

SAMIS Build 13.25

Overview

The SAMIS Build Initiatives & Enhancements Communication Bulletin contains information about business and system changes that have occurred and been deployed into SAMIS production.

Deployment Date

12th November 2018

Enhancement Details

- **SE-329 Fast Data Entry Screen Redevelopment**
With the inclusion of the new Equipment Register and Equipment Condition attributes, the Fast Data Entry screen was redeveloped for HVAC (SE-340), Hot Water Service (SE-339), Building Components (SE-338) and Services (SE-337) options.
 - **SE-347 Projected Replacement Cost Override Flag**
An “override” flag has been introduced to the Fast Data Entry screens for asset classes that have a default replacement cost based on unit rates (i.e. \$ per m2), allowing users to enter values other than the SAMIS-calculated rate.
 - **SE-320 Phone Number on SAMIS-Generated Asbestos Reports**
The number for the DPTI Asbestos Unit has changed. This has now been reflected in the asbestos reports generated by SAMIS.
 - **SE-268 Spelling Mistake in GCRC Screen**
A minor spelling mistake in the Gross Current Replacement Cost screen has been fixed.
-

Enhancement Details – System Administrators Only

- **SE-344 Ability to Flag Attributes for Inclusion in Fast Data Entry**
A flag has been added to the SAMIS code administration page to allow the AGFMA Service Desk to include attributes as required on the Fast Data Entry screens.

- **SE-335 Do Not Force to Update button for User Administration**
Due to a number of issues where the AGFMA Service Desk has been unable to reset a user's password, a button has been introduced allowing the AGFMA Service Desk to enter a new password and not require the user to update their password.
