTS / DPF 15.1

Private open space provided in accordance with Design in Rural Areas Table 1 - Outdoor Open Space.

#### PO 15.2

Private open space positioned to provide convenient access from internal living areas.

#### DTS / DPF 15.2

Private open space is directly accessible from a habitable room, other than a bedroom or study.

#### PO 15.3

Private open space is positioned and designed to:

- (a) provide useable outdoor space that suits the needs of occupants;
- (b) take advantage of desirable orientation and vistas;
- (c) animate street frontages by encouraging activity between buildings and public streets;
- (d) adequately define public and private space where located forward of the building; and
- (e) prolong activity along street frontages by protecting against inclement weather.

#### DTS / DPF 15.3

A portion of the private open space specified in DTS 15.1 can be provided forward of the primary building line where:

- (a) the area is fenced to a maximum height of 1.8m;
- (b) the area incorporates a verandah with a minimum dimension of 1.5m; and
- (c) an area is provided behind the primary building line that has the minimum dimensions identified in DTS 15.1.

## Water Sensitive Design

### PO 16.1

Development creating 5-19 dwellings includes stormwater management systems that minimise the discharge of sediment, suspended solids, organic matter, nutrients, bacteria, litter and other contaminants to the stormwater system, watercourses or other water bodies.

### DTS 16.1

Development creating 5-19 dwellings is accompanied by an approved Stormwater Management Plan that achieves the following stormwater runoff outcomes:

- (a) 80 per cent reduction in average annual total suspended solids;
- (b) 60 per cent reduction in average annual total phosphorus; and
- (c) 45 per cent reduction in average annual total nitrogen.

### PO 16.2

Development creating 5-19 dwellings includes a stormwater management system designed to mitigate peak flows and manage the rate and duration of stormwater discharges from the site to ensure the carrying capacities of downstream systems are not overloaded.

### DTS 16.2

Development creating 5-19 dwellings:

- (a) maintains:
  - i. a pre-development peak flow rate from the site based upon a 0.35 runoff coefficient for the 5-year ARI (18.1% AEP) 30 minute storm; and
  - ii. the stormwater runoff time to peak to match that of the pre-development condition; or
- (b) capture and retain the difference in pre-development runoff volume (based upon a 0.35 runoff coefficient) vs post development runoff volume from the site for a 5-year ARI (18.1% AEP) 30 minute storm; and
- (c) manage site generated stormwater runoff up to and including the 100 –year ARI flood event (1% AEP) to avoid flooding of buildings.

## Car parking, access and manoeuvrability

### PO 17.1

Covered parking spaces are of a size and dimensions to be functional, accessible and convenient.

### DTS / DPF 17.1

Covered car parking spaces:

- (a) where enclosed by fencing or walls, have:
  - i. a minimum internal width of 3.2m and length of 6.0m for a single space;
  - ii. a minimum internal width of 6.0m and length of 6.0m for a double space (side by side); and
  - iii. a minimum internal width of 3.2m and length of 11m for a double space (tandem); or
- (b) where not enclosed by fencing, walls or garage doors, have:
  - i. a minimum width of 3.0m and minimum length of 5.5m for a single space;
  - ii. a minimum width of 5.2m and minimum length of 5.5m for a double (side by side) space; and
  - iii. a minimum width of 3.0m and minimum length of 10.4m for a double (tandem) space.

### PO 17.2

Uncovered parking spaces are of a size and dimensions to be functional, accessible and convenient.

#### DTS / DPF 17.2

Uncovered car parking spaces have a minimum width of 2.4m and a minimum length of 5.5m.

#### PO 17.3

Driveways located and designed to facilitate safe access and egress while maximising land available for street tree planting, landscaped street frontages and on-street parking.

#### DTS / DPF 17.3

Driveways and access points:

- (a) for sites with a frontage to a public road of 12m or less, have a maximum width of 3.2m measured at the property boundary and are the only access point provided on the site; or
- (b) for sites with a frontage to a public road greater than 12m:
  - i. have a maximum width of 6m measured at the property and are the only access point provided on the site; or
  - ii. have a maximum width of 3.2 metres measured at the property boundary and no more than two access points are provided on site.

#### PO 17.4

Vehicle access is safe, convenient, minimises interruption to the operation of public roads and does not interfere with street infrastructure or street trees.

#### DTS / DPF 17.4

Vehicle access to designated car parking spaces:

- (a) is provided via a lawfully existing or authorised driveway or access point or an access point for which consent has been granted as part of an application for the division of land
- (b) where newly proposed, is setback:
  - i. 500mm or more from any street furniture, street pole, infrastructure services pit, or other stormwater or utility infrastructure unless consent is provided from the asset owner;
  - ii. 2m or more from a street tree unless consent is provided from the tree owner;
  - iii. 6m or more from the tangent point of an intersection of 2 or more roads or a pedestrian-actuated crossing.

#### PO 17.5

Driveways are designed to enable safe and convenient vehicle movements from the public road to on-site parking spaces.

#### DTS/ DPF 17.5

Driveways are designed and sited so that:

- (a) the gradient from the place of access on the boundary of the allotment to the finished floor level at the front of the garage or carport when work is completed is not steeper than 1:4 on average; and
- (b) the centre of the driveway at the public road boundary is no more than 25 degree deviation from the centre of the front of the covered car parking space for which it provides vehicle access.

#### PO 17.6

Driveways and access points are designed and distributed to optimise the provision of on-street visitor parking (where on-street parking is appropriate).

#### DTS / DPF 17.6

Where on-street parking is available directly adjacent the site, parking is retained in accordance with the following requirements:

- (a) 1 on-street car park per 3 proposed dwellings (rounded up to the nearest whole number); and
- (b) minimum car park length of 6m.

Waste storage

PO 18.1

Provision is made for the convenient storage of waste bins in a location screened from public view.

DTS / DPF 18.1

Dwellings are provided with:

- (a) an area of 3m<sup>2</sup> or more for the storage of waste (separate from any designated car parking spaces or private open space) is provided behind the building line; and
- (b) a continuous unobstructed path of travel with a minimum width of 800mm between the waste bin storage area and the street.

Design of Transportable Dwellings

PO 19.1

The sub-floor space beneath transportable buildings enclosed to give the appearance of a permanent structure.

DTS 19.1

None are applicable.

## GROUP DWELLINGS, RESIDENTIAL FLAT BUILDINGS AND BATTLE-AXE DEVELOPMENT

Amenity

PO 20.1

Dwellings are of a suitable size to accommodate a layout that is well organised and provides high standard of amenity for occupants.

DTS / DPF 20.1

Dwellings have a minimum internal floor area in accordance with the following table:

| <b>Bedrooms</b> | <b>Minimum-internal-floor-area</b>   |
|-----------------|--|
| 1-bed           | 50m <sup>2</sup>   |
| 2-bed           | 65m <sup>2</sup>   |
| 3-bed           | 80m <sup>2</sup> , and any dwelling over 3 bedrooms provides an additional 15m <sup>2</sup> for every additional bedroom |

PO 20.2

The orientation and siting of buildings minimises impacts on the amenity, outlook and privacy of occupants and neighbours.

DTS 20.2

None are applicable.

### PO 20.3

Development maximises the number of dwellings that face public open space and public streets and limits dwellings oriented to towards neighbouring properties.

### DTS 20.3

None are applicable.

## Communal Open Space

### PO 21.1

Communal open space provided where private open space provision is inadequate to meet the needs of occupants or where the nature of the development is such that private open space is not ordinarily provided.

### DTS 21.1

None are applicable.

## Car parking, access and manoeuvrability

### PO 22.1

Driveways and access points are designed and distributed to optimise the provision of on-street visitor parking (where on-street parking is appropriate).

### DTS / DPF 22.1

Where on-street parking is available directly adjacent the site, parking is retained in accordance with the following requirements:

- (a) 1 on-street car park per 3 proposed dwellings (rounded up to the nearest whole number); and
- (b) minimum car park length of 6m.

### PO 22.2

The number of vehicular access points onto public roads is minimised to reduce interruption of the footpath and positively contribute to public safety and walkability.

### DTS / DPF 22.2

Access to group dwellings or dwellings within a residential flat building provided via a single common driveway.

### PO 22.3

Driveways, access points, access tracks and parking areas are designed and constructed to allow adequate movement and manoeuvrability having regard to the types of vehicles that are reasonably anticipated.

### DTS / DPF 22.3

Driveways that service more than one dwelling have:

- a) a minimum width of 3m;
- b) incorporate a least one vehicle passing point with minimum width of 5m and minimum length of 6m, and an additional passing point at least every 25m thereafter;
- c) locate the passing point in (b) within 12m of the primary street boundary; and
- d) a width of 5m for at least the first 6m from the primary street boundary where located on an arterial road.

### PO 22.4

Residential driveways that service more than one dwelling are designed to allow adequate movement.

#### DTS / DPF 22.4

Where in a battle-axe configuration, a driveway servicing one dwelling to have a minimum width of 3m.

#### PO 22.5

Residential driveways that service more than one dwelling are designed to allow passenger vehicles to enter and exit the site in a safe and convenient manner.

#### DTS / DPF 22.5

Driveways providing access to more than one dwelling allow a B85 passenger vehicle to enter and exit all dedicated car parks and garages in a forward direction without requiring more than a 3-point turn manoeuvre.

#### PO 22.6

Dwellings are adequately separated from common driveways and manoeuvring areas.

#### DTS/DPF 22.6

Dwellings are at least 1.5m from any vehicle movement path required to achieve DTS 21.5.

### Landscaping

#### PO 23.1

Landscaping is provided between dwellings and common driveways to improve the outlook for occupants and improve the appearance of common areas.

#### DTS/ DPF 23.1

Other than where located directly in front of a garage or directly adjacent a building entry door, soft landscaping with a minimum dimension of 1m is provided between a dwelling and common driveway.

#### PO 23.2

Landscaping is provided that improves the appearance of common driveways.

#### DTS / DPF 23.2

Where a common driveway is located directly adjacent the side or rear boundary of the site, soft landscaping with a minimum dimension of 1m is provided between the driveway and site boundary (excluding along the perimeter of a passing point required in DTS 21.3).

### Site Facilities / Waste Storage

#### PO 24.1

Provision is made for suitable mailbox facilities close to the major pedestrian entry to the site or conveniently located considering the nature of accommodation and mobility of occupants.

#### DTS 24.1

None are applicable.

#### PO 24.2

Provision is made for suitable external clothes drying facilities.

#### DTS 24.2

None are applicable.

#### PO 24.3

Provision is made for suitable household waste and recyclable material storage facilities conveniently located from public view.

DTS 24.3

None are applicable.

PO 24.4

Waste and recyclable material storage areas are located away from dwellings.

DTS / DPF 24.4

Dedicated waste and recyclable material storage areas are located at least 3m from any habitable room window.

PO 24.5

Provision is made for on-site waste collection where 10 or more bins are to be collected at any one time.

DTS 24.5

None are applicable.

## SUPPORTED ACCOMMODATION, HOUSING FOR AGED PERSONS, AND PEOPLE WITH DISABILITIES

### Siting and Configuration

PO 25.1

Supported accommodation and housing for aged persons and people with disabilities is located where on-site movement of residents is not unduly restricted by the slope of the land.

DTS 25.1

None are applicable.

### Movement and Access

PO 26.1

Development is designed to support safe and convenient access and movement for residents by providing:

- (a) ground-level access or lifted access to all units;
- (b) level entry porches, ramps, paths, driveways, passenger loading areas and areas adjacent to footpaths that allow for the passing of wheelchairs and resting places;
- (c) car parks with gradients no steeper than 1-in-40, and of sufficient area to provide for wheelchair manoeuvrability; and
- (d) kerb ramps at pedestrian crossing points.

DTS 26.1

None are applicable.

### Communal Open Space

PO 27.1

Development that is designed to provide attractive, convenient and comfortable indoor and outdoor communal areas to be used by residents and visitors alike.

DTS 27.1

None are applicable.

PO 27.2

Communal open space provided where private open space provision is inadequate to meet the needs of occupants or where the nature of the development is such that private open space is not ordinarily provided (such as supported accommodation).

DTS 27.2

None are applicable.

Site Facilities / Waste Storage

PO 28.1

Development that is designed to provide storage areas for personal items and specialised equipment such as small electric powered vehicles, including facilities for the recharging of small electric powered vehicles.

DTS 28.1

None are applicable.

PO 28.2

Provision is made for suitable mailbox facilities close to the major pedestrian entry to the site or conveniently located considering the nature of accommodation and mobility of occupants.

DTS 28.2

None are applicable.

PO 28.3

Provision is made for suitable external clothes drying facilities.

DTS 28.3

None are applicable.

PO 28.4

Provision is made for suitable household waste and recyclable material storage facilities conveniently located and screened from public view.

DTS 28.4

None are applicable.

PO 28.5

Waste and recyclable material storage areas are located away from dwellings.

DTS / DPF 28.5

Dedicated waste and recyclable material storage areas are located at least 3m from any habitable room window.

PO 28.6

Provision is made for on-site waste collection where 10 or more bins are to be collected at any one time.

DTS 28.6

None are applicable.

PO 28.7

Services including gas and water meters conveniently located and screened from public view.

DTS 28.7

None are applicable.

## ALL NON-RESIDENTIAL DEVELOPMENT

### Water Sensitive Design

#### PO 29.1

Development likely to result in significant risk of export of litter, oil or grease should include stormwater management systems designed to minimise pollutants entering stormwater.

#### DTS/DPF 29.1

Development likely to result in significant risk of export of litter, oil or grease should include stormwater management systems designed to achieve the following gross pollutant outcomes:

- (a) 90 per cent reduction of litter/gross pollutants compared to untreated stormwater runoff; and
- (b) no visible oils/grease for flows up to the 1-in-3 month average return interval flood peak flow.

#### PO 29.2

Water discharged from a development site to be of a physical, chemical and biological condition equivalent to or better than its pre-developed state.

#### DTS 29.2

None are applicable.

### Wash-down and Waste Loading and Unloading

#### PO 30.1

Areas for activities including loading and unloading, storage of waste refuse bins in commercial and industrial development or wash-down areas used for the cleaning of vehicles, plant or equipment that are:

- (a) designed to contain all wastewater likely to pollute stormwater within a bunded and roofed area to exclude the entry of external surface stormwater run-off;
- (b) paved with an impervious material to facilitate wastewater collection;
- (c) of sufficient size to prevent 'splash-out' or 'over-spray' of wastewater from the wash-down area; and
- (d) designed to drain wastewater to either:
  - i. a treatment device such as a sediment trap and coalescing plate oil separator with subsequent disposal to a sewer, private or Community Wastewater Management Scheme; or
  - ii. a holding tank and its subsequent removal off-site on a regular basis.

#### DTS 30.1

None are applicable.

Table 1 - Outdoor Open Space

| Dwelling Type          | Dwelling / Site Configuration            | Minimum Rate  |
|------------------------|--|---|
| Detached dwelling      | Site area 1,000m <sup>2</sup> or greater | Total area: 20% of total site area                                      |
| Semi-detached dwelling |  | Adjacent to habitable room: 10% total site area / minimum dimension 4m. |
| Row dwelling           |  |   |

| Dwelling Type  | Dwelling / Site Configuration                       | Minimum Rate   |
|--|---|--|
| Group dwelling   | Site area 500m <sup>2</sup> to <1,000m <sup>2</sup> | Total area: 80m <sup>2</sup><br>Adjacent to habitable room: 24m <sup>2</sup> / minimum dimension 4m.                                     |
|  | Site area 300m <sup>2</sup> to <500m <sup>2</sup>   | Total area: 60m <sup>2</sup><br>Adjacent to habitable room: 16m <sup>2</sup> / minimum dimension 4m.                                     |
|  | Site area <300m <sup>2</sup>                        | Total area: 24m <sup>2</sup><br>Adjacent to habitable room: 16m <sup>2</sup> / minimum dimension 3m                                      |
| Cabin or caravan (permanently fixed to the ground) in a Residential Park Zone or Caravan and Tourist Park Zone |   | Total area: 16m <sup>2</sup> , which may be used as second car parking space, provided on each site intended for residential occupation. |

## Forestry

### Assessment Provisions (AP)

#### Desired Outcomes (DO)

##### DO 1

Commercial forestry designed and sited to maximise economic benefits whilst managing potential negative impacts on the environment, transport networks, surrounding land uses and landscapes.

#### Performance Outcomes and Deemed to Satisfy / Designated Performance Outcome Criteria

##### Siting

###### PO 1.1

Commercial forestry plantations established where there is no clearance of valued trees or substantially intact strata of native vegetation, or where there is no detrimental effect on the physical environment or scenic quality of the rural landscape.

###### DTS/DPF 1.1

None are applicable.

#### PO 1.2

Commercial forestry plantations established on slopes that are stable to minimise the risk of soil erosion.

#### DTS/DPF 1.2

Commercial forestry plantations are not located on land with a slope exceeding 20% (1-in-5).

#### PO 1.3

Commercial forestry plantations and operations associated with their establishment, management and harvesting appropriately setback from a sensitive receiver to minimise fire risk and noise disturbance.

#### DTS/DPF 1.3

Commercial forestry plantations and operations associated with their establishment, management and harvesting are setback 50m or more from any sensitive receiver.

#### PO 1.4

Commercial forestry plantations separated from reserves gazetted under the National Parks and Wildlife Act 1972 and/or Wilderness Protection Act 1992 to minimise fire risk and potential for weed infestation.

#### DTS/DPF 1.4

Commercial forestry plantations and operations associated with their establishment, management and harvesting are setback 50m or more of a reserve gazetted under the *National Parks and Wildlife Act 1972* or *Wilderness Protection Act 1992*.

## Water Protection

#### PO 2.1

Commercial forestry plantations incorporate artificial drainage lines (ie culverts, runoffs and constructed drains) integrated with natural drainage lines to minimise concentrated water flows onto or from plantation areas.

#### DTS/DPF 2.1

None are applicable

#### PO 2.2

Appropriate siting, layout and design measures adopted to minimise the impact of commercial forestry plantations on surface water resources.

#### DTS/DPF 2.2

Commercial forestry plantations:

- (a) do not involve cultivation (excluding spot cultivation) in drainage lines;
- (b) are setback 20m or more from the banks of any major watercourse (a third order or higher watercourse), lake, reservoir, wetland and sinkhole (direct connection to aquifer); and
- (c) are setback 10m or more from the banks of any first or second order watercourse or sinkhole (no-direct connection to aquifer).

## Fire Management

#### PO 3.1

Commercial forestry plantations incorporate appropriate firebreaks and fire management design elements.

### DTS/DPF 3.1

Commercial forestry plantations provide:

- (a) 7m or more wide external boundary firebreaks for plantations of 40ha or less;
- (b) 10m or more wide external boundary firebreaks for plantations of between 40ha and 100ha; or
- (c) 20m or more wide external boundary firebreaks, or 10m with an additional 10m or more of fuel-reduced plantation, for plantations of 100ha or greater.

### PO 3.2

Commercial forestry plantations incorporate appropriate fire management access tracks.

### DTS/DPF 3.2

Commercial forestry plantation fire management access tracks:

- (a) are incorporated within all firebreaks;
- (b) are 7m or more wide with a vertical clearance of 4m or more;
- (c) are aligned to provide straight through access at junctions, or if they are a no through access track are appropriately signposted and provide suitable turnaround areas for fire-fighting vehicles; and
- (d) partition the plantation into units 40ha or less in area.

## Power-line Clearances

### PO 4.1

Commercial forestry plantations achieve and maintain appropriate clearances from aboveground power-lines.

### DTS/DPF 4.1

Commercial forestry plantations incorporating trees with an expected mature height of greater than 6m meet the clearance requirements listed in the following table:

| Voltage of transmission line | Tower or Pole | Minimum horizontal clearance distance between plantings and transmission lines |
|------------------------------|---------------|--|
| 500 kV                       | Tower         | 38m  |
| 275 kV                       | Tower         | 25m  |
| 132 kV                       | Tower         | 30m  |
| 132 kV                       | Pole          | 20m  |
| 66 kV                        | Pole          | 20m  |
| Less than 66 kV              | Pole          | 20m  |

## Housing Renewal

Assessment Provisions (AP)

Desired Outcomes (DO)

DO 1

Renewed residential environments to replace older social housing, provide new social housing infrastructure and other housing options and tenures to enhance the residential amenity of the local area.

Performance Outcomes and Deemed to Satisfy / Designated Performance Outcome Criteria

### Land Use and Intensity

PO 1.1

Residential development provides a range of housing choices.

DTS/DPF 1.1

Development comprises:

- (a) detached dwellings;
- (b) semi-detached dwellings;
- (c) row dwellings;
- (d) group dwellings; or
- (e) residential flat buildings, except where incorporating above-ground dwellings.

PO 1.2

Higher density housing options (such as medium rise residential flat buildings) provided in close proximity to public transit, open space or activity centres.

DTS/DPF 1.2

None are applicable.

### Building Height

PO 2.1

Buildings contribute to a low-to-medium rise suburban character.

DTS/DPF 2.1

Building height (excluding garages, carports and outbuildings) does not exceed 3 building levels and 12m and wall height does not exceed 9m, except in the case of a gable end.

PO 2.2

Medium rise buildings in locations close to public transit, centres or open space.

DTS/DPF 2.2

None are applicable.

PO 2.3

Medium rise residential flat buildings located within or at the interface with zones which restrict heights to a maximum of 2 storeys transition down in scale and height towards the periphery (side and rear boundaries) of the site.

DTS/DPF 2.3

None are applicable.

## Primary Street Setback

### PO 3.1

Buildings are set back from the primary street boundary in a manner which is compatible with the desired outcomes of the area.

### DTS/DPF 3.1

Buildings (excluding any balcony, verandah, porch, awning or similar structure) are set back from the primary street boundary 3m or more.

## Secondary Street Setback

### PO 4.1

Buildings are set back from secondary street boundaries to maintain separation between building walls and public streets and contribute to a suburban streetscape character.

### DTS/DPF 4.1

Buildings are set back from any secondary street allotment boundary:

- (a) 900mm or more for any wall up to 6 metres in height
- (b) 2m or more for any wall above 6 metres in height.

## Boundary Walls

### PO 5.1

Boundary walls are limited in height and length to manage visual impacts and access to natural light and ventilation.

### DTS/DPF 5.1

Except where the dwelling is located on a central site within a row dwelling or terrace arrangement, dwellings with side boundary walls are sited on only one side boundary and either:

- (a) adjoin or abut a boundary wall of a building on adjoining land for the same length and height; or do not exceed the following:
  - i. 3m in wall height;
  - ii. 10m in length; and
- (b) setback 3m or more from any other existing or proposed boundary walls on the subject land.

### PO 5.2

Dwellings in a semi-detached, row or terrace arrangement maintain space between buildings consistent with a suburban streetscape character.

### DTS/DPF5.2

Dwellings in a semi-detached or row arrangement are setback 900mm or more from side boundaries shared with allotments outside the development site, except for a carport or garage.

## Side Boundary Setback

### PO 6.1

Buildings are set back from side boundaries to provide:

- (a) separation between dwellings in a way that contributes to a suburban character; and
- (b) access to natural light and ventilation for neighbours.

#### DTS/DPF 6.1

Other than walls located on a side boundary, buildings are set back from side boundaries:

- (a) 900mm or more where the wall is up to 3m measured from the top of the footings;
- (b) other than for a wall facing a southern side boundary, 900mm or more plus 1/3 of the wall height above 3m measured from the top of the footings; and
- (c) at 1.9m or more plus 1/3 of the wall height above 3m measured from the top of the footings for walls facing a southern side boundary.

### Rear Boundary Setback

#### PO 7.1

Buildings are set back from rear boundaries to provide:

- (a) separation between dwellings in a way that contributes to a suburban character;
- (b) access to natural light and ventilation for neighbours;
- (c) private opens space; and
- (d) space for landscaping and vegetation.

#### DTS/DPF 7.1

Dwellings are set back from rear boundary:

- (a) 3m or more for the first building level; and
- (b) 5m or more for any subsequent building level.

### Façade design

#### PO 8.1

Dwelling facades facing public streets and common driveways make a positive contribution to the streetscape.

#### DTS/DPF 8.1

Each dwelling includes at least 2 of the following design features along each façade facing a public road or common driveway:

- (a) a minimum of 25% of the façade is setback an additional 300mm
- (b) a porch or portico that projects at 1m or more from the building façade and is open on least 2 sides
- (c) a balcony that projects 1.0m or more from the building façade
- (d) a verandah that projects at least 1m from the building façade
- (e) eaves surrounding the dwelling of a minimum 450mm width
- (f) a minimum 50% of the upper level projects forward a minimum 300mm from the lower level building line.

#### PO 8.2

Dwellings incorporate windows along primary street frontages to encourage passive surveillance and make a positive contribution to the streetscape.

#### DTS/DPF 8.2

Each dwelling with a frontage to a public street or common driveway includes at least one window with a total window area of at least 2m<sup>2</sup> facing the primary street or common driveway, from a habitable room that has minimum room dimension of 2.7m.

#### PO 8.3

The visual bulk of larger buildings is reduced when viewed from adjoining allotments or public streets, such as through the incorporation of windows, articulation, building materials and textures.

#### DTS/DPF 8.3

None are applicable.

#### PO 8.4

Built form considers local context and provides a quality design response through scale, massing, materials, colours and architectural expression.

#### DTS/DPF 8.4

None are applicable.

#### PO 8.5

Entrances to apartment buildings are:

- (a) oriented towards the street
- (b) visible and easily identifiable from the street
- (c) designed to include a common mail box structure.

#### DTS/DPF 8.5

None are applicable.

### Outlook and amenity

#### PO 9.1

Primary living rooms have an external outlook to provide a high standard of internal amenity for occupants.

#### DTS/DPF 9.1

None are applicable.

#### PO 9.2

Ground level bedrooms separated or shielded from active communal recreation areas, common access areas and vehicle parking areas and access ways to mitigate noise and artificial light intrusion.

#### DTS/DPF 9.2

None are applicable.

### Private Open Space

#### PO 10.1

Dwellings provided with suitable sized areas of usable private open space to meet the needs of occupants.

#### DTS/DPF 10.1

Private open space provided in accordance with the following table:

| Dwelling-site-size <sup>a</sup>     |                             | Minimum area of POS <sup>x</sup> | Minimum <sup>¶</sup> dimension <sup>x</sup> |
|-------------------------------------|-----------------------------|----------------------------------|---|
| > 500m <sup>2</sup> <sup>x</sup>    |                             | 80m <sup>2</sup> <sup>x</sup>    | 4m <sup>x</sup>                             |
| 300--500m <sup>2</sup> <sup>x</sup> |                             | 60m <sup>2</sup> <sup>x</sup>    | 4m <sup>x</sup>                             |
| 200--300m <sup>2</sup> <sup>x</sup> |                             | 24m <sup>2</sup> <sup>x</sup>    | 3m <sup>x</sup>                             |
| <200 <sup>x</sup>                   | Three+ bedroom <sup>x</sup> | 15·m <sup>2</sup> <sup>x</sup>   | 3m <sup>x</sup>                             |
|                                     | Two bedroom <sup>x</sup>    | 11·m <sup>2</sup> <sup>x</sup>   | 2.5m <sup>x</sup>                           |
|                                     | One bedroom <sup>x</sup>    | 8·m <sup>2</sup> <sup>x</sup>    | 2m <sup>x</sup>                             |
|                                     | Studio <sup>x</sup>         | 8·m <sup>2</sup> <sup>x</sup>    | 2m <sup>x</sup>                             |

#### PO 10.2

Private open space positioned to provide convenient access from internal living areas.

#### DTS/DPF 10.2

At least 50% of the required area of private open space is accessible from a habitable room, other than a study or bedroom.

#### PO 10.3

Private open space is positioned and designed to:

- (a) provide useable outdoor space that suits the needs of occupants;
- (b) take advantage of desirable orientation and vistas; and
- (c) adequately define public and private space.

#### DTS/DPF 10.3

None are applicable.

### Visual privacy

#### PO 11.1

Development mitigates direct overlooking of habitable rooms and private open spaces of adjacent dwellings.

#### DTS/DPF11.1

Upper level windows facing side or rear boundaries shared with an allotment put to residential use:

- (a) are permanently obscured to a height of 1.5m above finished floor level that is fixed or not capable of being opened more than 200mm;
- (b) have sill heights greater than or equal to 1.5m above finished floor level; or
- (c) incorporate screening to a height of 1.5m above finished floor level.

#### PO 11.2

Balconies are sited and screened to minimise direct overlooking of adjacent dwellings.

#### DTS/DPF11.2

The building:

- (a) will not have a balcony on an upper storey; or
- (b) the longest side of a balcony faces a road (including any road reserve) or reserve (including any land held as open space); and

- (c) the balcony is 15m or more from the private open space of any other dwelling.

## Landscaping

### PO 12.1

Soft landscaping incorporated into development to:

- (a) minimise heat absorption and reflection;
- (b) maximise shade and shelter;
- (c) maximise stormwater infiltration and biodiversity; and
- (d) enhance the appearance of land and streetscapes.

### DTS/DPF 12.1

Residential development incorporates areas for soft landscaping with a minimum dimension of 0.5 metres provided in accordance with the following:

| Dwelling-site-area-(or-in-the-case-of-residential-flat-building-or-group-dwellings,-average-site-area)-(m <sup>2</sup> ) | %-of-site- |
|--|------------|
| <200   | 15%        |
| 201--450   | 20%        |
| >450   | 25%        |

(a)

; and

- (b) 25% of land between the road boundary and the primary building line is provided for soft landscaping with a minimum dimension of 1.5 metres.

## Water Sensitive Design

### PO 13.1

Residential development designed to capture and re-use stormwater to maximise conservation of water resources, manage peak stormwater runoff flows and volume and manage runoff quality to maintain, as close as is practical, pre development conditions.

### DTS/DPF 13.1

None are applicable.

## Parking

### PO 14.1

On-site car parking provided to meet the anticipated demand of residents, with less on-site parking appropriate in areas in close proximity to public transport stations.

### DTS/DPF 14.1

On-site car parking is provided at the following rates:

- (a) 2 or less bedroom dwelling – 1 car parking space, covered or able to be covered (without impinging on building setbacks);
- (b) 3 or more bedroom dwelling - 2 car parking spaces, 1 of which is covered or able to be covered (without impinging on building setbacks).

#### PO 14.2

Covered car parking spaces are of dimensions to be functional, accessible and convenient.

#### DTS/DPF 14.2

Covered car parking spaces:

(a) where enclosed by fencing or walls, have:

- i. a minimum internal width of 3.2m and length of 6.0m for a single garage;
- ii. a minimum internal width of 6.0m and length of 6.0m for a double garage (side by side);  
and
- iii. a minimum internal width of 3.2m and length of 11m for a double garage (tandem); or

(b) carports not enclosed by fencing, walls or garage doors, have:

- i. a minimum width of 3.0m and minimum length of 5.5m for a single width carport;
- ii. a minimum width of 5.2m and minimum length of 5.5m for double carports (side by side);  
and
- iii. a minimum width of 3.0m and minimum length of 10.4m for double carport (tandem).

#### PO 14.3

Uncovered car parking spaces are of dimensions to be functional, accessible and convenient.

#### DTS/DPF 14.3

Uncovered car parking spaces have a minimum width of 2.4m and minimum length of 5.5m.

#### PO 14.4

Residential flat buildings and group dwelling developments provide sufficient on-site visitor car parking to cater for anticipated demand.

#### DTS/DPF 14.4

Visitor car parking for group and residential flat buildings incorporating 4 or more dwellings is provided on-site at a minimum ratio of 0.25 car parking spaces per dwelling.

#### PO 14.5

Residential flat buildings provide dedicated areas for bicycle parking

#### DTS/DPF 14.4

Residential flat buildings provide one bicycle parking space per dwelling.

## Overshadowing

#### PO 15.1

Development minimises overshadowing of the private open spaces of adjoining land by ensuring that ground level open space associated with existing residential buildings receive direct sunlight for a minimum of 2 hours between 9am and 3pm on 21 June.

#### DTS/DPF 15.1

None are applicable.

## Waste

#### PO 16.1

Provision is made for the convenient storage of waste bins in a location screened from public view.

#### DTS/DPF 16.1

Dwellings are provided with:

- (a) an area of 3m<sup>2</sup> or more for the storage of waste (separate from any designated car parking spaces or private open space) is provided behind the building line; and
- (b) a continuous unobstructed path of travel with a minimum width of 800mm is provided between the waste storage area and the street.

#### PO 16.2

Residential apartment buildings provide a dedicated area for the on-site storage of waste which is:

- (a) easily and safely accessible for residents and for collection vehicles;
- (b) screened from adjoining land and public roads; and
- (c) of sufficient dimensions to be able to accommodate the waste storage needs of the development considering the intensity and nature of the development and the frequency of collection.

#### DTS/DPF 16.2

None are applicable.

### Vehicle Access

#### PO 17.1

Driveways located and designed to facilitate safe access and egress while maximising land available for street tree planting, landscaped street frontages and on-street parking.

#### DTS/DPF 17.1

None are applicable.

#### PO 17.2

Vehicle access is safe, convenient, minimises interruption to the operation of public roads and does not interfere with street infrastructure or street trees

#### DTS/DPF 17.2

Vehicle access to designated car parking spaces:

- (a) is provided via a lawfully existing or authorised driveway or access point or an access point for which consent has been granted as part of an application for the division of land
- (b) where newly proposed, is setback:
  - i. 500mm or more from any street furniture, street pole, infrastructure services pit, or other stormwater or utility infrastructure unless consent is provided from the asset owner;
  - ii. 2m or more from a street tree unless consent is provided from the tree owner;
  - iii. 6m or more from the tangent point of an intersection of 2 or more roads or a pedestrian-actuated crossing.

#### PO 17.3

Driveways are designed to enable safe and convenient vehicle movements from the public road to on-site parking spaces

#### DTS/DPF/ DPF 17.3

Driveways are designed and sited so that:

- (a) the gradient from the place of access on the boundary of the allotment to the finished floor level at the front of the garage or carport when work is completed is not steeper than 1:4 on average; and
- (b) the centre of the driveway at the public road boundary is no more than 25 degree deviation from the centre of the front of the covered car parking space for which it provides vehicle access.

#### PO 17.4

Driveways and access points are designed and distributed to optimise the provision of on-street visitor parking (where on-street parking is appropriate).

#### DTS/DPF17.4

Where on-street parking is available directly adjacent the site, parking is retained in accordance with the following requirements:

- (a) 1 on-street car park per 3 proposed dwellings (rounded up to the nearest whole number); and
- (b) minimum car park length of 6m.

#### PO 17.5

Driveways, access points, access tracks and parking areas are designed and constructed to allow adequate movement and manoeuvrability having regard to the types of vehicles that are reasonably anticipated.

#### DTS/DPF 17.5

Battle-axe driveways and driveways that service more than one dwelling satisfy the following:

- (a) a width of 3m or more;
- (b) for driveways servicing three or more dwellings which exceed 30m in length, incorporate a least one vehicle passing point with a width of 5m or more and a length of 6m or more, and an additional passing point at least every 30m thereafter;
- (c) locate the passing point in (b) within 12m of the primary street boundary; and
- (d) a width of 5m or more for at least the first 6m from the primary street boundary where located on an arterial road.

#### PO 17.6

Residential driveways that service more than one dwelling are designed to allow passenger vehicles to enter and exit the site in a safe and convenient manner.

#### DTS/DPF 17.6

Driveways providing access to more than one dwelling allow a B85 passenger vehicle to enter and exit all dedicated car parks and garages in a forward direction without requiring more than a 2-point-turn manoeuvre.

#### PO 17.7

Dwellings are adequately separated from common driveways and manoeuvring areas.

#### DTS/DPF 17.7

Dwellings are set back 0.5m or more from any vehicle movement path required to achieve DTS/DPF 18.6.

## Storage

#### PO 18.1

Dwellings are provided with sufficient space for storage to meet likely occupant needs.

#### DTS/DPF 18.1

Storage provided at the following rates:

- (a) 1 bedroom: 6m<sup>3</sup>;
- (b) 2 bedroom: 10m<sup>3</sup>;
- (c) 3+ bedroom: 12m<sup>3</sup>; and

50% or more of the storage volume is provided within the dwelling.

## Earthworks

### PO 19.1

Buildings are designed and sited to minimise alteration of existing landform.

### DTS/DPF 19.1

The development does not involve:

- (a) excavation exceeding a vertical height of 1m;
- (b) filling exceeding a vertical height of 1m; and
- (c) a total combined excavation and filling vertical height exceeding 2m.

## Service connections and infrastructure

### PO 20.1

Dwellings are provided with appropriate service connections and infrastructure.

### DTS/DPF 20.1

The applicant has certified that the site and building:

- (a) has the ability to be connected to a permanent potable water supply;
- (b) has the ability to be connected to a sewerage system, or a waste water control system approved under Public and Environmental Health Act 1987;
- (c) has the ability to be connected to electricity supply;
- (d) has the ability to be connected to an adequate water supply (and pressure) for fire-fighting purposes where located in a Hazard (Bushfire Risk) Overlay; and
- (e) would not be contrary to the Regulations prescribed for the purposes of Section 86 of the Electricity Act 1996.

## Site contamination

### PO 21.1

Development sites are suitable and safe for the intended land use, including remediation where required.

### DTS/DPF 21.1

The applicant has provided a declaration indicating, to the best of his or her knowledge and belief, the allotment is not, and has not been, subject to site contamination as a result of a previous use of the land or a previous activity on the land or in the vicinity of the land.

## Procedural Matters (PM)

### Notification

All development undertaken by:

- i) the South Australian Housing Trust either individually or jointly with other persons or bodies;  
or
- ii) registered Community Housing providers participating in housing renewal programs endorsed by the South Australian Housing Authority

is exempt from notification, except for a residential flat building (apartment building) of 3 storeys or greater.

## Interface between Land Uses

### Assessment Provisions (AP)

| Desired Outcome (DO)  |   |
|---|---|
| <p><b>DO 1</b></p> <p>Development located and designed to mitigate adverse effects on neighbouring and proximate land uses to reduce potential for conflict.</p>  |   |
| Performance Outcome (PO)  | <ul style="list-style-type: none"> <li>• <b>Deemed to Satisfy Criteria (DTS)</b><br/>(required for development to be classified as Deemed-to-Satisfy)</li> <li>• <b>Designated Performance Feature (DPF)</b><br/>(used for development to be assessed on its merits against the applicable policies of the Planning and Design Code)</li> </ul> |
| General Land Use Compatibility  |   |
| <p><b>PO 1.1</b></p> <p>Sensitive receivers designed and sited to protect residents and occupants from adverse impacts generated by lawfully existing land uses and land uses desired in the zone.</p>  | None are applicable.  |
| <p><b>PO 1.2</b></p> <p>Development adjacent to a site containing an existing sensitive receiver or zone primarily intended to accommodate sensitive receivers designed to minimise adverse impacts.</p>  | None are applicable.  |
| Hours of Operation  |   |
| <p><b>PO 2.1</b></p> <p>Non-residential development does not unreasonably impact the amenity of existing sensitive receivers or an adjacent zone primarily for sensitive receivers through hours of operation having regard to:</p> <ul style="list-style-type: none"> <li>(a) the nature of the development;</li> <li>(b) measures to mitigate off-site impacts;</li> <li>(c) the extent to which the development is desired in the zone; and</li> </ul> | <p><b>DTS/DPF 2.1</b></p> <p>Consulting room, office and shop hours of operation are limited to 7am – 9pm Monday to Friday and 8am – 5pm Saturday inclusive.</p>  |

| Performance Outcome (PO)   | <ul style="list-style-type: none"> <li>• <b>Deemed to Satisfy Criteria (DTS)</b><br/>(required for development to be classified as Deemed-to-Satisfy)</li> <li>• <b>Designated Performance Feature (DPF)</b><br/>(used for development to be assessed on its merits against the applicable policies of the Planning and Design Code)</li> </ul>   |
|--|---|
| <p>(d) measures that might be taken in an adjacent zone primarily for sensitive receivers that mitigate adverse impacts without unreasonably compromising the intended use of that land.</p>   |   |
| <b>Overshadowing</b>   |   |
| <p><b>PO 3.1</b></p> <p>Overshadowing of habitable room windows of adjacent residential land uses not unreasonably interrupted to maintain access to direct winter sunlight.</p>   | <p><b>DTS/DPF 3.1</b></p> <p>North-facing windows of habitable rooms of adjacent residential land uses receive at least 3 hours of direct sunlight over their surface between 9.00 am and 3.00 pm on 21 June.</p>   |
| <p><b>PO 3.2</b></p> <p>Overshadowing of the primary area of private open space or communal open space of adjacent residential land uses not unreasonably interrupted to maintain access to direct winter sunlight.</p>  | <p><b>DTS/DPF 3.2</b></p> <p>Development maintains 2 hours direct sunlight between 9.00 am and 3.00 pm on 21 June to adjacent residential land uses in accordance with the following:</p> <ul style="list-style-type: none"> <li>(a) for ground level private open space, the smaller of the following: <ul style="list-style-type: none"> <li>(i) half of the existing ground level open space; or</li> <li>(ii) 35m<sup>2</sup> of the existing ground level open space (with at least one of the area's dimensions measuring 2.5m);</li> </ul> </li> <li>(b) for ground level communal open space, at least half of the existing ground level open space.</li> </ul> |
| <p><b>PO 3.3</b></p> <p>Development does not unduly reduce the generating capacity of existing rooftop solar energy facilities taking into account:</p> <ul style="list-style-type: none"> <li>(a) the form of development contemplated in the relevant zone;</li> </ul> | <p>None are applicable.</p>   |

| <b>Performance Outcome (PO)</b>   | <ul style="list-style-type: none"> <li>• <b>Deemed to Satisfy Criteria (DTS)</b><br/>(required for development to be classified as Deemed-to-Satisfy)</li> <li>• <b>Designated Performance Feature (DPF)</b><br/>(used for development to be assessed on its merits against the applicable policies of the Planning and Design Code)</li> </ul> |
|---|---|
| <p>(b) the orientation of the solar energy facilities to operate effectively and efficiently; and</p> <p>(c) the extent to which the solar energy facilities are already overshadowed.</p>  |   |
| <p><b>PO 3.4</b></p> <p>Development that incorporates moving parts, including windmills and wind farms, located and operated to not cause unreasonable nuisance to nearby dwellings and tourist accommodation caused by shadow flicker.</p>   | <p>None are applicable.</p>   |
| <p><b>Activities Generating Noise or Vibration</b></p>  |   |
| <p><b>PO 4.1</b></p> <p>Development that emits noise (other than music noise) does not unreasonably impact acoustic amenity at the nearest existing sensitive receivers.</p>  | <p><b>DTS/DPF 4.1</b></p> <p>Predicted noise at the nearest existing sensitive receiver achieves the relevant Environment Protection (Noise) Policy criteria.</p>   |
| <p><b>PO 4.2</b></p> <p>Areas for the on-site manoeuvring of service and delivery vehicles, plant and equipment, outdoor work spaces (and the like) are designed and sited to not unreasonably impact the amenity of adjacent sensitive receivers and zones primarily intended to accommodate sensitive receivers due to noise and vibration by adopting techniques including:</p> <p>(a) locating openings of buildings and associated services away from the interface with the adjacent sensitive receivers and zones primarily intended to accommodate sensitive receivers;</p> <p>(b) when sited outdoors, locating such areas as far as practicable from adjacent sensitive receivers and zones primarily</p> | <p>None are applicable.</p>   |

| <b>Performance Outcome (PO)</b>  | <ul style="list-style-type: none"> <li>• <b>Deemed to Satisfy Criteria (DTS)</b><br/>(required for development to be classified as Deemed-to-Satisfy)</li> <li>• <b>Designated Performance Feature (DPF)</b><br/>(used for development to be assessed on its merits against the applicable policies of the Planning and Design Code)</li> </ul>  |
|--|--|
| <p>intended to accommodate sensitive receivers;</p> <p>(c) housing plant and equipment within an enclosed structure or acoustic enclosure; and</p> <p>(d) providing a suitable acoustic barrier between the plant and / or equipment and the adjacent sensitive receiver boundary or zone.</p> |  |
| <p><b>PO 4.3</b></p> <p>Fixed plant and equipment in the form of pumps and/or filtration systems for a swimming pool or spa positioned and/or housed to not cause unreasonable noise nuisance to adjacent sensitive receivers.</p>   | <p><b>DTS/DPF 4.3</b></p> <p>The pump and/or filtration system is ancillary to a dwelling erected on the same site and is:</p> <ul style="list-style-type: none"> <li>(a) enclosed in a solid acoustic structure that is located at least 5m from the nearest habitable room located on an adjoining allotment; or</li> <li>(b) located at least 12m from the nearest habitable room located on an adjoining allotment.</li> </ul> |
| <p><b>PO 4.4</b></p> <p>External noise into bedrooms minimised by separating or shielding these rooms from service equipment areas and fixed noise sources located on the same or an adjoining allotment.</p>  | <p><b>DTS/DPF 4.4</b></p> <p>Adjacent land is used for residential purposes.</p>   |
| <p><b>PO 4.5</b></p> <p>Outdoor areas associated with licensed premises (such as beer gardens or dining areas) designed and/or sited to not cause unreasonable noise impact on existing adjacent sensitive receivers.</p>  | <p><b>DTS/DPF 4.4</b></p> <p>None are applicable.</p>  |

|                                 |   |

# Infrastructure and Renewable Energy Facilities

## Assessment Provisions (AP)

### Desired Outcomes (DO)

#### DO 1

Efficient provision of infrastructure networks and services, renewable energy facilities and ancillary development in a manner that minimises hazard, is environmentally and culturally sensitive and that suitably manages adverse visual impacts on natural and rural landscapes and residential amenity.

### Performance Outcomes and Deemed to Satisfy / Designated Performance Outcome Criteria

#### General

##### PO 1.1

Development located and designed to minimise hazard or nuisance to adjacent development and land uses.

##### DTS/DPF 1.1

None are applicable.

#### Visual Amenity

##### PO 2.1

The visual impact of above ground infrastructure networks and services, renewable energy facilities (excluding wind farms), energy storage facilities and ancillary development from townships, scenic routes and public roads is minimised and managed by:

- (a) utilising features of the natural landscape to obscure views where practicable;
- (b) siting development below ridgelines where practicable;
- (c) avoiding visually sensitive and significant landscapes;
- (d) using materials and finishes with low reflectivity and colours that complement the surroundings;
- (e) using existing vegetation to screen buildings; and
- (f) incorporating landscaping or landscaped mounding around the perimeter of a site and between adjacent allotments accommodating, or zoned to primarily accommodate sensitive receivers.

##### DTS/DPF 2.1

None are applicable.

##### PO 2.2

Substations, pumping stations, battery storage facilities, maintenance sheds and other ancillary structures incorporate vegetation buffers to reduce adverse visual impacts on adjacent land.

##### DTS/DPF 2.2

None are applicable.

##### PO 2.3

Surfaces exposed by earthworks associated with installation of storage facilities, pipework, penstock, substations and other ancillary plant are reinstated and revegetated to reduce adverse visual impacts on adjacent land.

##### DTS/DPF 2.3

None are applicable.

## Rehabilitation

### PO 3.1

Progressive rehabilitation (incorporating revegetation) of disturbed areas, ahead of or upon decommissioning of areas used for renewable energy facilities and transmission corridors.

### DTS/DPF 3.1

None are applicable.

## Hazard Management

### PO 4.1

Infrastructure and renewable energy facilities and ancillary development located and operated to not adversely impact maritime or air transport safety, including the operation of ports, airfields and landing strips.

### DTS/DPF 4.1

None are applicable.

### PO 4.2

Facilities for energy generating, power storage and transmission separated from dwellings, tourist accommodation and frequently visited public places (such as viewing platforms / lookouts) to reduce risks to public safety from fire or equipment malfunction.

### DTS/DPF 4.2

None are applicable.

### PO 4.3

Bushfire hazard risk minimised for renewable energy facilities by providing appropriate access tracks, safety equipment, and water tanks and establishing cleared areas around substations, battery storage and operations compounds.

### DTS/DPF 4.3

None are applicable.

## Electricity Infrastructure and Battery Storage Facilities

### PO 5.1

Electricity infrastructure located to minimise visual impacts through techniques including:

- (a) siting utilities and services:
  - (i) on areas already cleared of native vegetation; or
  - (ii) where there is minimal interference or disturbance to existing native vegetation or biodiversity; and
- (b) grouping utility buildings and structures with non-residential development, where practicable.

### DTS/DPF 5.1

None are applicable.

### PO 5.2

Electricity supply (excluding transmission lines) serving new development in urban areas and townships installed underground, excluding lines having a capacity exceeding or equal to 33kV.

### DTS/DPF 5.2

None are applicable.

### PO 5.3

Battery storage facilities co-located with substation infrastructure where practicable to minimise the development footprint and reduce environmental impacts.

### DTS/DPF 5.3

None are applicable.

## Telecommunication Facilities

### PO 6.1

Where technically feasible, telecommunications facilities seek to reduce visual impact by incorporating techniques such as:

- (a) avoiding proliferation of facilities in a local area;
- (b) co-locating with other communications facilities;
- (c) locating antennae as close as practical to support structures ; and
- (d) screening using landscaping and existing vegetation, particularly for equipment shelters and huts.

### DTS/DPF 6.1

None are applicable.

### PO 6.2

Telecommunications facilities sited and designed to minimise visual impact having regard to:

- (a) the size, scale, context and characteristics of existing structures, heritage, landforms and vegetation so as to be compatible with the local environment;
- (b) incorporating the facility within an existing structure that may serve another purpose; and
- (c) using existing buildings and vegetation for screening.

### DTS/DPF 6.2

None are applicable.

## Renewable Energy Facilities

### PO 7.1

Renewable energy facilities located as close as practicable to existing transmission infrastructure to facilitate connections and minimise environmental impacts as a result of extending transmission infrastructure.

### DTS/DPF 7.1

None are applicable.

## Renewable Energy Facilities (Wind Farm)

### PO 8.1

Visual impact of wind turbine generators on the amenity of residential and tourist development reduced through appropriate separation.

### DTS/DPF 8.1

Wind turbine generators are:

- (a) setback at least 1,200m from the base of the turbine to non-associated (non-stakeholder) dwellings and tourist accommodation;
- (b) setback at least 2,000m from the base of a turbine to any of the following zones:
  - i. Settlement Zone;
  - ii. Township Zone;

- iii. Rural Living Zone; or
- iv. Rural Neighbourhood Zone

with an additional 10m setback per additional metre over 150m overall turbine height (measured from the base of the turbine).

#### PO 8.2

The visual impact of wind turbine generators on natural landscapes managed by:

- (a) designing wind turbine generators to be uniform in colour, size and shape;
- (b) coordinating blade rotation and direction; and
- (c) mounting wind turbine generators on tubular towers as opposed to lattice towers.

#### DTS/DPF 8.2

None are applicable.

#### PO 8.3

Wind turbine generators and ancillary development minimise potential for bird and bat strike.

#### DTS/DPF 8.3

None are applicable.

#### PO 8.4

Wind turbine generators incorporate recognition systems or physical markers to minimise the risk to aircraft operations.

#### DTS/DPF 8.4

No Commonwealth air safety (CASA / ASA) or Defence requirement is applicable.

#### PO 8.5

Meteorological masts and guidewires identifiable to aircraft through the use of colour bands, marker balls, high visibility sleeves or flashing strobes.

#### DTS/DPF 8.5

None are applicable.

### Renewable Energy Facilities (Solar Power)

#### PO 9.1

Solar power facilities generating 5MW or more are not located on land of high environmental, scenic or cultural value.

#### DTS/DPF 9.1

None are applicable.

#### PO 9.2

Solar power facilities allow for movement of wildlife by:

- (d) incorporating wildlife corridors and habitat refuges; and
- (e) avoiding the use of extensive security or perimeter fencing; or
- (f) incorporating fencing that enables the passage of small animals without unreasonably compromising the security of the facility.

#### DTS/DPF 9.2

None are applicable.

### PO 9.3

Amenity impacts of solar power facilities minimised through separation from sensitive receivers.

#### DTS/DPF 9.3

Solar power facilities are setback at least:

- (a) 500 metres from conservation areas;
- (b) 100 metres from Township, Settlement, Rural Neighbourhood and Rural Living Zones; and
- (c) 30 metres from adjoining land.

### PO 9.4

Solar power facilities incorporate landscaping within setbacks from adjacent road frontages and boundaries of adjacent allotments accommodating non-host dwellings.

#### DTS/DPF 9.4

None are applicable.

## Hydropower / Pumped Hydropower Facilities

### PO 10.1

Hydropower / pumped hydropower facility storage designed and operated to minimise the risk of storage dam failure.

#### DTS/DPF 10.1

None are applicable.

### PO 10.2

Hydropower / pumped hydropower facility storage designed and operated to minimise water loss through increased evaporation or system leakage, with the incorporation of appropriate liners, dam covers, operational measures or detection systems.

#### DTS/DPF 10.2

None are applicable.

### PO 10.3

Hydropower / pumped hydropower facilities on existing or former mine sites minimise environmental impacts from site contamination, including from mine operations or water sources subject to such processes, now or in the future.

#### DTS/DPF 10.3

None are applicable.

## Water Supply

### PO 11.1

Development connected to an appropriate water supply to meet the ongoing requirements of the intended use.

#### DTS/DPF 11.1

Development is connected, or will be connected, to a reticulated water scheme or mains water supply with the capacity to meet the on-going requirements of the development.

#### PO 11.2

Dwellings connected to a reticulated water scheme or mains water supply with the capacity to meet the requirements of the intended use. Where this is not available an appropriate rainwater tank or storage system for domestic use is provided.

#### DTS/DPF 11.2

A dwelling is connected, or will be connected, to a reticulated water scheme or mains water supply with the capacity to meet the requirements of the development. Where this is not available it is instead serviced by a rainwater tank or tanks capable of holding at least 50,000 litres of water which is:

- (a) exclusively for domestic use; and
- (b) connected to the roof drainage system of the dwelling.

### Wastewater Services

#### PO 12.1

Development is connected to an approved common waste water disposal service with the capacity to meet the requirements of the intended use. Where this is not available an appropriate on-site service is provided to meet the on-going requirements of the intended use in accordance with the following:

- (a) it is wholly located and contained within the allotment of the development they will service.
- (b) in areas where there is a high risk of contamination of surface, ground, or marine water resources from on-site disposal of liquid wastes are to include disposal systems that minimise the risk of pollution to those water resources
- (c) ensures septic tank effluent drainage fields and other waste water disposal areas located away from watercourses and flood prone, sloping, saline or poorly drained land to minimise environmental harm.

#### DTS/DPF 12.1

Development is connected, or will be connected, to an approved common waste water disposal service with the capacity to meet the requirements of the development. Where this is not available it is instead serviced by an on-site waste water treatment system in accordance with the following:

- (a) is wholly located and contained within the allotment of development it will service; and
- (b) ensures no part of a septic tank effluent drainage field or any other waste water disposal system is located:
  - i. within 50m of a watercourse, bore, well or dam;
  - ii. on any land with a slope greater than 20% (1-in-5), or a depth to bedrock or seasonal or permanent water table less than 1.2m; and
  - iii. on land that is waterlogged, saline, part of a runway area or likely to be inundated by a 10% AEP flood event.

#### PO 12.2

Effluent drainage fields and other waste water disposal areas maintained to ensure the effective operation of waste systems and minimise risks to human health and environmental harm.

#### DTS/DPF 12.2

Development is not built on, or encroaches within, an area that is, or will be, required for a sewerage system or waste control system.

## Temporary Facilities

### PO 13.1

In rural and remote locations, development that is likely to generate significant waste material during construction, including packaging waste, makes provision for a temporary on-site waste storage enclosure to minimise the incidence of wind-blown litter.

### DTS/DPF 13.1

A waste collection and disposal service will be used to dispose of the volume of waste and at a rate it is generated.

### PO 13.2

Temporary facilities to support the establishment of renewable energy facilities (including borrow pits, concrete batching plants, laydown, storage, access roads and worker amenity areas) are sited and operated to minimise environmental impact.

### DTS/DPF 13.2

None are applicable.

## Intensive Animal Husbandry and Dairies

### Assessment Provisions (AP)

#### Desired Outcome (DO)

##### DO 1

Development of intensive animal husbandry and dairies in locations that are protected from encroachment by sensitive receivers in a manner that minimises adverse effects on amenity and the environment.

### Performance Outcomes and Deemed to Satisfy / Designated Performance Outcome Criteria

#### Siting and Designs

##### PO 1.1

Intensive animal husbandry, dairies and associated activities sited, designed, constructed and managed to not unreasonably impact on the environment or amenity of the locality.

##### DTS/DPF 1.1

None are applicable

##### PO 1.2

Intensive animal husbandry, dairies and associated activities sited, designed, constructed and managed to minimise the potential transmission of disease to other operations where animals are kept.

##### DTS/DPF 1.2

None are applicable

##### PO 1.3

Intensive animal husbandry and associated activities such as wastewater lagoons and liquid/solid waste disposal areas sited, designed, constructed and managed to not unreasonably impact on sensitive receivers in other ownership in terms of noise and air emissions.

##### DTS/DPF 1.3

None are applicable

#### PO 1.4

Dairies and associated activities such as wastewater lagoons and liquid/solid waste disposal areas sited, designed, constructed and managed to not unreasonably impact on sensitive receivers in other ownership in terms of noise and air emissions.

#### DTS/DPF 1.4

Dairies, associated wastewater lagoon(s) and liquid/solid waste storage and disposal facilities located 500m or more from the nearest sensitive receiver in other ownership.

#### PO 1.5

Lagoons for the storage or treatment of milking shed effluent adequately separated from roads to minimise impacts from odour on the general public.

#### DTS/DPF 1.5

Lagoons for the storage or treatment of milking shed effluent setback 20m or more from public roads.

## Waste

#### PO 2.1

Storage of manure, used litter and other wastes (other than waste water lagoons) is sited, designed, constructed and managed to:

- (a) avoid attracting and harbouring vermin;
- (b) avoid polluting water resources; and
- (c) be located outside 1% AEP flood event areas.

#### DTS/DPF 2.1

None are applicable

## Soil and Water Protection

#### PO 3.1

To avoid environmental harm and adverse effects on water resources, intensive animal husbandry operations appropriately setback from:

- (a) public water supply reservoirs;
- (b) major watercourses (third order or higher stream); and
- (c) any other watercourse, bore or well used for domestic or stock water supplies.

#### DTS/DPF 3.1

Intensive animal husbandry operations are setback:

- (a) 800m or more from a public water supply reservoir;
- (b) 200m or more from a major watercourse (third order or higher stream); and
- (c) 100m or more from any other watercourse, bore or well used for domestic or stock water supplies.

#### PO 3.2

Intensive animal husbandry operations and dairies incorporate appropriately designed effluent and run-off facilities:

- (a) that have sufficient capacity to hold effluent and runoff from the operations on site; and
- (b) ensure that effluent does not infiltrate and pollute groundwater, soil or other water resources.

#### DTS/DPF 3.2

None are applicable

## Land Division in Urban Areas

Assessment Provisions (AP)

Desired Outcome (DO)

DO 1

Land division that:

- (e) creates allotments having appropriate dimensions and shape for intended use;
- (f) allows efficient provision of new infrastructure and optimum use of existing underutilised infrastructure;
- (g) integrates and allocates adequate and suitable land for the preservation of site features of value including significant vegetation, watercourses, water bodies and other environmental features;
- (h) supports energy efficiency in building orientation;
- (i) creates a compact urban form that supports active travel, walkability and the use of public transport; and
- (j) avoids areas of high natural hazard risk.

Performance Outcomes and Deemed to Satisfy / Designated Performance Outcome Criteria

### ALL LAND DIVISION

Allotment configuration

#### PO 1.1

Land division creates allotments suitable for their intended use taking into account physical characteristics of the land, preservation of environmental and cultural features of value and the prevailing context of the locality.

#### DTS/DPF 1.1

Land division for the:

- (a) minor adjustment of allotment boundaries to remove an anomaly in existing boundaries with respect to the location of existing buildings or structures where no additional allotments are created; or
- (b) creation of a single additional allotment for residential purposes where:
  - i. the allotment will contain a single lawfully existing dwelling or an approval for a single dwelling exists and is operative;
  - ii. access is provided via a lawfully existing driveway or access point or an access point for which approval under the Local Government Act exists and is operative; and
  - iii. the resulting allotment achieves any minimum site area and frontage width specified by the relevant zone or a relevant Technical and Numeric Variation Overlays.

Design and Layout

#### PO 2.1

Land division results in a pattern of development that minimises the likelihood of future earthworks and retaining walls

#### DTS 2.1

None are applicable.

#### PO 2.2

Land division enables appropriate treatment of the interface between potentially conflicting land uses and/or zones.

#### DTS 2.2

None are applicable.

**PO 2.3**

Land division maximises the number of allotments that face public open space and public streets.

**DTS 2.3**

None are applicable.

**PO 2.4**

Land division integrated with site features, adjacent land uses, the existing transport network and available infrastructure.

**DTS 2.4**

None are applicable.

**PO 2.5**

Development and infrastructure provided and staged in a manner that supports an orderly and economic provision of land, infrastructure and services.

**DTS 2.5**

None are applicable

**PO 2.6**

Land division results in watercourses being retained within open space and land subject to flooding free from development.

**DTS 2.6**

None are applicable.

**PO 2.7**

Land division results in street patterns that are legible and connected to the surrounding street network.

**DTS 2.7**

None are applicable.

**PO 2.8**

Land division is designed to allocate adequate and suitable land for the preservation of existing vegetation of value including native vegetation, regulated and significant trees.

**DTS 2.8**

None are applicable.

Roads and Access

**PO 3.1**

Land division provides allotments with access to a public road.

**DTS 3.1**

None are applicable.

**PO 3.2**

Street patterns and intersections designed to enable the safe and efficient movement of pedestrian, cycle and vehicular traffic.

**DTS 3.2**

None are applicable.

**PO 3.3**

Land division does not impede access to publicly owned open space and recreation facilities.

**DTS 3.3**

None are applicable.

**PO 3.4**

Road reserves provide for safe and convenient movement and parking of projected volumes of vehicles, and allow for the efficient movement of service and emergency vehicles.

**DTS 3.4**

None are applicable.

**PO 3.5**

Road reserves provide for footpaths, cycle lanes and shared-use paths, and accommodate street tree planting, landscaping and street furniture.

**DTS 3.5**

None are applicable.

**PO 3.6**

Road reserves accommodate stormwater drainage and public utilities.

**DTS 3.6**

None are applicable.

**PO 3.7**

Road reserves provide unobstructed vehicular access and egress to and from individual allotments and sites.

**DTS 3.7**

None are applicable.

**PO 3.8**

Street patterns and intersections designed to enable the safe and efficient movement of pedestrian, cycle and vehicular traffic.

**DTS 3.8**

None are applicable.

**PO 3.9**

Roads, open space and thoroughfares provided establish safe and convenient linkages to the surrounding open space and transport network.

**DTS 3.9**

None are applicable.

**PO 3.10**

Public streets include tree planting to provide shade and enhance the amenity of streetscapes.

**DTS 3.10**

None are applicable.

**PO 3.11**

Local streets designed to create low-speed environments that are safe for cyclists and pedestrians.

**DTS 3.11**

None are applicable.

**Infrastructure****PO 4.1**

Land division incorporates public utility services within road reserves or within dedicated easements.

**DTS 4.1**

None are applicable.

**PO 4.2**

Waste water, sewage and other effluent is capable of being disposed of from each allotment without unreasonable risk to public health or the environment.

**DTS/DPF 4.2**

Each allotment can be connected to any of the following:

- (a) a waste water treatment plant that has the hydraulic volume and pollutant load treatment and disposal capacity for the maximum predicted wastewater volume generated by subsequent development of the proposed allotments; or
- (b) a form of on-site waste water treatment and disposal that meets relevant public health and environmental standards.

**PO 4.3**

Septic tank effluent drainage fields and other waste water disposal areas maintained to ensure the effective operation of waste systems and minimise risks to human health and environmental harm.

**DTS / DPF 4.3**

Development is not built on, or encroaches within, an area that is, or will be, required for a sewerage system or waste control system.

**PO 4.4**

Constructed wetland systems, including associated detention and retention basins, sited and designed to ensure public health and safety is protected including by minimising potential public health risks arising from the breeding of mosquitoes.

**DTS 4.4**

None are applicable.

**PO 4.5**

Constructed wetland systems, including associated detention and retention basins, sited and designed to allow sediments to settle prior to discharge into watercourses or the marine environment.

**DTS 4.5**

None are applicable.

**PO 4.6**

Constructed wetland systems, including associated detention and retention basins, sited and designed to function as a landscape feature.

**DTS 4.6**

None are applicable.

**MINOR LAND DIVISION (UNDER 20 ALLOTMENTS)**

Open Space

**PO 5.1**

Land division proposing an additional allotment under 1 hectare in area provides or supports the provision of open space.

**DTS 5.1**

None are applicable.

**PO 5.2**

Land division creating 5-19 non-residential allotments includes a stormwater management system designed to mitigate peak flows and manage the rate and duration of stormwater discharges from the site to ensure the carrying capacities of downstream systems are not overloaded.

**DTS 5.2**

Land division creating 5-19 non-residential allotments is accompanied by an approved Stormwater Management Plan and manages up to and including the 100 –year ARI flood event (1% AEP) to avoid flooding of buildings and:

- (a) maintain
  - i. a pre-development peak flow rate from the site based upon a 0.35 runoff coefficient for the 5-year ARI (18.1% AEP) 30 minute storm; and
  - ii. the stormwater runoff time to peak to match that of the pre-development; or
- (b) capture and retain the difference in pre-development runoff volume (based upon a 0.35 runoff coefficient) vs post development runoff volume from the site for a 5-year ARI (18.1% AEP) 30 minute storm; and
- (c) manage site generated stormwater runoff up to and including the 100 –year ARI flood event (1% AEP) to avoid flooding of buildings.

Solar Orientation

**PO 6.1**

Land division for residential purposes facilitates solar access for energy efficiency through allotment orientation.

**DTS 6.1**

None are applicable.

Water Sensitive Design

**PO 7.1**

Land division creating 5-19 allotments includes stormwater management systems that minimise the discharge of sediment, suspended solids, organic matter, nutrients, bacteria, litter and other contaminants to the stormwater system, watercourses or other water bodies.

**DTS 7.1**

Land division creating 5-19 allotments is accompanied by an approved Stormwater Management Plan and achieves the following stormwater runoff outcomes:

- (a) 80 per cent reduction in average annual total suspended solids;
- (b) 60 per cent reduction in average annual total phosphorus;
- (c) 45 per cent reduction in average annual total nitrogen.

**PO 7.2**

Land division creating 5-19 non-residential allotments includes a stormwater management system designed to mitigate peak flows and manage the rate and duration of stormwater discharges from the site to ensure the carrying capacities of downstream systems are not overloaded.

**DTS / DPF 7.2**

Land division creating 5-19 non-residential allotments includes a storm water management system designed to:

- (a) maintain a pre-development peak flow rate from the site based upon a 0.35 runoff coefficient for the 20-year ARI (5% AEP) 30 minute storm, unless a lower performance measure is specified in an approved catchment based Stormwater Management Plan;

- (b) maintain the stormwater runoff time to peak to match that of the pre-development; and
- (c) manage site generated stormwater runoff up to and including the 100 –year ARI flood event (1% AEP).

## MAJOR LAND DIVISION (20+ ALLOTMENTS)

### Open Space

#### **PO 8.1**

Land division allocates or retains, evenly distributed, high quality areas of open space to improve residential amenity and provide urban heat amelioration.

#### **DTS 8.1**

None are applicable

#### **PO 8.2**

Land allocated for open space is suitable for intended active and passive recreational use considering gradient and potential for inundation.

#### **DTS / DPF 8.2**

Where provided, no more than 20% of open space:

- (a) has a slope in excess of 1 in 4; and
- (b) is comprised of watercourses, wetlands or detention basins.

#### **PO 8.3**

Land allocated for active recreation is of a size and has dimensions capable of accommodating a range of active recreational activities.

#### **DTS 8.3**

None are applicable.

### Water Sensitive Design

#### **PO 9.1**

Land division creating 20 or more residential allotments includes a stormwater management system designed to mitigate peak flows and manage the rate and duration of stormwater discharges from the site to ensure the carrying capacities of downstream systems are not overloaded.

#### **DTS/DPF 9.1**

Land division creating 20 or more residential allotments is accompanied by an approved Stormwater Management Plan and manages up to and including the 100 –year ARI flood event (1% AEP) to avoid flooding of buildings and:

- (a) maintains pre-development peak 5-year ARI (18.1% AEP) flow rate from the site, and maintains the time to peak to match that of the pre-development; or
- (b) captures and retains the difference in pre-development volume vs post development volume from the site for a 5-year ARI (18.1% AEP) 30 minute storm; or where there is no adequate local drainage scheme to connect to, captures and retains post development volume from the site for a 5 year ARI (18.1% AEP) 30 minute storm.

#### **PO 9.2**

Land division creating 20 or more non- residential allotments includes a stormwater management system designed to mitigate peak flows and manage the rate and duration of stormwater discharges from the site to ensure the carrying capacities of downstream systems are not overloaded.

### DTS/DPF 9.2

Land division creating 20 or more non-residential allotments is accompanied by an approved Stormwater Management Plan and manages up to and including the 100-year ARI flood event (1% AEP) to avoid flooding of buildings and:

- (a) maintains pre-development peak 20-year ARI (5% AEP) flow rate from the site and, maintains the time to peak to match that of the pre-development; or
- (b) captures and retains the difference in pre-development volume vs post development volume from the site for a 20-year ARI (5% AEP) 30 minute storm; where there is no adequate local drainage scheme to connect to, captures and retains post development volume from the site for a 20 year ARI (5% AEP) 30 minute storm.

### PO 9.3

Land division creating 20 or more allotments includes stormwater management systems that minimise the discharge of sediment, suspended solids, organic matter, nutrients, bacteria, litter and other contaminants to the stormwater system, watercourses or other water bodies

### DTS 9.3

Land division creating 20 or more allotments is accompanied by an approved Stormwater Management Plan and achieves the following stormwater runoff outcomes:

- (a) 80 per cent reduction in average annual total suspended solids;
- (b) 60 per cent reduction in average annual total phosphorus;
- (c) 45 per cent reduction in average annual total nitrogen.

### Solar Orientation

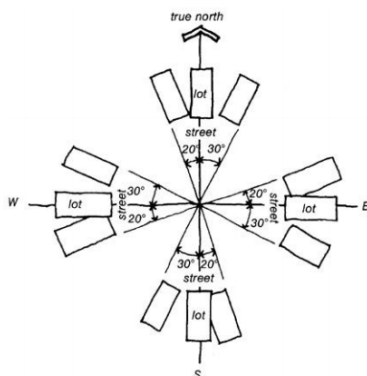

#### PO 10.1

Land division for residential purposes facilitates solar access for energy efficient through allotment orientation and allotment dimensions.

#### DTS/DPF 10.1

Land division results in:

- (a) at least 80% of allotments oriented so that their long axis conforms with figure 10.1:

- (b) 80% of allotments with an east-west orientation having a minimum frontage of 15m
- (c) no more than 20% of allotments are located on the south side of east-west oriented streets.

# Land Division in Rural Areas

## Assessment Provisions (AP)

| Desired Outcome (DO)  |
|---|
| <p><b>DO 1</b></p> <p>Land division that:</p> <ul style="list-style-type: none"> <li>(a) creates allotments having appropriate dimensions and shape for intended use;</li> <li>(b) allows efficient provision of new infrastructure and optimum use of existing underutilised infrastructure;</li> <li>(c) integrates and allocates adequate and suitable land for the preservation of site features of value including significant vegetation, watercourses, water bodies and other environmental features; and</li> <li>(d) supports energy efficiency in building orientation;</li> <li>(e) creates a compact urban form that supports active travel, walkability and the use of public transport; and</li> <li>(f) avoids areas of high natural hazard risk.</li> </ul> |

|   |   |
|---|---|
| <p><b>Performance Outcomes (PO)</b></p> | <ul style="list-style-type: none"> <li>• <b>Deemed to Satisfy Criteria (DTS)</b><br/>(required for development to be classified as Deemed-to-Satisfy)</li> <li>• <b>Designated Performance Feature (DPF)</b><br/>(used for development to be assessed on its merits against the applicable policies of the Planning and Design Code)</li> </ul> |
|---|---|

## ALL LAND DIVISION

### Allotment configuration

|   |   |
|---|---|
| <p><b>PO 1.1</b></p> <p>Land division creates allotments suitable for their intended use taking into account physical characteristics of the land, preservation of environmental and cultural features of value and the prevailing context of the locality.</p> | <p><b>DTS/DPF 1.1</b></p> <p>Land division for the:</p> <ul style="list-style-type: none"> <li>(a) minor adjustment of allotment boundaries to remove an anomaly in existing boundaries with respect to the location of existing buildings or structures where no additional allotments are created; or</li> <li>(b) Creation of a single additional allotment for residential purposes where:             <ul style="list-style-type: none"> <li>(i) the allotment will contain a single lawfully existing dwelling or an approval for a single dwelling exists and is operative;</li> </ul> </li> </ul> |
|---|---|

|  |   |
|--|---|
| <b>Performance Outcomes (PO)</b>   | <ul style="list-style-type: none"> <li>• <b>Deemed to Satisfy Criteria (DTS)</b><br/>(required for development to be classified as Deemed-to-Satisfy)</li> <li>• <b>Designated Performance Feature (DPF)</b><br/>(used for development to be assessed on its merits against the applicable policies of the Planning and Design Code)</li> </ul>                   |
|  | <p>(ii) access is provided via a lawfully existing driveway or access point or an access point for which approval under the Local Government Act exists and is operative; and</p> <p>(iii) the resulting allotment achieves any minimum site area and frontage width specified by the relevant zone or a relevant Technical and Numerical Variation Overlays.</p> |
| <p><b>PO 1.2</b></p> <p>Land division creates allotments suitable for their intended use.</p>  | <p><b>DTS/DPF 1.1</b></p> <p>Division of land that reflects the site or allotment boundaries on a valid development authorisation for Development Plan Consent under the <i>Development Act 1993</i> or Planning Consent under the <i>Planning, Development and Infrastructure Act 2016</i>.</p>  |
| <b>Design and Layout</b>   |   |
| <p><b>PO 2.1</b></p> <p>Land division results in a pattern of development that minimises the likelihood of future earthworks and retaining walls</p> | <p>None are applicable.</p>   |
| <p><b>PO 2.2</b></p> <p>Land division enables appropriate treatment of the interface between potentially conflicting land uses and/or zones.</p>     | <p>None are applicable.</p>   |
| <p><b>PO 2.3</b></p> <p>Land division maximises the number of allotments that face public open space and public streets.</p>                         | <p>None are applicable.</p>   |
| <p><b>PO 2.4</b></p>   | <p>None are applicable.</p>   |

| Performance Outcomes (PO)  | <ul style="list-style-type: none"> <li>• <b>Deemed to Satisfy Criteria (DTS)</b><br/>(required for development to be classified as Deemed-to-Satisfy)</li> <li>• <b>Designated Performance Feature (DPF)</b><br/>(used for development to be assessed on its merits against the applicable policies of the Planning and Design Code)</li> </ul> |
|--|---|
| Land division integrated with site features, adjacent land uses, the existing transport network and available infrastructure.  |   |
| <p><b>PO 2.5</b></p> <p>Development and infrastructure provided and staged in a manner that supports an orderly and economic provision of land, infrastructure and services.</p> | None are applicable   |
| <p><b>PO 2.6</b></p> <p>Land division results in watercourses being retained within open space and land subject to flooding free from development.</p>                           | None are applicable.  |
| <p><b>PO 2.7</b></p> <p>Land division results in street patterns that are legible and connected to the surrounding street network.</p>   | None are applicable.  |
| <b>Roads and Access</b>  |   |
| <p><b>PO 3.1</b></p> <p>Land division provides allotments with access to a public road.</p>  | None are applicable.  |
| <p><b>PO 3.2</b></p> <p>Street patterns and intersections designed to enable the safe and efficient movement of pedestrian, cycle and vehicular traffic.</p>                     | None are applicable.  |
| <p><b>PO 3.3</b></p> <p>Land division does not impede access to publicly owned open space and recreation facilities.</p>   | None are applicable.  |

| <b>Performance Outcomes (PO)</b>   | <ul style="list-style-type: none"> <li>• <b>Deemed to Satisfy Criteria (DTS)</b><br/>(required for development to be classified as Deemed-to-Satisfy)</li> <li>• <b>Designated Performance Feature (DPF)</b><br/>(used for development to be assessed on its merits against the applicable policies of the Planning and Design Code)</li> </ul> |
|--|---|
| <p><b>PO 3.4</b></p> <p>Road reserves provide for safe and convenient movement and parking of projected volumes of vehicles, and allow for the efficient movement of service and emergency vehicles.</p> | <p>None are applicable.</p>   |
| <p><b>PO 3.5</b></p> <p>Road reserves provide for footpaths, cycle lanes and shared-use paths, and accommodate street tree planting, landscaping and street furniture.</p>                               | <p>None are applicable.</p>   |
| <p><b>PO 3.6</b></p> <p>Road reserves accommodate stormwater drainage and public utilities.</p>  | <p>None are applicable.</p>   |
| <p><b>PO 3.7</b></p> <p>Road reserves provide unobstructed vehicular access and egress to and from individual allotments and sites.</p>  | <p>None are applicable.</p>   |
| <p><b>PO 3.8</b></p> <p>Street patterns and intersections designed to enable the safe and efficient movement of pedestrian, cycle and vehicular traffic.</p>   | <p>None are applicable.</p>   |
| <p><b>PO 3.9</b></p> <p>Roads, open space and thoroughfares provided establish safe and convenient linkages to the surrounding open space and transport network.</p>                                     | <p>None are applicable.</p>   |
| <p><b>PO 3.10</b></p> <p>Public streets include tree planting to provide shade and enhance the amenity of streetscapes.</p>  | <p>None are applicable.</p>   |

| Performance Outcomes (PO)  | <ul style="list-style-type: none"> <li>• <b>Deemed to Satisfy Criteria (DTS)</b><br/>(required for development to be classified as Deemed-to-Satisfy)</li> <li>• <b>Designated Performance Feature (DPF)</b><br/>(used for development to be assessed on its merits against the applicable policies of the Planning and Design Code)</li> </ul>  |

## Performance Outcomes (PO)

- **Deemed to Satisfy Criteria (DTS)**  
(required for development to be classified as Deemed-to-Satisfy)
- **Designated Performance Feature (DPF)**  
(used for development to be assessed on its merits against the applicable policies of the Planning and Design Code)

- (b) 80% of allotments with an east-west orientation having a minimum frontage of 15m
- (c) no more than 20% of allotments are located on the south side of east-west oriented streets. no more than 20% of allotments are located on the south side of east-west oriented streets.

## Marinas and On-Water Structures

### Assessment Provisions (AP)

#### Desired Outcome (DO)

##### DO 1

Marinas and on-water structures located and designed to minimise impairment of commercial, recreational and navigational activities and adverse impacts on the environment.

### Performance Outcomes and Deemed to Satisfy / Designated Performance Outcome Criteria

#### Navigation and Safety

##### PO 1.1

Safe public access is provided or maintained to the waterfront, public infrastructure and recreation areas.

##### DTS/DPF 1.1

None are applicable

##### PO 1.2

The operation of wharves not impaired by marinas and on-water structures.

##### DTS/DPF 1.2

None are applicable

##### PO 1.3

Navigation and access channels not impaired by marinas and on-water structures.

##### DTS/DPF 1.3

None are applicable

##### PO 1.4

Commercial shipping lanes not impaired by marinas and on-water structures.

##### DTS/DPF 1.4

Marinas and on-water structures are setback 250m or more from commercial shipping lanes.

##### PO 1.5

Marinas and on-water structures located to avoid interfering with the operation or function of a water supply pumping station.

##### DTS/DPF 1.5

On-water structures are setback:

- (a) 3km or more from upstream water supply pumping station take-off points; and
- (b) 500m or more from downstream water supply pumping station take-off points.

##### PO 1.6

Maintenance of on-water infrastructure, including revetment walls, not impaired by marinas and on-water structures.

##### DTS/DPF 1.6

None are applicable

## Environmental Protection

### PO 2.1

Development sited and designed to facilitate water circulation and exchange.

### DTS/DPF 2.1

None are applicable

## Open Space and Recreation

### Assessment Provisions (AP)

#### Desired Outcome (DO)

##### DO 1

Pleasant, functional and accessible open space and recreation facilities provided for active and passive recreation.

### Performance Outcomes and Deemed to Satisfy / Designated Performance Outcome Criteria

#### Land Use and Intensity

##### PO 1.1

Recreation facilities compatible with surrounding land use and activity.

##### DTS/DPF 1.1

None are applicable

#### Design and Siting

##### PO 2.1

Open space and recreation facilities address adjacent public roads to optimise pedestrian access and visibility.

##### DTS/DPF 2.1

None are applicable

##### PO 2.2

Open space and recreation facilities incorporate park furniture, shaded areas and resting places to enhance pedestrian comfort.

##### DTS/DPF 2.2

None are applicable

##### PO 2.3

Open space and recreation facilities link habitats, wildlife corridors and existing open spaces and recreation facilities.

##### DTS/DPF 2.3

None are applicable

#### Pedestrians and Cyclists

##### PO 3.1

Open space incorporates:

- (a) pedestrian and cycle linkages to other open spaces, centres, schools and public transport nodes;
- (b) safe crossing points where pedestrian routes intersect the road network; and
- (c) easily identified access points.

DTS/DPF 3.1

None are applicable.

## Usability

PO 4.1

Land allocated for open space is suitable for intended active and passive recreational use considering gradient and potential for inundation.

DTS/DPF 4.1

No more than 20% of the open space:

- (a) has a slope in excess of 1 in 4; and
- (b) is comprised of watercourses, wetlands or detention basins.

## Safety and Security

PO 5.1

Open space is overlooked by housing, commercial or other development to provide casual surveillance where possible.

DTS/DPF 5.1

None are applicable.

PO 5.2

Play equipment is located where it can be casually observed by nearby residents and users.

DTS/DPF 5.2

None are applicable.

PO 5.3

Landscaping provided in open space and recreation facilities maximises opportunities for casual surveillance throughout the park.

DTS/DPF 5.3

None are applicable.

PO 5.4

Fenced parks and playgrounds have more than one entrance or exit to minimise potential entrapment.

DTS/DPF 5.4

None are applicable.

PO 5.5

Adequate lighting provided around toilets, telephones, seating, litter bins, bicycle storage, car parks and other such facilities.

DTS/DPF 5.5

None are applicable.

PO 5.6

Pedestrian and bicycle movement after dark focused along clearly defined, adequately lit routes with observable entries and exits.

DTS/DPF 5.6

None are applicable.

## Signage

### PO 6.1

Signage provided at entrances to and within public open space to provide clear orientation to major points of interest such as the location of public toilets, telephones, safe routes, park activities and the like.

### DTS/DPF 6.1

None are applicable.

## Buildings and Structures

### PO 7.1

Buildings and car parking areas in open space areas are designed, located and of a scale to be unobtrusive.

### DTS/DPF 7.1

None are applicable.

### PO 7.2

Buildings and structures in open space are clustered where practical to ensure that the majority of the site remains open.

### DTS/DPF 7.2

None are applicable.

### PO 7.3

Development in open space is constructed to minimise the extent of hard paved areas.

### DTS/DPF 7.3

None are applicable.

### PO 7.4

Development that abuts or includes a coastal reserve or Crown land used for scenic, conservation or recreational purposes is located and designed to have regard to the purpose, management and amenity of the reserve.

### DTS/DPF 7.4

None are applicable.

## Landscaping

### PO 8.1

Open space and recreation facilities provide for the planting and retention of large trees and vegetation.

### DTS/DPF 8.1

None are applicable.

### PO 8.2

Landscaping in open space and recreation facilities provides shade and windbreaks:

- (a) along cyclist and pedestrian routes
- (b) around picnic and barbecue areas; and
- (c) in car parking areas.

### DTS/DPF 8.2

None are applicable.

PO 8.3

Landscaping in open space facilitates habitat for local fauna and facilitates biodiversity.

DTS/DPF 8.3

None are applicable.

## Resource Extraction

Assessment Provisions (AP)

Desired Outcome (DO)

DO 1

Resource extraction activities developed in a manner that minimises human and environmental impacts.

Performance Outcomes and Deemed to Satisfy / Designated Performance Outcome Criteria

Land Use and Intensity

PO 1.1

Resource extraction activities minimise landscape damage and provide for the progressive reclamation and betterment of disturbed areas.

DTS/DPF 1.1

None are applicable.

PO 1.2

Resource extraction activities avoid damage to cultural sites or artefacts.

DTS/DPF 1.2

None are applicable.

## Water Quality

PO 2.1

Stormwater and/or waste water from resource extraction activities is diverted into appropriately sized treatment and retention systems to enable reuse on-site.

DTS/DPF 2.1

None are applicable.

## Separation Treatments, Buffers and Landscaping

PO 3.1

Resource extraction activities minimise adverse impacts upon sensitive receivers through incorporation of separation distances and/or mounding/vegetation.

DTS/DPF 3.1

None are applicable.

PO 3.2

Resource extraction activities are screened from view from adjacent land by perimeter landscaping and/or mounding.

DTS/DPF 3.2

None are applicable.

## Site Contamination

### Assessment Provisions (AP)

#### Desired Outcome (DO)

##### DO 1

Protection of human health and the environment wherever site contamination has been identified or is suspected to have occurred.

### Performance Outcomes and Deemed to Satisfy / Designated Performance Outcome Criteria

#### PO 1.1

Ensure land is suitable for sensitive use in circumstances where it is, or may have been, subject to site contamination as a result of previously established uses of land or activities in the vicinity of the land.

#### DTS/DPF 1.1

Development:

- (a) does not incorporate a change of use of land;
- (b) incorporates a change of use of land that is not a more sensitive use of land than previously established uses of the land;
- (c) in respect of which the applicant is able to furnish, or the relevant authority is in possession of, a site contamination audit report less than 5 years old under Part 10A of the Environment Protection Act 1993 to the effect:
  - i. that site contamination does not exist (or no longer exists) at the land; or
  - ii. that any site contamination at the land has been cleared or addressed to the extent necessary to enable the land to be suitable for sensitive use; or
- (d) the allotment was the subject of consent granted under the Development Act 1993 or the Planning Development and Infrastructure Act 2016 on or after 1 September 2009 in relation the division of the land.

## Tourism Development

### Assessment Provisions (AP)

#### Desired Outcomes (DO)

##### DO 1

Tourism development in suitable locations that caters to the needs of visitors.

### Performance Outcomes and Deemed to Satisfy / Designated Performance Outcome Criteria

#### General

##### PO 1.1

Tourism development complements and contributes to local, natural, cultural or historical context.

#### DTS/DPF 1.1

None are applicable.

##### PO 1.2

Tourism development comprising multiple accommodation units (including any facilities and activities for use by guests and visitors) clustered to minimise environmental and contextual impact.

#### DTS/DPF 1.2

None are applicable.

## Caravan and Tourist Parks

### PO 2.1

Potential conflicts between long-term residents and short-term tourists minimised through suitable siting and design measures.

### DTS/DPF 2.1

None are applicable.

### PO 2.2

Occupants are provided privacy and amenity through landscaping and fencing.

### DTS/DPF 2.2

None are applicable.

### PO 2.3

Communal open space and centrally located recreation facilities provided for guests and visitors.

### DTS/DPF 2.3

12.5% or more of a caravan park comprises clearly defined communal open space, landscaped areas and areas for recreation.

### PO 2.4

Perimeter landscaping is used to enhance the amenity of the locality.

### DTS/DPF 2.4

None are applicable.

### PO 2.5

Amenity blocks (showers, toilets, laundry and kitchen facilities) sufficient to serve peak population.

### DTS/DPF 2.5

None are applicable.

### PO 2.6

Long-term occupation does not displace tourist accommodation, particularly in important tourist destinations such as coastal and riverside locations.

### DTS/DPF 2.6

None are applicable.

## Transport, Access and Parking

### Assessment Provisions (AP)

#### Desired Outcomes (DO)

##### DO 1

A comprehensive, integrated and connected transport system that is safe, sustainable, efficient, convenient and accessible to all users.

### Performance Outcomes and Deemed to Satisfy / Designated Performance Outcome Criteria

#### Movement Systems

##### PO 1.1

Development integrated with the existing transport system and designed to minimise its potential impact on the functional performance of the transport system.

#### DTS/DPF 1.1

None are applicable.

#### PO 1.2

Development is designed to discourage commercial and industrial vehicle movements through residential streets and adjacent other sensitive receivers.

#### DTS/DPF 1.2

None are applicable.

#### PO 1.3

Industrial, commercial and service vehicle movements, loading areas and designated parking spaces are separated from passenger vehicle car parking areas to ensure efficient and safe movement and minimise potential conflict.

#### DTS/DPF 1.3

None are applicable.

#### PO 1.4

Development sited and designed so that loading, unloading and turning of all traffic likely to be generated avoids interrupting the operation of and queuing on public roads and pedestrian paths.

#### DTS/DPF 1.4

All vehicle manoeuvring occurs onsite.

### Sightlines

#### PO 2.1

Maintenance or enhancement of sightlines at intersections, pedestrian and cycle crossings, and crossovers to allotments for motorists, cyclists and pedestrians to ensure safety for all road users and pedestrians.

#### DTS/DPF 2.1

None are applicable.

#### PO 2.2

Walls, fencing and landscaping adjacent to driveways and corner sites are designed to provide adequate sightlines between vehicles and pedestrians.

#### DTS/DPF 2.2

None are applicable.

### Vehicle Access

#### PO 3.1

Safe and convenient access that minimises impact or interruption on the operation of public roads.

#### DTS/DPF 3.1

The access is:

- (a) provided via a lawfully existing or authorised driveway or access point or an access point for which consent has been granted as part of an application for the division of land; and
- (b) not located within 6m of an intersection of 2 or more roads or a pedestrian actuated crossing.

#### PO 3.2

Development incorporating vehicular access ramps ensures vehicles can enter and exit a site safely and without creating a hazard to pedestrians and other vehicular traffic.

#### DTS/DPF 3.2

None are applicable.

#### PO 3.3

Access points sited and designed to accommodate the type and volume of traffic likely to be generated by the development or land use.

#### DTS/DPF 3.3

None are applicable.

#### PO 3.4

Access points sited and designed to minimise any adverse impacts on neighbouring properties.

#### DTS/DPF 3.4

None are applicable.

#### PO 3.5

Access points located so as not to interfere with mature street trees, existing street furniture (including directional signs, lighting, seating and weather shelters) or infrastructure services to maintain the appearance of the streetscape, preserve local amenity and minimise disruption to utility infrastructure assets.

#### DTS/DPF 3.5

The access point does not involve the removal or relocation of mature street trees, street furniture or utility infrastructure services.

#### PO 3.6

Driveways and access points are separated and minimised in number to optimise the provision of on-street visitor parking (where on-street parking is appropriate).

#### DTS/DPF 3.6

Driveways and access points:

- (a) for sites with a frontage to a public road of 20m or less, one access point no greater than 3.5m in width is provided.
- (b) for sites with a frontage to a public road greater than 20m:
  - i. a single access point no greater than 6m in width is provided; or
  - ii. not more than two access points with a width of 3.5m each are provided.

#### PO 3.7

Access points appropriately separated from level crossings to avoid interference and ensure their safe ongoing operation.

#### DTS/DPF 3.7

None are applicable.

#### PO 3.8

Driveways, access points, access tracks and parking areas are designed and constructed to allow adequate movement and manoeuvrability having regard to the types of vehicles that are reasonably anticipated.

#### DTS/DPF 3.8

None are applicable.

#### PO 3.9

Development designed to ensure vehicle circulation between activity areas occurs within the site without the need to use public roads.

#### DTS/DPF 3.9

None are applicable.

### Access for People with Disabilities

#### PO 4.1

Development sited and designed to provide safe, dignified and convenient access for people with a disability.

#### DTS/DPF 4.1

None are applicable.

### Vehicle Parking Rates

#### PO 5.1

The provision of sufficient on-site vehicle parking and specifically marked accessible car parking places to meet the needs of the development or land use having regard to factors that may support a reduced on-site rate such as:

- (a) availability of on-street car parking
- (b) shared usage of other parking areas
- (c) in relation to a mixed-use development, where the hours of operation of commercial activities complement the residential use of the site the provision of vehicle parking may be shared.

#### DTS/DPF 5.1

Development provides a number of car parking spaces on-site at a rate no less than the amount calculated using Transport, Access and Parking Table 1 – General Off-Street Car Parking Requirements or Transport, Access and Parking Table 2 – Off-Street Vehicle Parking Requirements in Designated Areas, whichever is relevant.

### Vehicle Parking Areas

#### PO 6.1

Vehicle parking areas that are sited and designed to minimise impact on the operation of public roads by avoiding the use of public roads when moving from one part of a parking area to another.

#### DTS/DPF 6.1

Movement between vehicle parking areas within the site can occur without the need to use a public road.

#### PO 6.2

Vehicle parking areas appropriately located, designed and constructed to minimise impacts on adjacent sensitive receivers through measures such as ensuring they are attractively developed and landscaped, screen fenced, and the like.

#### DTS/DPF 6.2

None are applicable.

#### PO 6.3

Vehicle parking areas designed to provide opportunity for integration and shared-use of adjacent car parking areas to reduce the total extent of vehicle parking areas and access points.

DTS/DPF 6.3

None are applicable.

PO 6.4

Pedestrian linkages between parking areas and the development are provided and are safe and convenient.

DTS/DPF 6.4

None are applicable.

PO 6.5

Vehicle parking areas that are likely to be used during non-daylight hours are provided with floodlit entry and exit points to ensure clear visibility to users.

DTS/DPF 6.5

None are applicable.

PO 6.6

Loading areas and designated parking spaces for service vehicles provided within the boundary of the site.

DTS/DPF 6.6

Loading areas and designated parking spaces are wholly located within the site.

PO 6.7

On-site visitor parking spaces are sited and designed to be accessible to all visitors at all times.

DTS/DPF 6.7

None are applicable.

## Undercroft and Below Ground Garaging and Parking of Vehicles

PO 7.1

Undercroft and below ground garaging of vehicles designed to enable safe entry and exit from the site without compromising pedestrian or cyclist safety or causing conflict with other vehicles.

DTS/DPF 7.1

None are applicable.

## Internal Roads and Parking Areas in Residential Parks and Caravan and Tourist Parks

PO 8.1

Internal road and vehicle parking areas surfaced to prevent dust becoming a nuisance to park residents and occupants.

DTS/DPF 8.1

None are applicable.

PO 8.2

Traffic circulation and movement within the park that is pedestrian friendly and promotes low speed vehicle movement

DTS/DPF 8.2

None are applicable.

## Bicycle Parking in Designated Areas

### PO 9.1

The provision of adequately sized on-site bicycle parking facilities to encourage cycling as an active transport mode supporting community health.

### DTS/DPF 9.1

Areas and / or fixtures are provided for the parking and storage of bicycles at a rate not less than the amount calculated using Transport, Access and Parking Table 3 - Off Street Bicycle Parking Requirements.

### PO 9.2

Bicycle parking facilities provide for the secure storage and tethering of bicycles in a place where casual surveillance is possible, is well lit and signed for the safety and convenience of cyclists and to deter property theft.

### DTS/DPF 9.2

None are applicable.

### PO 9.3

Non-residential development incorporates end-of-journey facilities for employees such as showers, changing facilities and secure lockers, and signage indicating the location of the facilities to encourage cycling as a mode of journey-to-work transport.

### DTS/DPF 9.3

None are applicable.

The number of employees

Table 1 – General Off-Street Car Parking Requirements

| Class of Development             | Car Parking Rate (unless varied by Table 3 onwards)<br>Where a development comprises more than one development type, then the overall car parking rate will be taken to be the sum of the car parking rates for each development type. |
|----------------------------------|--|
| <b>Residential Development</b>   |  |
| <b>Detached Dwelling</b>         | 1 or 2 bedroom dwelling – 1 space per dwelling.<br>3 or more bedroom dwelling – 2 spaces per dwelling.   |
| <b>Group Dwelling</b>            | 1 or 2 bedroom dwelling – 1 space per dwelling.<br>3 or more bedroom dwelling – 2 spaces per dwelling.<br>0.33 spaces per dwelling for visitor parking where development involves 3 or more dwellings.                                 |
| <b>Residential Flat Building</b> | 1 or 2 bedroom dwelling – 1 space per dwelling.<br>3 or more bedroom dwelling – 2 spaces per dwelling.   |

| <b>Class of Development</b>            | <b>Car Parking Rate (unless varied by Table 3 onwards)</b><br>Where a development comprises more than one development type, then the overall car parking rate will be taken to be the sum of the car parking rates for each development type. |
|--|---|
|  | 0.33 spaces per dwelling for visitor parking where development involves 3 or more dwellings.  |
| <b>Row Dwelling</b>                    | 1 or 2 bedroom dwelling – 1 space per dwelling.<br>3 or more bedroom dwelling – 2 spaces per dwelling.  |
| <b>Semi-Detached Dwelling</b>          | 1 or 2 bedroom dwelling – 1 space per dwelling.<br>3 or more bedroom dwelling – 2 spaces per dwelling.  |
| <b>Aged / Supported Accommodation</b>  |   |
| <b>Aged person's accommodation</b>     | 0.3 spaces per bed.   |
| <b>Nursing home</b>                    | 0.3 spaces per bed.   |
| <b>Retirement village</b>              | 1 or 2 bedroom dwelling – 1 space per dwelling.<br>3 or more bedroom dwelling – 2 spaces per dwelling.<br>0.2 spaces per dwelling for visitor parking.  |
| <b>Supported accommodation</b>         | 0.3 spaces per bed.   |
| <b>Residential Development (Other)</b> |   |
| <b>Ancillary accommodation</b>         | No additional requirements beyond those associated with the main dwelling.  |
| <b>Residential park</b>                | 1 or 2 bedroom dwelling – 1 space per dwelling.<br>3 or more bedroom dwelling - 2 spaces per dwelling.<br>0.2 spaces per dwelling for visitor parking.  |
| <b>Workers' accommodation</b>          | 0.5 spaces per bed plus 0.25 spaces per bed for visitor parking.  |
| <b>Tourist</b>                         |   |
| <b>Caravan park / tourist park</b>     | Parks with 100 sites or less – a minimum of 1 space per 10 sites to be used for accommodation.  |

| Class of Development   | <b>Car Parking Rate (unless varied by Table 3 onwards)</b><br>Where a development comprises more than one development type, then the overall car parking rate will be taken to be the sum of the car parking rates for each development type. |
|--|---|
|  | Parks with more than 100 sites - a minimum of 1 space per 15 sites used for accommodation.<br><br>A minimum of 1 space for every caravan (permanently fixed to the ground) or cabin.  |
| <b>Tourist accommodation</b>                                 | 1 car parking space per accommodation unit / guest room.  |
| <b>Commercial Uses</b>                                       |   |
| <b>Auction room/ depot</b>                                   | 1 space per 100m <sup>2</sup> of building floor area plus an additional 2 spaces.   |
| <b>Automotive collision repair</b>                           | 3 spaces per 100m <sup>2</sup> of gross leasable floor area plus 1 space for each vehicle being serviced, repaired or fitted with accessories, including vehicles waiting to be repaired, fitted with accessories or collected by owners.     |
| <b>Bulky goods outlet</b>                                    | 3 spaces per 100m <sup>2</sup> of gross leasable floor area.  |
| <b>Call centre</b>   | 8 spaces per 100m <sup>2</sup> of gross leasable floor area.  |
| <b>Motor repair station</b>                                  | 3 spaces per 100m <sup>2</sup> of gross leasable floor area plus 1 space for each vehicle being serviced, repaired or fitted with accessories, including vehicles waiting to be repaired, fitted with accessories or collected by owners.     |
| <b>Office</b>  | 4 spaces per 100m <sup>2</sup> of gross leasable floor area.  |
| <b>Retail fuel outlet</b>                                    | 6 spaces per service bay, plus 50% of the spaces calculated to be provided for ancillary uses   |
| <b>Service trade premises</b>                                | 4 spaces per 100m <sup>2</sup> of gross leasable floor area<br>1 space per 100m <sup>2</sup> of outdoor area used for display purposes.   |
| <b>Shop</b><br>other than a bulky goods outlet or restaurant | 7 spaces per 100m <sup>2</sup> of gross leasable floor area where not located in an integrated complex containing two or more tenancies (and which may comprise more than one building) where facilities for off-street vehicle               |

| <b>Class of Development</b>      | <b>Car Parking Rate (unless varied by Table 3 onwards)</b><br>Where a development comprises more than one development type, then the overall car parking rate will be taken to be the sum of the car parking rates for each development type.  |
|----------------------------------|--|
|                                  | <p>parking, vehicle loading and unloading, and the storage and collection of refuse are shared.</p> <p>6 spaces per 100m<sup>2</sup> of gross leasable floor area where located in an integrated complex containing two or more tenancies (and which may comprise more than one building) where facilities for off-street vehicle parking, vehicle loading and unloading, and the storage and collection of refuse are shared.</p> |
| <b>Community and Civic Uses</b>  |  |
| <b>Childcare centre</b>          | 0.25 spaces per child  |
| <b>Library</b>                   | 4 spaces per 100m <sup>2</sup> of total floor area.  |
| <b>Community facility</b>        | 10 spaces per 100m <sup>2</sup> of total floor area.   |
| <b>Hall / meeting hall</b>       | 0.2 spaces per seat.   |
| <b>Place of worship</b>          | 1 space for every 3 visitor seats.   |
| <b>Pre-school</b>                | 1 per employee plus 0.25 per child (drop off/pick up bays)   |
| <b>Educational establishment</b> | <p>For a primary school - 1.1 space per full time equivalent employee plus 0.25 spaces per student.</p> <p>For a secondary school - 1.1 per full time equivalent employee plus 0.16 spaces per student</p> <p>For a tertiary institution - 0.8 per student based on the maximum number of students on the site at any time.</p>  |
| <b>Health Related Uses</b>       |  |
| <b>Hospital</b>                  | 5 spaces per bed.  |
| <b>Consulting room</b>           | 4 spaces per 100m <sup>2</sup> of gross leasable floor area.   |

| Class of Development                       | <b>Car Parking Rate (unless varied by Table 3 onwards)</b><br>Where a development comprises more than one development type, then the overall car parking rate will be taken to be the sum of the car parking rates for each development type.                                       |
|--|---|
| <b>Recreational and Entertainment Uses</b> |   |
| <b>Amusement machine centre</b>            | 1 space per 10m <sup>2</sup> of total floor area.   |
| <b>Bowling club</b>                        | 10 spaces per bowling green.  |
| <b>Cinema complex</b>                      | 0.33 spaces per seat.   |
| <b>Concert hall / theatre</b>              | 0.33 spaces per seat.   |
| <b>Hotel</b>                               | 1 space for every 2m <sup>2</sup> of total floor area in a public bar plus 1 space for every 6m <sup>2</sup> of total floor area available to the public in a lounge, beer garden or other licensed area.   |
| <b>Indoor recreation facility</b>          | 7 spaces per 100m <sup>2</sup> of total floor area<br>For a squash court or tennis court – 4 spaces per court.  |

| Class of Development | Car Parking Rate  |                          | Designated Areas |
|----------------------|---|--------------------------|------------------|
|                      | Minimum number of spaces  | Maximum number of spaces |                  |
|                      | Where a development comprises more than one development type, then the overall car parking rate will be taken to be the sum of the car parking rates for each development type. |                          |                  |
|                      | 0.25 spaces per dwelling for visitor parking.   |                          |                  |

Table 2 - Criteria:

The designated area is wholly located within Metropolitan Adelaide and any part of the area satisfies one of the following:

- (a) is within 400 metres of a bus interchange<sup>(1)</sup>
- (b) is within 400 metres of an O-Bahn interchange<sup>(1)</sup>
- (c) is within 400 metres of a passenger rail station<sup>(1)</sup>
- (d) is within 400 metres of a passenger tram station<sup>(1)</sup>
- (e) is within 400 metres of the Adelaide Parklands.

[NOTE(S): (1) Measured from an area that contains any platform(s), shelter(s) or stop(s) where people congregate for the purpose waiting to board a bus, tram or train, but does not include areas used for the parking of vehicles.]

### Table 3 – Off-Street Bicycle Parking Requirements

The bicycle parking rates apply within designated areas located within parts of the State identified in the Schedule to Table 3.

| Class of Development             | Bicycle Parking Rate   |
|----------------------------------|--|
|                                  | Where a development comprises more than one development type, then the overall bicycle parking rate will be taken to be the sum of the bicycle parking rates for each development type.  |
| <b>Consulting Room</b>           | 1 space per 20 employees plus 1 space per 20 consulting rooms for customers.   |
| <b>Educational establishment</b> | For a secondary school – 1 space per 20 full-time time employees plus 10 percent of the total number of employee spaces for visitors.<br><br>For tertiary education – 1 space per 20 employees plus 1 space per 10 full time students. |
| <b>Hospital</b>                  | 1 space per 15 beds plus 1 space per 30 beds for visitors.   |

| <b>Class of Development</b>                             | <b>Bicycle Parking Rate</b><br>Where a development comprises more than one development type, then the overall bicycle parking rate will be taken to be the sum of the bicycle parking rates for each development type. |
|---|--|
| <b>Indoor recreation facility</b>                       | 1 space per 4 employees plus 1 space per 200m <sup>2</sup> of gross leasable floor area for visitors.  |
| <b>Office</b>   | 1 space for every 200m <sup>2</sup> of gross leasable floor area plus 2 spaces plus 1 space per 1000m <sup>2</sup> of gross leasable floor area for visitors.  |
| <b>Residential flat building</b>                        | 1 space for every 4 dwellings for residents plus 1 for every 10 dwellings for visitors.  |
| <b>Residential component of a multi-storey building</b> | 1 space for every 4 dwellings for residents plus 1 space for every 10 dwellings for visitors.  |
| <b>Shop</b>   | 1 space for every 300m <sup>2</sup> of gross leasable floor area plus 1 space for every 600m <sup>2</sup> of gross leasable floor area for customers.  |
| <b>Tourist accommodation</b>                            | 1 space for every 20 employees plus 2 for the first 40 rooms and 1 for every additional 40 rooms for visitors.   |
|   |  |

## Waste Treatment and Management Facilities

### Assessment Provisions (AP)

#### Desired Outcomes (DO)

##### DO 1

Mitigation of potential environmental and amenity impacts of waste treatment and management facilities.

### Performance Outcomes and Deemed to Satisfy / Designated Performance Outcome Criteria

#### Siting

##### PO 1.1

Waste treatment and management facilities incorporate separation distances and attenuation measures within the site between waste operations areas (including all closed, operating and future cells) and sensitive receivers and sensitive environmental features to mitigate off-site impacts from noise, air and dust emissions.

##### DTS/DPF 1.1

None are applicable.

#### Soil and Water Protection

##### PO 2.1

Soil, groundwater and surface water protected from contamination from waste treatment and management facilities through measures such as:

- (a) containing potential groundwater and surface water contaminants within waste operations areas;
- (b) diverting clean stormwater away from waste operations areas and potentially contaminated areas; and
- (c) providing a leachate barrier between waste operations areas and underlying soil and groundwater.

##### DTS/DPF 2.1

None are applicable.

##### PO 2.2

Wastewater lagoons setback from watercourses to minimise environmental harm and adverse effects on water resources.

##### DTS/DPF 2.2

Wastewater lagoons are setback 50m or more from watercourse banks.

##### PO 2.3

Wastewater lagoons designed and sited to:

- (a) avoid intersecting underground waters;
- (b) avoid inundation by flood waters;
- (c) ensure lagoon contents do not overflow; and
- (d) include a liner designed to prevent leakage.

#### DTS/DPF 2.3

None are applicable.

#### PO 2.4

Waste operations areas of landfills and organic waste processing facilities setback from watercourses to minimise adverse impacts on water resources.

#### DTS/DPF 2.4

Waste operations areas are setback 100m or more from watercourse banks.

### Amenity

#### PO 3.1

Waste treatment and management facilities are screened, located and designed to minimise adverse visual impacts on amenity.

#### DTS/DPF 3.1

None are applicable.

#### PO 3.2

Access routes to waste treatment and management facilities via residential streets is avoided.

#### DTS/DPF 3.2

None are applicable.

#### PO 3.3

Litter control measures minimise the incidence of windblown litter.

#### DTS/DPF 3.3

None are applicable.

#### PO 3.4

Waste treatment and management facilities are designed to minimise adverse impacts on both the site and surrounding areas from weed and vermin infestation.

#### DTS/DPF 3.4

None are applicable.

### Access

#### PO 4.1

Traffic circulation movements within any waste treatment or management site designed to enable all vehicles expected to use the facility to enter and exit the site in a forward direction.

#### DTS/DPF 4.1

None are applicable.

#### PO 4.2

Suitable access for emergency vehicles provided to and within waste treatment or management sites.

DTS/DPF 4.2

None are applicable.

## Fencing and Security

PO 5.1

Security fencing provided around waste treatment and management facilities to prevent unauthorised access to operations and potential hazard to the public

DTS/DPF 5.1

Chain wire mesh or pre-coated painted metal fencing 2m or more in height is erected along the perimeter of the waste treatment or waste management facility site.

## Landfill

PO 6.1

Landfill gas emissions managed in an environmentally acceptable manner.

DTS/DPF 6.1

None are applicable.

PO 6.2

Landfill facilities separated from areas of environmental significance and land used for public recreation and enjoyment.

DTS/DPF 6.2

Landfill facilities are setback 250m or more from a public open space reserve, forest reserve, national park or the Conservation Zone.

PO 6.3

Landfill facilities located on land that is not subject to land slip.

DTS/DPF 6.3

None are applicable.

PO 6.4

Landfill facilities separated from areas subject to flooding to avoid potential environmental harm.

DTS/DPF 6.4

Landfill facilities are setback 500m or more from land inundated in a 1% AEP flood event.

## Organic Waste Processing Facilities

PO 7.1

Organic waste processing facilities separated from the coast to avoid potential environment harm.

DTS/DPF 7.1

Organic waste processing facilities are setback 500m or more from coastal high water mark.

PO 7.2

Organic waste processing facilities not located on land where the interface of the engineered liner and natural soils would be within any of the following:

- a. 15m of unconfined aquifers bearing groundwater with less than 3,000mg per litre total dissolved salts;  
or

- b. 5m of groundwater with a water quality of 3,000mg to 12,000mg per litre total dissolved salts; or
- c. 2m of groundwater with a water quality exceeding 12,000mg per litre total dissolved salts.

#### DTS/DPF 7.2

None are applicable.

#### PO 7.3

Organic waste processing facilities sited away from areas of environmental significance and land used for public recreation and enjoyment.

#### DTS/DPF 7.3

Organic waste processing facilities are setback 250m or more from a public open space reserve, forest reserve, national park or the Conservation Zone.

#### PO 7.4

Organic waste processing facilities located on land that is not subject to land slip.

#### DTS/DPF 7.4

None are applicable.

#### PO 7.5

Organic waste processing facilities separated from areas subject to flooding to avoid potential environmental harm.

#### DTS/DPF 7.5

Organic waste processing facilities are setback 500m or more from land inundated in a 1% AEP flood event.

## Major Wastewater Treatment Facilities

#### PO 8.1

Major wastewater treatment and disposal systems, including lagoons, designed to minimise potential adverse odour impacts on sensitive receivers.

#### DTS/DPF 8.1

None are applicable.

#### PO 8.2

Artificial wetland systems for the storage of treated wastewater designed and sited to minimise potential public health risks arising from the breeding of mosquitoes.

#### DTS/DPF 8.2

None are applicable.

## Workers Accommodation and Settlements

### Assessment Provisions (AP)

### Desired Outcomes (DO)

#### DO 1

Appropriately designed and located accommodation for seasonal and short-term workers in rural areas that minimises environmental and social impacts.

## Performance Outcomes and Deemed to Satisfy / Designated Performance Outcome Criteria

### PO 1.1

Workers accommodation and settlements sited and designed to minimise impacts on views from scenic routes, tourist destinations and areas of conservation significance.

### DTS/DPF 1.1

None are applicable.

### PO 1.2

Workers accommodation and settlements sited and designed to minimise nuisance impacts on the amenity of adjacent users of land.

### DTS/DPF 1.2

None are applicable.

### PO 1.3

Workers accommodation and settlements designed with materials and colours that blend with the landscape.

### DTS/DPF 1.3

None are applicable.

### PO 1.4

Workers accommodation and settlements supplied with service infrastructure such as power, water and effluent disposal sufficient to satisfy the living requirements of workers.

### DTS/DPF 1.4

None are applicable.

## Part 5 – Designated Areas

Under the *Planning, Development and Infrastructure (General) Regulations* the Planning and Design Code may designate a zone, subzone, overlay or identify other areas for certain purposes.

Column A identifies the purpose of a designated area and Column B identifies the relevant zone, subzone or overlay in the Planning and Design Code or other area designated for that purpose, including limits to the extent of a designated area.

Where the extent of a designated area is limited in Column B by a figure, the figure is provided in Schedule 1 of this Part.

Table 1 – Designated Areas

| Introduction<br>(Column A)   | Designated Area(s)<br>(Column B)   |
|--|--|
| Interpretation   |  |
| Areas identified as 'designated 'airport building heights area' for the purposes of clause 3(1) of the Regulations – Interpretation              | Airport Building Heights (Aircraft Landing Areas) Overlay<br>Airport Building Heights (Regulated) Overlay<br>Defence Aviation Area Overlay   |
| Areas identified as 'designated environmental zone, subzone or overlay' for the purposes of clause 3(1) of the Regulations – Interpretation      | None specified   |
| Areas identified as 'designated flood zone, subzone or overlay' for the purposes of clause 3(1) of the Regulations – Interpretation              | Coastal Areas Overlay<br>Hazards (Flooding) Overlay<br>River Murray Flood Plain Overlay  |
| Areas identified as 'designated regulated tree overlay' for the purposes of clause 3(1) of the Regulations – Interpretation                      | Regulated Tree Overlay   |

| Bluff Beach - Minimum building site level 3.75m; Minimum building floor level 4m         |
| Port Rickaby - Minimum building site level 3.8m; Minimum building floor level 4.05m      |

## Part 7 – Land Use Definitions

### Land Use Terms

The following table lists terms which may be used in this Planning and Design Code in relation to the use of land.

### Meaning of Terms

A term listed in Column A has the meaning set out beside that term in Column B.

### Inclusions and Exclusions

Land uses and activities set out in Column C are to be taken as being **included** in the meaning of the land use term set out in Column A.

Land uses and activities set out in Column D are to be taken as being **excluded** from the meaning of the land use term set out in Column A.

In the event of any inconsistency Column D prevails over Column C.

### Ancillary and Subordinate

Unless stated to the contrary, a term set out in the following table which purports to define a form of land use will be taken to include a use which is ancillary and subordinate to that defined use.

### No Definition

A term not defined in the following table will have its ordinary meaning unless the term is defined in the *Planning, Development and Infrastructure Act 2016* or its Regulations (or any relevant practice direction or practice guideline issued by the State Planning Commission) in which case that meaning will apply.

Land Use Definitions Table LUD

| Land Use Term<br>(Column A) | Definition<br>(Column B)   | Includes<br>(Column C)  | Excludes<br>(Column D)   |
|-----------------------------|--|---|--|
| Agricultural building       | Means a building used wholly or partly for purposes associated with farming, commercial forestry or horticulture, or to support the operations of that use, but is not used wholly or partly for the processing or packaging of commodities.   | Farm shed;<br>Horticultural shed;<br>Hay shed;<br>Implement shed;<br>Pump shed. | Dairy;<br>Dwelling;<br>Industry;<br>Intensive animal husbandry;<br>Office;<br>Outbuilding;<br>Shop.          |
| Ancillary accommodation     | Means accommodation that:<br><br>(a) is located on the same allotment as an existing dwelling;<br><br>(b) contains no more than 1 bedroom or room or area capable of being used as a bedroom; and<br><br>(c) is subordinate to and shares the same utilities of the existing dwelling.                 |   |  |
| Animal keeping              | Means the boarding (short or long term), keeping, breeding or training of animals, except horses and/or commercially kept livestock.   | Dog kennelling<br>Catteries   | Aquaculture;<br>Farming;<br>Horse keeping;<br>Intensive animal husbandry;<br>Low intensity animal husbandry. |
| Aquaculture                 | Has the same meaning as in the <i>Aquaculture Act 2001</i> .   |   | Intensive animal husbandry.  |
| Automotive collision repair | Means repairs to motor vehicles involving structural repairs, panel beating, replacement of vehicle body parts or spray painting.  |   | Motor repair station   |
| Bulky goods outlet          | Means premises used primarily for the sale, rental, display or offer by retail of goods, other than foodstuffs, clothing, footwear or personal effects goods, unless the sale, rental, display or offer by retail of the foodstuffs, clothing, footwear or personal effects goods is incidental to the |   |  |

| Land Use Term<br>(Column A) | Definition<br>(Column B)   | Includes<br>(Column C) | Excludes<br>(Column D) |
|-----------------------------|--|------------------------|------------------------|
|                             | <p>sale, rental, display or offer by retail of other goods.</p> <p><b>Examples—</b> The following are examples of goods that may be available or on display at bulky goods outlets:</p> <ul style="list-style-type: none"> <li>(a) automotive parts and accessories;</li> <li>(b) furniture;</li> <li>(c) floor coverings;</li> <li>(d) window coverings;</li> <li>(e) appliances or electronic equipment;</li> <li>(f) home entertainment goods;</li> <li>(g) lighting and electric light fittings;</li> <li>(h) curtains and fabric;</li> <li>(i) bedding and manchester;</li> <li>(j) party supplies;</li> <li>(k) animal and pet supplies;</li> <li>(l) camping and outdoor recreation supplies;</li> <li>(m) hardware;</li> <li>(n) garden plants (primarily in an indoor setting);</li> <li>(o) office equipment and stationery supplies;</li> <li>(p) baby equipment and accessories;</li> <li>(q) sporting, fitness and recreational equipment and accessories;</li> <li>(r) homewares;</li> <li>(s) children's play equipment.</li> </ul> |                        |                        |
| Caravan and tourist park    | Means land used to provide short-term accommodation in caravans, recreational vehicles (RVs) cabins, tents   |                        | Residential park       |

| Land Use Term<br>(Column A) | Definition<br>(Column B)  | Includes<br>(Column C) | Excludes<br>(Column D)  |
|-----------------------------|---|------------------------|---|
|                             | and other similar demountable forms of shelter in a managed setting.  |                        |   |
| Commercial forestry         | Means the practice of planting, managing, and caring for forests that are to be harvested (or intended to be harvested) or used for commercial purposes (including through the commercial exploitation of the carbon absorption capacity of the forest).  |                        |   |
| Consulting room             | Means a building or part of a building (not being a hospital) used in the practice of a profession by a medical, veterinary or dental practitioner, or a practitioner in any curative science, in the provision of medical services, mental, moral or family guidance, but does not involve any overnight accommodation other than for animals that are recovering from treatment or in for observation as part of a veterinary practice. |                        |   |
| Cropping                    | Means propagating, cultivating and/or harvesting of grains, cereals, oilseeds, lupins, legumes, hops, hemp, hay, lucerne or other similar plants or plant products for commercial production.   |                        | Commercial forestry;<br>Horticulture;<br>Mushroom production. |
| Dairy                       | Means a building or part of a building used for all or any of the operations of commercial milk production (whether mechanical or otherwise) and includes a milking shed, milk room, wash room or engine room.  |                        |   |
| Detached dwelling           | Means a detached building comprising 1 dwelling on a site that is held exclusively with that dwelling and has a   |                        |   |

| Land Use Term<br>(Column A) | Definition<br>(Column B)   | Includes<br>(Column C) | Excludes<br>(Column D)                                    |
|-----------------------------|--|------------------------|---|
|                             | frontage to a public road, or to a road proposed in a plan of land division that is the subject of a current development authorisation.  |                        |   |
| Dwelling                    | Means a building or part of a building used as a self-contained residence.   |                        |   |
| Educational establishment   | Means a primary school, secondary school, reception to year 12 school, college, university or technical institute, and includes an associated pre-school or institution for the care and maintenance of children.  |                        |   |
| Electricity substation      | <p>Means—</p> <p>(a) works for the conversion, transformation or control of electricity by 1 or more transformers, or by any switchgear or other equipment; or</p> <p>(b) any equipment, building, structure or other works ancillary to or associated with works referred to in paragraph (a), other than any such works—</p> <p>(i) that are mounted on a pole; or</p> <p>(ii) that are wholly enclosed in a weather-proof enclosure not exceeding 8.5m<sup>3</sup>; or</p> <p>(iii) that are incidental to any lawful use of the land which the works are situated.</p> |                        |   |
| Farming                     | Means cropping, grazing or low intensity animal husbandry.   | Cropping;<br>Grazing;  | Animal keeping;<br>Commercial forestry;<br>Horse keeping; |

| Land Use Term<br>(Column A) | Definition<br>(Column B)   | Includes<br>(Column C)   | Excludes<br>(Column D)   |
|-----------------------------|--|--|--|
|                             |  | Low intensity animal husbandry.  | Horticulture;<br>Intensive animal husbandry;<br>Mushroom production. |
| Fuel depot                  | Means land used primarily for the storage of petrol, gas, oils or other petroleum products and within or upon which no retail trade is conducted.  |  |  |
| General industry            | Means any industry other than a light industry or special industry.  |  |  |
| Group dwelling              | Means 1 of a group of 2 or more detached buildings, each of which is used as a dwelling and 1 or more of which has a site without a frontage to a public road or to a road proposed in a plan of land division that is the subject of a current development authorisation. |  |  |
| Horse keeping               | Means the keeping or husbandry of horses where more than 1 horse is kept per 3ha of land used for such purposes.   |  |  |
| Horticulture                | Means the use of land for market gardening, viticulture, floriculture, orchards, wholesale plant nurseries or commercial turf growing.   |  | Commercial forestry;<br>Mushroom production.                         |
| Hotel                       | Means premises licensed, or proposed to be licensed, as a hotel under the <i>Liquor Licensing Act 1997</i> .   |  |  |
| Indoor recreation facility  | Means a building designed or adapted primarily for recreation or fitness pursuits.   | Bowling alley;<br>Squash courts;<br>Fitness centre;<br>Gymnasium;<br>Pilates Studio;<br>Yoga Studio;<br>Dance studio;<br>Indoor swimming centre; |  |

| Land Use Term<br>(Column A) | Definition<br>(Column B)  | Includes<br>(Column C)  | Excludes<br>(Column D)   |
|-----------------------------|---|---|--|
|                             |   | Indoor trampoline centre;<br>Indoor rock climbing centre;<br>Indoor children's play centre. |  |
| Industry                    | <p>Means the carrying on, in the course of a trade or business, of any process (other than a process in the course of farming or mining) for, or incidental to:</p> <p>(a) the making of any article, ship or vessel, or of part of any article, ship or vessel; or</p> <p>(b) the altering, repairing, ornamenting, finishing, assembling, cleaning, washing, packing, bottling, canning or adapting for sale, or the breaking up or demolition, of any article, ship or vessel; or</p> <p>(c) the getting, dressing or treatment of materials</p> <p>The use may include:</p> <p>(d) selling by wholesale of goods manufactured on site</p> <p>(e) selling by retail of goods manufactured on site provided the total floor area occupied for such sale does not exceed 250 square metres</p> <p>(and <b>industrial</b> will be construed accordingly).</p> | General industry;<br>Light industry;<br>Special industry.                                   |  |
| Intensive animal husbandry  | Means the commercial production of animals or animal products where the animals are kept in enclosures or other confinement and their main  | Broiler shed;<br>Feedlot;<br>Poultry hatchery;<br>Piggery;<br>Poultry battery.              | Animal keeping;<br>Apiculture;<br>Aquaculture;<br>Horse keeping; |

| Land Use Term<br>(Column A)    | Definition<br>(Column B)  | Includes<br>(Column C) | Excludes<br>(Column D)   |
|--------------------------------|---|------------------------|--|
|                                | food source is introduced from outside the enclosures or area of confinement in which they are kept.  |                        | Low intensity animal husbandry;<br>Stock sales yard.                             |
| Landfill                       | Land used for the receipt and controlled disposal of refuse through burial and/or spreading over land.  |                        |  |
| Light industry                 | <p>Means an industry where the process carried on, the materials and machinery used, the transport of materials, goods or commodities to and from the land on or in which (wholly or in part) the industry is conducted and the scale of the industry does not:</p> <p>(a) detrimentally affect the amenity of the locality or the amenity within the vicinity of the locality by reason of the establishment or the bulk of any building or structure, the emission of noise, vibration, smell, fumes, smoke, vapour, steam, soot, ash, dust, waste water, waste products, grit, oil, spilled light, or otherwise howsoever; or</p> <p>(b) directly or indirectly, cause dangerous or congested traffic conditions in any nearby road.</p> |                        |  |
| Low intensity animal husbandry | Means the commercial production of animals or animal products (eg meat, wool) on either native or improved pastures or vegetation where the animal's main food source is obtained by grazing or foraging.   | Grazing;               | Animal keeping;<br>Aquaculture;<br>Horse keeping;<br>Intensive animal husbandry. |

| Land Use Term<br>(Column A)                 | Definition<br>(Column B)  | Includes<br>(Column C) | Excludes<br>(Column D)                              |
|---|---|------------------------|---|
| Motor repair station                        | Means any land or building used for carrying out repairs (other than panel beating or spray painting) to motor vehicles and / or farm machinery.  |                        | Automotive collision repair                         |
| Mushroom production                         | Means the commercial production of mushrooms or any other type of fungi.  |                        |   |
| Office                                      | Means any building used for administration or the practice of a profession.   |                        | Consulting room.                                    |
| Organic waste processing facility           | Means the commercial processing of organic waste by composing, mulching, shredding, grinding or similar process into organic material for use as mulch, soil improver, growing medium or the like.  |                        |   |
| Outbuilding                                 | Means a non-habitable detached building on the same site as a main building which is ancillary and subordinate to the main building and has a use and function which relates to the main building.  |                        | Private bushfire shelter.                           |
| Personal or domestic services establishment | <p>Means premises used for the provision of services catering to the personal or domestic needs of customers:</p> <p><b>Examples—</b> The following are examples of services that may be available at personal and domestic services establishments</p> <ul style="list-style-type: none"> <li>(a) clothing repair and alterations;</li> <li>(b) cutting, trimming and styling hair;</li> <li>(c) domestic pet grooming;</li> <li>(d) manicures and pedicures;</li> </ul> |                        | Consulting room;<br>Office;<br>Financial institute. |

| Land Use Term<br>(Column A)       | Definition<br>(Column B)  | Includes<br>(Column C)  | Excludes<br>(Column D) |
|-----------------------------------|---|---|------------------------|
|                                   | (e) non-surgical cosmetic treatments;<br>(f) personal care treatments;<br>(g) self-service clothes laundering;<br>(h) shoe repair;<br>(i) watch repair.   |   |                        |
| Place of worship                  | Means premises used by an organised group for worship and religious activities.<br><br>The use may include facilities for social, educational and charitable activities associated with the congregation.   | Chapel;<br>Church;<br>Mosque;<br>Synagogue;<br>Temple.                    | Funeral parlour.       |
| Pre-school                        | Means a place primarily for the care or instruction of children of less than primary school age not resident on the site.   | Child care centre;<br>Early learning centre;<br>Kindergarten;<br>Nursery. |                        |
| Protective tree netting structure | Means netting and any associated structure:<br><br>(a) that is designed to protect trees or plants grown for the purpose of commercial horticulture; and<br><br>(b) that consists of a netting canopy attached to a structure (such as poles and cables).     |   |                        |
| Public service depot              | Means land used for storage and operations connected with the provision of public services (including gas, electricity, water supply, sewerage, drainage, roadworks or telecommunication services) by a body responsible for the provision of those services. |   |                        |
| Recreation area                   | Means any park, garden, children's playground or sports ground that is under the care, control and  | Outdoor public sports courts;<br>Public ovals and fields.                 | Golf course.           |

| Land Use Term<br>(Column A) | Definition<br>(Column B)   | Includes<br>(Column C)  | Excludes<br>(Column D)                                      |
|-----------------------------|--|---|---|
|                             | management of the Crown, or a council, and is open to the public without payment of a charge.  |   |   |
| Renewable energy facility   | <p>Means land and/or water used to generate electricity from a renewable source such as wind, solar, tidal, hydropower, biomass and/or geothermal.</p> <p>This use may also include:</p> <p>(a) any associated facility for the storage and/or transmission of the generated electricity;</p> <p>(b) any building or structure used in connection with the generation of electricity.</p> <p>The use does not include a renewable energy facility principally used to supply and/or store electricity to an existing use of land that has a generating capacity less than 5MW (e.g., domestic solar panels, domestic wind generators, domestic battery storage).</p> | <p>Battery storage facility;</p> <p>Hydropower or pumped hydropower facility;</p> <p>Solar power facility;</p> <p>Wave power generator;</p> <p>Wind farm.</p> |   |
| Residential flat building   | Means a single building in which there are 2 or more dwellings.  |   | Group dwelling;<br>Row dwelling;<br>Semi-detached dwelling; |
| Residential park            | Means a residential park operating under the regulatory framework of the <i>Residential Parks Act 2007</i> .   |   | Caravan and tourist park;                                   |
| Restaurant                  | Means land used primarily for the consumption of meals on the site.  |   |   |
| Retail fuel outlet          | <p>Means land used for:</p> <p>(a) the fuelling of motor vehicles involving the sale by retail of petrol, oil, liquid petroleum</p>  |   | Fuel depot;<br>Motor repair station.                        |

| Land Use Term<br>(Column A) | Definition<br>(Column B)   | Includes<br>(Column C) | Excludes<br>(Column D) |
|-----------------------------|--|------------------------|------------------------|
|                             | <p>gas, automotive distillate and any other fuels; and</p> <p>(b) the sale by retail of food, drinks and other convenience goods for consumption on or off the land; and</p> <p>both are operated as and constitute one integrated facility where on-site facilities, systems and processes, car parking and access and egress are all shared.</p> <p>The use may also include one or more of the following secondary activities:</p> <p>(c) the washing and cleaning of motor vehicles;</p> <p>(d) the washing of other equipment or things including dogs and other pets;</p> <p>(e) the provision (on a paid or free basis) of facilities for charging electric vehicles;</p> <p>(f) the hiring of trailers;</p> <p>(g) selling of motor vehicle accessories and/or parts; and</p> <p>(h) the installation of motor vehicle accessories and/or parts.</p> |                        |                        |
| Retirement facility         | Means a facility operating under the regulatory framework of the <i>Retirement Villages Act 2016</i> .   |                        |                        |
| Row dwelling                | <p>Means a dwelling:</p> <p>(a) occupying a site that is held exclusively with that dwelling and has a frontage to a public road or to a road proposed in a plan of</p>  |                        |                        |

| Land Use Term<br>(Column A) | Definition<br>(Column B)  | Includes<br>(Column C)                            | Excludes<br>(Column D)     |
|-----------------------------|---|---|----------------------------|
|                             | <p>land division that is the subject of a current development authorisation; and</p> <p>(b) comprising 1 of 3 or more dwellings erected side by side, joined together and forming, by themselves, a single building.</p>  |   |                            |
| Semi-detached dwelling      | <p>Means a dwelling:</p> <p>(a) occupying a site that is held exclusively with that dwelling and has a frontage to a public road or to a road proposed in a plan of land division that is the subject of a current planning authorisation; and</p> <p>(b) comprising 1 of 2 dwellings erected side by side, joined together and forming, by themselves, a single building.</p>                          |   |                            |
| Service trade premises      | <p>Means premises used primarily for the sale, rental or display of:</p> <p>(a) basic plant, equipment or machinery used in agriculture or industry; or</p> <p>(b) boats; or</p> <p>(c) caravans and recreational vehicles (RVs); or</p> <p>(d) domestic garages; or</p> <p>(e) sheds; or</p> <p>(f) outbuildings; or</p> <p>(g) motor vehicles; or</p> <p>(h) marquees; or</p> <p>(i) trailers; or</p> | <p>Motor vehicle showroom;<br/>Used car yard.</p> | <p>Bulky goods outlet.</p> |

| Land Use Term<br>(Column A) | Definition<br>(Column B)   | Includes<br>(Column C)  | Excludes<br>(Column D)   |
|-----------------------------|--|---|--|
|                             | <p>(j) swimming pools, equipment and accessories; or</p> <p>(k) building materials in bulk supply; or</p> <p>(l) landscaping materials; or</p> <p>(m) garden plants (primarily in an outdoor setting), or</p> <p>(n) agricultural supplies such as agricultural chemicals, fertilisers, seed and animal feed; or</p> <p>(o) rainwater tanks and irrigation supplies;</p> <p>or similar articles or merchandise.</p> <p>The use may also include the servicing and repair of any of the listed items (but not vehicle panel beating or spray painting).</p> |   |  |
| Shop                        | <p>Means:</p> <p>(a) premises used primarily for the sale by retail, rental or display of goods, foodstuffs, merchandise or materials; or</p> <p>(b) a personal or domestic services establishment.</p>  | <p>Bulky goods outlet;</p> <p>Personal or domestic services establishment;</p> <p>Restaurant.</p> | <p>Hotel;</p> <p>Motor repair station;</p> <p>Retail fuel outlet;</p> <p>Service trade premises;</p> <p>Wholesale plant nursery.</p> |
| Special industry            | <p>Means an industry where the processes carried on, the methods of manufacture adopted or the particular materials or goods used, produced or stored, are likely:</p> <p>(a) to cause or create dust, fumes, vapours, smells or gases; or</p>   |   |  |

| Land Use Term<br>(Column A) | Definition<br>(Column B)   | Includes<br>(Column C) | Excludes<br>(Column D)                              |
|-----------------------------|--|------------------------|---|
|                             | <p>(b) to discharge foul liquid or blood or other substance or impurities liable to become foul, and thereby:</p> <p>(c) to endanger, injure or detrimentally affect the life, health or property of any person (other than any person employed or engaged in the industry); or</p> <p>(d) to produce conditions which are, or may become, offensive or repugnant to the occupiers or users of land in the locality of or within the vicinity of the locality of the land on which (whether wholly or partly) the industry is conducted.</p> |                        |   |
| Stock slaughter works       | <p>Means a building or part of a building, or land, used primarily for slaughter of stock (including camels, goats and deer) or poultry,</p> <p>This use may also include:</p> <p>(a) the keeping of animals prior to slaughter on site</p> <p>(b) processing of animal products for human or animal consumption.</p>  |                        | Retail butcher.                                     |
| Stock sales yard            | <p>Means land or premises used for the commercial conduct of buying and selling of livestock.</p>  |                        | Stock slaughter works.                              |
| Store                       | <p>Means a building or enclosed land used for the storage of goods, and within or upon which no trade (whether wholesale or retail) or industry is carried on.</p>   |                        | Junk yard;<br>Outbuilding;<br>Public service depot. |
| Student accommodation       | <p>Mean premises used to accommodate students in</p>   |                        | Dwelling;   |

| Land Use Term<br>(Column A) | Definition<br>(Column B)   | Includes<br>(Column C) | Excludes<br>(Column D)            |
|-----------------------------|--|------------------------|-----------------------------------|
|                             | <p>room or dormitory style accommodation that is not self-contained and that includes common facilities for shared use by student occupants such as:</p> <ul style="list-style-type: none"> <li>(a) shared cooking facilities and/or the provision of meals;</li> <li>(b) common rooms and recreation areas;</li> <li>(c) shared laundry facilities or a laundry service; or</li> <li>(d) shared bathroom facilities.</li> </ul> |                        | Residential flat building.        |
| Supported accommodation     | Means premises in which residential accommodation is provided to persons requiring/together with regular medical and/or personal care assistance.  |                        | Hospital;<br>Retirement facility. |
| Telecommunications facility | Means a facility within the meaning of the <i>Telecommunications Act 1997</i> of the Commonwealth.   |                        |                                   |
| Tourist accommodation       | Means premises in which temporary or short-term accommodation is provided to travellers on a commercial basis.   |                        |                                   |
| Warehouse                   | Means a building or enclosed land used for the storage of goods and the carrying out of commercial transactions involving the sale of such goods, but does not include any land or building used for sale by retail.   |                        | Store.                            |
| Wind farm                   | <p>Means land used to generate electricity from wind force with wind turbine generators. This use may also include:</p> <ul style="list-style-type: none"> <li>(a) any associated facility for the storage and/or</li> </ul>   |                        |                                   |

| Land Use Term<br>(Column A) | Definition<br>(Column B)  | Includes<br>(Column C)   | Excludes<br>(Column D)        |
|-----------------------------|---|--|-------------------------------|
|                             | <p>transmission of the generated electricity;</p> <p>(b) any building or structure used in connection with the generation of electricity including a wind turbine, substation, maintenance shed, access road or wind monitoring mast.</p> <p>The use does not include a wind farm principally used to supply and/or store electricity to an existing use of land (e.g., domestic wind generator).</p>               |  |                               |
| Workers' accommodation      | <p>Means premises used to accommodate workers on a temporary basis while they carry out employment:</p> <p>(a) on the same site as the workers' accommodation;</p> <p>(b) in mining or petroleum extraction;</p> <p>(c) in seasonally intensive rural activities such as fruit picking, pruning, animal shearing, meat processing or similar; or</p> <p>(d) in road and/or railway infrastructure construction.</p> | <p>Mining camp;</p> <p>Road workers camp;</p> <p>Shearing quarters;</p> <p>Railway workers camp;</p> | <p>Tourist accommodation.</p> |

## Part 8 – Administrative Definitions

The following table lists terms which may be used to assist with the interpretation of policy used in the Planning and Design Code.

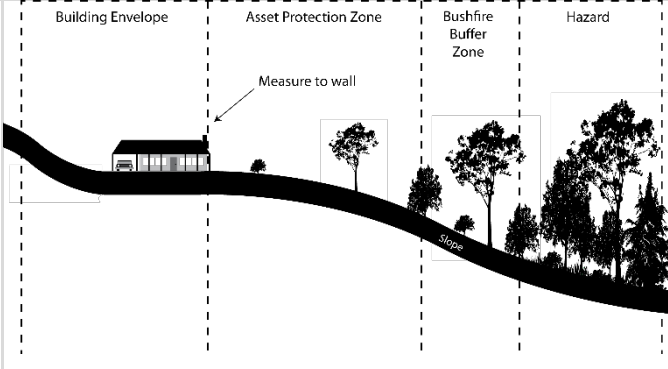

### Meaning of Terms

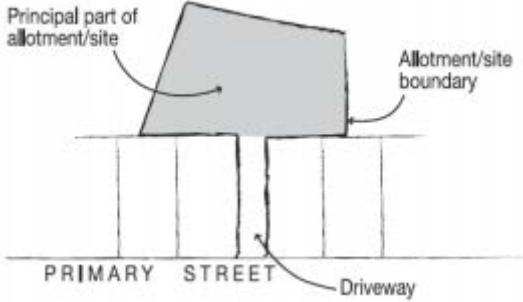

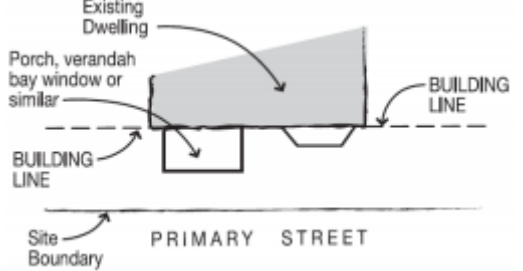

A term listed in Column A has the meaning set out beside that term in Column B. Column C contains, where applicable, illustrations to assist with the interpretation of the meaning provided in Column B.

### No Definition

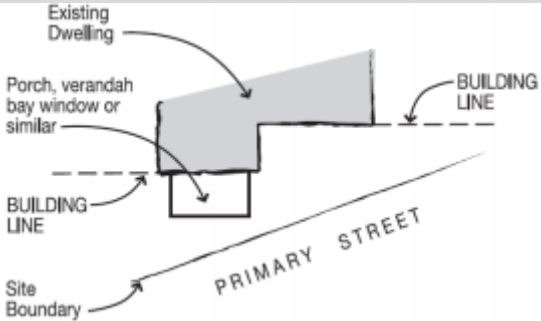

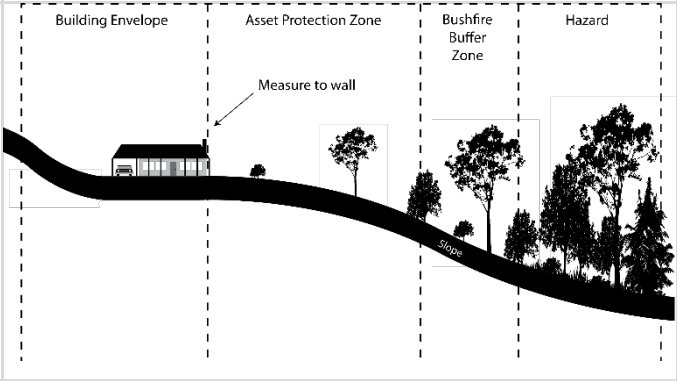

A term not defined in the following table will have its ordinary meaning unless the term is defined in the *Planning, Development and Infrastructure Act 2016* or its Regulations (or any relevant practice direction or practice guideline issued by the State Planning Commission) in which case that meaning will apply.

### Administrative Definitions Table

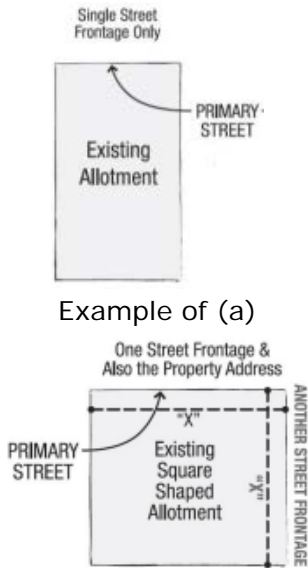

| Term<br>(Column A)    | Definition<br>(Column B)  | Illustrations<br>(Column C)  |
|-----------------------|---|--|
| AEP                   | Means annual exceedance probability   |  |
| AHD                   | Means Australian height datum.  |  |
| Asset protection zone | <p>In relation to bushfire protection, means an area generally clear of vegetation that is maintained to minimise the spread of fire between areas of hazardous vegetation and habitable buildings.</p> <p>Asset protection zones may incorporate features such as driveways, vegetable gardens or landscaped gardens incorporating deciduous trees and fire retardant plant species.</p> |  |

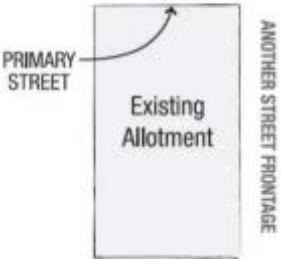

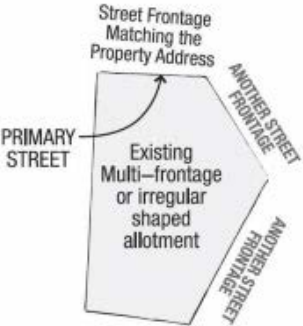

| Term<br>(Column A)   | Definition<br>(Column B)  | Illustrations<br>(Column C)   |
|----------------------|---|---|
| Battle-axe allotment | <p>Means an allotment or site that comprises—</p> <p>(a) a driveway or 'handle' (and any related open space) that leads back from a road to the balance of the allotment or site; and</p> <p>(b) a balance of the allotment or site that is the principal part of the allotment or site and that does not have a boundary with a road.</p>  |  <p><i>Note: Battle-axe allotments are often referred to as 'hammerhead' or 'flagpole' allotments.</i></p> |
| Building height      | <p>Means the maximum vertical distance between the lower of the natural or finished ground level at any point of any part of a building and the finished roof height at its highest point, ignoring any antenna, aerial, chimney, flagpole or the like.</p>   |   |
| Building level       | <p>Means that portion of a building which is situated between the top of any floor and the top of the next floor above it, and if there is no floor above it, that portion between the top of the floor and the ceiling above it. It does not include a floor located 1.5 metres below finished ground level or any mezzanine.</p>  |   |
| Building line        | <p>In relation to a building on a site, means a line drawn parallel to the wall on the building closest to the boundary of the site that faces the primary street (and any existing projection from the building such as a carport, verandah, porch or bay window is not to be taken to form part of the building for the purposes of determining the relevant wall of the building).</p> |    |

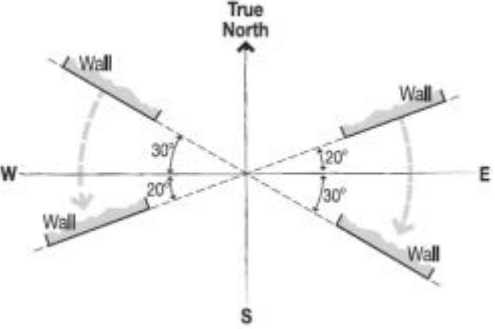

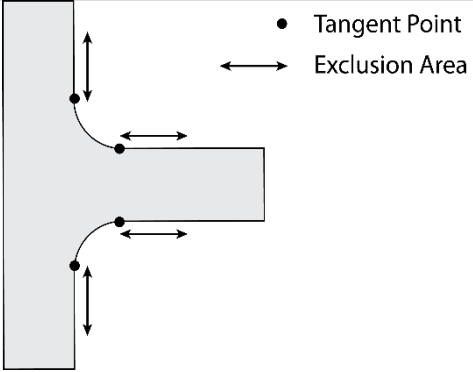

| Term<br>(Column A)        | Definition<br>(Column B)   | Illustrations<br>(Column C)  |
|---------------------------|--|--|
|                           |  |  <p>The diagram illustrates a building footprint on a site. Labels include: Existing Dwelling (the main rectangular part of the building), Porch, verandah bay window or similar (the smaller protrusions), BUILDING LINE (dashed lines indicating the building's extent), Site Boundary (the outer edge of the property), and PRIMARY STREET (a diagonal line representing the road).</p>  |
| Bushfire buffer zone      | In relation to bushfire protection, means an area of land designed to isolate residential allotments from areas that pose a bushfire risk such as areas with rugged terrain or hazardous vegetation.   |  <p>This cross-sectional diagram shows a building on a slope. From left to right, it identifies: Building Envelope (the building itself), Asset Protection Zone (the area immediately surrounding the building), Bushfire Buffer Zone (a larger area with trees and vegetation), and Hazard (the area beyond the buffer zone). A 'Measure to wall' is indicated between the building and the asset protection zone. The slope of the ground is also labeled.</p> |
| Defence aviation area     | Has the same meaning as in the <i>Defence Act 1903</i> of the Commonwealth.  |  |
| Density                   | In relation to residential development, means the number of dwelling units in a given area. It is calculated by dividing the total number of dwellings by the area of residential land that they occupy (excluding other land uses, roads, public open space, and services). |  |
| FFL                       | Means finished floor level.  |  |
| Gross leasable floor area | Means the total floor area of a building excluding public or common tenancy areas such as malls, hallways, verandahs,  |  |

| Term<br>(Column A) | Definition<br>(Column B)  | Illustrations<br>(Column C) |
|--------------------|---|-----------------------------|
|                    | public or shared tenancy toilets, common storage areas and loading docks.   |                             |
| Groundwater        | Means water that is naturally contained beneath the surface of the ground.  |                             |
| Habitable room     | Means any room used for domestic purposes other than a bathroom, laundry, toilet, pantry, walk-in wardrobe, corridor, stair, hallway, lobby, clothes drying room or other space of a specialised nature occupied neither frequently nor for extended periods. |                             |
| Heritage agreement | In relation to State Heritage, is an agreement that is registered under section 34 of the <i>Heritage Places Act 1993</i> .   |                             |
| High-density       | Means greater than 70 dwelling units per hectare.   |                             |
| High-rise          | In relation to development, means 7 building levels and above.  |                             |
| Hours of operation | Means the hours that a land use is open to the public or conducting activities related to the land use, not including administration or routine activities normally associated with opening and closing or start up and shut down.                            |                             |
| Low-density        | Means less than 35 dwelling units per hectare.  |                             |
| Low rise           | In relation to development, means up to and including 2 building levels.  |                             |
| Medium-density     | Means 35 to 70 dwelling units per hectare.  |                             |
| Medium-rise        | In relation to development, means 3 to 6 building levels.   |                             |
| Mezzanine          | Means an intermediate floor within a building between building levels that is open to the floor below and does not extend over the whole floor space.   |                             |
| Native vegetation  | Has the same meaning as in the <i>Native Vegetation Act 1991</i> .  |                             |

| Term<br>(Column A) | Definition<br>(Column B)  | Illustrations<br>(Column C)  |
|--------------------|---|--|
| Neighbourhood zone | Means any of the following:<br>City Living Zone<br>Residential Neighbourhood Zone<br>Residential Parks Zone<br>Rural Living Zone<br>Suburban Neighbourhood Zone<br>Suburban Neighbourhood (Medium Density) Zone<br>Suburban Neighbourhood (Low Density) Zone<br>Suburban Neighbourhood (Master-planned) Zone<br>Suburban Neighbourhood (Greenfield) Zone<br>Urban Renewal Zone  |  |
| Non-sensitive use  | Means use of land other than sensitive use  |  |
| Power system       | Has the same meaning as in the <i>Electricity Act 1996</i> .  |  |
| Primary street     | In relation to an existing or proposed building on a site is—<br>(a) in the case of a site that has a frontage to only 1 road – that road;<br>(b) in the case of a site that has a frontage to 2 roads—<br>(i) if the frontages are identical in length – the road that forms part of the street address of the building, as determined by the council for the relevant area when it is allocating numbers to building and allotments under section 220 of the <i>Local Government Act 1999</i> ; or<br>(ii) in any other case, the road in relation to which the site has a shorter frontage; or<br>(c) in any other case, the road that forms part of the street address of the building, as determined by the council for the relevant area when it is allocated numbers to buildings and allotments under section 220 of the <i>Local Government Act 1999</i> . |  <p>Single Street Frontage Only</p> <p>Existing Allotment</p> <p>PRIMARY STREET</p> <p>Example of (a)</p> <p>One Street Frontage &amp; Also the Property Address</p> <p>Existing Square Shaped Allotment</p> <p>PRIMARY STREET</p> <p>ANOTHER STREET FRONTAGE</p> <p>Example of (b)(i)</p> |

| Term<br>(Column A) | Definition<br>(Column B)   | Illustrations<br>(Column C)   |
|--------------------|--|---|
|                    |  | <p style="text-align: center;">One Street Frontage Only</p>  <p style="text-align: center;">Example of (b)(ii)</p>  <p style="text-align: center;">Example of (c)</p> |
| Private open space | <p>Means an outdoor area associated with a dwelling that:</p> <ul style="list-style-type: none"> <li>(a) is for the exclusive use of the occupants of that dwelling;</li> <li>(b) has a minimum dimension of 1.8 metres; and</li> <li>(c) is not fully enclosed.</li> </ul> <p>Private open space may include balconies, terraces, decks and areas between the dwelling and side boundaries but does not include areas used for bin storage, laundry drying,</p> |   |

| Term<br>(Column A)   | Definition<br>(Column B)  | Illustrations<br>(Column C) |
|----------------------|---|-----------------------------|
|                      | rainwater tanks, utilities, driveways and vehicle parking areas.  |                             |
| Proclaimed shipwreck | Means—<br>(a) a historic shipwreck or historic relic within the meaning of the <i>Historic Shipwrecks Act 1981</i> ; or<br>(b) a historic shipwreck or historic relic within the meaning of the <i>Historic Shipwrecks Act 1976</i> (Commonwealth).   |                             |
| Secondary street     | In relation to a building is any road, other than the primary street, that shares a boundary with the allotment on which the building is situated (or to be situated).  |                             |
| Sensitive receiver   | Means:<br>(a) any use for residential purposes or land zoned primarily for residential purposes;<br>(b) pre-school;<br>(c) educational establishment;<br>(d) hospital;<br>(e) supported accommodation;<br>(f) tourist accommodation.  |                             |
| Sensitive use        | Has the same meaning as in the <i>Environment Protection Act 1993</i> .   |                             |
| Site                 | Means the area of land (whether or not comprising a separate or entire allotment) on which a building is built, or proposed to be built, including the curtilage of the building, or in the case of a building comprising more than 1 separate occupancy, the area of land (whether or not comprising a separate or entire allotment) on which each occupancy is built, or proposed to be built, together with its curtilage. |                             |
| Soft-landscaping     | Means landscaped areas that are pervious and capable of supporting the growth of plant species. It does not include   |                             |

| Term<br>(Column A)            | Definition<br>(Column B)   | Illustrations<br>(Column C)   |
|-------------------------------|--|---|
|                               | any form of pervious paving or paved/hardstand areas used for pedestrian and/or vehicle movement.  |   |
| South                         | Means—true south.  |   |
| South facing                  | In relation to building orientation, a side wall is south facing if the wall is orientated anywhere between E20°N/W20°S and E30°S/W30°N.                 |  <p data-bbox="1473 770 1877 802">Example of south facing walls.</p> |
| Standard sea flood risk level | Means the 1% AEP sea flood level (tide, stormwater and associated wave effects combined), plus an allowance to accommodate 100 years of land subsidence. |   |
| Tangent point                 | Means the end point of a road's curve at the point of intersection.  |   |
| Terrace arrangement           | Means a group of 3 or more detached dwellings erected side by side and abutting each other but not joined by way of a party wall or party walls.         |   |

| Term<br>(Column A) | Definition<br>(Column B)   | Illustrations<br>(Column C) |
|--------------------|--|-----------------------------|
| Total floor area   | Means the sum of the superficies of horizontal sections of a building or other roofed area made at the level of each floor, inclusive of all roofed areas and of the external walls and of such portions of any party walls as belong to the building. |                             |
| Wall height        | Means the height of the wall measured from the top of its footings but excluding any part of the wall that is concealed behind an eave or similar roof structure and not visible external to the land.   |                             |
| Waste              | Means waste within the meaning of the <i>Environment Protection Act 1993</i> .   |                             |

## Part 9 – Referrals

### Notes- Additional Referrals

Additional referrals to those specified below are contained within Overlays within the Planning and Design Code

### Notes- Additional Referrals

Additional referrals to those specified below are contained within Overlays within the Planning and Design Code

### Part 9.1 Referral Body: Environment Protection Authority

In relation to Part 9(1):

**Community wastewater management system (CWMS)** means a system for the collection and management of wastewater generated in a town, regional or other community.

**Liquid waste** means waste classified as liquid waste in accordance with the assessment process set out in the guideline Liquid waste classification test, re-issued by the Environment Protection Authority in September 2003; as defined in Schedule 1 of the *Environment Protection Act 1993*.

**Listed waste** means a substance or thing listed in Part B of Schedule 1 of the *Environment Protection Act 1993*.

**Medical waste** has the same meaning as in the *Environment Protection (Waste to Resources) Policy 2010*.

**Prescribed approved activity** – means:

- (a) the on-site storage or disposal of domestic waste;
- (b) a regulated beverage container activity;
- (c) a regulated drop-off station for e-waste;
- (d) the temporary on-site storage of waste (other than tyre waste) while awaiting transport to another place;
- (e) incineration by way of thermal oxidation using fuel burning equipment for the disposal of solid trade waste with a processing capacity not exceeding 100 kilograms per hour;
- (f) the storage or disposal of tyre waste in a manner approved by the Environment Protection Authority;
- (g) the disposal of human wastewater or sewage to land in a manner approved by the Environment Protection Authority.

**Quarantine waste** means waste that is subject to quarantine under the *Quarantine Act 1908* of the Commonwealth.

**River Murray Protection Area** means a River Murray Protection Area under the *River Murray Act 2003*.

**Treatment** is taken to have the same meaning as defined in section 3(1) as in the *Environment Protection Act 1993*.

**Waste** has the same meaning as in the *Environment Protection Act 1993*.

**Wastewater** means waste principally consisting of water and includes—

- (a) human wastewater;
- (b) sewage;
- (c) water containing food or beverage waste;
- (d) wash down water or cooling water;
- (e) irrigation runoff or contaminated stormwater;
- (f) water containing any other trade waste or industrial waste;
- (g) any other water that has been used in any form of human activity;
- (h) a combination of any 1 or more of the above.

**Water protection area** has the same meaning as in the *Environment Protection Act 1993*.

| Referral Body: Environment Protection Authority |   |   |  |  |
|---|---|---|--|--|
| Referral Category                               | Development type  | Referral triggers   | Policies relevant to the referral                    | Purpose of referral  |
| Site contamination                              | Change in use of land to sensitive use or more sensitive use, except where—<br>(a) a <i>site contamination audit report</i> under Part 10A of the <i>Environment Protection Act 1993</i> has, within 5 years of the application, been | A change to a <i>more sensitive use</i> of land (including following its subdivision) at which <i>site contamination</i> exists or may exist as a result of a <i>class 1 potentially contaminating activity</i> listed in a Practice Direction (including <i>site contamination</i> caused by such an activity conducted on <i>adjacent land</i> , or on <i>other land</i> identified | Site Contamination<br>General Development Provisions | To ensure an appropriate and proportionate assessment of potential site contamination by providing direction to the relevant authority on the most |

|   |   |   |   |   |
|---|---|---|---|---|
|   | <p>prepared in relation to the land; and</p> <p>(b) the report clearly states that—</p> <p>(i) <i>site contamination</i> does not exist (or no longer exists) at the land; or</p> <p>(ii) the land is suitable for the proposed use or range of uses (without the need for any further remediation); or</p> <p>(iii) where remediation is or remains necessary for the proposed use (or range of uses), remediation work has been carried out or will be carried out (and the applicant has provided a written undertaking that the remediation works will be implemented as part of the application); and</p> <p>(c) no <i>class 1 or 2 potentially contaminating activities</i> (as identified in a Practice Direction) have taken place at the land since the preparation of the report.</p> | <p>on the SA Planning Portal that is known to impact the subject site).</p> <p>A change from:</p> <p>(a) a <i>non-sensitive use</i> to a <i>sensitive use</i>; or</p> <p>(b) <i>from a sensitive use to a more sensitive use</i></p> <p>on land at which <i>site contamination</i> exists or may exist as a result of a <i>class 2 potentially contaminating activity</i> listed in a Practice Direction (including <i>site contamination</i> caused by such an activity conducted on <i>adjacent land</i>, or on <i>other land</i> identified on the SA Planning Portal that is known to impact the subject site).</p> <p>A change in use of the land (including following its subdivision) that is the subject of a notation under section 103P of the <i>Environment Protection Act 1993</i> (i.e. a site contamination audit report has been prepared in respect of the land) to a <i>more sensitive use</i>.</p> |   | <p>appropriate person to determine site suitability (ie site contamination consultant or site contamination auditor).</p> |

|--|--------------------------------------|--|--|--|
|  |                                      | <p>elevated temperatures and with controlled amounts of oxygen, into a synthetic gas (syngas)</p>  |  |  |
|  | <p>Energy generation and storage</p> | <p>Development involving an <i>electricity generating plant</i> or <i>energy storage facility</i> (other than a <i>battery storage facility</i>) using any other energy source (excluding <i>fuel burning</i> and solar photovoltaic) with a capacity to generate or store 30 megawatts (MW) or more that is to be connected to the State's <i>power system</i>.</p> <p>In this referral trigger:</p> <p><b><i>battery storage facility</i></b> means a facility for the purpose of 1 or more batteries that are capable of being charged, storing energy and discharging in into the State's power system</p> <p><b><i>electricity generating plant</i></b> means electricity generating plant within the ambit of paragraph (a) of the definition of electricity infrastructure in section 4(1) of the <i>Electricity Act 1996</i></p> |  |  |

|                        |   |   |  |  |
|------------------------|---|---|--|--|
|                        |   | <b>power system</b> has the same meaning as in the <i>Electricity Act 1996</i>  |  |  |
| Petroleum and Chemical | Chemical storage and warehousing facilities | The storage or warehousing of chemicals or chemical products that are, or are to be, stored or kept in bulk or in containers having a capacity exceeding 200 litres at facilities with a total storage capacity exceeding 1,000 cubic metres.   |  |  |
|                        | Chemical works                              | The conduct of:<br>(a) works with a total processing capacity exceeding 10 tonnes per year, involving either or both of the following operations:<br>(i) manufacture (through chemical reaction) of any inorganic chemical, including sulphuric acid, inorganic fertilisers, soap, sodium silicate, lime or other calcium compound;<br>(ii) manufacture (through chemical reaction) or processing of any organic chemical or chemical product or petrochemical, including the separation of such materials into different |  |  |

|  |   |  |  |  |
|--|---|--|--|--|
|  |   | <p>products by distillation or other means; or</p> <p>(b) works with a total processing capacity exceeding 5,000 tonnes per year involving operations for salt production.</p>   |  |  |
|  | Coke works                              | The production, quenching, cutting, crushing and grading of coke.  |  |  |
|  | Hydrocarbon storage or production works | <p>The conduct of works or a facility:</p> <p>(a) for the storage of hydrocarbon or hydrocarbon products in tanks that, in aggregate, have a storage capacity exceeding 100m<sup>3</sup>; or</p> <p>(b) for the production of hydrocarbon or hydrocarbon products, being works having a total capacity exceeding 20 tonnes per hour.</p> |  |  |
|  | Petrol stations                         | <p>The conduct of a petrol station, being a facility for the storage and retail sale of petroleum products or other liquid organic chemical substances</p> <p>In this referral trigger:</p> <p><b>petroleum product</b> has the same meaning as in the <i>Petroleum Products Regulation Act 1995</i>.</p>                                |  |  |

|                                      |                             |   |  |  |
|--------------------------------------|-----------------------------|---|--|--|
|                                      | Timber preservation works   | The conduct of works for the preservation of timber by chemicals, but excluding the preservation by a primary producer of timber for use in the course of primary production carried on by the producer.  |  |  |
| Manufacturing and Mineral Processing | Abrasive blasting           | The cleaning of materials by the abrasive action of any metal shot or mineral particulate propelled in a gaseous or liquid medium (otherwise than solely by using blast cleaning cabinets less than 5m <sup>3</sup> in volume or totally enclosed automatic blast cleaning units).  |  |  |
|                                      | Hot mix asphalt preparation | The conduct of works at which crushed or ground rock aggregates are mixed with bituminous or asphaltic materials (by heating in a furnace, kiln or other fuel fired plant) for the purposes of producing road building mixtures.  |  |  |
|                                      | Cement works                | <p>The conduct of works for the use of <i>argillaceous</i> and <i>calcareous</i> materials in the production of cement clinker or the grinding of cement clinker.</p> <p>In this referral trigger:</p> <p><b><i>argillaceous</i></b> means having to do with or resembling clay</p> |  |  |

|  |  |   |  |  |
|--|--|---|--|--|
|  |  | <b><i>calcareous</i></b> means having to do with calcium carbonate  |  |  |
|  | Ceramic works                          | The conduct of works for the production of any products such as bricks, tiles, pipes, pottery goods, refractories, or glass that are manufactured or are capable of being manufactured in furnaces or kilns fired by any fuel, being works with a total capacity for the production of such products exceeding 100 tonnes per year. |  |  |
|  | Concrete batching works                | The conduct of works for the production of concrete or concrete products that are manufactured or are capable of being manufactured by the mixing of cement, sand, rock, aggregate or other similar materials, being works with a total capacity for production of such products exceeding 0.5m <sup>3</sup> per production cycle.  |  |  |
|  | Drum reconditioning or treatment works | The conduct of works for the cleaning, repairing, reconditioning or other treatment of metal or plastic drums or containers for the purposes of their reuse, including any associated storage facility.   |  |  |

|  |  |  |  |
|--|--|--|--|
| <p>Ferrous and non-ferrous metal melting</p> | <p>the melting of ferrous or non-ferrous metal in a furnace or furnaces that alone or in aggregate have the capacity to melt-</p> <p>(a) in excess of 50 but not in excess of 500 kilograms of metal during the normal cycle of operation but excluding facilities more than 500m from residential premises not associated with the works; or</p> <p>(b) in excess of 500 kilograms of metal during the normal cycle of operation.</p> |  |  |
| <p>Metallurgical works</p>                   | <p>The conduct of works at which ores are smelted or reduced to produce metal.</p>   |  |  |
| <p>Mineral works</p>                         | <p>The conduct of works for processing mineral ores, sands or earths to produce mineral concentrates.</p>  |  |  |
| <p>Pulp or paper works</p>                   | <p>The conduct of works at which paper pulp or paper is manufactured or is capable of being manufactured, being works with a total capacity for production of such products exceeding 10 tonnes per year</p>   |  |  |
| <p>Surface coating</p>                       | <p>The conduct of:</p> <p>(a) works for metal finishing, in which metal surfaces are prepared or finished by</p>   |  |  |

|  |                             |  |  |  |
|--|-----------------------------|--|--|--|
|  |                             | <p>means of electroplating, electrolyse plating, anodising (chromating, phosphating and colouring), chemical etching or milling, or printed circuit board manufacture, being works producing more than 5 kilolitres per day of effluent; or</p> <p>(b) works for hot dip galvanising; or</p> <p>(c) works for spray painting or powder coating with a capacity to use more than 100 litres per day of paint or 10kg per day of dry powder.</p> |  |  |
|  | Timber processing works     | The conduct of works (other than works at a builders supply yard or a home improvement centre) at which timber is sawn, cut, chipped, compressed, milled or machined, being works with a total processing capacity exceeding 4,000m <sup>3</sup> per year.   |  |  |
|  | Maritime construction works | The conduct of works for the construction or repair of ships, vessels or floating platforms or structures, being works with the capacity to construct or repair ships, vessels or floating platforms or structures of a mass exceeding 80 tonnes.  |  |  |
|  | Vehicle production          | The conduct of works for the production of motor vehicles,   |  |  |

|  |  |  |  |  |
|--|--|--|--|--|
|  |  | being works with a production capacity exceeding 2,000 motor vehicles per year.  |  |  |
|  | Fibre-reinforced plastic manufacturing                             | The conduct of facilities for the purposes of manufacturing fibre-reinforced plastic products, but excluding facilities more than 300m from residential premises not associated with the facility.   |  |  |
| Resource recovery, waste disposal and related activities | Waste recovery ( <i>excluding a prescribed approved activity</i> ) |  |  |  |
|  | Waste recovery facility  | The conduct of a <i>waste recovery facility</i> , being a depot, works or facility (including, but not limited to, a transfer station or material recovery facility) that, during a 12 month period, receives for <i>preliminary treatment</i> , or has the capacity for the <i>preliminary treatment</i> of:<br>(a) more than 100 tonnes of solid waste or matter; or<br>(b) more than 100 kilolitres of liquid waste or matter,<br>prior to its transfer elsewhere for lawful reuse, further treatment or disposal but excluding a prescribed approved activity or an activity in respect of which the Environment Protection Authority is satisfied, having regard to prescribed factors, that a referral is not necessary and has provided |  |  |

|--|--------------------------------------|--|--|--|
|  |                                      | <p>vehicle designed to operate both on and off a railway track when the vehicle is not operating on a railway track.</p> <p>Examples—A locomotive, carriage, rail car, rail motor, light rail vehicle, train, tram, light inspection vehicle, road/rail vehicle, trolley, wagon.</p>   |  |  |
|  | <p>Crushing, grinding or milling</p> | <p>Processing (by crushing, grinding, milling or separating into different sizes by sieving, air elutriation or in any other manner) of-</p> <p>(a) chemicals or rubber at a rate:</p> <ul style="list-style-type: none"> <li>(i) in excess of 1 but not in excess of 100 tonnes per year excluding facilities more than 500m from residential premises not associated with the facility; or</li> <li>(ii) in excess of 100 tonnes per year; or</li> </ul> <p>(b) agricultural crop products at a rate:</p> <ul style="list-style-type: none"> <li>(i) in excess of 50 but not in excess of 500 tonnes per year, but excluding facilities more than 300m from residential premises not associated with the facility; or</li> <li>(ii) in excess of 500 tonnes per year;</li> </ul> |  |  |

|  |                 |  |  |  |
|--|-----------------|--|--|--|
|  |                 | <p>but excluding non-commercial processing for on farm use; or</p> <p>(c) rock, ores or minerals at a rate:</p> <p>(i) in excess of 100 but not in excess of 1,000 tonnes per year, but excluding facilities more than 500m from residential premises not associated with the facility; or</p> <p>(ii) in excess of 1,000 tonnes per year;</p> <p>but excluding processing of wet sand.</p>  |  |  |
|  | <p>Dredging</p> | <p>The conduct of capital dredging being: the excavation of more than 10m<sup>3</sup> of material from the bed of any marine or inland waters by any digging, cutting, suction or any other means and any associated disposal of dredged material to land or waters, but excluding:</p> <p>(a) maintenance dredging;</p> <p>(b) works associated with the establishment of a visual aid; or</p> <p>(c) any lawful fishing or recreational activity.</p> <p>In this referral trigger:</p> |  |  |

|  |                           |  |  |  |
|--|---------------------------|--|--|--|
|  |                           | <p><b>marine waters</b> has the same meaning as in Section 3 of <i>Environment Protection Act 1993</i>.</p> <p><b>maintenance dredging</b> means the excavation of material from the bed of any marine or inland waters by any digging, cutting, suction or any other means for the purpose of maintaining a previously dredged (approved) depth, width and area in marine or inland waters.</p> |  |  |
|  | Coal handling and storage | The handling of coal or carbonaceous material by any means or the storage of coal, coke or carbonaceous reject material at facilities with a total handling capacity exceeding 100 tonnes per day or a storage capacity exceeding 5,000 tonnes.  |  |  |
|  | Extractive industries     | The conduct of operations involving extraction, or extraction and processing (by crushing, grinding, milling or separating into different sizes by sieving, air elutriation or any other manner), of sand, gravel, stone, shell, shale, clay or soil, being operations with an extraction production rate exceeding 100,000 tonnes per year.   |  |  |

|       |              |   |  |  |
|-------|--------------|---|--|--|
| Other | Aerodromes   | <p>The conduct of facilities for commercial or charter aircraft take-off and landing, being facilities estimated to be used for:</p> <ul style="list-style-type: none"> <li>(a) more than 200 flight movements per year but excluding facilities more than 3km from residential premises not associated with the facilities; or</li> <li>(b) more than 2 000 flight movements per year in any case.</li> </ul>  |  |  |
|       | Fuel burning | <p>The conduct of works or facilities involving the use of fuel burning equipment, including flaring (other than flaring at hydrocarbon storage or production works that do not have a total storage capacity or total production rate exceeding the levels respectively specified in 'Hydrocarbon storage or production works') or incineration, where the equipment alone or in aggregate is capable of burning combustible matter-</p> <ul style="list-style-type: none"> <li>(a) a rate of heat release exceeding 5MW; or</li> <li>(b) at a rate of heat release exceeding 500KW and the products of combustion are used: <ul style="list-style-type: none"> <li>(i) to stove enamel; or</li> <li>(ii) to bake or dry any substance that on heating releases dust or air impurities.</li> </ul> </li> </ul> |  |  |

|                                       |  |  |  |
|---------------------------------------|--|--|--|
| <p>Helicopter landing facilities</p>  | <p>The conduct of facilities designed for the arrival and departure of helicopters, but excluding:</p> <ul style="list-style-type: none"> <li>(a) facilities that are situated more than 3km from residential premises not associated with the facilities; or</li> <li>(b) facilities at the site of an activity authorised under the <i>Mining Act 1971</i>, the <i>Petroleum and Geothermal Energy Act 2000</i>, the <i>Petroleum (Submerged Lands) Act 1982</i> or the <i>Roxby Downs (Indenture Ratification) Act 1982</i>.</li> </ul> |  |  |
| <p>Marinas and boating facilities</p> | <p>The conduct of facilities comprising pontoons, jetties, piers or other structures (whether on water or land) designed or used to provide moorings or dry storage for:</p> <ul style="list-style-type: none"> <li>(a) 50 or more powered vessels at any 1 time; or</li> <li>(b) works for the repair or maintenance of vessels with the capacity to handle 5 or more vessels at any one time or vessels 12m or more in length.</li> </ul>  |  |  |
| <p>Motor racing or testing venues</p> | <p>The conduct of facilities designed and used for motor vehicle competitions or motor vehicle speed or performance trials, but</p>  |  |  |

|  |                            |  |  |  |
|--|----------------------------|--|--|--|
|  |                            | <p>excluding facilities that are situated more than 3km from residential premises not associated with the facilities.</p>  |  |  |
|  | <p>Shooting ranges</p>     | <p>The conduct of facilities for shooting competitions, practice or instruction (being shooting involving the propulsion of projectiles by means of explosion), but excluding facilities that are situated more than 3km from residential premises not associated with the facilities.</p>   |  |  |
|  | <p>Desalination plants</p> | <p>The conduct of a desalination plant that has a production capacity exceeding 200 kilolitres of desalinated water per day, and includes-</p> <ul style="list-style-type: none"> <li>(a) an underground desalination plant; and</li> <li>(b) a number of underground desalination plants within any 1 square kilometre area that, in aggregate, have a production capacity exceeding 200 kilolitres of desalinated water per day,</li> </ul> <p>but does not include-</p> <ul style="list-style-type: none"> <li>(c) a plant that disposes of all of its wastewater to a wastewater management system that is the subject of a licence; or</li> </ul> |  |  |

|  |  |   |  |  |
|--|--|---|--|--|
|  |  | <p>(d) a plant that produces 2 megalitres or less of wastewater per year;</p> <p>In this referral trigger:</p> <p><b>underground desalination plant</b> means a plant having a system comprised of a borehole, submersible pump and associated equipment for the desalination below the ground of underground water;</p> <p><b>underground water</b> means water occurring naturally under the ground or introduced to an aquifer or other area under the ground.</p>   |  |  |
|  | <p>Discharges to marine or inland waters</p> | <p>The conduct of operations, other than a desalination plant referred to in this table), involving discharges into marine waters or inland waters where-</p> <p>(a) the discharges:</p> <ul style="list-style-type: none"> <li>(i) raise the temperature of the receiving waters by more than 2 degrees Celsius at any time at a distance of 10m or more from the point of discharge; or</li> <li>(ii) contain antibiotic or chemical water treatments; and</li> </ul> |  |  |

|  |  |  |  |   |
|--|--|--|--|---|
|  |  | (b) the total volume of the discharges exceeds 50kl per day.   |  |   |
|  | Saline water discharge                               | An activity involving the discharge to land, surface water or underground water of more than 0.5MI of water per day containing more than 1 500mg of total dissolved solids per litre.  |  |   |
|  | Cremation or incineration of human or animal remains | <p>The conduct of a facility for the cremation or incineration of human or animal remains by means of thermal oxidation using fuel burning equipment.</p> <p>In this referral trigger:</p> <p><b>human or animal remains</b> does not include-</p> <p>(a) medical waste; or<br/> (b) cytotoxic wastes; or<br/> (c) quarantine waste</p> <p><b>Cytotoxic wastes</b> means waste that is toxic to living things.</p> |  |   |
|  | Land Division  | Land division creating 1 or more additional allotments for residential purposes within 500 metres of land used as a landfill waste depot.  |  | To provide expert technical assessment and advice to the relevant authority on the appropriateness of further residential opportunities being |

|  |  |  |  |  |
|--|--|--|--|--|
|  |  |  |  | established within close proximity to landfill waste depots, due to potential health and safety impacts. |
|--|--|--|--|--|

Part 9.2 Referral Body: The Minister responsible for the administration of the Natural Resources Management Act 2004

**Referral Body: The Minister responsible for the administration of the Natural Resources Management Act 2004**

| Referral Category   | Development Type  | Purpose of referral  |
|---------------------|---|--|
| Dams                | <p>Except where located within the River Murray Protection Area Overlay, development comprising the erection, construction, modification, enlargement or removal of a dam, wall or other structure that will collect or divert, or collects or diverts water:</p> <p>(a) flowing in a watercourse that is not in the Mount Lofty Ranges Catchment (Area 1) Overlay or Mount Lofty Ranges Catchment (Area 2), and</p> <p>(b) that is not prescribed or flowing over any other land that is not in a Prescribed Surface Water Area Overlay or in the Mount Lofty Ranges Water Protection Area Overlay,</p> <p>and where it is contrary to a Natural Resources Management Plan applying in the region of the development site.</p> | To provide expert assessment and direction to the relevant authority on potential impacts from development on the health, sustainability and/or natural flow paths of water resources. |
| Commercial Forestry | Development that involves a change in use of land for the purposes of undertaking commercial forestry for which a permit would be required  | To provide expert assessment and direction to the relevant authority on potential  |

## Referral Body: The Minister responsible for the administration of the Natural Resources Management Act 2004

| Referral Category | Development Type   | Purpose of referral                               |
|-------------------|--|---|
|                   | under section 127(3) of the <i>Natural Resources Management Act 2004</i> | impacts from such development on water resources. |

### Part 9.3 Referral Body: Technical Regulator

## Referral Body: Technical Regulator

| Referral Category        | Development Type   | Purpose of referral   |
|--------------------------|--|---|
| Building Near Powerlines | Development that involves the construction of a building where a declaration has not been given under Schedule 8 -11 of the <i>Planning, Development and Infrastructure Regulations 2019</i> , other than where the development is a building that is intended only to house, or that constitutes, electricity infrastructure (within the meaning of the <i>Electricity Act 1996</i> ) or is limited to:<br>(a) an internal alteration of a building; or<br>(b) an alteration to the walls of a building but not so as to alter the shape of the building. | To provide expert technical assessment and direction to the relevant authority on: <ul style="list-style-type: none"> <li>• potential impacts of development on electricity infrastructure; and</li> <li>• potential safety issues relating to development in close proximity to electricity infrastructure.</li> </ul> |

Part 9.4 Referral Body: Minister for the time being administering the Aquaculture Act 2001

| <b>Referral Body: Minister for the time being administering the <i>Aquaculture Act 2001</i></b> |  |   |
|---|--|---|
| <b>Referral Category</b>  | <b>Development Type</b>  | <b>Purpose of referral</b>  |
| Aquaculture Development   | Aquaculture development, other than development which involves an alteration to an existing or approved development which in the opinion of the relevant authority is minor in nature. | To provide expert technical assessment and direction to the relevant authority on matters which may impact upon the associated license required for aquaculture development under the <i>Aquaculture Act 2001</i> . |

## Part 10 – Table of Amendments

### Table of amendments
