## LANDSLIDE® TIPPER LINER

For Hamelex White® Standard Width Tipper

Now available as a retrofit kit for all Hamelex White standard width tippers, Landslide® reduces the tip angle by up to 30% when unloading an end tipper, compared to a tipper with no liner installed, reducing the trailer's centre of gravity and providing a safer more stable tipping platform. As a result, the height of the tipped trailer is also lower, reducing the chance of it making contact with overhead obstacles.

Improving the trailer aesthetics, Landslide® is affixed using a unique method which eliminates the need for unsightly rivets. This process also reduces the number of catch points inside the tub, resulting in better product discharge. In-built UV protection ensures Landslide® has an optimum life in the harsh Australian sun, while the trailer is reinforced by the inherent impact and abrasion resistance provided by the tipper liner, for a longer trailer life.
